CITY COUNCIL MEMO
2024-749

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Susan Norton, Chief of Staff
Chris Brown, Public Works Director

FROM: Justin Clay, Parking Manager

SUBJECT: **A resolution to recognize additional revenue and associated expenses for certain parking facilities and services and approve a budget adjustment**

RECOMMENDATION:
Staff is requesting approval of a budget adjustment in the amount of $68,200 to recognize additional revenue and associated expenses for certain parking facilities and services.

BACKGROUND:
The City manages certain parking facilities that are owned or leased to third parties, collects revenues for those facilities, and transfers the net revenues to the owners/lessees of those parking facilities.

DISCUSSION:
Through October 2024, the following parking facilities are on pace to exceed projected revenues, necessitating a budget adjustment to recognize the expected additional revenue and the off-setting expenses for the transfer of revenue for the remainder of the year. In addition, the utilization of the ParkMobile app has increased considerably in 2024 with more users adopting this convenient method of payment.

- Town Center Parking Deck: $12,000
- Gregg Avenue Lot: $31,000
- Meadow St. Municipal Deck: $3,000
- ParkMobile: $22,200

BUDGET/STAFF IMPACT:
Staff is requesting to recognize revenue in the amount of $68,200 for these parking facilities and services. The increase in revenue will offset the associated expenses related to the transfer of these net revenues back to each entity.

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-750

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Susan Norton, Chief of Staff
Chris Brown, Public Works Director

FROM: Matt Mihalevich, Active Transportation Manager

SUBJECT: **Carbon Reduction Program Federal-Aid Funding for Rupple Road Trail Lighting**

RECOMMENDATION:
Staff recommends approval of an Agreement of Understanding with the Arkansas Department of Transportation for the Rupple Road Trail lighting project made possible through the Northwest Arkansas Regional Planning Commission – Carbon Reduction Program (CRP), approval of a budget adjustment to recognize $315,193.00 in federal-aid funding and authorizing the Mayor to sign additional grant related documents as necessary to implement the project.

BACKGROUND:
In June of 2024, the City of Fayetteville was awarded $315,193.00 in federal-aid funds through the Northwest Arkansas Regional Planning Commission Carbon Reduction Program for installation of lighting along the Rupple Road Trail from MLK Jr. Blvd to Persimmon Street.

DISCUSSION:
The Rupple Road Trail Lighting project will include lighting along 1.8 miles of Rupple Road from MLK Jr. Blvd to Persimmon Street. The project will focus on the lighting of the trail but will also include lighting of the three roundabouts.

This project has been highly requested by area residents. It will further expand Fayetteville's active transportation and carbon reduction goals by increasing safety and extending hours of use. By providing the lighting infrastructure, more people can choose to reach their destinations using active transportation instead of a vehicle.

BUDGET/STAFF IMPACT:
The City of Fayetteville has been awarded $315,193 in federal-aid funding by the Northwest Arkansas Regional Planning Commission through the Carbon Reduction Program. The required 20 percent match or $78,798 has been budgeted through the Trails Capital Improvements Program.

Carbon Reduction Program Federal-Aid Funding for Rupple Road Trail Lighting

A RESOLUTION TO AUTHORIZE AN AGREEMENT OF UNDERSTANDING WITH THE ARKANSAS DEPARTMENT OF TRANSPORTATION FOR THE RUPPLE ROAD TRAIL LIGHTING PROJECT, AND TO APPROVE A BUDGET ADJUSTMENT RECOGNIZING $315,193.00 IN FEDERAL-AID FUNDING

WHEREAS, in June 2024, the City of Fayetteville was awarded $315,193.00 in federal-aid funds through the Northwest Arkansas Regional Planning Commission Carbon Reduction Program for installations of lighting along the Rupple Road Trail from MLK Jr. Boulevard to Persimmon Street; and

WHEREAS, the Rupple Road Trail Lighting project will include lighting along 1.8 miles of Rupple Road from MLK Jr. Boulevard to Persimmon Street; and

WHEREAS, the project has been highly requested by area residents and will further expand Fayetteville's active transportation and carbon reduction goals by increasing safety and extending hours of use; and

WHEREAS, by providing the lighting infrastructure, more people can choose to reach their destinations using active transportation instead of a vehicle.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign an agreement of understanding with the Department of Transportation for the Rupple Road Trail Lighting Project and further authorizes the Mayor to sign additional grant documents as necessary to implement the project.

Section 2: That the City Council of the City of Fayetteville, Arkansas hereby approves a budget adjustment recognizing $315,193.00 in federal-aid funding, a copy of which is attached to this Resolution.

The Honorable Lioneld Jordan
Mayor of Fayetteville
113 W. Mountain
Fayetteville, AR 72701

Re: Rupple Road Trail Lighting

Dear Mayor Jordan:

Reference is made to the Rupple Road Trail Lighting project in Fayetteville which was awarded 2025 Carbon Reduction Program – Attributable funding by the Northwest Arkansas Regional Planning Commission.

In order to proceed, you and your Attorney must sign the enclosed Agreement of Understanding. Upon receipt of the Agreement, State and Federal-aid job numbers will be assigned and a copy of the executed Agreement of Understanding will be returned to you. When submitting the Agreement to the Department for execution, you will also need to complete Form LPA-005, Form LPA-018, and Form LPA-019. All referenced Forms are available in digital format at www.ardot.gov/LPA.

If you have any questions, please contact our Grant Procurement Section at (479) 360-7161 or LPA@ardot.gov.

Sincerely,

AGREEMENT OF UNDERSTANDING

BETWEEN

THE CITY OF FAYETTEVILLE

AND

THE NORTHWEST ARKANSAS REGIONAL PLANNING COMMISSION

AND

THE ARKANSAS DEPARTMENT OF TRANSPORTATION

In Cooperation with the
U.S. Department of Transportation, Federal Highway Administration

RELATIVE TO

Implementation of **Job 040967, Rupple Rd. Trail Lighting (Fayetteville) (S) (**hereinafter called the "Project") as a Federal-aid Carbon Reduction Program – Attributable (CRP>200K) project.

WHEREAS, funding in Infrastructure Investment and Jobs Act (IIJA) includes the following Federal-aid funds for certain local projects:

	Maximum Federal %	Minimum Sponsor %
Preliminary Engineering by Consultant	80	20
Right of Way/Utilities	80	20
Construction	80	20
Construction Engineering by Consultant	80	20
Department Administrative Costs	80	20

WHEREAS, the City of Fayetteville (hereinafter called the "Sponsor") has expressed its desire to use Federal-aid funds for the eligible Project and to provide necessary matching cash share for such funds; and

WHEREAS, the Sponsor has transmitted to the Arkansas Department of Transportation (hereinafter called the "Department") Resolution No. 67-24 from the Sponsor's governing body authorizing the Sponsor's Chief Executive Officer (CEO) to execute agreements and contracts with the Department for the Project; and

WHEREAS, the Northwest Arkansas Regional Planning Commission (hereinafter called the "Commission") awarded the Sponsor Federal-aid CRP>200K funds; and

WHEREAS, funding participation will be subject to a limit of **$315,193** maximum Federal-aid CRP>200K funds for the **construction phase** of the Project and obligation limitation approved; and

WHEREAS, the Sponsor knows of no legal impediments to the completion of the Project; and

WHEREAS, it is understood that the Sponsor and the Department will adhere to the General Requirements for Recipients and Sub-Recipients Concerning Disadvantaged Business Enterprises (DBEs) (Form LPA-001) and that, as part of these requirements, the Department may set goals for DBE participation in the Project, ranging from 0% to 100%, that are practical and related to the potential availability of DBEs in desired areas of expertise; and

WHEREAS, the Department has published the Arkansas Local Public Agency Project Manual (available at ARDOT.gov) which outlines procedures and requirements which must be followed during development and construction of the Project; and

WHEREAS, the parties agree, unless specifically stated otherwise, that the provisions of this agreement are not intended to create or confer a third party benefit or right in any person or entity, not a party to this agreement.

IT IS HEREBY AGREED that the Sponsor, Commission, and the Department, in cooperation with the Federal Highway Administration (FHWA), will participate in a cooperative program for implementation and will accept the responsibilities and assigned duties as described hereinafter.

THE SPONSOR WILL:

1. Notify the Department in writing who the Sponsor designates as its full-time employee to be in responsible charge of the day to day oversight of the Project (Form LPA-005). If the designated full-time employee changes, the Sponsor must notify the Department by resubmitting Form LPA-005. The duties and functions of this person are:
    - Oversee project activities, including those dealing with cost, time, adherence to contract requirements, construction quality and scope of Federal-aid projects;
    - Maintain familiarity of day to day project operations, including project safety issues;
    - Make or participate in decisions about changed conditions or scope changes that require change orders and/or supplemental agreements;
    - During construction, visit and review the project on a daily basis;
    - Review financial processes, transactions, and documentation to ensure that safeguards are in place to minimize fraud, waste, and abuse;
    - Direct project staff, Sponsor or consultant, to carry out project administration and contract oversight, including proper documentation;
    - Be aware of the qualifications, assignments and on-the-job performance of the Sponsor and consultant staff at all stages of the project.
2. Initially submit to the Department $1,000 (20%) to be matched by $4,000 (80%) Federal-aid funds for Department administrative costs associated with state preliminary engineering, which include but are not limited to, on site meetings, environmental review, and plan and specification review. The Sponsor's final cost for this phase will be determined by actual Department charges to preliminary engineering.

3. Be responsible for hiring a consultant engineering firm(s) in accordance with the Local Agency Consultant Selection Procedures (Form LPA-002) to provide engineering services which include environmental documentation, preliminary engineering, and construction engineering for the Project. **NOTE: FHWA authorization and Department approval must be given prior to issuing a work order to the consultant for federal funds to be allowed in this phase.**

4. Prepare plans, specifications, and a cost estimate for construction. A registered professional engineer must sign the plans and specifications for the Project. (See Form LPA-003 for items to be included in the bid proposal.)

5. Make periodic payments to the consultant for preliminary engineering for the Project and request reimbursement from the Department. Reimbursement requests should be submitted, at minimum, every three (3) months and not more than once per month.

6. Request reimbursement from the Department for eligible expenditures related to preconstruction phases of the Project.

7. Understand that **expenditures for preliminary or construction engineering performed by the Sponsor's forces are not eligible for reimbursement with federal funds**.

8. Prepare the necessary environmental documentation as required by FHWA and conduct any required public involvement meetings and public hearings.

9. Ensure that the plans and specifications are developed using the Department's standard drawings and Standard Specifications for Highway Construction (latest edition).

10. Ensure that the plans and specifications comply with the Americans with Disabilities Act (ADA), the American Association of State Highway and Transportation Officials (AASHTO) design standards, and all other applicable state and federal regulations, including airport clearance, when necessary, for the type of work involved.

11. Before acquiring property or relocating utilities, contact the Department's Right of Way Division to obtain the procedures for acquiring right of way and adjusting utilities in compliance with federal regulations. **NOTE: Failure to notify the Department prior to initiating these phases of work may result in all project expenditures being declared non-participating in federal funds.**

12. Acquire property in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (commonly referred to as the "Uniform Act").

13. Ensure the preparation of utility adjustment and right of way plans are in accordance with Arkansas State Highway Commission Policy.

14. Be responsible for all non-reimbursable costs associated with the Sponsor owned utilities as defined in the Department's Utility Accommodation Policy.

15. Be responsible for the matching share for all reimbursable costs associated with the Sponsor owned utilities as defined in the Department's Utility Accommodation Policy.

16. Provide a copy of the registered deed or other approved documentation and an appropriate certification stating the Sponsor's clear and unencumbered title to any right of way to be used for the Project (Form LPA-007). If property has been acquired for the Project, use Form LPA-006 for certification of the right of way. **NOTE: Any property that is to become Department right of way must be acquired in the Department's name.**

17. Submit plans at 30%, 60%, and 90% completion stages for Department review.

18. Submit a certification letter (Form LPA-008), including all items noted, to the Department when requesting authority to advertise the Project for construction bids.

19. Advertise for bids in accordance with federal procedures as shown in Form LPA-010. **NOTE: FHWA authorization and Department approval must be given prior to advertising for construction bids.**

20. Forward a copy of all addenda issued for the Project during the advertisement to the Department.

21. After bids are opened and reviewed, submit a Certification Letter Requesting Concurrence in Award (Form LPA-013), including all items noted, to the Department.

22. Prior to awarding the construction contract, submit a check for $1,000 (20%) to be matched by $4,000 (80%) Federal-aid funds for Department administrative costs on the Project during construction. The Sponsor's final share of cost for this phase will be determined by actual Department charges to construction engineering.

23. Prior to issuing the notice to proceed to the Contractor, the Sponsor must hold a pre-construction meeting with the Contractor and **must invite the Department's Resident Engineer assigned to the Project.**

24. Ensure that all work, material testing and acceptance, and inspection are conducted in accordance with the Department's Standard Specifications for Highway Construction (latest edition), Manual of Field Sampling and Testing Procedures, and Resident Engineer's Manual and with the plans, specifications, and all other applicable FHWA and Department procedures for the Project.

25. Make periodic payments to the consultant for construction engineering for the Project and request reimbursement from the Department. Reimbursement requests should be submitted, at minimum, every three (3) months and not more than once per month.

26. Make payments to the contractor for work accomplished in accordance with the plans and specifications and then request reimbursement from the Department on the Construction Certification and Reimbursement Request (CCRR) form (Form LPA-014). Reimbursement requests should be submitted, at minimum, every three (3) months and not more than once per month.

27. Attach LPA Report of Daily Work Performed (Form LPA-015) for all days that correspond with each CCRR submittal.

28. Prior to executing the work, submit change orders (Form LPA-022) to the contract to the Department's Resident Engineer assigned to the Project for review and approval for program eligibility.

29. Upon completion of the Project, hold a final acceptance meeting for the Project and submit the LPA Final Acceptance Report form certifying that the Project was accomplished in accordance with the plans and specifications (Form LPA-016). This form must be signed by the engineer performing construction inspection on the Project, the Department's Resident Engineer assigned to the Project, the Sponsor's full-time employee in responsible charge, and the Sponsor's CEO.

30. Maintain accounting records to adequately support reimbursement with Federal-aid funds and be responsible for the inspection, measurement and documentation of pay items, and certification of all work in accordance with the plans and specifications for the Project and for monitoring the Contractor and subcontractor(s) for compliance with the provisions of FHWA-1273, Required Contract Provisions, Federal-aid Construction Contracts, and Supplements.

31. Pay all unpaid claims for all materials, labor, and supplies entered into contingent or incidental to the construction of said work or used in the course of said work including but not limited to materials, labor, and supplies described in and provided for in Act Nos. 65 and 368 of 1929, Act No. 82 of 1935, and Acts amendatory thereof.

32. Agree that any and all claims for damages to property or injury to persons caused by any act or omission, negligence, or misconduct from the performance of work by the Sponsor's contractor on the Project shall be the sole responsibility of the Sponsor's contractor and in this regard the Sponsor shall require the contractor on the Project to procure and maintain a General Public Liability Insurance Policy during the duration of the Project which shall be endorsed to include broad form general liability and complete operations coverage on the Project. The contractor shall furnish the Sponsor with documentation of proof of liability insurance coverage with submission of the signed contract.

33. Agree that any claims, liability, costs, expenses, demands, settlements, or judgments arising from misconduct or the negligent acts or omissions of the Sponsor, its employees, agents or contractors in the performance of the Project and this Agreement must be presented to the Sponsor. Further, the Sponsor by acceptance of this grant, agrees that the Department and the Arkansas State Highway Commission, as the pass-through entity, have no duty or responsibility for the design, construction, maintenance or operation of the Project that is the subject of this grant, and, therefore shall have no liability related to the design, construction, maintenance or operation of the Project. The Sponsor also agrees to assume all risks associated with the work to be performed by its agents, employees, and contractors under this grant and Agreement and the Department and the Arkansas State Highway Commission, as the pass-through entity, shall not be responsible or liable for any damages whatsoever from the actions of the Sponsor, its employees, agents and contractors.

34. Assure that its policies and practices with regard to its employees, any part of whose compensation is reimbursed from federal funds, will be without regard to race, color, religion, sex, national origin, age, or disability in compliance with the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, The Americans with Disabilities Act of 1990, as amended, and Title 49 of the Code of Federal Regulations Part 21 (49 CFR 21), Nondiscrimination in Federally-Assisted Programs of the Department of Transportation.

35. Assure that its policies and practices with regard to its employees, any part of whose compensation is reimbursed from federal funds, will be without regard to race, color, religion, sex, national origin, age, or disability in compliance with the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, The Americans with Disabilities Act of 1990, as amended, and Title 49 of the Code of Federal Regulations Part 21 (49 CFR Part 21), Nondiscrimination in Federally-Assisted Programs of the Department of Transportation, (Form LPA-029).

36. Retain all records relating to inspection and certification, the Contractor's billing statements, and any other files necessary to document the performance and completion of the work in accordance with requirements of 2 CFR Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Form LPA-017).

37. Grant the right of access to the Sponsor's records pertinent to the Project and the right to audit by the Department and FHWA officials.

38. Be responsible for 100% of all project costs incurred:

    - should the Project not be completed as specified;
    - should the Project be declared non-participating in federal funds, including any such award by the State Claims Commission; or
    - not provided by the FHWA.

39. Sign and transmit to the Department the Certification for Grants, Loans, and Cooperative Agreements (Form LPA-018), which is necessary for Project participation.

40. Repay to the Department the federal share of the cost of any portion of the Project if, for any reason, federal participation is removed due to actions or inactions of the Sponsor, its agents, its employees, or its assigns or the Sponsor's consultants or contractors or their agents. Such actions or inactions shall include, but are not limited to, federal non-participation arising from problems with design plans, specifications, construction, change orders, construction inspection, or contractor payment procedures.

41. Retain total, direct control over the Project throughout the life of all project improvements outside of the Department's right of way and **not**, **without prior approval from the Department**:

    - sell, transfer, or otherwise abandon any portion of the Project;
    - change the intended use of the Project;
    - make significant alterations to any improvements constructed with Federal-aid funds; or
    - cease maintenance or operation of a project due to the Project's obsolescence.

42. Be responsible for satisfactory maintenance and operation of all improvements and for adopting regulations and ordinances as necessary to ensure this. Failure to adequately maintain and operate the Project in accordance with Federal-aid requirements may result in the Sponsor's repayment of federal funds and may result in withholding all future Federal-aid.

43. Submit to the Department a Single Audit in accordance with the Office of Management and Budget (OMB) Circular A-133 each fiscal year that the Sponsor expends more than $750,000 of Federal-aid from any federal source including, but not limited to, the U.S. Department of Transportation. The fiscal year used for the reporting is based on the Sponsor's fiscal year. The $750,000 threshold is subject to change after OMB periodic reviews.

44. Promptly notify the Department if the Project improvements outside of the Department's right of way are rendered unfit for continued use by natural disaster or other cause.

45. Complete and transmit to the Department both pages of the Federal Funding Accountability and Transparency Act (FFATA) Reporting Requirements (Form LPA-019).

46. After each quarter of the calendar year, complete and transmit to the Department the LPA Project Quarterly Report Form (Form LPA-020) until the Project is complete.

THE COMMISSION WILL:

1. Provide up to $315,193 in Federal-aid CRP>200K funds for the design and environmental phases of the Project as funds become available.

THE DEPARTMENT WILL:

1. Maintain an administrative file for the Project and be responsible for administering Federal-aid funds.

2. Review plans and specifications submitted by the Sponsor.

3. Reimburse the Sponsor 80% (Federal-aid share) for all eligible costs related to preconstruction phases of the Project.

4. Notify the Sponsor when right of way and/or utility plans are approved, and the Sponsor may proceed with right of way acquisition and/or utility adjustments.

5. Upon receipt of the Sponsor's certification of right of way (property) ownership, provide the appropriate documentation to the file.

6. Ensure substantial compliance with federal contracting requirements through review of the bidding proposal for inclusion of required federal forms, review of the administration of the DBE program provisions, and general compliance with 23 CFR 635.

7. Advise the Sponsor when to proceed with advertisement of the Project for construction bids.

8. Review bid tabulations and concur in award of the construction contract for the Project.

9. Ensure that the Sponsor and the Sponsor's consultant provide adequate supervision and inspection of the Project by performing periodic inspections with the Sponsor's representatives and their consultant to verify that the work being performed by the Sponsor's contractor, and documented and certified by the Sponsor, meets the requirements of the Project plans, specifications, and all applicable FHWA and Department procedures. The Department intends to perform these inspections, at a minimum, when the construction work is approximately 10% and 50% completed. The Department will also participate in the final inspection of the Project.

10. Review and approve any necessary change orders for project/program eligibility.

11. Reimburse the Sponsor 80% (Federal-aid share) for eligible construction costs approved in the CCRR form (Form LPA-014). This reimbursement will be limited to the maximum Federal-aid amount and to the federal amount available at the time payment is requested. If the payment requested exceeds the Federal-aid available at the time, the difference will be reimbursed as additional Federal-aid for the Project becomes available.

12. Subject to the availability of Federal-aid allocated for the Project, pay the Sponsor the remaining amount due upon completion of the Project and submittal of the certified LPA Final Acceptance Report form (Form LPA-016).

13. Provide all form updates via email to the contact as shown on Form LPA-005.

14. Be reimbursed for costs involved in performing all the services listed above.

IT IS FURTHER AGREED that the Department reserves the right to cancel the Project without liability against the Department for any reason including, but not limited to, unreasonable delay or lack of progress, the Sponsor is unable to provide an audit-worthy reason for the substantial delay in the project development or completion process, or the Sponsor is unresponsive to the Department's requests.

IT IS FURTHER AGREED that should the Sponsor fail to fulfill its responsibilities and assigned duties as related in this Agreement, such failure may disqualify the Sponsor from receiving future Federal-aid highway funds.

IT IS FURTHER AGREED that should the Sponsor fail to pay to the Department any required funds due for project implementation or fail to complete the Project as specified in this Agreement, or fail to adequately maintain or operate the Project, the Department may cause such funds as may be required to be withheld from the Sponsor's Motor Fuel Tax allotment.

IN WITNESS WHEREOF, the parties thereto have executed this Agreement this _____ day of _____, 20____.

Agreement of Understanding between:

The City of Fayetteville, the Northwest Arkansas Regional Planning Commission, and the Arkansas Department of Transportation relative to:

Implementation of the Rupple Road Trail Lighting Project.

ARKANSAS DEPARTMENT OF TRANSPORTATION
NOTICE OF NONDISCRIMINATION

The Arkansas Department of Transportation (ARDOT) complies with all civil rights provisions of federal statutes and related authorities that prohibit discrimination in programs and activities receiving federal financial assistance. Therefore, ARDOT does not discriminate on the basis of race, sex, color, age, national origin, religion (not applicable as a protected group under the Federal Motor Carrier Safety Administration Title VI Program), disability, Limited English Proficiency (LEP), or low-income status in the admission, access to and treatment in ARDOT's programs and activities, as well as ARDOT's hiring or employment practices. Complaints of alleged discrimination and inquiries regarding ARDOT's nondiscrimination policies may be directed to Civil Rights Officer Joanna P. McFadden (ADA/504/Title VI Coordinator), P. O. Box 2261, Little Rock, AR 72203, (501) 569-2298, (Voice/TTY 711), or the following email address: joanna.mcfadden@ardot.gov.

Free language assistance for Limited English Proficient individuals is available upon request.

This notice is available from the ADA/504/Title VI Coordinator in large print, on audiotape and in Braille.

Form LPA-001

GENERAL REQUIREMENTS
FOR
RECIPIENTS AND SUB-RECIPIENTS
CONCERNING DISADVANTAGED BUSINESS ENTERPRISES

It is the policy of the U. S. Department of Transportation that disadvantaged business enterprises (DBEs) as defined in 49 CFR Part 26 shall have the maximum opportunity to participate in the performance of contracts financed in whole or in part with Federal funds under this Agreement. Consequently, the DBE requirements of 49 CFR Part 26 apply to this Agreement.

The recipient or its contractor agrees to ensure that DBEs as defined in 49 CFR Part 26 have the maximum opportunity to participate in the performance of contracts and subcontracts financed in whole or in part with Federal funds provided under this Agreement. In this regard all recipients or contractors shall take all necessary and reasonable steps in accordance with 49 CFR Part 26 to ensure that DBEs have the maximum opportunity to compete for and perform contracts. Recipients and their contractors shall not discriminate on the basis of race, color, national origin, or sex in the award and performance of DOT-assisted contracts.

If as a condition of assistance the recipient has submitted and the Department has approved a disadvantaged business enterprise affirmative action program, which the recipient agrees to carry out, this program is incorporated into this financial assistance agreement by reference. This program shall be treated as a legal obligation and failure to carry out its terms shall be treated as a violation of this financial assistance agreement. Upon notification to the recipient of its failure to carry out the approved program, the Department shall impose such sanctions as noted in 49 CFR Part 26, Subpart F, which sanctions may include termination of the Agreement or other measures that may affect the ability of the recipient to obtain future DOT financial assistance.

The recipient shall advise each sub-recipient, contractor or subcontractor that failure to carry out the requirements set forth in 49 CFR Part 26, Subsections 26.101 and 26.107 shall substitute a breach of contract and after the notification of the Department, may result in termination of the agreement or contract by the recipient or such remedy as the recipient deems appropriate.

(NOTE: Where appropriate, the term "recipient" may be modified to mean "sub-recipient", and the term "contractor" modified to include "subcontractor".)

LOCAL AGENCY

CONSULTANT SELECTION PROCEDURES

Section I – Application *(These procedures do not apply to Design-Build Contracts.)*

These procedures apply to federally and state funded contracts for engineering and design related services for projects and are issued to ensure that a qualified consultant is obtained through an equitable qualifications-based selection procurement process and that the prescribed work is properly accomplished in a timely manner at a fair and reasonable cost.

Engineering and design related services are defined in 23 Code of Federal Regulations (CFR) Part 172 to include program management, construction management, preliminary engineering, design engineering, surveying mapping, or architectural related services with respect to a highway construction project. These services also include professional services of an architectural or engineering nature, as defined by State law, which are required to or may logically or justifiably be performed or approved by a person licensed, registered, or certified to provide the services with respect to a highway construction project. Contracts for these services that are paid with Federal-aid highway program (FAHP) funding will be awarded following these selection procedures.

The federal laws and regulations that govern the procurement of engineering and design related services with FAHP funds are:

- 23 United States Code (U.S.C.) 106 “Project approval and oversight”
- 23 U.S.C. 112 “Letting of contracts”
- 23 U.S.C. 114(a) “Construction Work In General”
- 23 U.S.C. 302 “State transportation department”
- 23 U.S.C. 315 “Rules, regulations, and recommendations”
- 23 U.S.C. 402 “Highway safety programs”
- 40 U.S.C. Chapter 11 – Selection of Architects and Engineers, §§1101 *et seq.,* commonly called the “Brooks Act”
- 2 CFR Part 200 “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards”
- 23 CFR Part 172 “Procurement, Management, and Administration of Engineering and Design Related Services”
- 48 CFR Part 31 “Contract Cost Principles and Procedures”
- 49 CFR Part 1.48(b) “The Federal Highway Administrator is delegated authority to administer the following provisions of title 23, Highways, U.S.C.”

In accordance with the above federal laws and regulations, the Arkansas Department of Transportation (Department) has approved these procedures for use by

the Local Agency for the "competitive negotiation" (qualifications-based selection) method of procurement as defined in 23 CFR §172.7, Procurement Methods and Procedures that complies with the Brooks Act (40 U.S.C. §§1101, *et seq.*).

The Local Agency will use these procedures for Federal-aid contracts and may elect to use them for non-Federal-aid contracts.

Section II – Advertisement for Letters of Interest

The Local Agency may employ a consultant engineering firm when a need exists for engineering services, and it is in the Local Agency's best interest to employ an engineer or engineering firm.

As a minimum, the Local Agency will advertise in a statewide newspaper, the Department's website and the Local Agency's website (if available), advising that consultant engineering services are being sought. In addition, the Local Agency may advertise in appropriate national trade magazines or websites for specialized services.

Interested firms must furnish:

1. A cover letter with the firm's response including primary contact information.
2. The firm's completed Architect-Engineer Qualifications Standard Form (SF) 330 Parts I and II (48 CFR §53.236-2(b)). (SF 330 is available on the Department's website.) http://arkansashighways.com/consultant_services/advertisements/advertisements.aspx
3. A current copy of the firm's equal employment opportunity policy required per Arkansas Code Annotated (Ark. Code Ann.) §19-11-104.
4. The firm's current copy (within 12 months) of the Department and Finance and Administration (DFA) Illegal Immigrant Contractor Disclosure Form (Ark. Code Ann. §19-11-105). https://www.ark.org/dfa/immigrant/index.php/user/welcome

Advertisements may be for either a specific single project; a group of projects; or for an on-call or indefinite delivery/indefinite quantity (IDIQ) for an established contract period (not to exceed 5 years), to be determined at a later date with specific task orders issued for each project. (23 CFR §172.9(a))

When advertising a specific project, the advertisement will describe the work in general terms allowing firms to evaluate their interest in performing the desired services.

When advertising a group of projects, a general description of work will be furnished. Firms will be asked to specify the projects they are interested in performing. When the Local Agency decides to proceed with a certain project, those firms having expressed interest in that project will be considered for selection.

When advertising for an on-call / IDIQ projects with later specified task orders, the advertisement will include a general description of work for the project task and the number of consultants anticipated to be selected.

If a solicitation fails to yield three qualified respondents, then the Local Agency may proceed with evaluation and selection if the Local Agency and the Department determines that the solicitation did not contain conditions or requirements that arbitrarily limited competition. Alternatively, the Local Agency may pursue procurement following the noncompetitive method when competition is determined to be inadequate and it is determined to not be feasible or practical to re-compete under a new solicitation. (23 CFR §172.7(a)(1)(iv)(D))

Solicitations will include language to comply with state procurement laws, rules, and regulations including but not limited to Ethical Standards (Ark. Code Ann. §19-11-708), Employee and Relative Disclosure, and Equal Opportunity Policy.

Interested firms are advised that in order to comply with state and federal requirements that the Local Agency will verify suspension and debarment actions and eligibility status of consultants in accordance with 2 CFR Part 1200 and 2 CFR Part 180.

Ark. Code Ann. §§19-11-701 through 19-11-714 addresses ethics and conflicts of interest. Federal regulations about conflicts of interest are described in 2 CFR §200.112, 23 CFR §1.33, and provisions of 23 CFR §172.7(4). No Local Agency employee may participate in selection, award or administration of a contract in which the Local Agency employee or any member of his or her immediate family has a financial, prospective financial, or other interest. Additionally, in accordance with Ark. Code Ann. §19-11-704(b) it is a breach of ethical standards for any person, including potential consultants, or parties to subagreements to engage in any conduct or behavior with other consultants, contractors, cities, counties, state agencies, or metropolitan/local planning organizations that may influence any public employee to breach the standards of ethical conduct provided by state and federal laws.

Section III – Selection Committee

The Local Agency will designate a Selection Committee (Committee) to evaluate and analyze the letters of interest (LOI) and proposals.

Section IV – Evaluation of Letters of Interest

The Committee will evaluate each consultant firm based on the criteria provided in the detailed LOIs in general as follows:

No.	Evaluation Factors for LOIs	Maximum Points Possible
1	Professional staff including the education, experience, number of personnel available, and any partnerships with sub-consultants	10
2	General and professional reputation, including responsiveness to civil rights and equal employment opportunity requirements and opportunities	10
3	*Past work performance	10
4	Experience with projects of a similar nature as those advertised	10
	Total Points for LOI	40

*Past performance or evaluations from other clients will be considered when the firm has not worked for the Local Agency previously.

Following their review, the Committee will prepare a short list (minimum of three) of the top ranked engineering firms and recommend that these firms submit detailed proposals for further evaluation.

Section V – Request for Proposal

The Local Agency will prepare a scope of work statement and request proposals from the engineering firms on the short list. For projects with FHWA oversight, which are identified by FHWA as Projects of Division Interest (PoDI) projects, the Local Agency will forward the scope of work statement to the Department and FHWA for review and approval before soliciting request for proposals (RFPs). A Local Agency's scope of work will typically include the following:

1. A detailed purpose and description of the work,
2. Services that will be furnished by the Local Agency,
3. Services that will be furnished by the consultant,
4. Deliverables to be provided,
5. Project conditions of the work,
6. Schedule for performance of the work,
7. Special conditions of the work including applicable standards, specifications, and policies, and
8. Assurance of participation of certified Disadvantaged Business Enterprises (DBE) in Federal-aid projects as Department goals for the Project are established.

The short-listed firms should submit proposals that contain the following:

1. A cover letter with primary contact information,
2. A detailed work plan that identifies the major tasks of work,
3. A list of major concerns associated with completing the work,
4. A detailed work schedule for specific projects as requested,
5. A manpower estimate for specific projects as requested, and
6. Updated Standard Form 330 Parts I and II, if necessary.

The Committee will review the proposals with particular attention to the five (5) listed evaluation factors for the proposals and will also consider the results determined in Section IV. The evaluation factors and their relative importance will be listed in the RFP if any of the factors are different from the list below.

No.	Evaluation Factors for Proposals	Maximum Points Possible
1	Obvious indication that the scope of work is clearly understood	20
2	Comprehensive, coherent, and detailed work plan	20
3	Realistic work schedule when applicable	10
4	Proposed working office location, need for a local office, and any local representative*	5
5	Identification of sub-consultants and responsiveness to DBE goals and opportunities	5
6	Total Points for LOI	40
	Total Points for Proposals	100

*Locality preference shall not be based on political or jurisdictional boundaries and may be applied on a project-by-project basis for contracts where a need has been established for a consultant to provide a local presence, a local presence will add value to the quality and efficiency of the project, and application of this criteria leaves an appropriate number of qualified consultants, given the nature and size of the project. (Consultants indicating that it will satisfy this factor in some manner, such as establishing a local project office, shall be considered to have satisfied this factor.)

Based on these evaluation factors, the Committee will rank the consultants based on the total score and submit the list to the Local Agency who will either:

1. Select one (1) firm to enter negotiations with; or
2. Select
   a. Multiple firms for an IDIQ contract; or
   b. Three or more firms to interview (a firm may present additional information concerning their proposal at the interview). After the interviews, the Committee will re-evaluate the firms based on the interview and the same evaluation factors as noted previously. The ranking list will be submitted to the Local Agency for review and final selection.

The Local Agency's contract file will contain records of the rankings and supporting data; however, the rankings will not be public information. Copies of the LOI advertisement, the rankings, and supporting data shall be submitted to the Department.

Notification must be provided to all responding consultants of the final selection of the most qualified consultant including the ranking of the top three consultants on projects where only one consultant is selected.

Section VI – Negotiation and Contract Preparation

Once a firm is selected for negotiation for a specific job or a group of projects, it will prepare a draft contract including a cost estimate for the project(s). The other firms on the short list will be advised of the firm selected, subject to successful negotiations. Prior to receipt or review of the draft contract and cost estimate, the Local Agency shall prepare a detailed independent estimate with an appropriate breakdown of the work or labor hours, types or classifications of labor required, other direct cost and consultant's fixed fee for the defined scope of work. The independent estimate shall serve as the basis for negotiation to ensure a fair and reasonable cost is obtained.

More than one firm may be selected for an on-call or IDIQ contract. The contract will establish a maximum ceiling price for work issued under the contract as well as an expiration date not to exceed 5 years, per 23 CFR Part 172. Individual task order cost estimates will be negotiated when issued.

The selected firm will prepare a draft contract based on a sample contract furnished by the Department. In accordance with the principles of 23 CFR 172, the draft contract must include an overhead rate that is approved by the Department. If the contract exceeds $250,000, in accordance with the Department's Indirect Cost Rate Audit Requirements, the indirect cost rate shall be verified through an audit performed by a certified public accountant on behalf of the consultant. If the contract is less than $250,000, and at least one of these conditions applies:

1. When there is insufficient knowledge of the consultant's accounting system
2. When there is previous unfavorable experience regarding the reliability of the consultant's accounting system
3. When the contract involves procurement of new equipment or supplies for which cost experience is lacking

then the Consultant shall provide the indirect cost rate verified through an audit performed by a certified public accountant on behalf of the consultant. The certified audit shall be provided by the selected firm prior to the submission of the final draft contract.

Pursuant to this requirement, the Department will notify the Local Agency if an audit by a certified public accountant for the selected firm is necessary. The certified audit needs to be provided by the selected firm prior to the submission of the final draft contract.

The Local Agency will review the draft contract proposal and either approve it as submitted or enter into negotiations with the selected firm to establish a contract and contract ceiling price that the Local Agency deems is fair and reasonable. If a satisfactory contract cannot be negotiated with the selected firm, negotiations will be

formally terminated. The Local Agency will then enter into negotiations with the second ranked firm. If negotiations with that firm fail, the Local Agency will formally terminate those negotiations and begin to negotiate with the third ranked firm, and so on. If the Local Agency cannot negotiate a satisfactory contract with any of the firms on the short list, the Local Agency shall either:

1. Request proposals from additional firms who have submitted LOIs and are considered competent and qualified; evaluate and rank the firms based on the criteria described in Section V; and continue the negotiation process, or
2. Terminate all negotiations and begin the selection process again, or
3. Pursue procurement following the noncompetitive method when competition is determined to be inadequate and it is determined to not be feasible or practical to re-compete under a new solicitation. (23 CFR §172.7(a)(1)(iv)(D))

When the Local Agency and the consultant agree the negotiated contract is fair and reasonable, the consultant will prepare a final draft and submit it to the Local Agency and the Department for review. After review and a determination that it is acceptable, the consultant will sign the contract. The Local Agency will then execute the contract. The contract will subsequently be submitted to the Department for final review and approval including funding. When approved, copies of the signed contract will be distributed within the Local Agency and to the consultant.

For projects with FHWA oversight and for on-call or IDIQ contracts where the consultant performs a management role utilizing federal funds, the Department will forward the initial and final drafts of the contract to FHWA for review and comment. The FHWA approves the final executed contract by stamp and signature and retains a copy.

After the Local Agency executes an on-call or IDIQ contract, it will assign specific projects by task order for the duration of the contract period. The consultant will prepare each task order based on the scope of work furnished by the Local Agency. The task order will include a manpower estimate and cost. The Local Agency will review the task order and approve it as submitted or negotiate with the consultant to establish a task order and task order amount that the Local Agency deems is fair and reasonable. After review and a determination that the task order is acceptable, the consultant will sign the task order. The Local Agency will then execute the task order. The task order will subsequently be submitted to the Department for final review and approval including funding. When approved, copies of the signed task order will be distributed within the Local Agency and to the consultant.

For PoDI projects, the Department will forward the initial and final drafts of the task order to FHWA for review, comment, and approval. Upon FHWA approval, the final task order is executed.

Section VII – Monitoring the Contract

The Local Agency may designate staff members as key liaisons for specific projects or for technical matters during the administration of the contract period.

The Local Agency will:

1. Maintain the contract files,
2. Arrange and attend periodic progress meetings,
3. Coordinate reviews and approval actions with other agencies when necessary,
4. Review progress payments,
5. Coordinate questions from the consultant,
6. Negotiate any change or amendment to the contract and submit to the Department for review and approval, and
7. Prepare an evaluation of the consultant's performance after completion of the contract. A copy of the evaluation shall be submitted to the Department.

Section VIII – Consultant Liability

The Local Agency will include a contract requirement that the consultant will warrant that all services and work products provided as part of the contract are performed in accordance to the prevailing industry standards, including standards of conduct and care, format and content, meet the satisfaction of the Local Agency, and conform to the requirements of the Agreement. This warrant is effective regardless of the degree of inspection and acceptance by the Local Agency or others.

If the consultant is required to correct or re-perform any work or services, the work will be performed at no cost to the Local Agency, and any work or services corrected or re-performed by the consultant shall also be warranted that it is free from defects in workmanship in accordance with industry standards. If the consultant fails or refuses to correct or re-perform, the Local Agency may, by contract or otherwise, correct or replace the deficient items or services with similar work or services, and charge the cost to the consultant or make an equitable adjustment in the consultant's reimbursement.

Acceptance is an act of an authorized representative of the Local Agency by which the Local Agency approves specific services, as partial or complete performance of the contract. Correction is the elimination of a defect.

REQUIRED CONTENTS OF BIDDING PROPOSALS
FEDERAL-AID PROJECTS

1) **FHWA-1273**

Each set of contract documents shall include FHWA-1273, "Required Contract Provisions, Federal-aid Construction Contracts," and such supplements that may modify the FHWA-1273. Copies of FHWA-1273 and supplements will be provided by the Department.

2) **Anti-Collusion and Debarment Certification**

The certification shall either be in the form of an affidavit executed and sworn to by the bidder before a person who is authorized by the laws of the State to administer oaths or in the form of an unsworn declaration executed under penalty of perjury of the law of the United States. The required form for the Anti-Collusion and Debarment Certification will be provided by the Department. The certification includes:

- Anti-collusion - A statement executed by, or on behalf of the person, firm, association, or corporation submitting the bid certifying that such person, firm, association, or corporation has not, either directly or in-directly, entered into any agreement, participated in any collusion, or otherwise taken any action, in restraint of free competitive bidding in connection with the submitted bid.

- Debarment - A statement regarding debarment, suspension, ineligibility and voluntary exclusion as required by Title 2 of the United States Code of Federal Regulations, Part 180 (2 CFR Part 180).

Failure to submit the executed Certification as part of the bidding documents will make the bid nonresponsive and not eligible for award consideration.

3) **Lobbying Certification**

This certification is required by 49 CFR 20. The form for this certification will be provided by the Department.

4) **Davis-Bacon Pre-determined Minimum Wage Rates**

Davis-Bacon requirements apply to all projects greater than $2,000 that are physically located within the existing right-of-way of a functionally classified city street or highway. The Davis-Bacon wage rates will be provided by the Department.

5) "Build America, Buy America" Provisions

Because federal highway funds are included in this project, "Build America, Buy America" requirements, as specified in Title 23 of the United States Code Section 313 and Title 23 of the Code of Federal Regulations Section 635.410, apply to this project. A section of the bidding documents should specify these requirements as part of the project and it should at least be noted in the advertisement for bids.

FAYETTEVILLE
ARKANSAS

DESIGNATING FULL-TIME EMPLOYEE IN RESPONSIBLE CHARGE

December 3rd, 2024

Mr. David Siskowski
Division Head – Local Programs
Arkansas Department of Transportation
P. O. Box 2261
Little Rock, AR 72203

Re: ***Job #040967***
Rupple Rd. Trail Lighting
Washington County

Dear Mr. Siskowski:

The full-time employee in responsible charge of the day to day oversight for the referenced project will be ***MATT MIHALEVICH, ACTIVE TRANSPORTATION MANAGER***. This letter certifies that the employee is aware of the duties and functions they are in charge of as outlined in the Agreement of Understanding. This employee may be reached by phone at ***(479) 444-3416*** or by email at ***mmihalevich@fayetteville-ar.gov***

Sincerely,

_____
Mayor Lioneld Jordan

CITY OF
FAYETTEVILLE

Mr. Jared D. Wiley
Chief Engineer – Preconstruction
Arkansas Department of Transportation
P. O. Box 2261
Little Rock, AR 72203

Re: ***Job #***
Job Name
County

Dear Mr. Wiley:

The following documents are submitted concerning the referenced project:

1. One set of plans and specifications.
2. A copy of the preliminary estimate of cost.
3. An unexecuted copy of the bid proposal form.

I certify that the plans, specifications and estimate were prepared by or under the direct supervision of a Professional Engineer licensed to practice in the State of Arkansas and that the plans and specifications comply with the Americans with Disabilities Act (ADA), the American Association of State Highway and Transportation Officials (AASHTO) design standards, and all other applicable state and federal regulations, including airport clearance when necessary, for the type of work involved.

I understand that if any project items are declared non-participating in federal funds due to failure to comply with any State or federal requirements, the ***(Sponsor Name)*** will promptly repay such funds to the Arkansas Department of Transportation (ARDOT). Further, I hereby authorize the Director of the Arkansas State Department of Finance and Administration to transfer such funds from the ***(Sponsor Name)'s*** Motor Fuel Tax allotment to the ARDOT's RRA Fund upon notification by the ARDOT Director of that such funds are due ARDOT and have not been paid by the ***(Sponsor Name)***.

Approval to proceed with advertisement of the project for bids is requested.

GUIDELINES FOR ADVERTISING AND OPENING BIDS
FEDERAL-AID PROJECTS

Upon receipt of written authorization from the Arkansas Department of Transportation (Department), the project may be advertised for bids. The following minimum guidelines for advertising must be met:

- The minimum advertising period is three weeks (21 days).

- In addition to meeting the State requirements for advertising for construction projects, the project must be advertised a minimum of two times in a statewide newspaper (online or print versions are acceptable).

- The notice must contain: (1) the time, date, and place that sealed bids are to be accepted, opened, and publicly read; (2) a brief description of the kind or type of work contemplated; and (3) the place at which prospective bidders may obtain plans and specifications.

- The Sponsor will forward a copy of the approved advertisement to the Department once advertisement starts. Any addenda will also be sent to the Department during the advertisement period.

- The Sponsor will include the following language in the solicitation for bids:

  "The **(INSERT SPONSOR NAME)** hereby notifies all bidders that this contract is subject to applicable labor laws, non-discrimination provisions, wage rate laws and other federal laws including the Fair Labor Standards Acts of 1938. The Work Hours Act of 1962 and Title VI of the Civil Rights Act of 1964 also apply."

  "'Buy America' provisions apply to this project."

  "Registration and good standing in the System for Award Management (SAM) will be required prior to contract execution."

- All bids received in accordance with the terms of the advertisement shall be publicly opened and at a minimum, the total amount bid must be read aloud (the sponsor may choose to read the bids item by item).

- If any bid received is not read aloud, the name of the bidder and the reason for not reading the bid aloud shall be publicly announced at the letting.

- In accordance with 23 CFR 635.110, any procedures and requirements for qualifying and licensing contractors must be approved by the Federal Highway Administration.

- **Negotiation with contractors during the period following the opening of bids and before the award of the contract is strictly prohibited.**

Little Rock, AR 72203

Re: ***Job #***
Job Name
County

Dear Mr. Wiley:

The following documents are submitted concerning the referenced project:

1. One set of bid tabulations.
2. Justification of award (if low bid amount is greater than 10% over the estimate).
3. A check for $1,000 for ARDOT construction involvement.

I certify that the referenced project was advertised and bids were received in accordance with the regulations governing Federal-aid projects and all other applicable state and federal regulations, and that this process has been reviewed and approved by the ***(Sponsor Name)'s*** Attorney. Additionally, I certify that the bid is being awarded to the lowest responsive and qualified bidder and that there has not been, nor will there be, any negotiations with the contractor or other bidders regarding the amount bid.

Your concurrence in the award of this contract to ***(INSERT CONTRACTOR NAME)*** for ***(INSERT LOW BID AMOUNT)*** is requested.

2 CFR Part 200

UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

Subpart D - Post Federal Award Requirements
Record Retention and Access

§200.334 Retention requirements for records.

Financial records, supporting documents, statistical records, and all other non-Federal entity records pertinent to a Federal award must be retained for a period of three years from the date of submission of the final expenditure report or, for Federal awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, respectively, as reported to the Federal awarding agency or pass-through entity in the case of a subrecipient. Federal awarding agencies and pass-through entities must not impose any other record retention requirements upon non-Federal entities. The only exceptions are the following:

(a) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken.

(b) When the non-Federal entity is notified in writing by the Federal awarding agency, cognizant agency for audit, oversight agency for audit, cognizant agency for indirect costs, or pass-through entity to extend the retention period.

(c) Records for real property and equipment acquired with Federal funds must be retained for 3 years after final disposition.

(d) When records are transferred to or maintained by the Federal awarding agency or pass-through entity, the 3-year retention requirement is not applicable to the non-Federal entity.

(e) Records for program income transactions after the period of performance. In some cases recipients must report program income after the period of performance. Where there is such a requirement, the retention period for the records pertaining to the earning of the program income starts from the end of the non-Federal entity's fiscal year in which the program income is earned.

(f) Indirect cost rate proposals and cost allocations plans. This paragraph applies to the following types of documents and their supporting records: Indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(1) *If submitted for negotiation.* If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the pass-through entity) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission.

(2) *If not submitted for negotiation.* If the proposal, plan, or other computation is not required to be submitted to the Federal Government (or to the pass-through entity) for negotiation purposes, then the 3-year retention period for the proposal, plan, or computation and its supporting records starts from the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

§200.335 Requests for transfer of records.

The Federal awarding agency must request transfer of certain records to its custody from the non-Federal entity when it determines that the records possess long-term retention value. However, in order to avoid duplicate recordkeeping, the Federal awarding agency may make arrangements for the non-Federal entity to retain any records that are continuously needed for joint use.

§200.336 Methods for collection, transmission, and storage of information.

The Federal awarding agency and the non-Federal entity should, whenever practicable, collect, transmit, and store Federal award-related information in open and machine-readable formats rather than in closed formats or on paper in accordance with applicable legislative requirements. A machine-readable format is a format in a standard computer language (not English text) that can be read automatically by a web browser or computer system. The Federal awarding agency or pass-through entity must always provide or accept paper versions of Federal award-related information to and from the non-Federal entity upon request. If paper copies are submitted, the Federal awarding agency or pass-through entity must not require more than an original and two copies. When original records are

2 CFR Part 200

UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

Subpart D - Post Federal Award Requirements
Record Retention and Access

electronic and cannot be altered, there is no need to create and retain paper copies. When original records are paper, electronic versions may be substituted through the use of duplication or other forms of electronic media provided that they are subject to periodic quality control reviews, provide reasonable safeguards against alteration, and remain readable.

§200.337 Access to records.

Records of non-Federal entities. The Federal awarding agency, Inspectors General, the Comptroller General of the United States, and the pass-through entity, or any of their authorized representatives, must have the right of access to any documents, papers, or other records of the non-Federal entity which are pertinent to the Federal award, in order to make audits, examinations, excerpts, and transcripts. The right also includes timely and reasonable access to the non-Federal entity's personnel for the purpose of interview and discussion related to such documents.

(a) *Extraordinary and rare circumstances.* Only under extraordinary and rare circumstances would such access include review of the true name of victims of a crime. Routine monitoring cannot be considered extraordinary and rare circumstances that would necessitate access to this information. When access to the true name of victims of a crime is necessary, appropriate steps to protect this sensitive information must be taken by both the non-Federal entity and the Federal awarding agency. Any such access, other than under a court order or subpoena pursuant to a bona fide confidential investigation, must be approved by the head of the Federal awarding agency or delegate.

(b) *Expiration of right of access.* The rights of access in this section are not limited to the required retention period but last as long as the records are retained. Federal awarding agencies and pass-through entities must not impose any other access requirements upon non-Federal entities.

§200.338 Restrictions on public access to records.

No Federal awarding agency may place restrictions on the non-Federal entity that limit public access to the records of the non-Federal entity pertinent to a Federal award, except for protected personally identifiable information (PII) or when the Federal awarding agency can demonstrate that such records will be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) or controlled unclassified information pursuant to Executive Order 13556 if the records had belonged to the Federal awarding agency. The Freedom of Information Act (5 U.S.C. 552) (FOIA) does not apply to those records that remain under a non-Federal entity's control except as required under §200.315. Unless required by Federal, state, local, and tribal statute, non-Federal entities are not required to permit public access to their records. The non-Federal entity's records provided to a Federal agency generally will be subject to FOIA and applicable exemptions.

CERTIFICATION FOR GRANTS, LOANS, AND COOPERATIVE AGREEMENTS

The undersigned certifies to the best of his knowledge and belief that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all sub awards at all tiers (including sub grants, and contracts and subcontracts under grants, sub grants, loans and cooperative agreements) which exceed $100,000, and that all such sub recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Federal Funding Accountability and Transparency Act (FFATA)
Reporting Requirements

(For more information go to https://www.fsrs.gov/)

FFATA was signed on September 26, 2006. The intent is to empower every American with the ability to hold the government accountable for each spending decision. The end result is to reduce wasteful spending in the government. The FFATA legislation requires information on federal awards (federal financial assistance and expenditures) be made available to the public via a single, searchable website, which is www.USASpending.gov.

A Prime Grant Recipient (Arkansas Department of Transportation (hereinafter called ARDOT)) awarded a new Federal grant greater than or equal to $25,000 as of October 1, 2010 is subject to FFATA sub-award reporting requirements as outlined in the Office of Management and Budget guidance issued August 27, 2010. **ARDOT is required to file a FFATA sub-award report for any sub-grant awarded to a sub-awardee greater than or equal to $25,000.** As a sub-awardee, _____ shall provide the following information to ARDOT in order to fulfill FFATA reporting requirements:

- ✔ A Unique Entity Identifier (UEI) of the sub-awardee receiving the award and the parent entity of the recipient, should the sub-awardee be owned by another entity;
- ✔ The names and total compensation of the five most highly compensated officers of the sub-awardee **if** the sub-awardee in the preceding Federal fiscal year received 80 percent or more of its annual gross revenues in Federal awards; and $25,000,000 or more in annual gross revenues from Federal awards; and the public does not have access to information about the compensation of the senior executives of the sub-awardee through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. See FFATA § 2(b)(1).

Required Sub-Awardee Information

(A) Sub-Awardee UEI: FKCQRMDULFH9 UEI Expiration Date: _____

Parent (if applicable) UEI: N/A UEI Expiration Date: _____

(B) In the preceding completed Federal fiscal year, did your business or organization (the legal entity to which the UEI number entered above belongs) receive (1) 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and (2) $25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements?

Yes (No)

If "Yes" is selected, answer (C).

(C) Does the public have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI entered above belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986?

(Yes) No

If "Yes" is selected, visit http://www.sec.gov/edgar.shtml for reference.

If "No" is selected, answer (D).

(D) **If "No" was selected in Question "C"**, complete the following information for the five (5) most highly compensated executives in your business or organization (the legal entity to which the UEI entered above belongs). Amount should reflect the Total Compensation Amount in the preceding completed Federal fiscal year in U.S. whole dollars.

Sub-Awardee Names and Compensation of Most Highly Compensated Officers

1. Name: _____ Amount: $_____
2. Name: _____ Amount: $_____
3. Name: _____ Amount: $_____
4. Name: _____ Amount: $_____
5. Name: _____ Amount: $_____

NEEDED AT THIS TIME

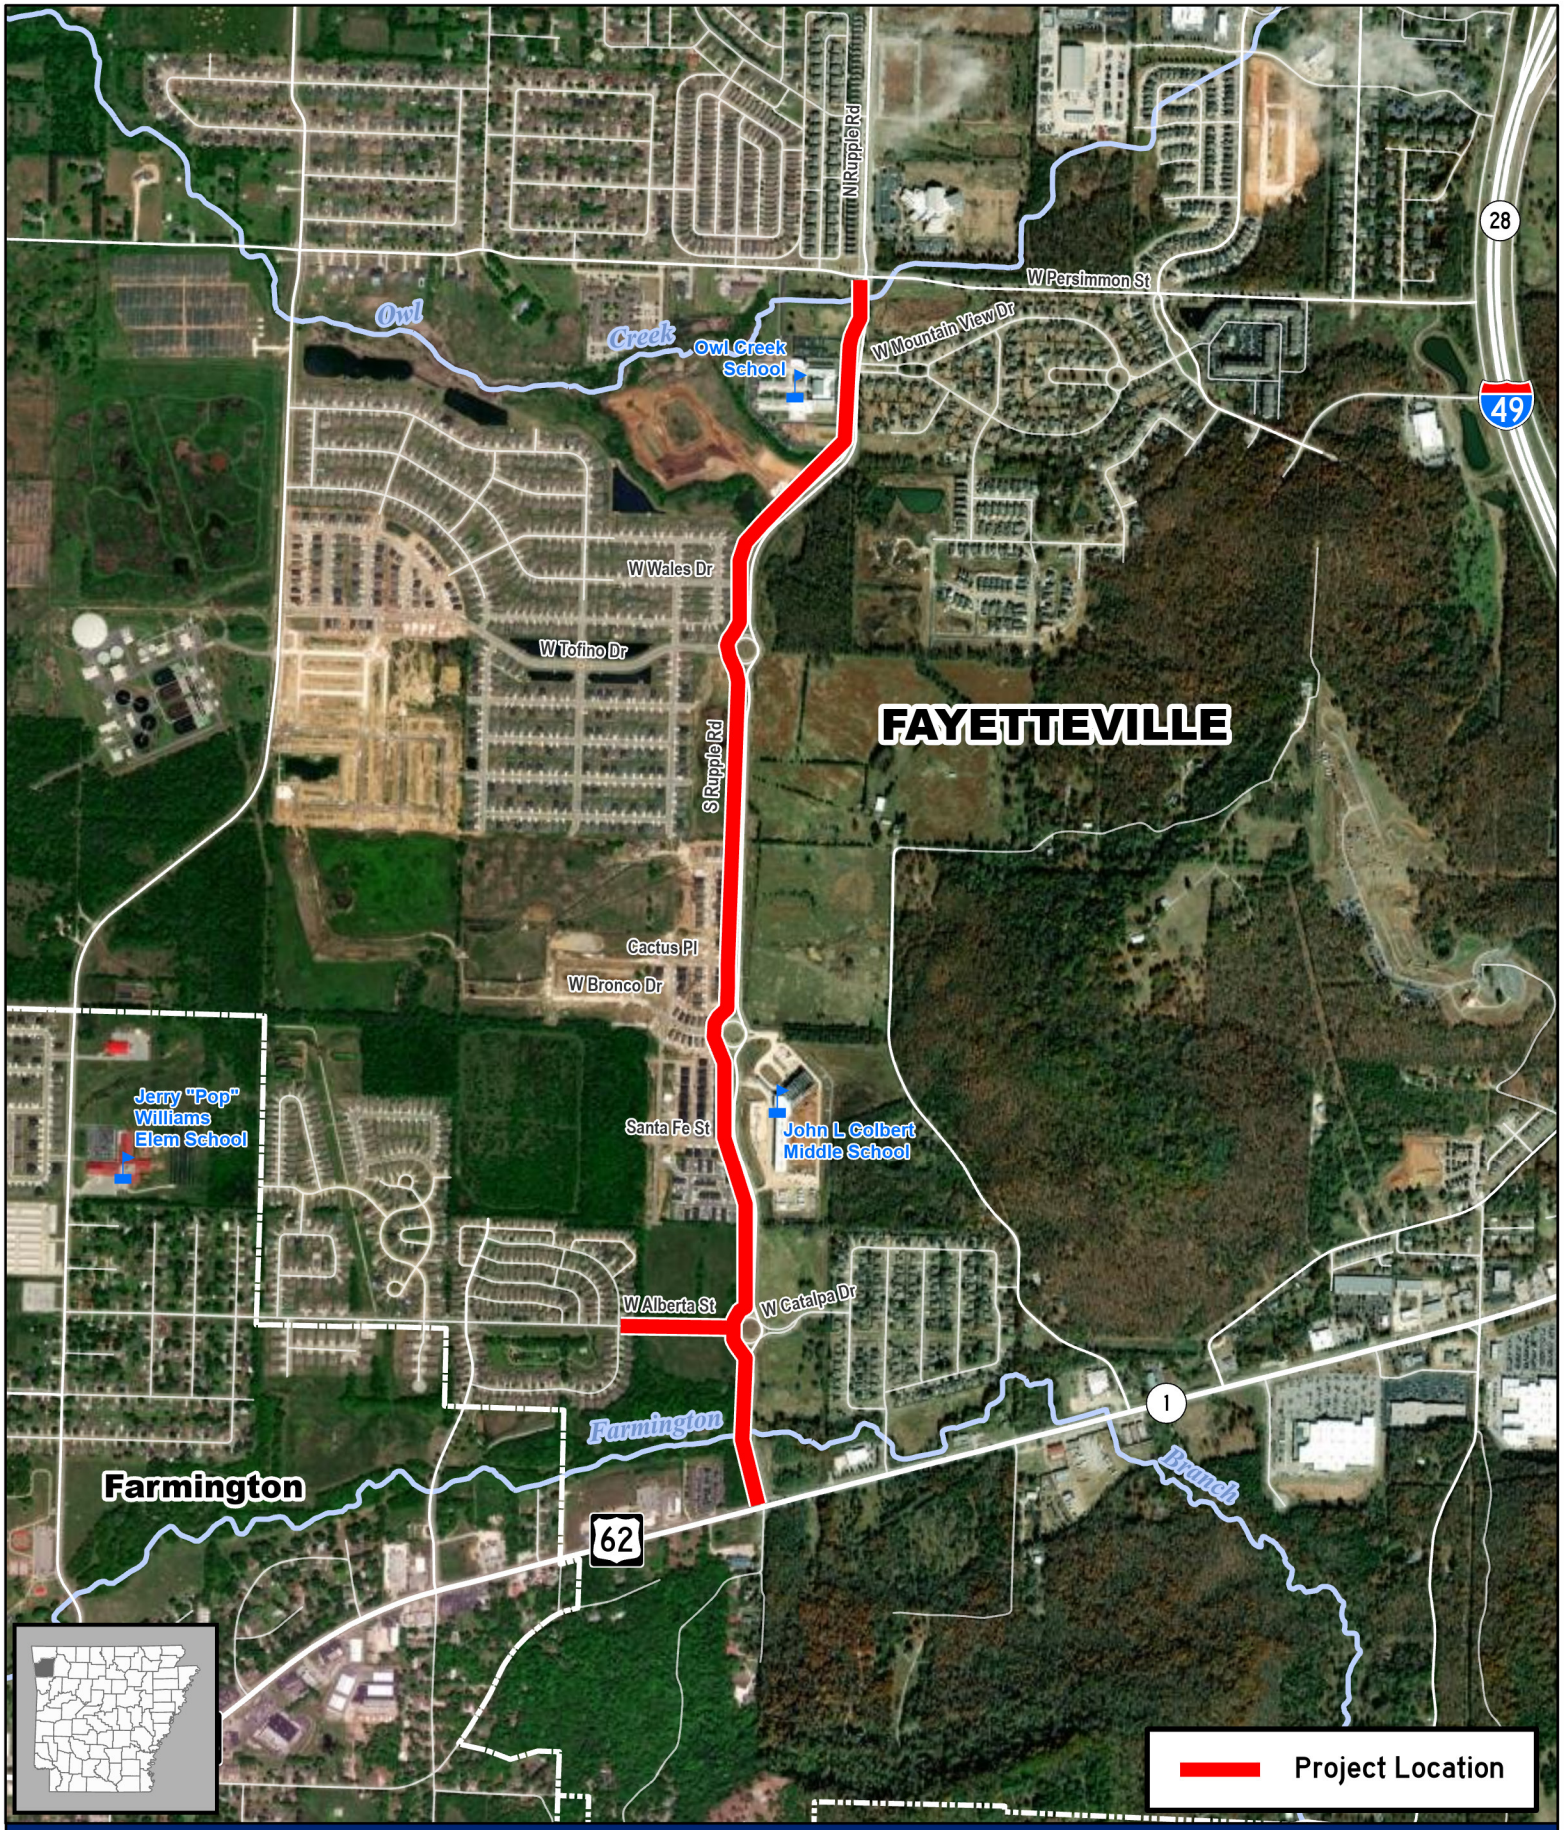
Title VI Requirements and Responsibilities

Title VI of the Civil Rights Act of 1964, prohibits discrimination based upon race, color, and national origin. Specifically, 42 USC 2000d states that *"No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.*"



ARDOT is a recipient of federal funds from the U.S. Department of Transportation modal agencies, including the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). All recipients/subrecipients of federal funding must comply with the requirements of Title VI of the Civil Rights Act of 1964 and other nondiscrimination statues, regulation, and authorities.

Therefore, the sponsor (subrecipient) must also comply with the requirements of Title VI and its responsibilities.

Upon receipt of ARDOT reimbursement, the subrecipient will be required to establish Title VI compliance. ARDOT's Title VI Coordinator or designee will contact the subrecipient to request the following information:

- **Name of designated Title VI/ADA/Section 504 Coordinator**
- **Notice of Nondiscrimination**
- **Complaint Procedure and Process**
- **Complaint Form**
- **Standard USDOT Title VI/Non-Discrimination Assurances**
    - Must be signed annually by highest ranking official

The Title VI Coordinator or designee will assist the subrecipient in establishing the information as needed. For further information or inquiries, please contact the Civil Rights Division at 501-569-2299.

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-751

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Lisa Thurber, Comm and Marketing Director
Susan Norton, Chief of Staff

FROM: Doug Bankston, Director Of Media Services

SUBJECT: **Approve a Community Access Television, Inc. (d/b/a Your Media) Contract Renewal for Public Access Television Services for 2025.**

RECOMMENDATION:
Staff recommends approval of the attached contract for Public Access Television Provider between the City of Fayetteville and Community Access Television, Inc. (d/b/a Your Media) in the amount of $220,725.00 to provide Public Access Television services from January 1, 2025, through December 31, 2025. . This is contingent upon the approval of the 2025 annual City budget and work program.

BACKGROUND:
Community Access Television, Inc. (d/b/a Your Media), has been the City's Public Access provider for the previous five-year term from January 2016 through December 2020, which was approved through City Council Resolution 207-15 in November 2015, and was selected as the service provider for the current five-year term through City Council Resolution 306-20.

DISCUSSION:
The nonprofit Community Access Television, Inc.—d/b/a Your Media—has been the contract service provider for Fayetteville Public Access Television for the previous two five-year term periods. Community Access Television, Inc. (d/b/a Your Media) was the only organization to submit a proposal for the public access service provider RFP (RFP 20-12) for the 2021-2025 term. The contract was developed by the City of Fayetteville in partnership with Your Media and was approved by the Your Media Board of Directors. This contract renewal cost has considerations for a 3% cost-of-living increase of staff salaries. This is a request for a contract renewal for fiscal year 2025, the final renewal for the current five-year term (January 2021 through December 2025).

BUDGET/STAFF IMPACT:
The total cost of this contract is $220,725.00. This amount is included in the proposed 2025 Budget that is up for City Council approval.

Approve a Community Access Television, Inc. (d/b/a Your Media) Contract Renewal for Public Access Television Services for 2025.

A RESOLUTION TO APPROVE A CONTRACT WITH COMMUNITY ACCESS TELEVISION, INC. D/B/A YOUR MEDIA IN THE AMOUNT OF $220,725.00 FOR THE PROVISION OF PUBLIC ACCESS TELEVISION SERVICES AND THE OPERATION OF THE PUBLIC ACCESS TELEVISION CHANNEL THROUGH 2025, CONTINGENT ON APPROVAL OF THE 2025 ANNUAL BUDGET AND WORK PROGRAM

BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby approves a contract with Community Access Television, Inc. d/b/a Your Media, a copy of which is attached to this Resolution, in the amount of $220,725.00 for the provision of public access television services and the operation of the public access television channel through 2025, contingent on approval of the 2025 Annual Budget and Work Program.

CONTRACT BETWEEN CITY OF FAYETTEVILLE, ARKANSAS
AND
COMMUNITY ACCESS TELEVISION
d/b/a Your Media
A 501-C-3 NONPROFIT ORGANIZATION

AGREEMENT

This Agreement is made this 1st day of January, 2025, by and between the City of Fayetteville, a municipal corporation ("City"), and Community Access Television, Inc., a nonprofit corporation, dba Your Media ("Your Media") who agree as follows:

PURPOSE AND INTENT

1. The purpose of Public Access Television in Fayetteville is to provide an opportunity for users and others to produce and telecast television programming in a first-come, first-served, content-neutral, non-discriminatory manner, in accordance with the First Amendment, and to provide training in the techniques of video production for Public Access Television.
2. The City of Fayetteville is accorded a Public Access Television channel by television services providers with which it holds agreements, or pursuant to Arkansas law.
3. The City of Fayetteville desires to provide support for the operation of Public Access Television in Fayetteville.
4. This contract for Public Access Television services is contingent upon the City retaining a Public Access Television channel, either through agreements with television services providers or pursuant to Arkansas law.
5. The City has determined it will provide support for the operation and programming of its Public Access Television channel and it will provide physical space and equipment at the City of Fayetteville Television Center, located at 101 W. Rock Street, Fayetteville.
6. The City of Fayetteville provides financial support through General Fund Revenue allocations for operational contract services, building and facilities, approximately 3,000 square feet of space, utilities, repairs, maintenance, custodial services and capital expenditures for facilities, studios and equipment.

NOW, THEREFORE, in consideration of the mutual promises and covenants set forth herein, the parties agree as follows:

SECTION 1. DEFINITIONS

For the purposes of this contract, the following definitions will be established:

Class: An organized, regularly scheduled, interactive teaching session that is focused on a particular subject and lead by an employee qualified to teach the subject.
Curriculum: A documented plan of teaching in which subject matter and class sessions are described in a detailed syllabus, including specific topics, teaching methods, schedules and methods of student evaluation.
Inside Program: A program produced utilizing Television Center equipment.
Outside Program: A program produced not utilizing Television Center equipment.
Producer: An individual who creates, owns, controls or is responsible for the content of a television program.
Programming: Video and/or audio material that is organized in a particular fashion as determined by a producer and distributed through one or more means to an audience.
Program Requestor: A user who requests a program to be telecast on the Public Access Television channel.
Resident User: An individual who resides within the city limits of Fayetteville, a student at the University of Arkansas or a public school within the city limits of Fayetteville, or an employee of a public institution (or branch thereof) or non-profit organization that is based in Fayetteville. This status may be documented by producing a current City of Fayetteville utility bill, a rental contract, a driver's license, other government-issued photo ID that contains name and address (including a student identification card), or a check stub or other proof of employment by a public institution or non-profit organization located in Fayetteville.
Non-Resident User*:* An individual (henceforth referred to as non-resident) who resides within the Washington or Benton County limits, is a student of a public school within the county limits, or is an employee of a public institution (or branch thereof) or non-profit organization that is based within the county limits and who does not otherwise qualify as a Resident User. County Residency may be documented by producing a current utility bill, a rental contract, a driver's license, student identification card, or other government-issued photo ID that contains name and address, or a check stub or other proof of employment by a public institution or non-profit organization located in Washington or Benton County.
Trainee: A resident or non-resident of Fayetteville who is currently enrolled in a class offered by Fayetteville Public Access Television.
Television: Video programming that is distributed through any one or more wide-area distribution methods, such as Video On Demand, Web site embedding, cable, IPTV, Web streaming, over-the-air broadcast, etc.
Workshop: An organized, non-regular interactive teaching session which covers a particular topic of interest to the participants, usually lead by an expert in the subject matter.

SECTION 2: GENERAL PROVISIONS

All services described in this contract and provided to the public by Your Media will be provided free of charge to Resident-of-Fayetteville Public Access Users who were qualified users as of December 31, 2024. Non-resident-of-Fayetteville Public Access Users shall pay a $50 per year fee for services described in this contract. Your Media will not require, solicit, or accept any compensation of any kind, beyond that agreed upon in this contract and provided by the City, in return for providing the services described herein, unless otherwise stipulated in this contract.

At no time shall the number of non-resident users exceed 49% of the total user base of FPTV services and resources.

Your Media shall not provide any services or engage in any activity not described in this contract, with or without compensation, that utilizes equipment, facilities, or resources owned or controlled by the City of Fayetteville, without the expressed written consent of the City, or as stipulated in this contract.

Your Media may charge a fee for the following items or activities utilizing equipment, facilities or resources owned or controlled by the City of Fayetteville:

1. Non-resident of Fayetteville annual service dues.
2. Training workshops and seminars that are conducted utilizing City of Fayetteville resources.
3. The sale of blank recording media.
4. Transfer and/or duplication services.
5. Other small items, such as t-shirts or other promotional items, as approved by the City of Fayetteville Communications Director or Director of Media Services.
6. Video production services. If production services are provided, the following conditions apply:
    a. These services and activities will be referred to as “contract production”.
    b. Contract production may include studio production activity at the Television Center and related activity, including pre- and post-production.
    c. Your Media shall charge rates adequate to cover the basic costs of production. Service rates will be reviewed and approved by the Director of Media Services on an annual basis.
    d. Your Media will utilize a standard contract document for each agreement to provide contract production services. This contract document will be approved by the Director of Media Services.
    e. All fees charged for providing contract production services will be collected at the point Your Media delivers the final product for which it was contracted.
    f. All monies collected for providing production services will be utilized to support Fayetteville Public Access services or capital improvements as approved by the City Council and following applicable City of Fayetteville policies and procedures.

7. In addition to charging a fee for services described above, Your Media may generate revenue utilizing equipment, facilities, or resources owned or controlled by the City of Fayetteville through:
    a. Fundraising activities designed to raise funds to support the operations or capital improvements of the Public Access channel.
    b. Acquisition of grants or awards dedicated to support the operations or capital improvements of the Public Access channel.

<u>If Your Media generates or collects any revenue through activities as allowed in this contract, or otherwise approved by the City, utilizing equipment, facilities, or resources owned or controlled by the City of Fayetteville, Your Media will ensure:</u>

1. All monies collected for such services will be deposited into and all checks shall be made payable to the "Trust Account of Community Access Television, Inc." which shall contain only those funds.
2. Your Media's manager shall ensure proper accounting of all such revenues collected and shall report such accounting monthly to the Director of Media Services.
3. All funds within the "Trust Account of Community Access Television, Inc." may only be expended through City Council Resolution authorizing the receipt of funds into the Television Center budget and approving any necessary Budget Adjustments. Normal bank fees related directly to the use of this trust account may be paid with trust account funds without prior authorization.
4. Proper accounting and records of services provided, fees charged and monies collected for services will be kept by Your Media, in a manner approved by the Director of Media Services.

The City of Fayetteville provides the services described herein as a public service to the users for non-commercial use. Your Media will not allow any equipment, facilities, or resources owned or controlled by the City to be used to generate revenue for any private company, group, organization, or individual with the following exceptions:

1. Your Media may produce, or allow to be produced, televised fund-raising programs or activities for 501(c)3, non-profit organizations that directly provide services to the users. These programs are limited to one (1) per organization per contract year.
2. Your Media may produce or conduct one (1) fund-raising program or activity for itself that is televised, or produces programming that is televised, on the Public Access Channel.
3. Your Media may be contracted to produce, or assist in the production of, productions that utilize facilities and equipment controlled by the City at the discretion of the Operations Manager and the Director of Media Services for a market-appropriate fee structure to be determined by the Operations Manager and the Director of Media Services.
4. Televised fund-raising programs or activities may not exceed twenty-four (24) hours of continuous programming or activity, or, if not continuous programming, exceed seven (7) contiguous days of duration.
5. Fund-raising activities may not disrupt the normal operations of the Television Center. Questions regarding disruption will be determined by the Director of Media Services.

6. Fund-raising messages may not be displayed over other programming without the expressed written consent of the program owner.
7. The on-air bulletin/message board and the "Open Mic" program may be used by 501(c)3 non-profit organizations to announce or publicize activities of their organizations that generate revenue for their organizations or programs.

Ownership title to all capital acquisition, supplies, material, or any other property purchased with funds received under this Contract is vested with the City, and possession of such property shall, upon termination of the Contract, revert to the City unless otherwise provided for by the City in writing. Any equipment secured through fund-raising efforts to benefit the Public Access Television channel shall remain the property of the City's Television Center. Any funds or revenue secured through fund-raising efforts to benefit the Public Access Television channel shall be remitted to the City.

All policies, procedures, information, and execution of the services and responsibilities described in this contract shall be subject to approval by the Director of Media Services. Your Media will not make changes or revisions to any policy, procedure, or method of work directly related to the services described herein without the prior approval of the Director of Media Services.

In exchange for the funding provided by the City to Your Media, pursuant to this Agreement, Your Media shall provide the following services and report progress in each area to the City as defined in this contract:

SECTION 3: SCOPE OF SERVICES

PROVIDE EQUITABLE CHANNEL AVAILABILITY AND PROGRAMMING SERVICES TO USERS ON A FIRST-COME, FIRST-SERVED, CONTENT-NEUTRAL, AND NON-DISCRIMINATORY BASIS.

The City of Fayetteville provides airtime on the Public Access Television channel as a public service to users. Your Media will not require, solicit, or accept any compensation of any kind, beyond that agreed upon in this contract and provided by the City, in return for telecasting any programming on the Public Access Television channel. Each program that is produced utilizing City of Fayetteville Television Center equipment or facilities will be telecast on the Public Access channel at least one time. A program may be excused from the telecast requirement with approval from the Director of Media Services prior to the production of the program, or at any time at the discretion of the Director of Media Services.

Your Media will:

1. Maintain a process whereby users may request programming to be telecast on the Public Access Television channel. This process is subject to approval by the Director of Media Services.
2. Ensure individuals requesting programs to be telecast by Your Media on the Public Access Television channel are users, as defined in Section 1.
3. Require requestors to sign an affidavit warranting that the program they are requesting to be telecast does not contain:
    a. any violation of any Federal, State or local statute or ordinance relating to obscenity; or
    b. any material that is an unlawful invasion of privacy; or
    c. any use of material which violates copyright law;

   Such a statement does not relieve Your Media of its duty to prevent further telecast of programming that does not meet the stipulations contained herein, as such programming comes to its knowledge.

4. Ensure programming on the public access channel (FPTV) is not commercial in nature. Commercial programming is defined as: “Programming that contains direct appeals to purchase commercial goods or services; promotes the activities of for-profit groups, organizations, or individuals; contains any call to action or solicitation to purchase a product or patronize a business; any use of superlatives in describing a product, service, or business; any direct comparison to other products, or direct comparisons to unnamed products; any price or value information; or any inducements to buy.”
5. Require program requestors to provide Your Media with expressed, written consent of the program’s owner for the program to be telecast on Fayetteville’s Public Access Television channel. Your Media will maintain a copy of all such permissions on file.
6. Maintain a decision-making process and criteria for the scheduling of programming that will ensure the protection of 1st Amendment rights of program requestors while ensuring programming does not violate Federal, State, or local laws or ordinances. The process and criteria are subject to approval by the Director of Media Services. At a minimum, the process and criteria will:

a. Utilize program type definitions as included in Section 1 and define other program types as necessary (i.e. one-time, series, date-sensitive, etc.).
b. Define scheduling priority of program types.
c. Define a priority conflict-resolution process.
d. Establish criteria for defining "mature-audience"-type programming.
e. Ensure program requestors are informed of "mature-audience"-type programming criteria and sign an affidavit categorizing a requested program as "mature-audience"-type programming if appropriate.
f. Define day-parts of the programming schedule that are appropriate for "mature-audience"-type programming.
g. Define the program scheduling process.

7. Program the automated telecast system to ensure the telecast of programming on the Public Access Television channel 24 hours per day/7 days per week.
8. Manage the program scheduling process in such a manner that ensures no more than seven (7) days elapse between the submission of a new program and its first scheduled telecast.
9. Manage the programming schedule in such a manner that the on-air bulletin/message board constitutes no more than 15% of the total weekly air time.
10. Publish and distribute to the public a current program schedule weekly. The schedule will, at a minimum, be published in the following media:
    a. The Public Access Television channel's on-air bulletin/message board.
    b. The Public Access Television channel's web site.
    c. A publicly accessible bulletin board at the Television Center.
    d. Your Media's email address list that is maintained as an opt-in list in the central records database.

    The schedule will also be made available for publication by other media outlets that wish to do so.

<u>Your Media will not:</u>

1. Exercise any control of the content of programming, with the following exceptions:
    a. Programs that are produced solely by Your Media staff for the purposes of communicating information about the Public Access Television channel or itself.
    b. Portions of "open-studio" program content created by Your Media (i.e. opens, closes, bumpers, etc.).
    c. The on-air bulletin/message board.
    d. Programming that is produced as a result of classroom/training/studio laboratory production activity that is conducted by Your Media.
2. Schedule for further telecast any programming that has been found to violate any Federal, State, or local statute or ordinance. Your Media staff will bring any possible violations immediately to the attention of the Executive Director and the Director of Media Services as they become known to them, either through complaint or observation. The Director of Media Services will make an initial determination regarding the status of the programming. An email message is sufficient for notification. Questions regarding the legality of any programming should initially be directed to the Director of Media Services.

3. Schedule for further telecast any programming that has been found in violation of any policy of Your Media or the City, including, but not limited to, a violation of the affidavit of copyright; the affidavit of ownership; the affidavit of redistribution rights; or the affidavit of "mature audience" content; each of which is included in the telecast request process. Your Media staff will bring any possible violations immediately to the attention of the Executive Director and the Director of Media Services as these violations become known to them, either through complaint or observation. The Director of Media Services will make an initial determination regarding the status of the programming. An email message is sufficient for notification.

The City reserves the right to approve the content of any program telecast on the Public Access Television channel that in any way indicates or implies it has originated directly from the Public Access Television channel or its management. The Director of Media Services will determine if programming meets such criteria.

PROGRAM SPONSORSHIP

Program producers and owners may accept sponsors for programming they produce for telecast on the Public Access Television channel. Program sponsorship must adhere to the following:

1. The following may be identified as a program sponsor:
    a. Corporations or Divisions or Subsidiaries of Corporations
    b. Endowments and Foundations
    c. Individuals
2. General Rules for Acceptability
    a. The sponsor may not exercise editorial control over the content of any portion of programming telecast on the Public Access Television channel.
    b. The public must not perceive that the sponsor has editorial control over the content of any portion of programming telecast on the Public Access Television channel.
    c. The public must not conclude that any programming on the Public Access Television channel promotes sponsors' products, services or other business interests.
    d. Product placement in programming in exchange for sponsor support is prohibited.
3. Rules for Display of Sponsor Credits
    a. All sponsor credits must identify the sponsor by name and/or logo.
    b. Sponsor credits may not include:
        i. Any call to action or solicitation to purchase a product, i.e. any use of "you" or "your"; or slogans such as "Get Met. It Pays."
        ii. Superlatives, i.e. "…the most intelligent car ever built."
        iii. Direct comparisons, i.e. "…when a Cadillac just isn't good enough."
        iv. Price or value information
        v. Inducements to buy, i.e. "six months free service when you buy"
    c. Toll-free numbers or Web site addresses are acceptable if their purpose is only for the viewer to receive more information, and not to solicit sales.
    d. Sponsor credits may not exploit or take unfair advantage of the child audience for children's programming.

e. Sponsor credits may not create the perception that there is a connection between the program content and the sponsor's products or services.
f. Sponsor credits may only be displayed at the beginning and/or end of a program.
g. Program content may not be interrupted to provide sponsor credit.
h. No one sponsor credit may exceed fifteen 15 seconds in length. No single program may have a sequence of sponsor credits that exceeds sixty (60) seconds in length.
i. Credits for in-kind goods and/or services are acceptable but they must appear in context with normal production credits and may incorporate brands or logos.

PROVIDE TELEVISION STUDIO PRODUCTION SERVICES FOR USERS ON A FIRST-COME, FIRST-SERVED, NON-DISCRIMINATORY BASIS

Your Media will:

1. Produce a weekly program ("Open Mic") of no less than 30 minutes and no more than one hour in length that provides an open-studio opportunity for users to express their views, present information, or perform; not to exceed 10 minutes per person.
    a. The "Open Mic" program is owned and controlled by the City of Fayetteville.
    b. Your Media will conduct two (2) separate studio sessions of one (1) hour each during which users may record their "Open Mic" segments. The schedule of studio sessions is subject to approval of the Director of Media Services.
    c. All participants, residents and non-residents of Fayetteville appearing on the "Open Mic" program will be provided a document that informs them that what is presented on the "Open Mic" program must conform to all guidelines for other programming telecast on the Public Access Television channel.
    d. Non-residents of Fayetteville wishing to participate in the "Open Mic" service alone shall not be required to pay the $50 annual non-resident fee.
2. Produce programming for the users utilizing studio production laboratory sessions.
    a. Content of programming produced in studio laboratory sessions will be the responsibility of the producer requesting the production services.
    b. All technical aspects of production will be under the control and responsibility of Your Media.
    c. Producers requesting production services utilizing the studio laboratory sessions will be notified that they will be working in a classroom/training environment. The experience of the participants in the class will be priority.
    d. Your Media will not charge any production fees for programming produced in studio laboratory sessions.
    e. Studio laboratory sessions may not be used to produce series programming.
    f. Production slots in the studio laboratory sessions will be scheduled on a first-come, first-served basis. A producer may not schedule more than one session at a time.
3. Produce and telecast an electronic community bulletin/message board for residents to announce events or other information.

4. Produce and telecast a disclaimer at random times during the program schedule, no fewer than six (6) times per day, which contains the following message in both video and audio format: "Fayetteville Public Access Television is a public service provided by the City of Fayetteville to help residents exercise their First Amendment Rights. The views and opinions expressed on this channel are not necessarily those of the staff or management of Fayetteville Public Access Television or the City of Fayetteville."

EDUCATE FAYETTEVILLE RESIDENTS AND NON-RESIDENTS IN THE PRODUCTION AND DISTRIBUTION OF NON-COMMERCIAL TELEVISION PROGRAMMING

Your Media will provide training and technical support for users so they may learn the techniques and details of video production and television programming distribution.

Your Media will:

1. Create and implement a training curriculum that emphasizes technical proficiency and production quality. The curriculum will contain at least 3 core classes in the subjects of:
    a. Basic Field Production
    b. Basic Video Editing
    c. Basic Studio Production/Crew Positions

    And at least 3 advanced classes in the subjects of:
    a. Advanced Field Production
    b. Advanced Video Editing
    c. Advanced Studio Production

    The syllabus for each class will be available on the Fayetteville Public Access Television web site.
2. Offer a minimum of six (6) free classes a week taught by Your Media staff in various disciplines of video production and programming distribution.
    a. At least three (3) classes each week must be in the core subjects.
    b. At least two (2) classes each week must be in the advanced subjects.
    c. The studio production laboratory does not count toward the total of required classes.
3. Conduct a studio production laboratory session at least once per week that provides a "hands-on" training environment for students in Studio Production classes.
4. Create student evaluation criteria and methods that allow students to demonstrate proficiency in training both in writing and through practical application.
5. Require a minimum level of proficiency, as approved by the Director of Media Services, to achieve a passing grade in classes.
6. Maintain records of student performance and evaluations.
7. Provide training and development resources, and technical support, in addition to regular classes, to users while they are engaged in training or production activities.
8. Provide technical and production consultation to users who are producing outside programs.
9. Offer training in the use of all available methods of television programming distribution.
10. Ensure that instructors maintain a minimum level of competence in the operation of equipment, as approved by the Director of Media Services. This can be demonstrated through industry certification or actual demonstration of skills to the Director of Media Services or their designee. If an instructor fails to meet a minimum level of competence,

they will be prohibited from teaching any classes or workshops until such time as they have demonstrated to the Director of Media Services, or his/her designee, they have achieved that level.

11. Create and publish a monthly schedule of classes and workshops, a minimum of 30 calendar days prior to conducting the classes. The schedule will, at a minimum, be published in the following media:
    a. The Public Access Television channel's on-air bulletin board.
    b. The Public Access Television channel's web site.
    c. A publicly accessible bulletin board at the Television Center.
    d. Your Media's email address list that is maintained as an opt-in list in the central records database.
    e. Made available for publication in other media that wish to do so.
12. Ensure Your Media staff stays current with emerging technologies through professional development that includes technical training.
13. Provide reports on training and education activity as required by the City.

PROVIDE EQUAL ACCESS TO TELEVISION PRODUCTION EQUIPMENT AND FACILITIES TO ALL USERS ON A FIRST-COME, FIRST-SERVED, CONTENT-NEUTRAL, NON-DISCRIMINATORY BASIS.

The City of Fayetteville provides video production equipment and facilities as a public service to the users so they may learn and apply the skills and techniques of television production. Your Media will not require, solicit or accept any compensation of any kind, beyond that agreed upon in this contract and provided by the City, in return for the opportunity for residents to use any video production equipment or facilities provided by the City of Fayetteville.

The City of Fayetteville Director of Media Services is responsible for the use designation of equipment and facilities within the Television Center. Your Media is responsible for the management of equipment and facilities designated for use by the public and designated for use by Your Media staff in the execution of the services described herein.

<u>Your Media will:</u>

1. Maintain accurate and detailed inventory records of all equipment designated for use by the public and use by Your Media staff.
2. Assist City staff in maintaining accurate and detailed inventory records of all equipment in the Television Center.
3. Maintain accurate and detailed records of the identification and use of all equipment that is designated for use by the public.
4. Maintain accurate and detailed records and identification of users to check-out or utilize equipment designated for use by the public. Each record will contain, at a minimum, the user's name, address, telephone number, the area(s) in which they are qualified, and the expiration date of their qualification(s). A photocopy of the documentation of residency must be included.

5. Implement a plan to determine, either by elapsed time or demonstrated proficiency, the need for a qualified user to re-take any classes to maintain their qualification to use equipment or facilities of the Television Center.
6. Maintain a reservation system and procedure for qualified users to be able to reserve the use of equipment and facilities designated for public use.
7. Maintain check-in and check-out procedures for equipment and facilities designated for public use.
8. Design and utilize procedures and checklists that will ensure equipment is checked for full functionality upon return by a user. Records will be kept of the condition of equipment on check-out and return.
9. Perform minor repairs, maintenance and upkeep of equipment and facilities as directed by City staff.
10. Actively monitor the use of editing and studio facilities.
11. Ensure that a staff member who is fully qualified in the operation of all equipment or facilities available for public use is present and available at all times to any resident who is using, or wishes to use, any equipment or facilities designated for public use.

Your Media will not:

1. Allow, or continue to allow, the use of any equipment or facilities owned or controlled by the City of Fayetteville and provided for the use of the public or Your Media under this contract to be utilized in any way that may violate any Federal, State, or local law.

MAINTAIN A PROGRAM LIBRARY AND MANAGE ARCHIVE/PROGRAM RIGHTS

The City is committed to the preservation of Fayetteville's culture, history and legacy. This is demonstrated, in part, by support of the preservation of the programs and material telecast on the Public Access Television channel.

Producers will retain all rights to any program material or programming they create. All producers requesting their program to be telecast on the Public Access Television channel must sign a statement granting the City of Fayetteville non-exclusive rights for distribution and re-distribution of the program, either in whole or in part, as the City determines necessary. In the case of a resident who requests the telecast of a program, either in whole or in part, to which they do not hold the copyright, the resident will provide expressed, written consent from the program's owner granting the City of Fayetteville non-exclusive rights for distribution and re-distribution of the program, either in whole or in part, as the City determines necessary.

Your Media will create and maintain the necessary documentation, affidavits and statements, subject to the approval of the Director of Media Services, to be included in any forms used to document the request for the telecast of programming.

1. Your Media will maintain a program library containing copies of all inside and outside programs telecast on the Public Access Television channel.
2. Your Media will maintain a program library database of all programs telecast on the Public Access Television channel.

3. Your Media will ensure the library and program library database are maintained in an easily accessible manner.
4. Physical recording media containing programming for telecast on the Public Access Television channel shall become property of the City.
5. Your Media will ensure programs are archived as digital video files in the TV Center archive server system, unless otherwise determined by the Director of Media Services.
6. Under no circumstances will Your Media remove, or allow to be removed, any program materials or media from the Public Access Television channel program library or program library database, without the prior approval of the Director of Media Services.

CONDUCT OUTREACH AND COMMUNICATION ACTIVITIES WITH THE PUBLIC

1. Your Media will manage a procedure whereby residents can communicate their views or complaints regarding the programming or operations of the Public Access Television channel to Your Media and the City. All complaints or comments, from whatever source or however communicated, must be immediately communicated to the Director of Media Services. After a resident makes a complaint, either verbally or in writing, the public access outsourced provider manager, or designee, will follow this procedure:
    a. Document the complaint, recording:
        i. Date.
        ii. Time.
        iii. Nature of the complaint.
        iv. As many details as possible to facilitate the investigation of the complaint.
        v. Contact information of the complainant, if available.
    b. Immediately communicate the complaint to the Director of Media Services.
    c. Immediately communicate to the complainant their complaint is being investigated, and they will receive a determination, in writing, regarding their complaint within 3 business days.
    d. Provide a written response to the complainant detailing the investigation of their complaint, any findings thereof, and any action taken by the management of Your Media in response to the complaint. The response will also contain a statement that the complainant may appeal, in writing, any determination or action to the City of Fayetteville Director of Communications, c/o City of Fayetteville Television Center, 101 W. Rock Street, Fayetteville.
    e. Provide a copy of all correspondence and other pertinent materials to the Director of Media Services.
2. The management, staff, or members of the Board of Directors of Your Media will not identify the Public Access Television channel in any way, either expressed or implied, as belonging to, owned by, or controlled by Your Media.
3. The management, staff, or members of the Board of Directors of Your Media will not identify the City of Fayetteville Television Center, or the equipment contained therein, or any portion thereof, in any way, either expressed or implied, as belonging to, owned by, or controlled by Your Media.
4. The management, staff or members of the Board of Directors of Your Media will not identify themselves or their organization in any way, either expressed or implied, as “The City of Fayetteville” or as representing the City of Fayetteville.

5. In all communication from Your Media, the Public Access Television channel will be referred to and identified as "Fayetteville Public Access Television".
6. In all communication from Your Media, the entire production facility will be referred to as "The City of Fayetteville Television Center" or "The Television Center", as appropriate.
7. Your Media will maintain a process for effective communication with, and coordination among, all affected City programs and City staff.
8. Your Media will conduct a consistent community outreach effort designed to recruit new producers and trainees.
9. Your Media will provide information to the entire community about the nature and role of public access television; educate the community about the opportunities available for training, production and programming; and encourage groups and individuals to participate in training classes and production experiences.
10. Your Media will maintain a Fayetteville Public Access Television-branded web site for the promotion of Public Access Television services and the education of the public that includes, at a minimum, current information regarding program, production and class schedules; policies and procedures; class syllabi; and an internet forum for exchange of information between the City, Your Media, producers and trainees. Your Media may include a link to their organization's web site.
11. The City will provide one (1) bulletin board in a publicly accessible area of the Television Center for the use of Your Media. Information posted on the bulletin board must meet at least <u>one</u> of the following criteria:
    a. It is information from the City or public access operator regarding policies, procedures or regulations
    b. It is a request by a producer to recruit help for video productions
    c. It is a request to recruit producers for specific video production projects
    d. It is information directly related to the programming of the public access channel
    e. It is information directly related to opportunities for training and development in television production
    f. It is information that promotes:
        i. The City of Fayetteville
        ii. A non-profit, 501(c)3 organization that serves the citizens of Fayetteville
        iii. A government organization that serves the citizens of Fayetteville
    g. It is information that informs the public of an event or program sponsored by:
        i. The City of Fayetteville
        ii. A non-profit, 501(c)3 organization that serves the citizens of Fayetteville
        iii. A government organization that serves the citizens of Fayetteville

    Information shall not be posted on bulletin boards unless it meets <u>all</u> the following criteria:
    a. It shall not contain any type of direct appeal to purchase commercial goods or services, or promote the for-profit activities of individuals, groups or organizations
    b. It shall not contain any depiction of libelous, obscene, indecent or violent material
    c. It shall not be information campaigning for or in support of any political candidate or ballot issue
    d. It shall be no larger than standard "letter" sized paper, 8 ½" x 11"

e. It shall be legible
f. It shall not be a personal message or communication

All other bulletin boards in the Television Center are reserved for use by employees of the City or Your Media.

GENERAL ADMINISTRATION AND COMMUNICATION

Your Media will administer the activities and responsibilities described herein in compliance with all applicable Federal, State, or local laws, ordinances, rules, and regulations and within any and all agreements, rules, or regulations of any television programming distribution service or provider utilized to perform the activities or responsibilities described herein.

All communication between the City and Your Media with regard to contractual matters or operations of the Television Center will be directed through the Director of Media Services, or any other such representative as may be appointed by the City, and Your Media's duly appointed representative.

1. Your Media will develop, maintain, and enforce operational policies that assure for staff and users decorum and a professional working environment at the City of Fayetteville Television Center consistent with other City offices.
2. Your Media will abide by and enforce all policies, rules, and regulations regarding the use of the Television Center. The Director of Media Services is responsible for developing and publishing policies, procedures, rules, and regulations regarding the use of the Television Center facility and equipment. The Director of Media Services will make available to all users of the facility a reference manual that will contain all policies, procedures, rules, and regulations regarding the operation of the Public Access Television channel and the City of Fayetteville Television Center. The City reserves the right to exclude users or staff of Your Media from the Television Center for violations of policies, procedures, rules, and regulations.
3. The City shall make three telephone lines available for Your Media's business use.
4. Your Media shall be responsible for reimbursing the City for its own long distance telephone calls.
5. The City is not required to provide hardware and/or software for the establishment or maintenance of systems for the purpose of public internet access.
6. Your Media shall be responsible for the maintenance and repair of the hardware or software of computers installed for the office use of Your Media.
7. The City shall provide access to the Internet for Your Media at the same level provided to the Television Center. Your Media will be responsible for any access requirements above the level provided to the Television Center.
8. The City shall be responsible for the payment of the Television Center utilities, routine building and grounds maintenance and maintenance of the structure.
9. Your Media may use the City's current copier/printer at the Television Center for a charge of $.039 per page. If the City upgrades the copier/printer located in the Television Center, Your Media shall pay an adjusted charge per page, up to, but not to exceed the standard rate charged to City Departments and Divisions as determined annually.

10. Copier/printer maintenance costs will be paid by the City.
11. All business conducted and information maintained by Your Media or the Your Media Board of Directors in the execution of this contract is subject to the terms of the Arkansas Freedom of Information Act (FOIA).
12. Your Media will create an operations, training, and production schedule that maintains convenient business hours as well as a class schedule that allows producers to become certified through a combination of day, evening, and weekend classes. At a minimum Your Media will:
    a. Provide service to the users, a minimum of forty-five (45) hours per week through a minimum of five (5) days of operation.
    b. Create a schedule that provides service for a minimum of four (4) hours per scheduled operation day.
    c. Provide a staff member in the lobby to greet the public whenever the Television Center is open to the public.
    d. Observe all City Holiday closings and follow City of Fayetteville policies regarding closing for inclement weather.

    Your Media and the Director of Media Services will agree upon the operations schedule and Your Media will not vary from the agreed upon schedule without prior approval of the Director of Media Services.
13. Your Media shall submit monthly, quarterly, and annual reports, as defined by the Director of Media Services, on the execution of the activities and responsibilities described herein. Monthly reports shall be due by the 10th of the following month, or, if the 10th is not a regular business day, the next business day following the 10th. No contract payments will be made to Your Media while any required report is incomplete or overdue.
14. Your Media agrees to provide the City with a monthly financial report, due by the 10th of the following month, detailing:
    a. Expenditures of funds provided Your Media from the City
    b. Sources and amounts of other revenue generated from Public Access service activity
    c. Any other expenditures related to Public Access service activity

    The report shall be prepared by an independent certified public accountant, based on a modified accrual or cash basis method, summarizing activity during the preceding month and year to date. Said report shall include income and balance sheet statements.
15. Quarterly reports shall contain, but not be limited to:
    i) Financial reports, detailing:
        (a) Expenditures of funds provided Your Media from the City
        (b) Sources and amounts of other revenue generated from Public Access service activity
        (c) Any other expenditures related to Public Access service activity
    ii) Training reports, detailing:
        (a) Training activity provided users
        (b) Training activity for staff
        (c) Class and workshop activity
    iii) Certification activity
        (a) Certification of residents
            1. Number of new users qualified to use equipment

2. Number of new outside producers

(b) Certification of staff

iv) Production activity

(a) Production activity of users

(b) Production activity of staff

v) Equipment Utilization

vi) Feedback and Complaints

vii) Programming reports

(a) Itemization of programs telecast by:

1. Inside programs
2. Outside programs

(b) Itemization of program requestors by:

1. Inside programs
2. Outside programs

(c) Quantity of new and repeat inside programs

(d) Quantity of new and repeat outside programs

(e) Quantity of new program requestors

viii) Details of activity engaged in by Your Media to promote Fayetteville Public Access Television

16. In addition to the monthly, quarterly and annual reports, the following special reports and information shall be provided to the Director of Media Services:

a. Reports of stolen, missing or damaged equipment within one (1) working day of learning of each occurrence; and
b. Requests for changes in any policies or procedures that affect any services described herein; and
c. All corporate documents, including but not limited to Your Media's by-laws, policies, articles of incorporation, certification of compliance with affirmative action plan and EEO standards, and a list of Board members; and
d. At any reasonable time and as often as the City may deem necessary, Your Media shall make available to them, or any of their authorized representatives, within three (3) business days, all of Your Media's records related to all matters covered by this Agreement and shall permit the City to audit, examine, make excerpts and copies of such records, and to make audits of all contracts, invoices, materials, payrolls, records of personnel, conditions of employment and other data relating to or deemed pertinent to matters covered by this Contract; and
e. During the term of this Contract, Your Media shall make available to the City all notices of meetings of its Board of Directors, setting forth the time and place thereof. Such notice shall be delivered in a timely manner to give adequate notice and shall also include an agenda; and
f. Minutes of all meetings, if taken, and materials distributed in meetings of Your Media's Board of Directors, or committees thereof, shall be submitted to the City; and

Your Media will, upon request of the City, make available all supporting documentation and data relating to any reports required by this Contract or requested by the City.

PERFORMANCE EVALUATION

1. A performance evaluation will be conducted quarterly by the Director of Media Services to assess Your Media's effectiveness in providing the services described herein.
2. The City and Your Media may agree upon periodic performance measures. These measures will be documented as Addendum A of this contract.
3. Your Media will provide a method for receiving feedback, comments, input and suggestions from the public. This communication will be made available to the Director of Media Services as part of the quarterly evaluation process.
4. The Director of Media Services will immediately communicate to Your Media any violations of this contract as may come to his/her attention so that Your Media may have an opportunity to correct such violations in a timely manner.
5. Quarterly evaluations will be communicated to the City and made publicly available, consistent with the process for oversight.

CONTRACT PERIOD

The contract period will be from January 1, 2025, until December 31, 2025. Either party may cancel this contract at any time with a thirty (30) day written notice. This contract may be renewed by the parties per year for up to four additional one-year terms.

FUNDING

The City hereby agrees to pay Your Media the monthly sum of $18,393.75 for services performed under the terms of this contract for 12 months. Each monthly payment will be remitted on or before the 15th day of each month, beginning January 15, 2025, unless Your Media fails to comply with the expressed terms of this contract. The City reserves the right to withhold contract payments to Your Media unless Your Media is deemed in full compliance with the contract or until all contract violations are corrected.

FUTURE ADDITIONAL SERVICE OPTIONS

Upon any renewal, the City of Fayetteville reserves the right to add services, along with any additional costs, to this agreement, including, but not limited to, Education Channel operation, management or services and/or expansion of Public Access operations or services.

LEGAL AUTHORITY

Your Media assures and guarantees that it possesses the legal authority to enter into this Agreement. Further, that the person or persons signing and executing this Agreement on behalf of Your Media have been fully authorized by Your Media to execute this Agreement. That such authority is evidenced pursuant to a proper, appropriate and official motion and resolution, which was passed and approved specifically to enter into this Agreement and shall legally bind Your Media to all the terms, performances, and provisions here set forth. A copy of such resolution shall be provided upon execution of this Agreement. The City may exercise its right to either temporarily suspend or permanently terminate this Agreement if there is a dispute as to the legal authority of Your Media or the person signing the Agreement. The City shall not be obligated to pay Your

Media for any performance of the provisions of this Agreement after the City has suspended or terminated this Agreement as provided in this Section.

PERSONNEL
Your Media shall adequately staff the Public Access operation to meet the services and duties outlined in this agreement. Both City staff and Your Media staff will be expected to work together in a cooperative manner within the Television Center. Personnel policies shall be established by Your Media and shall be available for examination by the City.

Upon termination of any employee from either the City or Your Media, it is understood that any violation of policy or procedure serious enough to require termination is also grounds for exclusion from the Television Center.

EQUAL OPPORTUNITY
Your Media shall comply with all applicable equal opportunity, affirmative action, and ADA laws or regulations, including those of the City of Fayetteville.

INSURANCE
Your Media shall obtain and keep in force during the term of this agreement a policy of public liability and property damage insurance. Your Media shall provide continued proof of coverage in its quarterly reports. The coverage, at a minimum, shall be in the following amounts:

General Liability

1.	General Aggregate	$1,000,000
2.	Products/Completed Oper. Aggr.	$1,000,000
3.	Each Occurrence	$100,000
4.	Fire Damage (any one fire)	$50,000
5.	Medical Expense (any one person)	$5,000

Worker's Compensation for all employees as required by Arkansas Statute.

Bonding: Your Media shall obtain a fidelity bond covering all persons handling funds received or disbursed and/or signing or co-signing checks to disburse funds under this agreement, within 10 days of the contract execution. The fidelity bond shall be in an amount equal to 10% of the city grant award or $5,000, whichever is less. Your Media shall furnish the city proof of an adequate fidelity bond prior to the first payment of funds under this agreement.

POLITICAL/SECTARIAN ACTIVITY
Your Media shall not initiate or sponsor political or religious programming. Your Media shall not engage in any political activity. Your Media shall not directly produce any programs nor participate in any activities that establish or promote any religion or prohibit the free exercise thereof.

HOLD HARMLESS

It is expressed, understood and agreed by both parties that the City is contracting with Your Media as an independent contractor and that as such, Your Media shall save and hold the City, its officers, agents, and employees harmless from all liability of any nature of any kind, including costs and expenses for, or on account of, any claims, audit exceptions, demands, suits or damages of any character whatsoever resulting from injuries or damages sustained by persons or property, resulting in whole or in part from the performance or omission of any employee, agent or representative of Your Media. This Agreement shall not be construed in any manner or form as a waiver of that Tort Immunity as set out under Arkansas Law.

CONFLICT OF INTEREST

Your Media covenants that neither it nor any member of its Board of Directors currently has any interest or shall acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of services required to be performed under this Agreement. Your Media further covenants that in the performance of this Agreement no person having such interest shall be employed or appointed as a member of its Board of Directors.

Your Media further covenants that no member of its Board of Directors or its staff or employees shall possess any interest in or use their position for a purpose that is or gives the appearance of being motivated by desire for private gain for themselves or others, particularly those with which they have family, business, or other ties.

No officer, member, or employee of the City and no member of its governing body who exercises any functions or responsibilities in the review or approval of the undertaking or carrying out of this Agreement shall participate in any decision relating to the Agreement which affects his or her personal interest or the interest of any corporation, partnership, or association in which he has a personal financial direct or indirect interest; or have any personal financial interest, direct or indirect, in this Agreement or the proceeds thereof.

CONTRACT ENTIRE AGREEMENT

This Agreement constitutes the entire agreement between the parties hereto, and any prior agreement, whether written or oral, shall have no force or effect. Any subsequent agreements will have no effect unless properly executed in writing and recorded as an addendum to this Agreement.

SEVERABILITY

If any section, subsection, sentence, clause, phrase, or word of this agreement is held to be invalid or unconstitutional by any court of competent jurisdiction, such section, subsection, sentence, clause, phrase, or word will be deemed as a separate, distinct and independent provision, and such holding will not affect the validity of the remaining provisions of this agreement.

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-768

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Susan Norton, Chief of Staff
Jonathan Curth, Development Services Director
Britin Bostick, Long Range Planning/Special Projects Manager

FROM: Kylee Cole, Long Range & Preservation Planner

SUBJECT: **Application for a Certified Local Government Grant from the Arkansas Historic Preservation Program for the 2025 grant year in the amount of $70,356 Submitted by CITY OF FAYETTEVILLE STAFF. The request is for a grant application requesting $70,000 for a city-wide windshield survey of historic properties and $356 for Historic District Commission training.**

RECOMMENDATION:
City staff recommends approval of a grant application for a Certified Local Government (CLG) Grant from the Arkansas Historic Preservation Program (AHPP) for the 2025 grant year in the amount of $70,000 for a city-wide historic property windshield survey and $356 for Historic District Commission training. The Historic District Commission (HDC) and the Black Heritage Preservation Commission (BHPC) joins staff in recommending the project.

BACKGROUND:
In July 2023 the Fayetteville City Council adopted the Heritage and Historic Preservation Master Plan. This Plan provided objectives and actions for historic preservation work for the next ten years (2023-2033). One of the five overall goals resulting from this plan calls for the City to “identify and protect historic properties for future generations” (Goal 3).

Protection of historic properties begins with the systematic and comprehensive survey of historical resources. A key Action Item to accomplish Goal 3, is to prepare and conduct a comprehensive city-wide windshield survey (3.4). A windshield-level survey consists of methodologically driving a large area to understand the composition and makeup and to note those properties or areas with the most potential to have historic significance. This project would focus on properties constructed before 1970. The information gathered by the survey includes architectural style or features, approximate construction date, and evaluation of threats and preservation prioritization. This proposed project is aligned with Action Items 3.4 – Windshield Survey, 3.6 – Historic District Outreach, 3.7 – Local Historic District Designation, 4.4 – Program Promotion, 4.7 – Learning Opportunities: Workshops, and 5.5 – Historic Contexts: Diverse Histories in the city’s Heritage & Historic Preservation Plan that was adopted by the City Council in July 2023.

Additionally, this year an in-person training will be available to the Historic District Commissioners and Long Range Planning staff in El Dorado, Arkansas, with training details including training date forthcoming. Training funds are encouraged by AHPP to be submitted with this grant application as the training funds are eligible for grant funding. This training is required to meet the criteria for a CLG and is aligned with Action Items 1.2 –

Commission Qualifications and 1.3 – Training of the city's Heritage & Historic Preservation Plan.

The Historic District Commissioners considered this grant proposal in their regular meeting on October 10, 2024 and concurred with staff's recommendation, voting 6-0-0 in favor of forwarding the grant application request to the City Council. Similarly, the Black Historic Preservation Commissioners considered the proposed city-wide windshield survey as a grant proposal on October 17, 2024 and voted 5-0-0 in favor of forwarding the grant application request to the City Council.

DISCUSSION:
The proposed projects for this grant application are a city-wide windshield survey of historic properties and HDC commissioner training. The documents attached are required for the grant application submittal.

1. City-Wide Windshield Survey of Historic Properties
The proposed project is a city-wide windshield survey of historic properties. The survey would include areas within incorporated Fayetteville and its Planning Area. According to the 2023 American Community Survey data, Fayetteville has approximately 7,089 housing units built in 1969 or earlier.

This survey would require a project consultant to provide the needed capacity to perform the work. Staff has solicited cost estimates from qualified and experienced professionals and has received a cost range of $100,000-$125,000 for the multi-phase project. The range in prices is due to the location of prospective consultants relative to Fayetteville and associated travel costs, time, and resources needed for research and the anticipated deliverables. Project budget estimates were gathered by communicating AHPP requirements for project deadlines and expectations to consultants who are active in the historic preservation field, experienced in this type of work, and meet Secretary of the Interior (SOI) qualifications. The partial funding requested from AHPP is to initiate the first phase of the project work for a portion of the city, and to request additional funds for subsequent phases as available.

Should this project receive a grant award, the outcomes and work products will provide the HDC and staff with a more clear understanding of the current state of historical resources in Fayetteville, provide vital background information for future in-depth surveying and preservation efforts, an advocacy tool for additional steps in the preservation process, and an important next step in maintaining momentum with action items identified in the Heritage & Historic Preservation Master Plan. The Fayetteville Historic District Commission and Black Heritage Preservation Commission continue to express a desire to serve the community by demonstrating that not only is valuable historic preservation work available through the CLG grant programs, but that local historic preservation work includes a thoughtful process to research, document, and evaluate the historic resources that need protection and stewardship.

2. Historic District Commission Training
The City of Fayetteville has seven appointed Historic District Commission Commissioners, most of whom have not yet attended a "CAMP" training, which is the Commission Assistance and Mentoring Program through the National Alliance of Preservation Commissions. Although the City of Fayetteville currently has only one structure protected by local historic ordinance, the community is considering whether to adopt additional protections for neighborhoods as we work through our Heritage & Historic Preservation Master Plan, which was primarily funded by a CLG grant. Should additional local historic district ordinances be an option, the Fayetteville HDC will need to be trained on best practices for reviewing Certificates of Appropriateness, which is one of the aspects of the CAMP training. Most of the Commissioners have expressed enthusiastic interest in an opportunity for additional training, particularly with their peers across the state. We are requesting funding at the current federal per diem and hotel rate for two commissioners to attend the training, which would be 2 x $178, or $356 total.

BUDGET/STAFF IMPACT:
Staff support for the project is offered as an in-kind match. A potential budget adjustment of up to $70,356 may be required if the grant funding is approved.

Application for a Certified Local Government Grant from the Arkansas Historic Preservation Program for the 2025 grant year in the amount of $70,356 Submitted by CITY OF FAYETTEVILLE STAFF. The request is for a grant application requesting $70,000 for a city-wide windshield survey of historic properties and $356 for Historic District Commission training.

A RESOLUTION TO AUTHORIZE THE APPLICATION FOR A CERTIFIED LOCAL GOVERNMENT GRANT FROM THE ARKANSAS HISTORIC PRESERVATION PROGRAM FOR 2025 IN THE TOTAL AMOUNT OF $70,356.00 FOR A CITY-WIDE WINDSHIELD SURVEY OF HISTORIC PROPERTIES AND HISTORIC DISTRICT COMMISSION TRAINING

WHEREAS, in July 2023 the Fayetteville City Council adopted the Heritage and Historic Preservation Master Plan that provided objectives and actions for historic preservation work for the next ten years (2023-2033); and

WHEREAS, one of the five overall goals resulting from the Heritage and Historic Preservation Master Plan calls for the City to "identify and protect historic properties for future generations"; and

WHEREAS, protection of historic properties begins with the systematic and comprehensive survey of historical resources with a key Action Item being to prepare and conduct a comprehensive city-wide windshield survey; and

WHEREAS, most members of the City's Historic District Commission have not yet attended a Commission Assistance and Mentoring Program training offered through the National Alliance of Preservation Commissions and, because the community is considering whether to adopt additional protections for neighborhoods as we work through our Heritage & Historic Preservation Master Plan, commissioners will need to be trained on best practices for reviewing Certificates of Appropriateness, which is one of the aspects of the CAMP training.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to submit an application for a Certified Local Government Grant from the Arkansas Historic Preservation Program for 2025 in the total amount of $70,356.00 for a city-wide windshield survey of historic properties and Historic District Commission training.

OMB Circular A-133 Audit Certification Form

Audits of States, Tribal and Local Governments, and Non-Profit Organizations

For Most Recent Fiscal Year Ending ___(month) 20___

Grantee:	
EIN:	**DUNS:**
Name of Authorized Chief Financial Officer:	
Address:	
Email:	Phone:

Purpose: The National Park Service (NPS) is required under the Office of Management and Budget (OMB) to monitor the Single Audit requirements of its grant recipients. This requirement ensures that federal funds are used for their authorized purposes. It also confirms that non-federal entities **expending** $500,000 or more in FY 2014 (or $750,000 or more in FY 2015) **in federal funds from all federal sources** during *their* most recently completed fiscal year, have submitted a Single Audit. OMB Circular A-133 can be found at http://www.whitehouse.gov/omb/circulars, and should be consulted when completing this form.

Directions: Your agency's Chief Financial Officer (CFO) must certify whether or not your agency/organization is subject to the Single Audit requirement by checking the appropriate box in Sections A and B and signing and dating the form. Failure to return a completed form will result in delay in processing your next grant award, withholding of federal awards or disallowance of costs, and suspension or termination of federal awards.

SECTION A
Check Appropriate Box:

☐ We **did not exceed** the $500,000/$750,000 federal expenditure threshold for the FY referenced above. A Single Audit or a Program Specific Audit is not required for this fiscal year. **If checked, skip Section B.**

☐ We **have exceeded** the $500,000/$750,000 federal expenditure threshold for the fiscal year referenced above. **If checked, complete Section B.**

SECTION B
Entities that ARE subject to the requirements of OMB Circular A-133

Complete the information below and check the appropriate box:

☐ We completed our last A-133 Audit on _____ for Fiscal Year ending _____.
There were **no** findings related to federal awards. No follow-up action is required.
Was a complete copy submitted to the Federal Audit Clearinghouse? ☐ Yes ☐ No

☐ We completed our last A-133 Audit on _____ for Fiscal Year ending _____.
There **were** findings related to federal awards. (If findings provide/email a copy of the audit with this form.)
Were any findings related to CFDA 15.904? ☐ Yes ☐ No
Was a complete copy submitted to the Federal Audit Clearinghouse? ☐ Yes ☐ No

☐ Our completed A-133 Audit will be available on _____ for Fiscal Year ending _____.
We will forward a copy of the audit report to the Federal Audit Clearinghouse at that time. If there are findings related to federal awards, we will also provide NPS a copy at that time.

I hereby certify that I am an individual authorized to complete this form. Further, I certify that the above information is true and correct and all relevant material findings contained in audit report/statement have been disclosed.

Signature of Authorized CFO: _____ Date: _____

Form Revised 08/2015

Frequently Asked Questions

Single Audit Certification Forms

Question:	**Why am I being asked to certify Fiscal Year 2014 when it is 2015?**
Answer:	Grantees that *EXPEND* $500,000/$750,000 or more of federal funds in *THEIR* 2014/2015 most recently completed fiscal year must conduct a single audit. This form is a way for NPS to monitor its grantees audit status, as required by the Office of Management and Budget (OMB).

Question:	**Who needs to fill out this form?**
Answer:	Your agency's Chief Financial Officer (or designee).

Question:	**Who must sign the Audit Certification Form?**
Answer:	The Chief Financial Officer of the agency, or his or his designee.

Question:	**Does NPS need a copy of the audit?**
Answer:	*ONLY* submit a copy of the audit to NPS if there are "findings" listed in it specific to CFDA 15.904 (Historic Preservation Grants-in-Aid). However, a complete copy of the audit MUST be submitted electronically to the Federal Audit Clearinghouse.

Question:	**What is an audit finding?**
Answer:	Audit findings are significant issues identified in the audit report, which are commonly items related to non-compliance with terms and conditions in an award. Findings typically include lack of timely reporting, internal controls not being in place to fulfill grant requirements, etc.

Question:	**What if there is a finding related to CFDA 15.904?**
Answer:	The NPS will review the finding and request a Corrective Action Plan from the grantee, outlining how this issue will be resolved.

Question:	**Does the audit requirement apply to our subgrantees who received federal pass-through funds?**
Answer:	Yes. Subgrantees are subject to A-133, Single Audit requirements as well. Grant funds can be used to pay for the audit process.

Question:	**Who do I contact if I have questions about this form?**
Answer:	Contact your NPS grant manager.

U.S. Department of the Interior

Certifications Regarding Debarment, Suspension and Other Responsibility Matters, Drug-Free Workplace Requirements and Lobbying

Persons signing this form should refer to the regulations referenced below for complete instructions:

Certification Regarding Debarment, Suspension, and Other Responsibility Matters - Primary Covered Transactions - **The prospective primary participant further agrees by submitting this proposal that it will include the clause titled, "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transaction," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.** See below for language to be used or use this form certification and sign. (See Appendix A of Subpart D of 43 CFR Part 12.)

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions - (See Appendix B of Subpart D of 43 CFR Part 12.)

Certification Regarding Drug-Free Workplace Requirements - Alternate I. (Grantees Other Than Individuals) and Alternate II. (Grantees Who are Individuals) - (See Appendix C of Subpart D of 43 CFR Part 12)

Signature on this form provides for compliance with certification requirements under 43 CFR Parts 12 and 18. The certifications shall be treated as a material representation of fact upon which reliance will be placed when the Department of the Interior determines to award the covered transaction, grant, cooperative agreement or loan.

PART A: Certification Regarding Debarment, Suspension, and Other Responsibility Matters- Primary Covered Transactions

---

CHECK____IF THIS CERTIFICATION IS FOR A PRIMARY COVERED TRANSACTION AND IS APPLICABLE.

(1) The prospective primary participant certifies to the best of its knowledge and belief, that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded by any Federal department or agency;

(b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State or local) terminated for cause or default.

(2) Where the prospective primary participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

PART B: Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion - Lower Tier Covered Transactions

---

CHECK_xx___IF THIS CERTIFICATION IS FOR A LOWER TIER COVERED TRANSACTION AND IS APPLICABLE.

(1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

DI-2010
June 1995
(This form replaces DI-1953, DI-1954, DI-1955, DI-1956 and DI-1963)

PART C: Certification Regarding Drug-Free Workplace Requirements

CHECK_x__IF THIS CERTIFICATION IS FOR AN APPLICANT WHO IS NOT AN INDIVIDUAL.

Alternate I. (Grantees Other Than Individuals)

A. The grantee certifies that it will or continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an ongoing drug-free awareness program to inform employees about--
(1) The dangers of drug abuse in the workplace;
(2) The grantee's policy of maintaining a drug-free workplace;
(3) Any available drug counseling, rehabilitation, and employee assistance programs; and
(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will --
(1) Abide by the terms of the statement; and
(2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency in writing, within ten calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to every grant officer on whose grant activity the convicted employee was working, unless the Federal agency has designated a central point for the receipt of such notices. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted --

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or
(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a) (b), (c), (d), (e) and (f).

B. The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

Check___if there are workplaces on files that are not identified here.

PART D: Certification Regarding Drug-Free Workplace Requirements

CHECK___IF THIS CERTIFICATION IS FOR AN APPLICANT WHO IS AN INDIVIDUAL.

Alternate II. (Grantees Who Are Individuals)

(a) The grantee certifies that, as a condition of the grant, he or she will not engage in the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance in conducting any activity with the grant;

(b) If convicted of a criminal drug offense resulting from a violation occurring during the conduct of any grant activity, he or she will report the conviction, in writing, within 10 calendar days of the conviction, to the grant officer or other designee, unless the Federal agency designates a central point for the receipt of such notices. When notice is made to such a central point, it shall include the identification number(s) of each affected grant.

PART E: Certification Regarding Lobbying
Certification for Contracts, Grants, Loans, and Cooperative Agreements

CHECK____IF CERTIFICATION IS FOR THE AWARD OF ANY OF THE FOLLOWING AND THE AMOUNT EXCEEDS $100,000: A FEDERAL GRANT OR COOPERATIVE AGREEMENT; SUBCONTRACT, OR SUBGRANT UNDER THE GRANT OR COOPERATIVE AGREEMENT.

CHECK___IF CERTIFICATION FOR THE AWARD OF A FEDERAL LOAN EXCEEDING THE AMOUNT OF $150,000, OR A SUBGRANT OR SUBCONTRACT EXCEEDING $100,000, UNDER THE LOAN.

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of an agency, a Member of Congress, and officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

As the authorized certifying official, I hereby certify that the above specified certifications are true.

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-748

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Chris Brown, Public Works Director
Susan Norton, Chief of Staff

FROM: Matt Casey, Engineering Design Manager

SUBJECT: **A Resolution expressing the willingness of the City of Fayetteville to utilize Federal-aid funds for the design and environmental phases of the I-49/Stephen Carr Memorial Blvd. Interchange Improvements Project**

RECOMMENDATION:
Staff recommends approval of the attached resolution for I-49/Stephen Carr Memorial Blvd. Interchange Improvements Project. The resolution provides for:

- The City understands that Federal-aid Surface Transportation Block Grant Program-Attributable funds are available for this project using the participating ratio of 80% Federal/20% City.
- The City will participate in accordance with its designated responsibilities for this project.
- The Mayor, or his designee, is authorized and directed to execute all appropriate agreements and contracts necessary to expedite the construction of this City project.
- The City pledges its full support and hereby authorizes the Arkansas Department of Transportation (ARDOT) to initiate action to implement this project.

BACKGROUND:
In 2012, the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA) designated the Fayetteville-Springdale-Rogers, AR-MO urbanized area as a Transportation Management Area (TMA). This TMA designation provides Surface Transportation Block Grant Program – Attributable (STBGP-A) funds to the Northwest Arkansas Regional Planning Commission (NWARPC) based on the 2010 Census Urbanized Area population of 295,083. The Urban Area continues to grow significantly to a recorded 373,687 population in the 2020 Census. In becoming a TMA, the Northwest Arkansas Regional Planning Commission, of which Fayetteville is a member, will have STBGP-A discretionary funding available at approximately $12,000,000 per year. Under current legislation, these STBGP-A funds can be utilized for all permitted transportation projects at the discretion of the TMA Policy Committee.

An application for federal funding of the I-49/Stephen Carr Memorial Blvd. Interchange Improvements Project was submitted to and selected by the Northwest Arkansas Regional Planning Commission (NWARPC). On May 22, 2024, the NWARPC approved funding of the design and environmental phases for $650,000 (80%) from STBGP-A funds, but the City must provide a 20% local match of $162,500 for a total of $812,500. Other project phases such as right of way, utilities and construction will be submitted for future year's available STBGP-A funding.

DISCUSSION:
The next step in this process is approval of the Agreement of Understanding with ARDOT. Therefore, a City Council resolution expressing the willingness of the City to utilize Federal-aid funds, and to provide matching funds for the Federal-aid dollars, and to authorize the Mayor to sign the project agreement is needed.

BUDGET/STAFF IMPACT:
This project will be based on an Agreement of Understanding with ARDOT in which Federal-aid money will pay 80% of the project amount and the City will pay 20%. Based on the total estimate of $812,500 for design and environmental phases, the federal aid portion will be $650,000 and the City's portion $162,500. (These numbers are subject to change as the project is developed and more detailed estimates are provided.) The Federal portion will be paid from the Surface Transportation Block Grant Program - Attributable (STBGP-A) funds. City funds will be from the Transportation Bond Program.

File #: 2024-748

A Resolution expressing the willingness of the City of Fayetteville to utilize Federal-aid funds for the design and environmental phases of the I-49/Stephen Carr Memorial Blvd. Interchange Improvements Project

A RESOLUTION TO EXPRESS THE WILLINGNESS OF THE CITY OF FAYETTEVILLE TO UTILIZE FEDERAL-AID SURFACE TRANSPORTATION BLOCK GRANT FUNDS IN THE AMOUNT OF $650,000.00 FOR THE DESIGN AND ENVIRONMENTAL PHASES OF THE I-49/STEPHEN CARR MEMORIAL BOULEVARD INTERCHANGE IMPROVEMENTS PROJECT, TO APPROVE A CITY MATCH IN THE AMOUNT OF $162,500.00, AND TO AUTHORIZE THE MAYOR TO SIGN AN AGREEMENT OF UNDERSTANDING WITH THE NORTHWEST ARKANSAS REGIONAL PLANNING COMMISSION AND THE ARKANSAS DEPARTMENT OF TRANSPORTATION FOR THE PROJECT

WHEREAS, the City of Fayetteville understands Federal-aid Surface Transportation Block Grant Program-Attributable funds are available at 80% federal participation and 20% local match to be used for the I-49/Stephen Carr Memorial Blvd. Interchange Improvements Project; and

WHEREAS, the City of Fayetteville understands that Federal-Aid funds are available for this project on a reimbursable basis, requiring work to be accomplished and proof of payment prior to actual monetary reimbursement; and

WHEREAS, this project, using federal funding, will be open and available for use by the general public and maintained by the City of Fayetteville.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas expresses its willingness to participate in accordance with its designated responsibilities in this project, including maintenance of this project and providing local matching funds in the amount of $162,500.00.

Section 2: That the City Council of the City of Fayetteville, Arkansas hereby authorizes the Mayor to execute all appropriate applications, agreements, and contracts necessary to expedite the construction of the above stated project.

Section 3: That the City Council of the City of Fayetteville, Arkansas pledges its full support and hereby authorizes the City of Fayetteville to cooperate with the Arkansas Department of Transportation to initiate action to implement this project.

Fayetteville, AR 72701

Re: I-49/Stephen Carr Memorial Blvd.
Intchng. Impvts.

Dear Mayor Jordan:

Reference is made to the Interstate 49 and Stephen Carr Memorial Boulevard Interchange Improvements project in Fayetteville which was awarded 2025 Surface Transportation Block Grant – Attributable funding by the Northwest Arkansas Regional Planning Commission.

In order to proceed, you and your Attorney must sign the enclosed Agreement of Understanding. Upon receipt of the Agreement, State and Federal-aid job numbers will be assigned and a copy of the executed Agreement of Understanding will be returned to you. When submitting the Agreement to the Department for execution, you will also need to complete Form LPA-005, Form LPA-018, and Form LPA-019. All referenced Forms are available in digital format at www.ardot.gov/LPA.

If you have any questions, please contact our Grant Procurement Section at (479) 360-7161 or LPA@ardot.gov.

Sincerely,

Keli Wylie

AGREEMENT OF UNDERSTANDING

BETWEEN

THE CITY OF FAYETTEVILLE

AND

THE NORTHWEST ARKANSAS REGIONAL PLANNING COMMISSION

AND

THE ARKANSAS DEPARTMENT OF TRANSPORTATION

In Cooperation with the
U.S. Department of Transportation, Federal Highway Administration

RELATIVE TO

Implementation of **Job 040966, I-49/Stephen Carr Memorial Blvd. Intchng. Impvts. (Fayetteville) (S) (**hereinafter called the "Project") as a Federal-aid Surface Transportation Block Grant Program – Attributable (STBGP>200K) project.

WHEREAS, funding in Infrastructure Investment and Jobs Act (IIJA) includes the following Federal-aid funds for certain local projects:

	Maximum Federal %	Minimum Sponsor %
Preliminary Engineering by Consultant	80	20
Right of Way/Utilities	80	20
Construction	80	20
Construction Engineering by Consultant	80	20
Department Administrative Costs	80	20

WHEREAS, the City of Fayetteville (hereinafter called the "Sponsor") has expressed its desire to use Federal-aid funds for the eligible Project and to provide necessary matching cash share for such funds; and

WHEREAS, the Sponsor has transmitted to the Arkansas Department of Transportation (hereinafter called the "Department") Resolution No. 67-24 from the Sponsor's governing body authorizing the Sponsor's Chief Executive Officer (CEO) to execute agreements and contracts with the Department for the Project; and

WHEREAS, the Northwest Arkansas Regional Planning Commission (hereinafter called the "Commission") awarded the Sponsor Federal-aid STBGP>200K funds; and

WHEREAS, funding participation will be subject to a limit of **$650,000** maximum Federal-aid STBGP>200K funds for the **design and environmental phases** of the Project and obligation limitation approved; and

WHEREAS, the Sponsor knows of no legal impediments to the completion of the Project; and

WHEREAS, it is understood that the Sponsor and the Department will adhere to the General Requirements for Recipients and Sub-Recipients Concerning Disadvantaged Business Enterprises (DBEs) (Form LPA-001) and that, as part of these requirements, the Department may set goals for DBE participation in the Project, ranging from 0% to 100%, that are practical and related to the potential availability of DBEs in desired areas of expertise; and

WHEREAS, the Department has published the Arkansas Local Public Agency Project Manual (available at ARDOT.gov) which outlines procedures and requirements which must be followed during development and construction of the Project; and

WHEREAS, the parties agree, unless specifically stated otherwise, that the provisions of this agreement are not intended to create or confer a third party benefit or right in any person or entity, not a party to this agreement.

IT IS HEREBY AGREED that the Sponsor, Commission, and the Department, in cooperation with the Federal Highway Administration (FHWA), will participate in a cooperative program for implementation and will accept the responsibilities and assigned duties as described hereinafter.

THE SPONSOR WILL:

1. Notify the Department in writing who the Sponsor designates as its full-time employee to be in responsible charge of the day to day oversight of the Project (Form LPA-005). If the designated full-time employee changes, the Sponsor must notify the Department by resubmitting Form LPA-005. The duties and functions of this person are:
    - Oversee project activities, including those dealing with cost, time, adherence to contract requirements, construction quality and scope of Federal-aid projects;
    - Maintain familiarity of day to day project operations, including project safety issues;
    - Make or participate in decisions about changed conditions or scope changes that require change orders and/or supplemental agreements;
    - During construction, visit and review the project on a daily basis;
    - Review financial processes, transactions, and documentation to ensure that safeguards are in place to minimize fraud, waste, and abuse;
    - Direct project staff, Sponsor or consultant, to carry out project administration and contract oversight, including proper documentation;
    - Be aware of the qualifications, assignments and on-the-job performance of the Sponsor and consultant staff at all stages of the project.
2. Initially submit to the Department $1,000 (20%) to be matched by $4,000 (80%) Federal-aid funds for Department administrative costs associated with state preliminary engineering, which include but are not limited to, on site meetings, environmental review, and plan and specification review. The Sponsor's final cost for this phase will be determined by actual Department charges to preliminary engineering.

3. Be responsible for hiring a consultant engineering firm(s) in accordance with the Local Agency Consultant Selection Procedures (Form LPA-002) to provide engineering services which include environmental documentation, preliminary engineering, and construction engineering for the Project. **NOTE: FHWA authorization and Department approval must be given prior to issuing a work order to the consultant for federal funds to be allowed in this phase.**

4. Prepare plans, specifications, and a cost estimate for construction. A registered professional engineer must sign the plans and specifications for the Project. (See Form LPA-003 for items to be included in the bid proposal.)

5. Make periodic payments to the consultant for preliminary engineering for the Project and request reimbursement from the Department. Reimbursement requests should be submitted, at minimum, every three (3) months and not more than once per month.

6. Request reimbursement from the Department for eligible expenditures related to the preconstruction phases of the Project.

7. Understand that **expenditures for preliminary or construction engineering performed by the Sponsor's forces are not eligible for reimbursement with federal funds**.

8. Prepare the necessary environmental documentation as required by FHWA and conduct any required public involvement meetings and public hearings.

9. Ensure that the plans and specifications are developed using the Department's standard drawings and Standard Specifications for Highway Construction (latest edition).

10. Ensure that the plans and specifications comply with the Americans with Disabilities Act (ADA), the American Association of State Highway and Transportation Officials (AASHTO) design standards, and all other applicable state and federal regulations, including airport clearance, when necessary, for the type of work involved.

11. Before acquiring property or relocating utilities, contact the Department's Right of Way Division to obtain the procedures for acquiring right of way and adjusting utilities in compliance with federal regulations. **NOTE: Failure to notify the Department prior to initiating these phases of work may result in all project expenditures being declared non-participating in federal funds.**

12. Acquire property in accordance with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (commonly referred to as the "Uniform Act").

13. Ensure the preparation of utility adjustment and right of way plans are in accordance with Arkansas State Highway Commission Policy.

14. Be responsible for all non-reimbursable costs associated with the Sponsor owned utilities as defined in the Department's Utility Accommodation Policy.

15. Be responsible for the matching share for all reimbursable costs associated with the Sponsor owned utilities as defined in the Department's Utility Accommodation Policy.

16. Provide a copy of the registered deed or other approved documentation and an appropriate certification stating the Sponsor's clear and unencumbered title to any right of way to be used for the Project (Form LPA-007). If property has been acquired for the Project, use Form LPA-006 for certification of the right of way. **NOTE: Any property that is to become Department right of way must be acquired in the Department's name.**

17. Submit plans at 30%, 60%, and 90% completion stages for Department review.

18. Submit a certification letter (Form LPA-008), including all items noted, to the Department when requesting authority to advertise the Project for construction bids.

19. Advertise for bids in accordance with federal procedures as shown in Form LPA-010. **NOTE: FHWA authorization and Department approval must be given prior to advertising for construction bids.**

20. Forward a copy of all addenda issued for the Project during the advertisement to the Department.

21. After bids are opened and reviewed, submit a Certification Letter Requesting Concurrence in Award (Form LPA-013), including all items noted, to the Department.

22. Prior to awarding the construction contract, submit a check for $1,000 (20%) to be matched by $4,000 (80%) Federal-aid funds for Department administrative costs on the Project during construction. The Sponsor's final share of cost for this phase will be determined by actual Department charges to construction engineering.

23. Prior to issuing the notice to proceed to the Contractor, the Sponsor must hold a pre-construction meeting with the Contractor and **must invite the Department's Resident Engineer assigned to the Project.**

24. Ensure that all work, material testing and acceptance, and inspection are conducted in accordance with the Department's Standard Specifications for Highway Construction (latest edition), Manual of Field Sampling and Testing Procedures, and Resident Engineer's Manual and with the plans, specifications, and all other applicable FHWA and Department procedures for the Project.

25. Make periodic payments to the consultant for construction engineering for the Project and request reimbursement from the Department. Reimbursement requests should be submitted, at minimum, every three (3) months and not more than once per month.

26. Make payments to the contractor for work accomplished in accordance with the plans and specifications and then request reimbursement from the Department on the Construction Certification and Reimbursement Request (CCRR) form (Form LPA-014). Reimbursement requests should be submitted, at minimum, every three (3) months and not more than once per month.

27. Attach LPA Report of Daily Work Performed (Form LPA-015) for all days that correspond with each CCRR submittal.

28. Prior to executing the work, submit change orders (Form LPA-022) to the contract to the Department's Resident Engineer assigned to the Project for review and approval for program eligibility.

29. Upon completion of the Project, hold a final acceptance meeting for the Project and submit the LPA Final Acceptance Report form certifying that the Project was accomplished in accordance with the plans and specifications (Form LPA-016). This form must be signed by the engineer performing construction inspection on the Project, the Department's Resident Engineer assigned to the Project, the Sponsor's full-time employee in responsible charge, and the Sponsor's CEO.

30. Maintain accounting records to adequately support reimbursement with Federal-aid funds and be responsible for the inspection, measurement and documentation of pay items, and certification of all work in accordance with the plans and specifications for the Project and for monitoring the Contractor and subcontractor(s) for compliance with the provisions of FHWA-1273, Required Contract Provisions, Federal-aid Construction Contracts, and Supplements.

31. Pay all unpaid claims for all materials, labor, and supplies entered into contingent or incidental to the construction of said work or used in the course of said work including but not limited to materials, labor, and supplies described in and provided for in Act Nos. 65 and 368 of 1929, Act No. 82 of 1935, and Acts amendatory thereof.

32. Agree that any and all claims for damages to property or injury to persons caused by any act or omission, negligence, or misconduct from the performance of work by the Sponsor's contractor on the Project shall be the sole responsibility of the Sponsor's contractor and in this regard the Sponsor shall require the contractor on the Project to procure and maintain a General Public Liability Insurance Policy during the duration of the Project which shall be endorsed to include broad form general liability and complete operations coverage on the Project. The contractor shall furnish the Sponsor with documentation of proof of liability insurance coverage with submission of the signed contract.

33. Agree that any claims, liability, costs, expenses, demands, settlements, or judgments arising from misconduct or the negligent acts or omissions of the Sponsor, its employees, agents or contractors in the performance of the Project and this Agreement must be presented to the Sponsor. Further, the Sponsor by acceptance of this grant, agrees that the Department and the Arkansas State Highway Commission, as the pass-through entity, have no duty or responsibility for the design, construction, maintenance or operation of the Project that is the subject of this grant, and, therefore shall have no liability related to the design, construction, maintenance or operation of the Project. The Sponsor also agrees to assume all risks associated with the work to be performed by its agents, employees, and contractors under this grant and Agreement and the Department and the Arkansas State Highway Commission, as the pass-through entity, shall not be responsible or liable for any damages whatsoever from the actions of the Sponsor, its employees, agents and contractors.

34. Assure that its policies and practices with regard to its employees, any part of whose compensation is reimbursed from federal funds, will be without regard to race, color, religion, sex, national origin, age, or disability in compliance with the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, The Americans with Disabilities Act of 1990, as amended, and Title 49 of the Code of Federal Regulations Part 21 (49 CFR 21), Nondiscrimination in Federally-Assisted Programs of the Department of Transportation.

35. Retain all records relating to inspection and certification, the Contractor's billing statements, and any other files necessary to document the performance and completion of the work in accordance with requirements of 2 CFR Part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Form LPA-017).

36. Grant the right of access to the Sponsor's records pertinent to the Project and the right to audit by the Department and FHWA officials.

37. Be responsible for 100% of all project costs incurred:

    - should the Project not be completed as specified;
    - should the Project be declared non-participating in federal funds, including any such award by the State Claims Commission; or
    - not provided by the FHWA.

38. Sign and transmit to the Department the Certification for Grants, Loans, and Cooperative Agreements (Form LPA-018), which is necessary for Project participation.

39. Repay to the Department the federal share of the cost of any portion of the Project if, for any reason, federal participation is removed due to actions or inactions of the Sponsor, its agents, its employees, or its assigns or the Sponsor's consultants or contractors or their agents. Such actions or inactions shall include, but are not limited to, federal non-participation arising from problems with design plans, specifications, construction, change orders, construction inspection, or contractor payment procedures.

40. Retain total, direct control over the Project throughout the life of all project improvements outside of the Department's right of way and **not**, **without prior approval from the Department**:

    - sell, transfer, or otherwise abandon any portion of the Project;
    - change the intended use of the Project;
    - make significant alterations to any improvements constructed with Federal-aid funds; or
    - cease maintenance or operation of a project due to the Project's obsolescence.

41. Be responsible for satisfactory maintenance and operation of all improvements and for adopting regulations and ordinances as necessary to ensure this. Failure to adequately maintain and operate the Project in accordance with Federal-aid requirements may result in the Sponsor's repayment of federal funds and may result in withholding all future Federal-aid.

42. Submit to the Department a Single Audit in accordance with the Office of Management and Budget (OMB) Circular A-133 each fiscal year that the Sponsor expends more than $750,000 of Federal-aid from any federal source including, but not limited to, the U.S. Department of Transportation. The fiscal year used for the reporting is based on the Sponsor's fiscal year. The $750,000 threshold is subject to change after OMB periodic reviews.

43. Promptly notify the Department if the Project improvements outside of the Department's right of way are rendered unfit for continued use by natural disaster or other cause.

44. Complete and transmit to the Department both pages of the Federal Funding Accountability and Transparency Act (FFATA) Reporting Requirements (Form LPA-019).

45. After each quarter of the calendar year, complete and transmit to the Department the LPA Project Quarterly Report Form (Form LPA-020) until the Project is complete.

THE COMMISSION WILL:

1. Provide up to $650,000 in Federal-aid STBGP>200K funds for the design and environmental phases of the Project as funds become available.

THE DEPARTMENT WILL:

1. Maintain an administrative file for the Project and be responsible for administering Federal-aid funds.
2. Review plans and specifications submitted by the Sponsor.
3. Reimburse the Sponsor 80% (Federal-aid share) for all eligible costs related to preconstruction phases of the Project.
4. Notify the Sponsor when right of way and/or utility plans are approved, and the Sponsor may proceed with right of way acquisition and/or utility adjustments.
5. Upon receipt of the Sponsor's certification of right of way (property) ownership, provide the appropriate documentation to the file.
6. Ensure substantial compliance with federal contracting requirements through review of the bidding proposal for inclusion of required federal forms, review of the administration of the DBE program provisions, and general compliance with 23 CFR 635.
7. Advise the Sponsor when to proceed with advertisement of the Project for construction bids.
8. Review bid tabulations and concur in award of the construction contract for the Project.
9. Ensure that the Sponsor and the Sponsor's consultant provide adequate supervision and inspection of the Project by performing periodic inspections with the Sponsor's representatives and their consultant to verify that the work being performed by the Sponsor's contractor, and documented and certified by the Sponsor, meets the requirements of the Project plans, specifications, and all applicable FHWA and Department procedures. The Department intends to perform these inspections, at a minimum, when the construction work is approximately 10% and 50% completed. The Department will also participate in the final inspection of the Project.
10. Review and approve any necessary change orders for project/program eligibility.
11. Reimburse the Sponsor 80% (Federal-aid share) for eligible construction costs approved in the CCRR form (Form LPA-014). This reimbursement will be limited to the maximum Federal-aid amount and to the federal amount available at the time payment is requested. If the payment requested exceeds the Federal-aid available at the time, the difference will be reimbursed as additional Federal-aid for the Project becomes available.
12. Subject to the availability of Federal-aid allocated for the Project, pay the Sponsor the remaining amount due upon completion of the Project and submittal of the certified LPA Final Acceptance Report form (Form LPA-016).
13. Provide all form updates via email to the contact as shown on Form LPA-005.
14. Be reimbursed for costs involved in performing all the services listed above.

IT IS FURTHER AGREED that the Department reserves the right to cancel the Project without liability against the Department for any reason including, but not limited to, unreasonable delay or lack of progress, the Sponsor is unable to provide an audit-worthy reason for the substantial delay in the project development or completion process, or the Sponsor is unresponsive to the Department's requests.

IT IS FURTHER AGREED that should the Sponsor fail to fulfill its responsibilities and assigned duties as related in this Agreement, such failure may disqualify the Sponsor from receiving future Federal-aid highway funds.

IT IS FURTHER AGREED that should the Sponsor fail to pay to the Department any required funds due for project implementation or fail to complete the Project as specified in this Agreement, or fail to adequately maintain or operate the Project, the Department may cause such funds as may be required to be withheld from the Sponsor's Motor Fuel Tax allotment.

IN WITNESS WHEREOF, the parties thereto have executed this Agreement this _____ day of _____, 20____.

Agreement of Understanding between:

The City of Fayetteville, Northwest Arkansas Regional Planning Commission, and the Arkansas Department of Transportation relative to:

Implementation of the I-49 & Stephen Carr Memorial Boulevard Interchange Improvements Project.

ARKANSAS DEPARTMENT OF TRANSPORTATION
NOTICE OF NONDISCRIMINATION

The Arkansas Department of Transportation (ARDOT) complies with all civil rights provisions of federal statutes and related authorities that prohibit discrimination in programs and activities receiving federal financial assistance. Therefore, ARDOT does not discriminate on the basis of race, sex, color, age, national origin, religion (not applicable as a protected group under the Federal Motor Carrier Safety Administration Title VI Program), disability, Limited English Proficiency (LEP), or low-income status in the admission, access to and treatment in ARDOT's programs and activities, as well as ARDOT's hiring or employment practices. Complaints of alleged discrimination and inquiries regarding ARDOT's nondiscrimination policies may be directed to Civil Rights Officer Joanna P. McFadden (ADA/504/Title VI Coordinator), P. O. Box 2261, Little Rock, AR 72203, (501) 569-2298, (Voice/TTY 711), or the following email address: joanna.mcfadden@ardot.gov.

Free language assistance for Limited English Proficient individuals is available upon request.

This notice is available from the ADA/504/Title VI Coordinator in large print, on audiotape and in Braille.

Form LPA-001

GENERAL REQUIREMENTS
FOR
RECIPIENTS AND SUB-RECIPIENTS
CONCERNING DISADVANTAGED BUSINESS ENTERPRISES

It is the policy of the U. S. Department of Transportation that disadvantaged business enterprises (DBEs) as defined in 49 CFR Part 26 shall have the maximum opportunity to participate in the performance of contracts financed in whole or in part with Federal funds under this Agreement. Consequently, the DBE requirements of 49 CFR Part 26 apply to this Agreement.

The recipient or its contractor agrees to ensure that DBEs as defined in 49 CFR Part 26 have the maximum opportunity to participate in the performance of contracts and subcontracts financed in whole or in part with Federal funds provided under this Agreement. In this regard all recipients or contractors shall take all necessary and reasonable steps in accordance with 49 CFR Part 26 to ensure that DBEs have the maximum opportunity to compete for and perform contracts. Recipients and their contractors shall not discriminate on the basis of race, color, national origin, or sex in the award and performance of DOT-assisted contracts.

If as a condition of assistance the recipient has submitted and the Department has approved a disadvantaged business enterprise affirmative action program, which the recipient agrees to carry out, this program is incorporated into this financial assistance agreement by reference. This program shall be treated as a legal obligation and failure to carry out its terms shall be treated as a violation of this financial assistance agreement. Upon notification to the recipient of its failure to carry out the approved program, the Department shall impose such sanctions as noted in 49 CFR Part 26, Subpart F, which sanctions may include termination of the Agreement or other measures that may affect the ability of the recipient to obtain future DOT financial assistance.

The recipient shall advise each sub-recipient, contractor or subcontractor that failure to carry out the requirements set forth in 49 CFR Part 26, Subsections 26.101 and 26.107 shall substitute a breach of contract and after the notification of the Department, may result in termination of the agreement or contract by the recipient or such remedy as the recipient deems appropriate.

(NOTE: Where appropriate, the term "recipient" may be modified to mean "sub-recipient", and the term "contractor" modified to include "subcontractor".)

LOCAL AGENCY

CONSULTANT SELECTION PROCEDURES

Section I – Application *(These procedures do not apply to Design-Build Contracts.)*

These procedures apply to federally and state funded contracts for engineering and design related services for projects and are issued to ensure that a qualified consultant is obtained through an equitable qualifications-based selection procurement process and that the prescribed work is properly accomplished in a timely manner at a fair and reasonable cost.

Engineering and design related services are defined in 23 Code of Federal Regulations (CFR) Part 172 to include program management, construction management, preliminary engineering, design engineering, surveying mapping, or architectural related services with respect to a highway construction project. These services also include professional services of an architectural or engineering nature, as defined by State law, which are required to or may logically or justifiably be performed or approved by a person licensed, registered, or certified to provide the services with respect to a highway construction project. Contracts for these services that are paid with Federal-aid highway program (FAHP) funding will be awarded following these selection procedures.

The federal laws and regulations that govern the procurement of engineering and design related services with FAHP funds are:

- 23 United States Code (U.S.C.) 106 “Project approval and oversight”
- 23 U.S.C. 112 “Letting of contracts”
- 23 U.S.C. 114(a) “Construction Work In General”
- 23 U.S.C. 302 “State transportation department”
- 23 U.S.C. 315 “Rules, regulations, and recommendations”
- 23 U.S.C. 402 “Highway safety programs”
- 40 U.S.C. Chapter 11 – Selection of Architects and Engineers, §§1101 *et seq.,* commonly called the “Brooks Act”
- 2 CFR Part 200 “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards”
- 23 CFR Part 172 “Procurement, Management, and Administration of Engineering and Design Related Services”
- 48 CFR Part 31 “Contract Cost Principles and Procedures”
- 49 CFR Part 1.48(b) “The Federal Highway Administrator is delegated authority to administer the following provisions of title 23, Highways, U.S.C.”

In accordance with the above federal laws and regulations, the Arkansas Department of Transportation (Department) has approved these procedures for use by

the Local Agency for the "competitive negotiation" (qualifications-based selection) method of procurement as defined in 23 CFR §172.7, Procurement Methods and Procedures that complies with the Brooks Act (40 U.S.C. §§1101, *et seq.*).

The Local Agency will use these procedures for Federal-aid contracts and may elect to use them for non-Federal-aid contracts.

Section II – Advertisement for Letters of Interest

The Local Agency may employ a consultant engineering firm when a need exists for engineering services, and it is in the Local Agency's best interest to employ an engineer or engineering firm.

As a minimum, the Local Agency will advertise in a statewide newspaper, the Department's website and the Local Agency's website (if available), advising that consultant engineering services are being sought. In addition, the Local Agency may advertise in appropriate national trade magazines or websites for specialized services.

Interested firms must furnish:

1. A cover letter with the firm's response including primary contact information.
2. The firm's completed Architect-Engineer Qualifications Standard Form (SF) 330 Parts I and II (48 CFR §53.236-2(b)). (SF 330 is available on the Department's website.) http://arkansashighways.com/consultant_services/advertisements/advertisements.aspx
3. A current copy of the firm's equal employment opportunity policy required per Arkansas Code Annotated (Ark. Code Ann.) §19-11-104.
4. The firm's current copy (within 12 months) of the Department and Finance and Administration (DFA) Illegal Immigrant Contractor Disclosure Form (Ark. Code Ann. §19-11-105). https://www.ark.org/dfa/immigrant/index.php/user/welcome

Advertisements may be for either a specific single project; a group of projects; or for an on-call or indefinite delivery/indefinite quantity (IDIQ) for an established contract period (not to exceed 5 years), to be determined at a later date with specific task orders issued for each project. (23 CFR §172.9(a))

When advertising a specific project, the advertisement will describe the work in general terms allowing firms to evaluate their interest in performing the desired services.

When advertising a group of projects, a general description of work will be furnished. Firms will be asked to specify the projects they are interested in performing. When the Local Agency decides to proceed with a certain project, those firms having expressed interest in that project will be considered for selection.

When advertising for an on-call / IDIQ projects with later specified task orders, the advertisement will include a general description of work for the project task and the number of consultants anticipated to be selected.

If a solicitation fails to yield three qualified respondents, then the Local Agency may proceed with evaluation and selection if the Local Agency and the Department determines that the solicitation did not contain conditions or requirements that arbitrarily limited competition. Alternatively, the Local Agency may pursue procurement following the noncompetitive method when competition is determined to be inadequate and it is determined to not be feasible or practical to re-compete under a new solicitation. (23 CFR §172.7(a)(1)(iv)(D))

Solicitations will include language to comply with state procurement laws, rules, and regulations including but not limited to Ethical Standards (Ark. Code Ann. §19-11-708), Employee and Relative Disclosure, and Equal Opportunity Policy.

Interested firms are advised that in order to comply with state and federal requirements that the Local Agency will verify suspension and debarment actions and eligibility status of consultants in accordance with 2 CFR Part 1200 and 2 CFR Part 180.

Ark. Code Ann. §§19-11-701 through 19-11-714 addresses ethics and conflicts of interest. Federal regulations about conflicts of interest are described in 2 CFR §200.112, 23 CFR §1.33, and provisions of 23 CFR §172.7(4). No Local Agency employee may participate in selection, award or administration of a contract in which the Local Agency employee or any member of his or her immediate family has a financial, prospective financial, or other interest. Additionally, in accordance with Ark. Code Ann. §19-11-704(b) it is a breach of ethical standards for any person, including potential consultants, or parties to subagreements to engage in any conduct or behavior with other consultants, contractors, cities, counties, state agencies, or metropolitan/local planning organizations that may influence any public employee to breach the standards of ethical conduct provided by state and federal laws.

Section III – Selection Committee

The Local Agency will designate a Selection Committee (Committee) to evaluate and analyze the letters of interest (LOI) and proposals.

Section IV – Evaluation of Letters of Interest

The Committee will evaluate each consultant firm based on the criteria provided in the detailed LOIs in general as follows:

No.	Evaluation Factors for LOIs	Maximum Points Possible
1	Professional staff including the education, experience, number of personnel available, and any partnerships with sub-consultants	10
2	General and professional reputation, including responsiveness to civil rights and equal employment opportunity requirements and opportunities	10
3	*Past work performance	10
4	Experience with projects of a similar nature as those advertised	10
	Total Points for LOI	40

*Past performance or evaluations from other clients will be considered when the firm has not worked for the Local Agency previously.

Following their review, the Committee will prepare a short list (minimum of three) of the top ranked engineering firms and recommend that these firms submit detailed proposals for further evaluation.

Section V – Request for Proposal

The Local Agency will prepare a scope of work statement and request proposals from the engineering firms on the short list. For projects with FHWA oversight, which are identified by FHWA as Projects of Division Interest (PoDI) projects, the Local Agency will forward the scope of work statement to the Department and FHWA for review and approval before soliciting request for proposals (RFPs). A Local Agency's scope of work will typically include the following:

1. A detailed purpose and description of the work,
2. Services that will be furnished by the Local Agency,
3. Services that will be furnished by the consultant,
4. Deliverables to be provided,
5. Project conditions of the work,
6. Schedule for performance of the work,
7. Special conditions of the work including applicable standards, specifications, and policies, and
8. Assurance of participation of certified Disadvantaged Business Enterprises (DBE) in Federal-aid projects as Department goals for the Project are established.

The short-listed firms should submit proposals that contain the following:

1. A cover letter with primary contact information,
2. A detailed work plan that identifies the major tasks of work,
3. A list of major concerns associated with completing the work,
4. A detailed work schedule for specific projects as requested,
5. A manpower estimate for specific projects as requested, and
6. Updated Standard Form 330 Parts I and II, if necessary.

The Committee will review the proposals with particular attention to the five (5) listed evaluation factors for the proposals and will also consider the results determined in Section IV. The evaluation factors and their relative importance will be listed in the RFP if any of the factors are different from the list below.

No.	Evaluation Factors for Proposals	Maximum Points Possible
1	Obvious indication that the scope of work is clearly understood	20
2	Comprehensive, coherent, and detailed work plan	20
3	Realistic work schedule when applicable	10
4	Proposed working office location, need for a local office, and any local representative*	5
5	Identification of sub-consultants and responsiveness to DBE goals and opportunities	5
6	Total Points for LOI	40
	Total Points for Proposals	100

*Locality preference shall not be based on political or jurisdictional boundaries and may be applied on a project-by-project basis for contracts where a need has been established for a consultant to provide a local presence, a local presence will add value to the quality and efficiency of the project, and application of this criteria leaves an appropriate number of qualified consultants, given the nature and size of the project. (Consultants indicating that it will satisfy this factor in some manner, such as establishing a local project office, shall be considered to have satisfied this factor.)

Based on these evaluation factors, the Committee will rank the consultants based on the total score and submit the list to the Local Agency who will either:

1. Select one (1) firm to enter negotiations with; or
2. Select
   a. Multiple firms for an IDIQ contract; or
   b. Three or more firms to interview (a firm may present additional information concerning their proposal at the interview). After the interviews, the Committee will re-evaluate the firms based on the interview and the same evaluation factors as noted previously. The ranking list will be submitted to the Local Agency for review and final selection.

The Local Agency's contract file will contain records of the rankings and supporting data; however, the rankings will not be public information. Copies of the LOI advertisement, the rankings, and supporting data shall be submitted to the Department.

Notification must be provided to all responding consultants of the final selection of the most qualified consultant including the ranking of the top three consultants on projects where only one consultant is selected.

Section VI – Negotiation and Contract Preparation

Once a firm is selected for negotiation for a specific job or a group of projects, it will prepare a draft contract including a cost estimate for the project(s). The other firms on the short list will be advised of the firm selected, subject to successful negotiations. Prior to receipt or review of the draft contract and cost estimate, the Local Agency shall prepare a detailed independent estimate with an appropriate breakdown of the work or labor hours, types or classifications of labor required, other direct cost and consultant's fixed fee for the defined scope of work. The independent estimate shall serve as the basis for negotiation to ensure a fair and reasonable cost is obtained.

More than one firm may be selected for an on-call or IDIQ contract. The contract will establish a maximum ceiling price for work issued under the contract as well as an expiration date not to exceed 5 years, per 23 CFR Part 172. Individual task order cost estimates will be negotiated when issued.

The selected firm will prepare a draft contract based on a sample contract furnished by the Department. In accordance with the principles of 23 CFR 172, the draft contract must include an overhead rate that is approved by the Department. If the contract exceeds $250,000, in accordance with the Department's Indirect Cost Rate Audit Requirements, the indirect cost rate shall be verified through an audit performed by a certified public accountant on behalf of the consultant. If the contract is less than $250,000, and at least one of these conditions applies:

1. When there is insufficient knowledge of the consultant's accounting system
2. When there is previous unfavorable experience regarding the reliability of the consultant's accounting system
3. When the contract involves procurement of new equipment or supplies for which cost experience is lacking

then the Consultant shall provide the indirect cost rate verified through an audit performed by a certified public accountant on behalf of the consultant. The certified audit shall be provided by the selected firm prior to the submission of the final draft contract.

Pursuant to this requirement, the Department will notify the Local Agency if an audit by a certified public accountant for the selected firm is necessary. The certified audit needs to be provided by the selected firm prior to the submission of the final draft contract.

The Local Agency will review the draft contract proposal and either approve it as submitted or enter into negotiations with the selected firm to establish a contract and contract ceiling price that the Local Agency deems is fair and reasonable. If a satisfactory contract cannot be negotiated with the selected firm, negotiations will be

formally terminated. The Local Agency will then enter into negotiations with the second ranked firm. If negotiations with that firm fail, the Local Agency will formally terminate those negotiations and begin to negotiate with the third ranked firm, and so on. If the Local Agency cannot negotiate a satisfactory contract with any of the firms on the short list, the Local Agency shall either:

1. Request proposals from additional firms who have submitted LOIs and are considered competent and qualified; evaluate and rank the firms based on the criteria described in Section V; and continue the negotiation process, or
2. Terminate all negotiations and begin the selection process again, or
3. Pursue procurement following the noncompetitive method when competition is determined to be inadequate and it is determined to not be feasible or practical to re-compete under a new solicitation. (23 CFR §172.7(a)(1)(iv)(D))

When the Local Agency and the consultant agree the negotiated contract is fair and reasonable, the consultant will prepare a final draft and submit it to the Local Agency and the Department for review. After review and a determination that it is acceptable, the consultant will sign the contract. The Local Agency will then execute the contract. The contract will subsequently be submitted to the Department for final review and approval including funding. When approved, copies of the signed contract will be distributed within the Local Agency and to the consultant.

For projects with FHWA oversight and for on-call or IDIQ contracts where the consultant performs a management role utilizing federal funds, the Department will forward the initial and final drafts of the contract to FHWA for review and comment. The FHWA approves the final executed contract by stamp and signature and retains a copy.

After the Local Agency executes an on-call or IDIQ contract, it will assign specific projects by task order for the duration of the contract period. The consultant will prepare each task order based on the scope of work furnished by the Local Agency. The task order will include a manpower estimate and cost. The Local Agency will review the task order and approve it as submitted or negotiate with the consultant to establish a task order and task order amount that the Local Agency deems is fair and reasonable. After review and a determination that the task order is acceptable, the consultant will sign the task order. The Local Agency will then execute the task order. The task order will subsequently be submitted to the Department for final review and approval including funding. When approved, copies of the signed task order will be distributed within the Local Agency and to the consultant.

For PoDI projects, the Department will forward the initial and final drafts of the task order to FHWA for review, comment, and approval. Upon FHWA approval, the final task order is executed.

Section VII – Monitoring the Contract

The Local Agency may designate staff members as key liaisons for specific projects or for technical matters during the administration of the contract period.

The Local Agency will:

1. Maintain the contract files,
2. Arrange and attend periodic progress meetings,
3. Coordinate reviews and approval actions with other agencies when necessary,
4. Review progress payments,
5. Coordinate questions from the consultant,
6. Negotiate any change or amendment to the contract and submit to the Department for review and approval, and
7. Prepare an evaluation of the consultant's performance after completion of the contract. A copy of the evaluation shall be submitted to the Department.

Section VIII – Consultant Liability

The Local Agency will include a contract requirement that the consultant will warrant that all services and work products provided as part of the contract are performed in accordance to the prevailing industry standards, including standards of conduct and care, format and content, meet the satisfaction of the Local Agency, and conform to the requirements of the Agreement. This warrant is effective regardless of the degree of inspection and acceptance by the Local Agency or others.

If the consultant is required to correct or re-perform any work or services, the work will be performed at no cost to the Local Agency, and any work or services corrected or re-performed by the consultant shall also be warranted that it is free from defects in workmanship in accordance with industry standards. If the consultant fails or refuses to correct or re-perform, the Local Agency may, by contract or otherwise, correct or replace the deficient items or services with similar work or services, and charge the cost to the consultant or make an equitable adjustment in the consultant's reimbursement.

Acceptance is an act of an authorized representative of the Local Agency by which the Local Agency approves specific services, as partial or complete performance of the contract. Correction is the elimination of a defect.

REQUIRED CONTENTS OF BIDDING PROPOSALS
FEDERAL-AID PROJECTS

1) **FHWA-1273**

Each set of contract documents shall include FHWA-1273, "Required Contract Provisions, Federal-aid Construction Contracts," and such supplements that may modify the FHWA-1273. Copies of FHWA-1273 and supplements will be provided by the Department.

2) **Anti-Collusion and Debarment Certification**

The certification shall either be in the form of an affidavit executed and sworn to by the bidder before a person who is authorized by the laws of the State to administer oaths or in the form of an unsworn declaration executed under penalty of perjury of the law of the United States. The required form for the Anti-Collusion and Debarment Certification will be provided by the Department. The certification includes:

- Anti-collusion - A statement executed by, or on behalf of the person, firm, association, or corporation submitting the bid certifying that such person, firm, association, or corporation has not, either directly or in-directly, entered into any agreement, participated in any collusion, or otherwise taken any action, in restraint of free competitive bidding in connection with the submitted bid.

- Debarment - A statement regarding debarment, suspension, ineligibility and voluntary exclusion as required by Title 2 of the United States Code of Federal Regulations, Part 180 (2 CFR Part 180).

Failure to submit the executed Certification as part of the bidding documents will make the bid nonresponsive and not eligible for award consideration.

3) **Lobbying Certification**

This certification is required by 49 CFR 20. The form for this certification will be provided by the Department.

4) **Davis-Bacon Pre-determined Minimum Wage Rates**

Davis-Bacon requirements apply to all projects greater than $2,000 that are physically located within the existing right-of-way of a functionally classified city street or highway. The Davis-Bacon wage rates will be provided by the Department.

5) "Build America, Buy America" Provisions

Because federal highway funds are included in this project, "Build America, Buy America" requirements, as specified in Title 23 of the United States Code Section 313 and Title 23 of the Code of Federal Regulations Section 635.410, apply to this project. A section of the bidding documents should specify these requirements as part of the project and it should at least be noted in the advertisement for bids.

Re: ***Job #***
Job Name
County

Dear Mr. Wiley:

The following documents are submitted concerning the referenced project:

1. One set of plans and specifications.
2. A copy of the preliminary estimate of cost.
3. An unexecuted copy of the bid proposal form.

I certify that the plans, specifications and estimate were prepared by or under the direct supervision of a Professional Engineer licensed to practice in the State of Arkansas and that the plans and specifications comply with the Americans with Disabilities Act (ADA), the American Association of State Highway and Transportation Officials (AASHTO) design standards, and all other applicable state and federal regulations, including airport clearance when necessary, for the type of work involved.

I understand that if any project items are declared non-participating in federal funds due to failure to comply with any State or federal requirements, the ***(Sponsor Name)*** will promptly repay such funds to the Arkansas Department of Transportation (ARDOT). Further, I hereby authorize the Director of the Arkansas State Department of Finance and Administration to transfer such funds from the ***(Sponsor Name)'s*** Motor Fuel Tax allotment to the ARDOT's RRA Fund upon notification by the ARDOT Director of that such funds are due ARDOT and have not been paid by the ***(Sponsor Name)***.

Approval to proceed with advertisement of the project for bids is requested.

Sincerely,

NAME & OFFICE
(Sponsor's CEO)

GUIDELINES FOR ADVERTISING AND OPENING BIDS
FEDERAL-AID PROJECTS

Upon receipt of written authorization from the Arkansas Department of Transportation (Department), the project may be advertised for bids. The following minimum guidelines for advertising must be met:

- The minimum advertising period is three weeks (21 days).

- In addition to meeting the State requirements for advertising for construction projects, the project must be advertised a minimum of two times in a statewide newspaper (online or print versions are acceptable).

- The notice must contain: (1) the time, date, and place that sealed bids are to be accepted, opened, and publicly read; (2) a brief description of the kind or type of work contemplated; and (3) the place at which prospective bidders may obtain plans and specifications.

- The Sponsor will forward a copy of the approved advertisement to the Department once advertisement starts. Any addenda will also be sent to the Department during the advertisement period.

- The Sponsor will include the following language in the solicitation for bids:

  "The **(INSERT SPONSOR NAME)** hereby notifies all bidders that this contract is subject to applicable labor laws, non-discrimination provisions, wage rate laws and other federal laws including the Fair Labor Standards Acts of 1938. The Work Hours Act of 1962 and Title VI of the Civil Rights Act of 1964 also apply."

  "Build America, Buy America provisions apply to this project."

- All bids received in accordance with the terms of the advertisement shall be publicly opened and at a minimum, the total amount bid must be read aloud (the sponsor may choose to read the bids item by item).

- If any bid received is not read aloud, the name of the bidder and the reason for not reading the bid aloud shall be publicly announced at the letting.

- In accordance with 23 CFR 635.110, any procedures and requirements for qualifying and licensing contractors must be approved by the Federal Highway Administration.

- **Negotiation with contractors during the period following the opening of bids and before the award of the contract is strictly prohibited.**

Dear Mr. Wiley:

The following documents are submitted concerning the referenced project:

1. One set of bid tabulations.
2. Justification of award (if low bid amount is greater than 10% over the estimate).
3. A check for $1,000 for ARDOT construction involvement.

I certify that the referenced project was advertised and bids were received in accordance with the regulations governing Federal-aid projects and all other applicable state and federal regulations, and that this process has been reviewed and approved by the ***(Sponsor Name)'s*** Attorney. Additionally, I certify that the bid is being awarded to the lowest responsive and qualified bidder and that there has not been, nor will there be, any negotiations with the contractor or other bidders regarding the amount bid.

Your concurrence in the award of this contract to ***(INSERT CONTRACTOR NAME)*** for ***(INSERT LOW BID AMOUNT)*** is requested.

2 CFR Part 200

UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

Subpart D - Post Federal Award Requirements
Record Retention and Access

§200.334 Retention requirements for records.

Financial records, supporting documents, statistical records, and all other non-Federal entity records pertinent to a Federal award must be retained for a period of three years from the date of submission of the final expenditure report or, for Federal awards that are renewed quarterly or annually, from the date of the submission of the quarterly or annual financial report, respectively, as reported to the Federal awarding agency or pass-through entity in the case of a subrecipient. Federal awarding agencies and pass-through entities must not impose any other record retention requirements upon non-Federal entities. The only exceptions are the following:

(a) If any litigation, claim, or audit is started before the expiration of the 3-year period, the records must be retained until all litigation, claims, or audit findings involving the records have been resolved and final action taken.

(b) When the non-Federal entity is notified in writing by the Federal awarding agency, cognizant agency for audit, oversight agency for audit, cognizant agency for indirect costs, or pass-through entity to extend the retention period.

(c) Records for real property and equipment acquired with Federal funds must be retained for 3 years after final disposition.

(d) When records are transferred to or maintained by the Federal awarding agency or pass-through entity, the 3-year retention requirement is not applicable to the non-Federal entity.

(e) Records for program income transactions after the period of performance. In some cases recipients must report program income after the period of performance. Where there is such a requirement, the retention period for the records pertaining to the earning of the program income starts from the end of the non-Federal entity's fiscal year in which the program income is earned.

(f) Indirect cost rate proposals and cost allocations plans. This paragraph applies to the following types of documents and their supporting records: Indirect cost rate computations or proposals, cost allocation plans, and any similar accounting computations of the rate at which a particular group of costs is chargeable (such as computer usage chargeback rates or composite fringe benefit rates).

(1) *If submitted for negotiation.* If the proposal, plan, or other computation is required to be submitted to the Federal Government (or to the pass-through entity) to form the basis for negotiation of the rate, then the 3-year retention period for its supporting records starts from the date of such submission.

(2) *If not submitted for negotiation.* If the proposal, plan, or other computation is not required to be submitted to the Federal Government (or to the pass-through entity) for negotiation purposes, then the 3-year retention period for the proposal, plan, or computation and its supporting records starts from the end of the fiscal year (or other accounting period) covered by the proposal, plan, or other computation.

§200.335 Requests for transfer of records.

The Federal awarding agency must request transfer of certain records to its custody from the non-Federal entity when it determines that the records possess long-term retention value. However, in order to avoid duplicate recordkeeping, the Federal awarding agency may make arrangements for the non-Federal entity to retain any records that are continuously needed for joint use.

§200.336 Methods for collection, transmission, and storage of information.

The Federal awarding agency and the non-Federal entity should, whenever practicable, collect, transmit, and store Federal award-related information in open and machine-readable formats rather than in closed formats or on paper in accordance with applicable legislative requirements. A machine-readable format is a format in a standard computer language (not English text) that can be read automatically by a web browser or computer system. The Federal awarding agency or pass-through entity must always provide or accept paper versions of Federal award-related information to and from the non-Federal entity upon request. If paper copies are submitted, the Federal awarding agency or pass-through entity must not require more than an original and two copies. When original records are

2 CFR Part 200

UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

Subpart D - Post Federal Award Requirements
Record Retention and Access

electronic and cannot be altered, there is no need to create and retain paper copies. When original records are paper, electronic versions may be substituted through the use of duplication or other forms of electronic media provided that they are subject to periodic quality control reviews, provide reasonable safeguards against alteration, and remain readable.

§200.337 Access to records.

Records of non-Federal entities. The Federal awarding agency, Inspectors General, the Comptroller General of the United States, and the pass-through entity, or any of their authorized representatives, must have the right of access to any documents, papers, or other records of the non-Federal entity which are pertinent to the Federal award, in order to make audits, examinations, excerpts, and transcripts. The right also includes timely and reasonable access to the non-Federal entity's personnel for the purpose of interview and discussion related to such documents.

(a) *Extraordinary and rare circumstances.* Only under extraordinary and rare circumstances would such access include review of the true name of victims of a crime. Routine monitoring cannot be considered extraordinary and rare circumstances that would necessitate access to this information. When access to the true name of victims of a crime is necessary, appropriate steps to protect this sensitive information must be taken by both the non-Federal entity and the Federal awarding agency. Any such access, other than under a court order or subpoena pursuant to a bona fide confidential investigation, must be approved by the head of the Federal awarding agency or delegate.

(b) *Expiration of right of access.* The rights of access in this section are not limited to the required retention period but last as long as the records are retained. Federal awarding agencies and pass-through entities must not impose any other access requirements upon non-Federal entities.

§200.338 Restrictions on public access to records.

No Federal awarding agency may place restrictions on the non-Federal entity that limit public access to the records of the non-Federal entity pertinent to a Federal award, except for protected personally identifiable information (PII) or when the Federal awarding agency can demonstrate that such records will be kept confidential and would have been exempted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) or controlled unclassified information pursuant to Executive Order 13556 if the records had belonged to the Federal awarding agency. The Freedom of Information Act (5 U.S.C. 552) (FOIA) does not apply to those records that remain under a non-Federal entity's control except as required under §200.315. Unless required by Federal, state, local, and tribal statute, non-Federal entities are not required to permit public access to their records. The non-Federal entity's records provided to a Federal agency generally will be subject to FOIA and applicable exemptions.

CERTIFICATION FOR GRANTS, LOANS, AND COOPERATIVE AGREEMENTS

The undersigned certifies to the best of his knowledge and belief that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any Federal agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form - LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

3. The undersigned shall require that the language of this certification be included in the award documents for all sub awards at all tiers (including sub grants, and contracts and subcontracts under grants, sub grants, loans and cooperative agreements) which exceed $100,000, and that all such sub recipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Federal Funding Accountability and Transparency Act (FFATA)
Reporting Requirements

(For more information go to https://www.fsrs.gov/)

FFATA was signed on September 26, 2006. The intent is to empower every American with the ability to hold the government accountable for each spending decision. The end result is to reduce wasteful spending in the government. The FFATA legislation requires information on federal awards (federal financial assistance and expenditures) be made available to the public via a single, searchable website, which is www.USASpending.gov.

A Prime Grant Recipient (Arkansas Department of Transportation (hereinafter called ARDOT)) awarded a new Federal grant greater than or equal to $25,000 as of October 1, 2010 is subject to FFATA sub-award reporting requirements as outlined in the Office of Management and Budget guidance issued August 27, 2010. **ARDOT is required to file a FFATA sub-award report for any sub-grant awarded to a sub-awardee greater than or equal to $25,000.** As a sub-awardee, _____ shall provide the following information to ARDOT in order to fulfill FFATA reporting requirements:

- ✔ A Unique Entity Identifier (UEI) of the sub-awardee receiving the award and the parent entity of the recipient, should the sub-awardee be owned by another entity;
- ✔ The names and total compensation of the five most highly compensated officers of the sub-awardee **if** the sub-awardee in the preceding Federal fiscal year received 80 percent or more of its annual gross revenues in Federal awards; and $25,000,000 or more in annual gross revenues from Federal awards; and the public does not have access to information about the compensation of the senior executives of the sub-awardee through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986. See FFATA § 2(b)(1).

Required Sub-Awardee Information

(A) Sub-Awardee UEI: _____ UEI Expiration Date: _____

Parent (if applicable) UEI: _____ UEI Expiration Date: _____

(B) In the preceding completed Federal fiscal year, did your business or organization (the legal entity to which the UEI number entered above belongs) receive (1) 80 percent or more of its annual gross revenues in U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements; and (2) $25,000,000 or more in annual gross revenues from U.S. federal contracts, subcontracts, loans, grants, subgrants, and/or cooperative agreements?

Yes No

If "Yes" is selected, answer (C).

(C) Does the public have access to information about the compensation of the executives in your business or organization (the legal entity to which the UEI entered above belongs) through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986?

Yes No

If "Yes" is selected, visit http://www.sec.gov/edgar.shtml for reference.

If "No" is selected, answer (D).

(D) **If "No" was selected in Question "C"**, complete the following information for the five (5) most highly compensated executives in your business or organization (the legal entity to which the UEI entered above belongs). Amount should reflect the Total Compensation Amount in the preceding completed Federal fiscal year in U.S. whole dollars.

Sub-Awardee Names and Compensation of Most Highly Compensated Officers

1. Name: _____ Amount: $_____
2. Name: _____ Amount: $_____
3. Name: _____ Amount: $_____

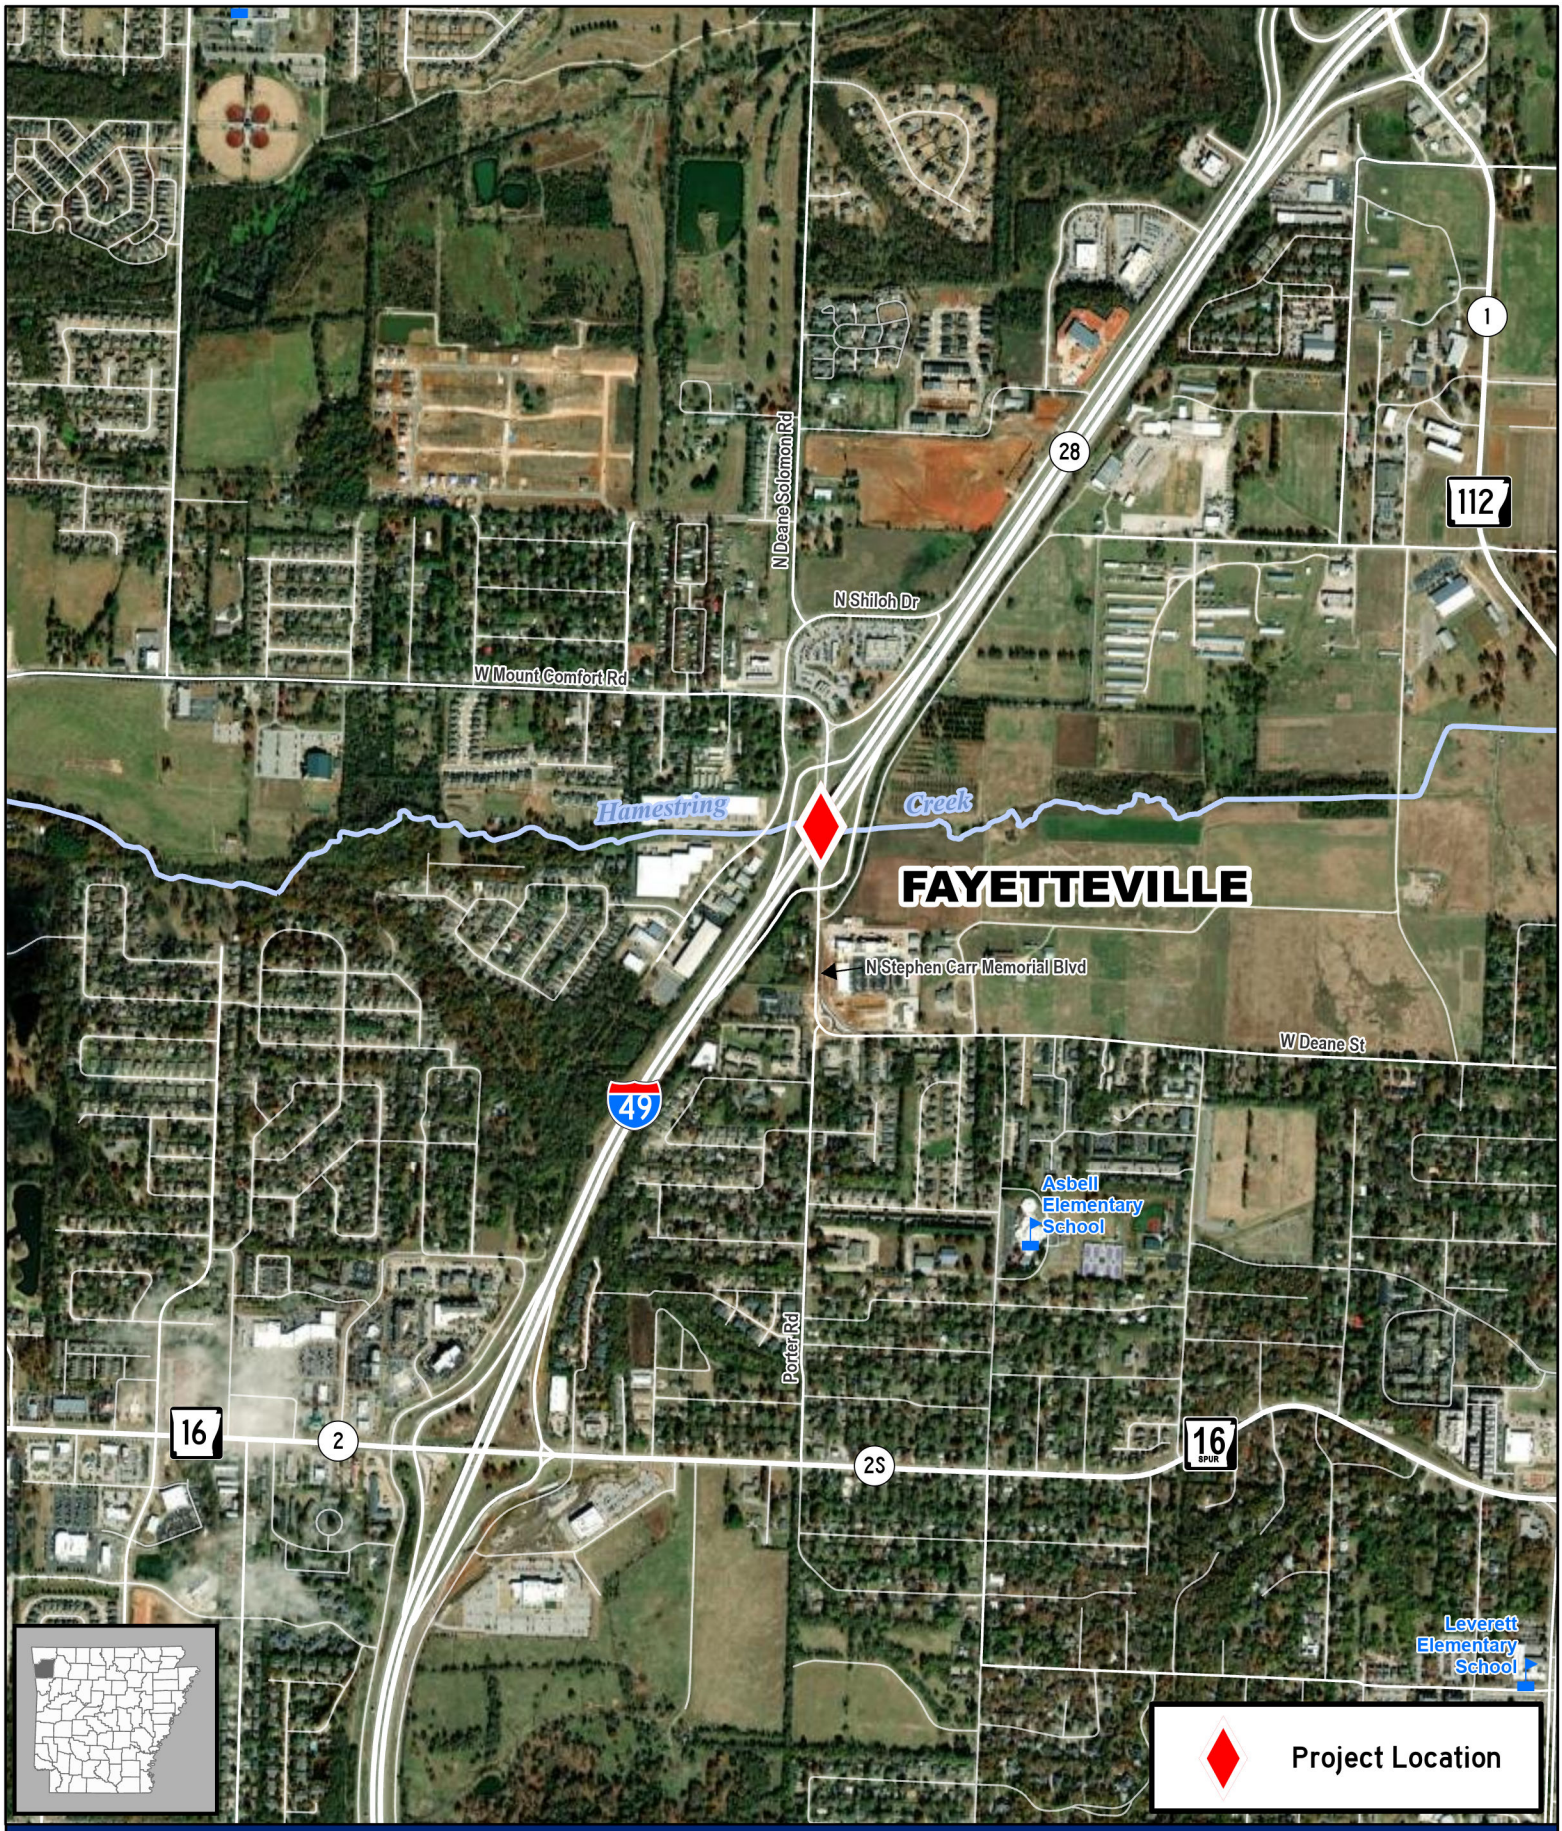
Title VI Requirements and Responsibilities

Title VI of the Civil Rights Act of 1964, prohibits discrimination based upon race, color, and national origin. Specifically, 42 USC 2000d states that *"No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.*"



ARDOT is a recipient of federal funds from the U.S. Department of Transportation modal agencies, including the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). All recipients/subrecipients of federal funding must comply with the requirements of Title VI of the Civil Rights Act of 1964 and other nondiscrimination statues, regulation, and authorities.

Therefore, the sponsor (subrecipient) must also comply with the requirements of Title VI and its responsibilities.

Upon receipt of ARDOT reimbursement, the subrecipient will be required to establish Title VI compliance. ARDOT's Title VI Coordinator or designee will contact the subrecipient to request the following information:

- **Name of designated Title VI/ADA/Section 504 Coordinator**
- **Notice of Nondiscrimination**
- **Complaint Procedure and Process**
- **Complaint Form**
- **Standard USDOT Title VI/Non-Discrimination Assurances**
    - Must be signed annually by highest ranking official

The Title VI Coordinator or designee will assist the subrecipient in establishing the information as needed. For further information or inquiries, please contact the Civil Rights Division at 501-569-2299.

Total NWARPC Federal Funds Awarded to Project: $650,000

Dear Mayor Jordan:

I am pleased to inform you the Stephen Carr Memorial Dr / I-49 Interchange Impvts. (Job No. TBD) was selected by the Northwest Arkansas Regional Planning Commission on May 22, 2024, for Federal Fiscal Year (FFY) 2025 NWARPC Surface Transportation Block Grant Program – Attributable (STBGP-A) funding.

The awarded FY2025 NWARPC STBGP-A funds and the required local match are shown below:

NWARPC STBGP-A	**$650,000**	**(80% Federal)**
City Match	**$162,500**	**(20% Local Match)**
Total	**$812,500**	

The NWARPC STBGP-A funding is subject to an obligation limitation and the total available funds may change after final FFY 2025 funding is published by the Federal Highway Administration (FHWA).

These funds are required to be obligated by the end of the Federal Fiscal Year that ends on September 30, 2025. All required submittals to Arkansas Department of Transportation (ARDOT) and required approvals for this project should be completed by August 15, 2025, to allow sufficient time to obligate the STBGP-A funds for this project.

ARDOT administers the Local Public Agency (LPA) program, including oversight support for the federal-aid project delivery and applicable provisions in Title 23, U.S.C., and processes reimbursement requests for the NWARPC funding award. Please refer to the ARDOT Local Public Agency Project Manual for more information. Required training for this program is being provided by ARDOT **on Thursday, July 18, 2024, from 9:00 am to 10:00 am** at the NWARPC office. Please send the appropriate staff member(s).

Please let us know if you have any questions or need additional information regarding this program.

Sincerely,

Tim Conklin
Executive Director

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-723

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Paul Becker, Chief Financial Officer

FROM: Steven Dotson, Internal Auditor

SUBJECT: **ARPA Peace at Home Family Shelter agreement**

RECOMMENDATION:
Recommend Council approval of a revision to the agreement and budget for the Peace At Home Family Shelter ARPA project

BACKGROUND:
Peace At Home Family Shelter submitted an application for the City of Fayetteville's 2022 American Rescue Plan Act subrecipient grant program in the amount of $686,500.00. Resolution 270-22 was passed on 11/15/2022, authorizing Mayor Jordan to sign a subrecipient agreement with Peace At Home Family Shelter. The subrecipient agreement between the City and the applicant was finalized in December of 2022. The purpose of this ARPA project was to provide for the expansion of the emergency shelter for survivors of domestic violence. Peace at home is requesting a substantial change to the scope of the project, which is the reason this item is being brought back to Council for discussion.

DISCUSSION:
Peace at Home Family Shelter has experienced an increased demand for services in the local community. Since the pandemic began, the unique number of survivors seeking services from Peace at Home is up almost 27% (2019- 973 households; 2024- 1,235 households). Since 2019, Peace at home has experienced a nearly 40% increase in the demand for emergency shelter services.

Peace At Home Family Shelter had identified a need to expand the domestic violence shelter and requested the use of City ARPA funds to do so. As indicated in the original application, the ongoing COVID- 19 pandemic made it more difficult and dangerous for victims of domestic violence seeking to flee abusive homes. Peace at Home Family Shelter originally proposed a renovation project for $686,500 to create 3 additional shelter bedrooms with bathrooms. This expansion would allow Peace at Home to provide safe, emergency shelter to approximately 60 additional adults and children fleeing domestic violence each year.

During the architectural design phase of the renovation project, Peace at Home experienced a large scale water pipe breakage which caused portions of the ceiling to collapse throughout the residential wing including areas designed for the storage expansion. Through the rebuild of the damaged areas, a revised plan for expansion of the shelter was completed. As a result, Peace at Home will not need to utilize the full $686,500 of committed City of Fayetteville ARPA funds towards construction costs.

Peace at Home is not requesting additional funds, but is requesting a revision to its approved ARPA budget to allow for (1) fully covering the actual costs of the emergency shelter expansion, and (2) to use the remaining

committed ARPA funds to cover the additional programmatic expenses to be incurred by sheltering 23% more victims in the expanded emergency shelter. Those additional programmatic expenses include items such as food and medical care costs, residential supplies, housing assistance when leaving the emergency shelter, and salary and wage expenses including funding for victim advocate positions to provide 24 hour on site support for residents and their children.

Per the attached revised budget, Peace at Home Family Shelter is requesting to use the funding as follows (amounts per category are approximate):

$375,270 for completion of the renovation project
$23,000 for furniture and fixtures
$155,450 for salaries and wages
$81,350 for residential support
$51,430 for maintenance and operations
Total ARPA expenditures = $686,500

BUDGET/STAFF IMPACT:

ARPA Peace at Home Family Shelter agreement

A RESOLUTION TO APPROVE AMENDMENT #3 TO THE ARPA SUBRECIPIENT AGREEMENT WITH PEACE AT HOME FAMILY SHELTER TO REVISE THE SCOPE OF WORK AND PROJECT ALLOCATION

WHEREAS, on November 15, 2022 City Council passed Resolution 270-22 authorizing Mayor Jordan to sign a subrecipient agreement with Peace at Home Family Shelter in the amount of $686,500.00 in American Rescue Plan Act funds for the expansion of the safety shelter for survivors of domestic violence; and

WHEREAS, Peace at Home is not requesting additional funds, but a revision to its approved ARPA budget to allow for fully covering the actual costs of the three bedroom, three bathroom emergency shelter and to cover the additional programmatic expenses to be incurred by sheltering 23% more victims in the expanded emergency shelter.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign Amendment #3 to the subrecipient agreement with Peace at Home Family Shelter to revise the scope of work and project allocation.

AMENDMENT #3 TO THE SUBRECIPIENT AGREEMENT WITH PEACE AT HOME FAMILY SHELTER, INC.

WHEREAS, on November 15, 2022, pursuant to Resolution 270-22, the City of Fayetteville and Peace at Home Family Shelter ("Peace at Home") entered into a subrecipient agreement to provide funds in the amount of $686,500.00 for an expansion of the emergency shelter for survivors of domestic violence; and

WHEREAS, on September 21, 2023, the City and Peace at Home executed Amendment #1 which extended the Agreement to March 31, 2025; and

WHEREAS, on November 6, 2024, the City and Peace at Home executed Amendment #2 which extended the Period of Performance to June 30, 2026; and

WHEREAS, Peace at Home has requested approval of a revised scope of work and project allocation to allow the remaining funds to be used for additional programmatic expenses incurred as a result of the shelter expansion.

NOW, THEREFORE, BE IT KNOWN TO ALL:

That the City of Fayetteville, Arkansas and Peace at Home, on this _____ day of December, 2024, hereby agree that the Subrecipient Agreement dated November 15, 2022, as amended on September 21, 2023 and November 6, 2024, shall be amended to incorporate revised Appendix A – Scope of Work & Project Allocation attached hereto and made a part hereof.

The parties agree and understand that this Amendment is supplemental to their Agreement, and that it does not alter, amend or abridge any of the rights, obligations, or duties of the parties not expressly addressed herein.

IN WITNESS WHEREOF, the parties hereto have caused their signatures to be set by their authorized representative effective the date set forth herein above.

Revised Appendix A

City of Fayetteville American Rescue Plan Act
Peace at Home Family Shelter Subgrant Budget Revision Request

Even before the COVID 19 pandemic, domestic violence was a serious concern for Northwest Arkansas. The dangerous, controlling and impoverishing nature of domestic violence made it difficult for victims of violence and their children to successfully flee abuse and build new lives. Unfortunately, the pandemic exacerbated the difficulties domestic violence victims face. Stay at home orders, while a well-intended response to help stop the spread of the virus, also created an increased risk of domestic violence. Victims experienced heightened isolation, financial insecurity, stress from homeschooling and child rearing responsibilities, and were often unable to receive assistance to escape violent homes. Abusive partners capitalized on the isolating conditions of lockdowns and home quarantines to enforce separation from support systems using containment, fear and the threat of contagion as a mechanism of abuse.

Since the pandemic began medical providers have reported both an increase in the incidences of physical violence and the severity of injuries for domestic violence victims. Indeed, *Radiology Journal* reports higher incidences of high risk abuse such as strangulation, the use of weapons, stab wounds, and burns from domestic violence victims since the pandemic began.

And although lockdowns and stay at home orders have ceased, the increased rates of reported domestic violence have continued. *The American Journal of Public Health* reported that the COVID 19 pandemic increased the rate of domestic violence between 21-35% across the United States with reported rates even higher in marginalized communities of color. This trend continues in 2024.

Evidence of Local Need:
Peace at Home Family Shelter has also experienced an increased demand for services in our local community since the pandemic began. Since the pandemic began, the unique number of survivors seeking services from Peace at Home is up almost 27% (2019-973 households; 2024-1,235 households).

Demand for emergency shelter is the most pressing unmet need since the pandemic began. Since 2019, we have experienced a nearly 40% increase in the demand for emergency shelter services. In fact, in 2024 nearly 90% of the families who called Peace at Home for emergency shelter were unable to receive shelter at our facility. We had no beds available.

What will be done:
This ARPA funded project will increase the capacity of our emergency safe shelter for survivors of domestic violence by adding three bedrooms and three bathrooms. Currently, Peace at

Home has the capacity to house up to 13 households at one time (survivors and their children) at the emergency shelter (approximately 40-55 people daily). This ARPA funded project permanently increases that daily capacity to 16 households-a 23% increase in available emergency shelter beds. This funding would provide emergency safe shelter to at least 60 more households each year.

This project is in alignment with the City of Fayetteville's Master plan goals #1 and #6 as it involves the rehabilitation of an existing building and increasing access to housing.

While residing in our emergency safe shelter, families are provided with all their basic needs including food, household items, toiletries, medication, and children's needs completely free of charge. Families may bring their pets with them; all pet expenses including veterinary costs, food, toys, and waste disposal are covered. In addition, families are assisted with financial assistance to access safe housing including rental deposits, first month rent, and other related moving expenses. Families are eligible for free legal representation in family law issues, mental health counseling and support groups, and connection to mainstream benefits and community partners. The emergency safe shelter provides a refuge for families escaping domestic violence and a connection to the resources needed to break free from violence. Funding from the City of Fayetteville's ARPA grant will increase this lifesaving support to more survivors and their children.

Community Benefit:
In addition to meeting the immediate needs for emergency safe shelter, residing families are assigned a Victim Advocate to work with them on their goals towards self sufficiency and recovery from domestic violence. These goals can include acquiring permanent housing, increasing their income, rebuilding social networks, legal needs, and mental wellbeing.

This project enhances Peace at Home's capacity to provide immediate, lifesaving emergency shelter to survivors of domestic violence and their children at a time when more survivors need shelter than ever before. **This project will increase the emergency safe shelter's capacity by 23%.** It will help families recover from violence, work towards and obtain self-sufficiency and thrive in our community.

Verification of Final Rule Qualification:
As a project providing emergency housing, this project is enumerated in the Final Rule as a qualifying project. While there is no income requirement for emergency shelter services for victims of domestic violence, any person seeking shelter at a domestic violence organization is considered homeless under Housing and Urban Development (HUD) Category 4 definition and is a presumed benefit clientele assumed to be a Low to Moderate Income according to Community Development Block Grant HUD regulations.

Budget Revision Request:
In 2022, Peace at Home was awarded $686,500 from the City of Fayetteville to expand its emergency safe shelter by three bedrooms and three bathrooms and to improve its storage space. The current storage space would be converted into the new bedrooms and bathrooms and a small storage space would be added to the existing building.

During the architectural design phase, Peace at Home experienced a large scale water pipe breakage which caused portions of the ceiling to collapse throughout the residential wing including areas designed for the storage expansion. Through the rebuild of the damaged areas, a revised plan for storage expansion was completed. As a result, Peace at Home will not utilize City of Fayetteville ARPA funds towards its storage space.

Peace at Home is requesting a budget revision to fully cover the actual costs of the three bedroom, three bathroom emergency shelter expansion and to cover the additional programmatic expenses to be incurred by sheltering 23% more victims in the expanded emergency shelter over the next 18 months.

The following changes are requested:

1. **Renovation-Emergency Shelter Expansion:**

Peace at Home followed the procurement process required by the City of Fayetteville.

1. The lowest bid for the three bedroom three bathroom renovation construction project came in at $299,700, which is higher than originally budgeted.
2. WER, architect for the project, recommended adding a 10% contingency above the lowest bid.
3. Architectural, design, engineering and geo tech expenses were slightly higher than originally budgeted.

$276,500 was originally budgeted for architecture, escalation, and renovation.

Renovation-Emergency Shelter Expansion Revised Budget: $375,270

2. **Furniture, Fixtures and Equipment:**

Each new bedroom will be furnished with beds, bed frames, mattresses, a chest of drawers, desks, and nightstands. The bedroom furnishings are commercial grade and designed to be resistant to bed bugs.

Additionally, having more residents in the emergency shelter will require additional washing machines, dryers, and a refrigerator.

Furniture, Fixtures, and Equipment Revised Budget: $23,000

3. **Salary and Wages:**

Serving 23% more families in the emergency safe shelter will increase the staff required to provide crisis intervention and supportive services. Peace at Home has staff on site to support victims and their children 24 hours a day every day of the year.

This revised budget includes the salary and wage expenses for one full time Victim Advocate, 2 part time Victim Advocates, a portion of the residential supervisor, and a portion of the janitor salaries to support the increased number of families after the three bedroom expansion. The budgeted expense timeline for salary and wages is January 2025-June 2026 (after the completion of construction).

The Victim Advocates provide 24 hour on site support for residents and their children. While working with Victim Advocates, survivors address their housing, legal, mental health, job readiness, education, and other basic needs. Victim Advocates connect families with community resources and address barriers that keep families in dangerous homes.

This budget revision will add the staff necessary to support the additional families to be served in the emergency shelter. The additional bedroom and bathroom space will also increase the janitorial expenses.

Salary and Wages Revised Budget: $155,450

4. **Increased Residential Support**

Peace at Home provides families and their children with all their basic needs free of charge. Serving more families will increase these expenses.

Food: Families residing in the shelter often have unique dietary or personal food preferences. We anticipate serving more families in the emergency shelter will increase our food costs by approximately 20% between January 2025-June 2026.

Medical care: Families often are forced to flee violent homes quickly. As a result, they leave behind lifesaving medications, health care devices, and mobility equipment. We anticipate serving more families in the emergency shelter will increase medical care expenses by 20% between January 2025-June 2026.

Transportation: Families fleeing domestic violence are often unable to safely bring a personal vehicle with them. Families often need bus tickets, gas vouchers, ride shares, or transportation in a Peace at Home owned vehicle to access community resources. We anticipate that by serving more families in shelter we will increase our transportation expenses by 20% between January 2025-June 2026.

Residential Client Support: Peace at Home supports families with a variety of personal needs including clothing, steel toed boots for work, bicycles, children's needs like summer camp fees, and personal hygiene items. By serving more families in the shelter, we anticipate the residential client support budget will increase by 20% between January 2025-June 2026.

Residential supplies: Serving more residents in the emergency shelter will require additional supplies including bedding, pillows, kitchen supplies such as plates, utensils and cups, janitorial supplies, paper towels, toilet paper, and children's supplies including highchairs and baby monitors. By serving more families in the shelter, we anticipate our residential client support budget will increase by 20% between January 2025-June 2026.

Housing assistance: This funding will provide 15 additional residential households with the first month, last month, and security deposits necessary to secure safe housing when leaving the emergency shelter**.**

Increased Residential Support Revised Budget: $81,350

5. Increased Emergency Shelter Maintenance and Operations:
Expanding the emergency safe shelter will also increase the maintenance and operational expenses associated with insurance, utilities, security, and telephone/internet coverage.

Based on the increased square footage for the three bedrooms and bathrooms and the additional families served, we anticipate a 15% increase in insurance, utilities, security, and telephone/internet between January 2025-June 2026.

Emergency Shelter Maintenance and Operations Revised Budget: $51,430

Line Item	Revised Budget	Explanation or Description
Renovation-Emergency Shelter Expansion		
1. Construction	$299,700	Southern Building Services executed contract to build three bedrooms and three bathrooms
2. Construction Contingency/Escalation	$29,970	10% contingency for construction- renovation project
3. Architectural design, engineering, surveys, Geotech	$30,600	WER Architecture executed contract for renovation project

PEACE AT HOME FAMILY SHELTER SUBRECIPIENT AGREEMENT:

A RESOLUTION TO AUTHORIZE MAYOR JORDAN TO SIGN A SUBRECIPIENT AGREEMENT WITH PEACE AT HOME FAMILY SHELTER FOR THE EXPANSION OF THE EMERGENCY SHELTER FOR SURVIVORS OF DOMESTIC VIOLENCE UTILIZING AMERICAN RESCUE PLAN ACT FUNDS IN THE AMOUNT OF $686,500.00, AND TO APPROVE A BUDGET ADJUSTMENT

WHEREAS, the City of Fayetteville has received funding from the American Rescue Plan Act (ARPA) invited non-profit organizations to submit proposals for projects to fund with the available ARPA funding; and

WHEREAS, the Peace at Home Family Shelter submitted an application requesting $686,500.00 in American Rescue Plan Act funds for the expansion of the safety shelter for survivors of domestic violence; and

WHEREAS, the expansion will include 3 additional shelter bedrooms with bathrooms which will allow Peace at Home to provide safe, emergency shelter to approximately 60 additional adults and children fleeing domestic violence each year; and

WHEREAS, the Subrecipient Agreement would provide funding in the amount of $686,500.00 for the rehabilitation and construction costs.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign a Subrecipient Agreement with Peace at Home Family Shelter to provide the amount of

$686,500.00 in American Rescue Plan Act funds to fund the expansion of the emergency shelter.

Section 2: That the City Council of the City of Fayetteville, Arkansas hereby approves a budget adjustment, a copy of which is attached to this Resolution.

CITY OF FAYETTEVILLE
AMERICAN RESCUE PLAN ACT
2022 SUBRECIPIENT GRANT APPLICATION

NOTE: Submission of a Subrecipient Grant Application provides no guarantee that the applicant will receive funding. All organizations selected to receive funds will be subject to entering into a contract with the City of Fayetteville and subject to the rules and regulations pertaining to the American Rescue Plan Act.

Please review the City of Fayetteville American Rescue Plan Act 2022 Subrecipient Grant Application Guide for more information on the required items listed in this application.

PART 1 APPLICANT IDENTIFICATION	
Total Amount of Funding Requested (whole dollar) [Minimum $50,000]	$686,500
Applicant/Organization Name	Peace at Home Family Shelter
Mailing Address (street, city, zip)	PO Box 10946, Fayetteville, AR 72703
Organization Website	www.peaceathomeshelter.org
DUNS Number	029494593
Organization FEIN/SSN	71-0552563
PART 2 APPLICANT CONTACT INFORMATION	
Contact for Project (name & title)	Teresa Mills, CEO
Contact Phone Number	479-444-8310
Contact Email	tmills@peaceathomeshelter.com
Signature Authority (name, title & email address)	Teresa Mills, CEO tmills@peaceathomeshelter.com
PART 3 PROJECT INFORMATION	
Project Name	Expanding Safe Shelter for Survivors of Domestic Violence
Project Address (street, city, zip)	3045 E Ivey Ln, Fayetteville, AR 72764

PART 3 PROJECT INFORMATION continued	
Is anyone with control over the Organization (i.e. owner, manager, director, board member, or other) or any member of that person's immediate family, an employee or elected official of the City of Fayetteville	◉ Yes ○ No
If Yes, above, please identify person and position with the City	Blake Pennington, Assistant City Attorney (Peace at Home board member)
Project Summary (**brief** synopsis of proposed project)	The ongoing COVID-19 pandemic has made it more difficult and dangerous for victims of domestic violence seeking to flee abusive homes. Peace at Home Family Shelter proposes a renovation project to create 3 additional shelter bedrooms with bathrooms. This will allow Peace at Home to provide safe, emergency shelter to approximately 60 additional adults and children fleeing domestic violence each year.
Describe previous experience in providing similar services	As the first domestic violence shelter in the state of Arkansas, Peace at Home Family Shelter has been providing safe, emergency shelter to survivors of domestic violence and their children since 1979. In addition to safe shelter, Peace at Home also provides housing assistance, counseling, legal services exclusively to survivors of domestic violence and their children. In total, we serve over 1,000 individuals each year.
Programs will typically be funded for a time period not to exceed 12 months from the signed date of the subrecipient agreement. Please describe your organization's ability to plan and utilized requested funds within that timeframe.	The requested project will be for rehabilitation and construction costs in order to increase the physical capacity of our emergency shelter for survivors of domestic violence. We are already working with an architect for this and other projects and would be able to quickly begin construction to meet the limited time frame required.

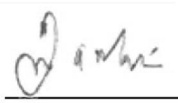
PART 4 PROJECT BENEFICIARIES	
Projected number of **Fayetteville** beneficiaries	60 per year

Because the federal rules vary depending on the type of project for which funds are being requested, the city has grouped project requests in 3 focus categories: Social Services, Economic, and Environmental. Please choose the corresponding category below that most closely identifies your project.

PART 4A **SOCIAL SERVICES APPLICATIONS ONLY**	
Will **ALL** beneficiaries live, work and/or go to school in Fayetteville	(●) Yes ( ) No
Will **ALL** beneficiaries meet US Treasury Low to Moderate Income (LMI) Guidelines (please see Application Guide, Exhibit A).	(●) Yes ( ) No
Will **ALL** beneficiaries have been negatively impacted by COVID-19	(●) Yes ( ) No
Does this request respond to a **negative COVID-19 impact**?	(●) Yes ( ) No
If answering Yes to the **question above**, please describe the COVID-19 impact and how this proposal will aid in responding to the impact	COVID-19 has made it more dangerous for victims of domestic violence to flee abusive homes and avoid homelessness. The Final Rule lists victims of domestic violence as a population disproportionately negatively impacted by COVID-19 (page 19). This proposal will increase our community's capacity to provide safe emergency housing for a vulnerable population.
Please indicate how the proposed project meets eligibility standards and requirements described in the Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds	As a project providing emergency housing assistance, this project is enumerated in the Final Rule as eligible to respond to the impacts of the pandemic on households and communities.

PART 4B **ENVIRONMENTAL APPLICATIONS ONLY**	
Please describe the effect of the proposed environmental impact or benefit. Please indicate how the proposed project meets eligibility standards under the EPA's Clean Water State Revolving Fund (CWSRF), Drinking Water State Revolving Fund (DWSRF), or eligible projects as described in Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds. See Subrecipient Application Guide for more information.	
PART 4C **ECONOMIC APPLICATIONS ONLY**	
Please describe the residents or industry sector this grant request is intended to serve or benefit. Please indicate how the proposed project meets eligibility standards and requirements described in the Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds.	This project will exclusively serve survivors of domestic violence and their children in our community. As a project providing emergency housing assistance, this project is enumerated in the Final Rule as eligible to respond to the impacts of the pandemic on households and communities.
Does this request respond to a negative COVID-19 impact	◉ Yes ○ No
If yes, please describe the COVID-19 impact and how this proposal will aid in the City's economic recovery	COVID-19 has made it more dangerous for victims of domestic violence to flee abusive homes and avoid homelessness. The Final Rule lists victims of domestic violence as a population disproportionately negatively impacted by COVID-19 (page 19). This proposal will aid in the City's economic recovery by meeting temporary housing needs for a vulnerable population so they have the stability to find or maintain employment and permanent housing in our community and achieve self-sufficiency.

PART 5 FAYETTEVILLE BUSINESS LICENSE



City Code Chapter 118 Business Registry and Licenses delineates what businesses are required to have a Fayetteville Business License. Submission of this grant application indicates that, if required, a current business license is in place.

PART 6 SIGNATURE OF SIGNATURE AUTHORITY AND DATE

I am an authorized employee/agent of the applicant organization and I am authorized to submit this application.

I have read and reviewed the American Rescue Plan Act documentation. I understand that as a subrecipient of the City of Fayetteville's American Rescue Plan Act funds, I will be responsible for maintaining records, complying with provisions of the subrecipient agreement, and providing any/all records and information necessary for the City of Fayetteville to report on this award.

All applications and documentation are subject to disclosure pursuant to the Arkansas Freedom of Information Act. All documentation may be provided to Federal and/or State government agencies for accounting and auditing purposes.

Teresa A. Mills CEO 3/29/2022

Name/Title/Date

PART 7 ORGANIZATION DESCRIPTION Provide a brief description of your organization and the services offered.	
Year of Incorporation	1977
Philosophy, Purpose and/or Mission Statement	The mission of Peace at Home Family Shelter is to empower victims of domestic violence to survive and thrive by nurturing their self-determination and courage and to promote healthy relationships and compassionate communities through education, outreach, and advocacy. Peace at Home Family Shelter believes that everyone deserves to feel safe in their own homes. We operate with an empowerment philosophy centered on the rights of survivors of domestic violence to be the decision makers of their own lives.

Provide a brief description of your organization including information about programs and/or services other than the proposed project.

Peace at Home Family Shelter helps survivors of domestic violence and their children safely escape abusive homes and rebuild their lives. In addition to providing immediate safe shelter, our program connects survivors with the resources they need to transition out of shelter and into long-term safe housing. Our programs have five components working together to help survivors transition from homes of violence to homes of safety.

24 Hour Hotline -- First, Peace at Home operates a 24/7 crisis hotline and email inbox. Our crisis hotline is available in Spanish and English and serves as the entry point for clients. Hotline advocates assist callers with community referrals, safety planning, coming into shelter, and our additional programs. In 2021, we received 1,205 calls from members of our community seeking help.

Emergency Shelter -- The emergency shelter has 14 rooms available for women, men, children, and any person escaping violence. Bilingual staff are available to provide onsite assistance to clients. On average, families stay 45 days in shelter as they work on their individualized goals (90 day maximum stay). Peace at Home was able to provide emergency shelter to 151 individuals in the community in 2021, a reduced capacity due to COVID-19 and renovations to make the shelter safer for families during the on-going pandemic.

Advocacy -- While staying in shelter, clients are offered advocacy services to help them reach their goals. Advocates meet daily with clients to develop and implement self-sufficiency plans.

These plans are built around the current strengths of a survivor and provide steps to achieving long-term goals such as employment or affordable housing.

The purpose is to empower survivors to overcome their unique barriers such as education skill gaps, scarce work histories, unreliable transportation, career planning, affordable child-care, and self-confidence. Peace at Home maintains partnerships with life-skill agencies such as the Credit Counseling of Arkansas and Dress for Success. These agencies provide critical support for the clients to meet the variety of employment and financial goals that they have towards achieving a safe life. The Institute for Women's Policy Research indicates that 73% of respondents said that they had stayed with an abusive partner longer than they wanted or returned to them for economic reasons.

Working together, advocates eliminate barriers that might keep survivors economically or emotionally dependent on a violent partner. These advocacy services are also open to individuals in the community who are not currently living at our shelter but are survivors of domestic violence in need of assistance.

Housing Assistance -- Survivors of domestic violence in our emergency shelter and in our community also have access to support from our Home Restored and SHE housing assistance programs. These program provides direct financial support, landlord advocacy, budgeting skills, and case management to help families find permanent housing in the community that meets their long-term needs. In 2021, Peace at Home was able to provide housing-related assistance to 160 families.

Legal Services -- Peace at Home has an onsite staff attorney and a bilingual advocate to assist shelter residents and outreach clients with legal needs. Our legal services department enables Peace at Home to provide survivors of domestic violence with legal representation for divorce cases, child custody issues, and orders of protection as well as legal advocacy and financial assistance for legal fees. In 2021, Peace at Home provided legal services to 537 clients.

Mental Health/Emotional Support Services - Peace at Home employs a full-time bilingual counselor and partners with the University of Arkansas Doctorate Program in Psychology as a site for doctoral candidates in clinical psychology. These mental health professionals provide one-on-one and parent/child counseling to clients of Peace at Home free of charge. In 2021, Peace at Home provided direct counseling services to 94 individuals in our community.

All of our services are free of charge, personalized to meet individual survivor needs, and voluntary.

PART 8	PROJECT BUDGET Provide a descriptive line-item budget for the entire project including the American Rescue Plan Act (ARPA) funds being requested. **Provide specific information on how American Rescue Plan Act funds will be used and include any necessary supporting documentation. Please indicate whether any American Rescue Plan Act funds have been requested or received from other sources, and if so, provide detailed information on the source and proposed use of those funds.** Please indicate how you will spend all awarded ARPA funding by the project end date.

Peace at Home Family Shelter - Rehabilitation Project to Add Capacity

Budget (based on estimates received from WER Architects):
Construction:
1000 sf ($235 per sf renovation costs) - $235,000
1250 sf ($300 per sf building addition costs) - $375,000
Escalation - $18,000
FF&E - $35,000
Design/Engineering/Surveys/Geotech - $23,500

TOTAL PROJECT BUDGET: $686,500

Spending by Project Date - The requested funds will be for a building rehabilitation project and will be expensed within the project timeline on the above line items.

Other ARPAR Requests - Peace at Home Family Shelter has requested $25,000 in ARPAR funding from the Emergency Food and Shelter Program to support emergency shelter operations.

PART 9	PROJECT DESCRIPTION Describe the proposed project and provide the information requested under PART 9 of the American Rescue Plan Act 2022 Subrecipient Application Guide. Please provide any additional information that will assist in evaluating the project.

What Project Will Do

This project will increase the capacity of the emergency shelter for survivors of domestic violence by renovating and expanding a section of the existing shelter building to add three additional client rooms and bathrooms. This project will involve converting an existing storage space into client rooms while expanding out to replace the lost storage. Currently, Peace at Home Family Shelter has capacity for up to 14 households (survivors and their children) at the emergency shelter (40-55 people). This project would permanently increase that capacity to 17 households. Allowing approximately 60 additional individuals to access emergency shelter every year.

COVID-19 has negatively impacted victims of domestic violence, as many individuals have lost employment and social supports to help them successfully leave abusive relationships. In 2022, Peace at Home received 1,205 calls from individuals seeking support in our community, an increase from pre-pandemic 2019 numbers of 24%.

As more individuals are requesting shelter services, Peace at Home Family Shelter also had to change shelter operations due to COVID-19. Now, clients no longer share rooms or bathrooms to help prevent the spread of illness. While this change was necessary to protect the health of families in shelter, it reduced capacity for emergency shelter. The completion of this project will recover lost capacity and allow Peace at Home to safely shelter more families. Peace at Home operates with a waiting list for emergency shelter due to insufficient capacity and high community need.

This project is in alignment with the City of Fayetteville's Master Plan goals #1 and #6 as it involves the rehabilitation of an existing building and increasing access to housing.

Execution of Project

This is a building rehabilitation project that will involve the addition of three additional family rooms to Peace at Home's emergency shelter. If approved for funding, the construction would take place within the 12-month timeframe and services would continue for families residing in the newly expanded shelter. Peace at Home Family Shelter is already working with WER Architects on this project and, if approved for funding, would be able to complete the rehabilitation within the required time frame.

How Beneficiaries are Selected

Peace at Home Family Shelter advertises and operates a 24-hour crisis hotline, email help address, and limited online chat for individuals in the community to reach out to us for assistance.

PART 9 PROJECT DESCRIPTION continued

When a person contacts us for services, our only requirement is that they are a survivor of domestic violence and have a need for services. For the emergency shelter, someone must be either fleeing intimate partner violence or homeless as a result of recent intimate partner violence. Our emergency shelter program defines ‘recent’ as within the past three months. Per best practices laid out by the National Network to End Domestic Violence, no additional verifications are required. When a new client arrives at the shelter, they complete intake paperwork with an advocate.

Services Provided

In addition to meeting immediate needs for shelter, each emergency shelter client is assigned to a primary advocate who works with them to identify and work towards individualized goals for self-sufficiency and recovery from domestic violence. These goals can include: acquiring permanent housing, increasing income, rebuilding social support networks, legal needs, and mental wellbeing. Many of these needs can be addressed through Peace at Home’s in-house programs, but advocates also offer robust community referrals to help clients connect with the community at large.

Verification of Final Rule Qualification

As a project providing emergency housing, this project is an enumerated in the Final Rule as a qualifying project. While there is no income requirement for emergency shelter services for victims of domestic violence, anyone seeking shelter at a domestic violence organization is considered homeless under Housing and Urban Development (HUD) Category 4 definition and is a presumed benefit clientele population assumed to be Low to Moderate Income according to Community Development Block Grant HUD regulations.

Benefit of Project – Limited Assistance and Creating Self-Sufficiency

This project will enhance Peace at Home Family Shelter’s capacity to provide immediate, life-saving emergency shelter to survivors of domestic violence and their children at a time when survivors are more in need of shelter and our capacity has been reduced (both because of the ongoing COVID-19 pandemic). In addition to this immediate assistance, the individualized advocacy provided to all residents of Peace at Home’s emergency shelter allows individuals to work towards and obtain self-sufficiency and thrive in our community.

How Project will Further Philosophy and Purpose

This project will further Peace at Home Family Shelter’s philosophy and purpose by increasing our capacity to provide client-centered safe shelter and supportive services to survivors of domestic violence and their children in our community. With increased capacity, our emergency shelter can serve more families in need every day and help make our community a safe and thriving place for all of our neighbors.

PART 10	PROJECT TIMELINE Provide a complete and specific timeline for all activities related to proposed project.

Project Timeline

Upon Award Notification (0-3 months) - Finalize design details with WER Architects, receive bids from construction contractors and select a contractor for the project.

3 Months-9 Months into Project - Complete construction and renovation of shelter space to add 3 additional client rooms with bathrooms and replace storage area.

9 Months - 12 Months (if not completed sooner) - Ensure all construction is completed and payments are processed. Acquire and install all necessary furniture, fixtures, and equipment. Complete inspection. Open rooms up to survivors of domestic violence seeking safe shelter.

PART 11 DATA COLLECTION, RECORD MAINTENANCE, AND REPORTING Describe how the organization will collect data and maintain records to track program activities and eligibility verification. Please also describe your organization's ability to produce required documentation including financial reports, performance reports, progress reports, expenditure information, etc.

Data Collection and Maintenance:

Peace at Home Family Shelter utilizes a database system built for victim service organizations by Osnium called WomensShelter for all client and program tracking information, including program activities and client eligibility. This database is used to generate reports for any grant requirements and to assess program effectiveness. Data is collected by advocate staff members of Peace at Home at intake and on an ongoing basis throughout the client's stay.

Organizational Capacity

Peace at Home has extensive experience managing federal grants, including grants as a recipient and sub-recipient from the Department of Justice, Department of Health and Human Services, and the Department of Housing and Urban Development.

Peace at Home employs a full-time Chief Financial Officer (CFO) to oversee all finances, including financial reporting for grants. The CFO is a certified public accountant and successfully manages all necessary reporting for grants and ensure appropriate accounting for all restricted funding.

PART 12 PROJECT EVALUATION | OBJECTIVES AND OUTCOMES List the objectives (not activities) of the proposed project. Describe how each objective will be measured to determine if it has been met.

Use the following format

Objective #:
Outcome(s):
Method of Measurement:

Objective: More survivors of domestic violence and their children have access to safe, emergency housing in order to flee abusive homes.

Outcome: 60 more individuals will receive safe shelter in the 12 months following completion of the rehabilitation than in the 12 months previous, increasing the shelter's capacity by 25%.

Method of Measurement: Shelter stays are logged in our database system and the previous 12 months before the rooms were added can be compared to a period of time after the additional rooms are opened to measure an increase in capacity for safe shelter.

Objective: More survivors of domestic violence will have access to individualized advocacy and support to help them overcome barriers to independence.

Outcome: Peace at Home advocates will provide an average of 14 hours of individualized advocacy services to each household staying in the shelter, providing support in commonly identified needs, including: safety planning, emotional support, resource referrals, legal support, budgeting, and transportation.

Method of Measurement: Hours of advocacy services are logged in the database system and can be pulled in aggregate for all shelter clients.

PART 13 PARTIAL FUNDING Indicate whether the project can proceed with partial funding. If **YES**, indicate the minimum amount the applicant will accept with line items arranged from highest to lowest priority. Describe the impact that partial funding will have on the project. If **NO**, the project will not be considered for partial funding.

Yes, the project could proceed with partial funding. Given the limited 12-month time frame, the project would need to be funded at a minimum of 75% in order to move forward. The impact of partial funding could potentially be redirecting needed funds away from important programs serving survivors of domestic violence in our community in order to fill the budget gap and move forward.

Line Item Breakdown - All line items are equally necessary for funding as all are necessary aspects of the rehabilitation project.

PART 14 ADDITIONAL DOCUMENTATION CHECKLIST

Please provide these items with your application. See page 10 of the 2022 American Rescue Plan Act Subrecipient Application Guide for more information

Action Recommendation:

Recommend Mayor's signature of approval of a subrecipient agreement with the Peace At Home Family Shelter in the amount of $686,500.00 to provide funding from the American Rescue Plan Act to expand the emergency shelter. Resolution 270-22 passed on 11/15/22 as a walk-on item included the funding arrangements and authorized Mayor Jordan to sign the subrecipient agreement.

STAFF MEMO

TO: Mayor

THRU: Susan Norton, Chief of Staff

FROM: Steve Dotson, Internal Auditor

DATE: November 30, 2022

SUBJECT: **Subrecipient Agreement – Peace At Home Family Shelter**

RECOMMENDATION:
Recommend Mayor Jordan's signature on the Peace At Home Family Shelter subrecipient agreement.

BACKGROUND:
Resolution 270-22, passed and approved on 11/15/22, authorized Mayor Jordan to sign a subrecipient agreement with the Peace At Home Family Shelter for the expansion of the emergency shelter for survivors of domestic violence in the amount of $686,500.00.

DISCUSSION:
Peace at Home Family Shelter submitted a request for funding under the ARPA program as a subrecipient, with the purpose of expanding the emergency shelter for survivors of domestic violence. Resolution 270-22 authorized Mayor Jordan to sign the subrecipient agreement to provide the amount of $686,500.00 in American Rescue Plan Act funds to fund the expansion of the emergency shelter.

BUDGET/STAFF IMPACT:
The emergency shelter expansion will utilize American Rescue Plan Act funds.

Attachments:
ARPA Subrecipient Contract with the Peace At Home Family Shelter with Resolution 270-22 attached at the end of the subrecipient contract.

SUBRECIPIENT AGREEMENT for AMERICAN RESCUE PLAN
City of Fayetteville, AR
and
PEACE AT HOME FAMILY SHELTER, INC.
City of Fayetteville Subrecipient# ARPA-0005

This Subrecipient Agreement (Agreement) is entered into and effective on this 7th day of December, 2022 between **the City of Fayetteville,** hereafter referred to as ("the City") and Peace at Home Family Shelter, Inc. (hereinafter referred to as "Peace at Home" or the "subrecipient").

WHEREAS, Peace at Home requested funding to increase the capacity of the emergency shelter for survivors of domestic violence by renovating and expanding a section of the existing shelter building to add three additional client rooms and bathrooms; and

WHEREAS, The City of Fayetteville has received funding through the American Rescue Plan Act ("ARPA" or the "Act"), from the United States Department of the Treasury;

WHEREAS, it shall be hereby disclosed this Agreement shall make Peace at Home a subrecipient / pass-through entity under 2 CFR 200.1 receiving a subaward under sections 602(c)(3) and 603(c)(3) of the Act and be considered for this subaward to carry out a program or project on behalf of the City with the City's Federal award funding;

WHEREAS, the City notifies the subrecipient: (1) that this funding shall be considered a subaward of ARPA funds; (2) subrecipient shall adhere to any and all compliance requirements for use of ARPA funds; and (3) any and all reporting requirements for expenditures of ARPA funds; and

WHEREAS, this Agreement is reflective of requirements issued and identified with the ***Final Rule*** of the Department of the Treasury; that capital expenditures, in certain cases, can be appropriate responses to the public health and economic impacts of the pandemic; and

WHEREAS, an increase in the number of domestic violence victims is recognized as a significant negative public health impact of the COVID-19 pandemic, and the City may use American Rescue Plan Act funds to address the harm experienced by these victims through increasing capacity and expanding access to emergency housing assistance.

NOW, THEREFORE, in consideration of the covenants and conditions hereinafter set forth, the City and subrecipient agree as follows:

1. INFORMATION REQUIRED BY THE UNIFORM GRANT GUIDANCE (UGG) §200.332:

a) **Subrecipient Name** (must match the name associated with its Unique Entity Identifier):

Peace at Home Family Shelter, Inc.
P.O. Box 10946
Fayetteville, AR 72703
EIN: 71-0552563

Subrecipient's Unique Entity Identifier (formerly known as DUNS number): LN3EUDU177W3

b) **Subaward Budget Period:** Subaward budget period shall be set forth in Section 4 below.

c) **Total Amount of Federal Funds obligated to the subrecipient by the City:** $686,500.00

d) **Name of Federal Awarding Agency and Contact Information:**

This subaward is a program grant and not for Research and Development.

e) **Indirect Cost Rate:** (de minimis cost rate) maximum of 10% of direct costs if indicated in the budget.

2. AGREEMENT: This Agreement, contains the entire agreement and understanding between the parties hereto and supersedes any prior or contemporaneous written or oral agreements, representations and warranties between them respecting the subject matter hereof. This Agreement is also composed of the following appendices:

   a. **Appendix A – Scope of Work & Project Allocation**

   b. **Appendix B – Department of the Treasury, 31 CFR Part 35, RIN 1505-AC77, Coronavirus State and Local Fiscal Recovery Funds, Action: Final Rule**

   c. **Appendix C – Compliance and Reporting Guidance, State and Local Fiscal Recovery Funds**

3. SUBCONTRACTING: Subrecipient is permitted to sub-contract with third parties to complete the scope of work identified in this contract. Any sub-contract or sub-sub recipient shall follow all federal, local and state regulations. Subrecipient shall not be allowed to disperse funds in a subrecipient manner to another third party without prior written City approval.

4. PERIOD OF PERFORMANCE: This Agreement shall commence on the effective date stated above and shall expire one year from commencement. The Agreement may be extended or shortened upon mutual written agreement of the parties.

5. STANDARDS OF WORK: Subrecipient agrees that the performance of the work and services of this Agreement shall conform to the highest professional standards.

6. TAXES: Subrecipient shall pay all current and applicable local, city, county, state and federal taxes, licenses and assessments related to the Scope of Work to be performed by Subrecipient including but not limited to those payments required by all federal, state and local laws, and any other laws and Acts under which Subrecipient may be liable.

7. COMPLIANCE WITH APPLICABLE LAWS: Subrecipient shall perform all activities funded by this Agreement in accordance with all applicable federal, state and local laws, including without limitation laws which regulate the use of funds allocated under ARPA. The term "federal, state and local laws" as used in this Agreement shall mean all applicable statutes, rules, regulations, executive orders, directives or other laws, including all laws as presently in effect and as may be amended or otherwise altered during the Agreement Term, as well as all such laws which may be enacted or otherwise become effective during the Agreement Term. The term "federal, state and local laws" shall include, without limitation:

   a. Federal Requirements:

      i. Subrecipient agrees to comply with the requirements of section 603 of the **ARPA**, regulations adopted by Treasury pursuant to section 603(f) of the Act, and guidance issued by Treasury regarding the foregoing. The Subrecipient also agrees to comply with all other applicable federal statutes, regulations, and executive orders, and the Subrecipient shall provide for such

compliance by other parties in any agreements it enters into with other parties relating to this award.

ii. Federal regulations applicable to this award include, without limitation, the following:

a. **Uniform Administrative Requirements**, Cost Principles, and Audit Requirements for Federal Awards, 2 C.F.R. Part 200, other than such provisions as Treasury may determine are inapplicable to this Award and subject to such exceptions as may be otherwise provided by Treasury. Subpart F – Audit Requirements of the Uniform Guidance, implementing the Single Audit Act, shall apply to this award. The following 2 CFR Part 200 Policy requirements are excluded from coverage under this assistance listing: For 2 CFR Part 200, Subpart C, the following provisions do not apply to the CSLFRF program: 2 C.F.R. § 200.204 (Notices of Funding Opportunities); 2 C.F.R. § 200.205 (Federal awarding agency review of merit of proposal); 2 C.F.R. § 200.210 (Pre-award costs);and 2 C.F.R. § 200.213(Reporting a determination that a non-Federal entity is not qualified for a Federal award). For 2 CFR Part 200, Subpart D, the following provisions do not apply to the SLFRF program: 2 C.F.R. § 200.308 (revision of budget or program plan); 2 C.F.R. § 200.309 (modifications to period of performance); C.F.R. § 200.305 (b)(8) and (9) (Federal Payment).

b. **Universal Identifier and System for Award Management (SAM),** 2 C.F.R. Part 25, pursuant to which the award term set forth in Appendix A to 2 C.F.R. Part 25 is hereby incorporated by reference. As SAM is scheduled to be phased out, compliance with a successor government-wide system officially designated by the Office of Management and Budget (OMB).

c. **Reporting Subaward and Executive Compensation Information**, 2 C.F.R. Part 170, pursuant to which the award term set forth in Appendix A to 2 C.F.R. Part 170 is hereby incorporated by reference.

d. OMB Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement), 2 C.F.R. Part 180, including the requirement to include a term or condition in all lower tier covered transactions (contracts and subcontracts described in 2 C.F.R. Part 180, subpart B) that the award is subject to 2 C.F.R. Part 180 and Treasury's implementing regulation at 31 C.F.R. Part 19.

e. **Subrecipient Integrity and Performance Matters**, pursuant to which the award term set forth in 2 C.F.R. Part 200, Appendix XII to Part 200 is hereby incorporated by reference.

f. **Governmentwide Requirements for Drug-Free Workplace**, 31 C.F.R. Part 20.

g. **New Restrictions on Lobbying,** 31 C.F.R. Part 21.

h. **Uniform Relocation Assistance and Real Property Acquisitions Act of 1970** (42 U.S.C. §§ 4601-4655) and implementing regulations.

i. Generally applicable federal environmental laws and regulations.

iii. Statutes and regulations prohibiting discrimination applicable to this award include without limitation, the following:

a. **Title VI of the Civil Rights Act of 1964** (42 U.S.C. §§ 2000d et seq.) and Treasury's implementing regulations at 31 C.F.R. Part 22, which prohibit discrimination on the basis of race, color, or national origin under programs or activities receiving federal financial assistance; Subrecipient and its sub-contractors, sub-recipients, sub-grantees, successors, transferees, or assignees, shall comply with: Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq., 78 stat. 252) and its applicable federal statutory, regulatory authorities, other pertinent directives, circulars, policy, memoranda, and guidance prohibiting discrimination on the basis of race, color, national origin, age, sex, and disability and give assurance that it will promptly take any measures necessary to ensure such compliance.

b. **The Fair Housing Act, Title VIII of the Civil Rights Act of 1968** (42 U.S.C. §§ 3601 et seq.), which prohibits discrimination in housing on the basis of race, color, religion, national origin, sex, familial status, or disability;

c. **Section 504 of the Rehabilitation Act of 1973**, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of disability under any program or activity receiving federal financial assistance;

d. **The Age Discrimination Act of 1975**, as amended (42 U.S.C. §§ 6101 et seq.), and Treasury's implementing regulations at 31 C.F.R. Part 23, which prohibit discrimination on the basis of age in programs or activities receiving federal financial assistance; and

e. **Title II of the Americans with Disabilities Act of 1990**, as amended (42 U.S.C. §§ 12101 et seq.), which prohibits discrimination on the basis of disability under programs, activities, and services provided or made available by state and local governments or instrumentalities or agencies thereto.

iv. **Remedial Actions.** In the event of the Subrecipient's noncompliance with section 603 of the Act, other applicable laws, Treasury's implementing regulations, guidance, or any reporting or other program requirements, the City may impose additional conditions on the receipt of a subsequent payments, if any, or take other available remedies as set forth in 2 C.F.R. § 200.339.

In the case of a violation of section 603(c) of the Act regarding the use of funds, previous payments shall be subject to recoupment as provided in section 603(e) of the Act.

v. **Hatch Act.** The Subrecipient agrees to comply, as applicable, with requirements of the Hatch Act (5 U.S.C. §§ 1501-1508 and 7324-7328), which limit certain political activities of State or local government employees whose principal employment is in connection with an activity financed in whole or in part by this federal assistance.

vi. **False Statements.** The Subrecipient understands that making false statements or claims in connection with this award is a violation of federal law and may result in criminal, civil, or administrative sanctions, including fines, imprisonment, civil damages and penalties, debarment from participating in federal awards or contracts, and/or any other remedy available by law.

vii. **Monitoring**: The Subrecipient agrees to allow the City and the US Treasury to monitor the subaward in accordance with all applicable statutes, regulations, OMB circulars, and guidelines. The Subrecipient shall allow the City to have oversight of any Subrecipient's spending and monitoring of specific outcomes and benefits attributable to use of subaward funds by Subrecipient.

viii. **Audits** In accordance with the provisions of 2 CFR 200, Subpart F - Audit Requirements, nonfederal entities that expend financial assistance of $750,000 or more in Federal awards will have a single audit conducted for that year. Non-federal entities that expend less than $750,000 a year in Federal awards are exempt from Federal audit requirements for that year, except as noted in 2 CFR 200.503. The City is responsible for resolving audit findings specifically related to the subaward and not responsible for resolving cross-cutting findings (§200.332(d)(4)).

ix. **Disclosure of Information**. Any confidential or personally identifiable information (PII) acquired during the course of the subaward shall not be disclosed by the Subrecipient to any person, firm, corporation, association, or other entity for any reason or purpose whatsoever without the prior written consent of the City, either during the term of the Agreement or after termination of the Agreement for any reasons whatsoever. The Subrecipient agrees to abide by applicable federal regulations regarding confidential information and research standards, as appropriate, for federally supported projects.

x. **Conflicts of Interest.** The Subrecipient understands and agrees it must maintain a conflict of interest policy consistent with 2 C.F.R. § 200.318(c) and that such conflict of interest policy is applicable to each activity funded under this award. Subrecipients must disclose in writing to the City, as appropriate, any potential conflict of interest affecting the awarded funds in accordance with 2 C.F.R. § 200.112.

b. City and Other City Requirements (see §200.332(a)(3)):

i. **Reporting:** Subrecipient agrees to comply with any reporting obligations established by the City as it relates to this award. Subrecipient shall submit a Monthly Grant Report by the 6th of the month to the Contact for the City.

ii. **Maintenance of and Access to Records:**

a. The Subrecipient shall maintain records and financial documents sufficient to evidence compliance with section 603(c) of the Act, Treasury's regulations implementing that section, and guidance issued by Treasury regarding the foregoing.

b. The US Treasury Office of Inspector General and the Government Accountability Office, the City, or their authorized representatives, shall have the right of access to records (electronic and otherwise) of the Subrecipient in order to conduct audits or other investigations.

c. Records shall be maintained by Subrecipient for a period of five (5) years after all funds have been audited, the audit resolved, and all funds expended or returned to Treasury, whichever is later.

iii. **Administrative Considerations**. Where policies of the Subrecipient differ from those of, such as travel reimbursement, fringe benefits, indirect costs, etc., the policies of the subrecipient shall be applicable to cost incurrences under the Agreement provided such policies comply with awarding agency regulations.

iv. **Responsibilities**. The Subrecipient agrees to furnish the necessary resources, materials, services, and otherwise to do all things necessary for the performance of the work described in Scope of Work, which is incorporated into the Agreement as Attachment , along with the Budget required for that performance, which is incorporated into the Agreement as Attachment B and C respectively. (see Attachment B: Scope of Work and Attachment C Budget). Subrecipient shall provide Monthly Reports as provided above.

v. **Relationship of Parties**. The parties are independent, and neither party is the agent, joint venturer, partner, or employer of the other.

vi. **Rebudgeting and Prior Approvals**. Subrecipient is permitted to rebudget direct costs, if necessary, as described in the uniform guidance (§200.308) to better reflect spending requirements, subject to the City's written approval, and subject to the federal awarding agency's policy and UGG's that would define requirements for prior written approval (§200.407) before implementation.

vii. **Monitoring Plan and Reporting**. The City will monitor the Subrecipient to ensure that the subaward is used for authorized purposes, in compliance with federal statutes, regulations,

and the terms and conditions of the subaward; and that subaward performance goals are achieved, as required by §200.332(d). The City will monitor the Subrecipient and identify any failures in the administration and performance of the award. The monitoring plan will also serve to identify whether the Subrecipient needs technical assistance.

In addition to program performance, The City will monitor financial performance as required by §200.332(d)(1)). Monitoring will be used to document allowable and unallowable costs, time and effort reporting and travel. Monitoring also will be used to follow up on findings identified in an earlier monitoring visit, from document reviews or after an audit to ensure the Subrecipient took corrective action (§200.332(d)(2)).

As appropriate, the cooperative audit resolution process may be applied. The monitoring plan may include on-site visits, follow-up, document and/or desk reviews, third-party evaluations, virtual monitoring, technical assistance and informal monitoring such as email and telephone interviews.

The City will also issue management decisions for applicable audit findings as required by §200.521 (§200.332(d)(3)). For reporting, UGG requires that the City and the Subrecipient use OMB approved government-wide standard information collections when providing performance information and data in reports.

The books and records of the Subrecipient shall be made available, if needed and upon request, at subrecipient's regular place of business, for audit by personnel authorized by the City or federal government. The Subrecipient books and records must be retained for a period of five (5) years following receipt of final report, understanding no other actions require an extension of the record retention period, such as open audit findings, committed program income, or other reasons, as applicable.

viii. **Risk Assessments, Specific Conditions and Remedies**. The City has conducted a risk assessment as required by §200.332(b) and determined the subrecipient's level of risk as **low**. Risk assessments may be repeated throughout the project period after scheduled reports, audits, unanticipated issues or other adverse circumstances that may arise. In the event of noncompliance or failure to perform, the City has the authority to apply remedies, as defined in the uniform guidance (§200.339), including but not limited to: temporarily withholding payments, disallowances, suspension or termination of the federal award, suspension of other federal awards received by the subrecipient, debarment or other remedies including civil and/or criminal penalties, as appropriate (§200.332(h). The City will also consider whether the monitoring results of the Subrecipient necessitate adjustments to the its own record (see §200.332(9)).

ix. **Copyright/Intellectual Property**. The federal government will possess the entire copyright, title, and interest in all materials, inventions or deliverables produced as a result of this subaward, including use of logos, as appropriate. As a general principle, subject to the rights of the federal government and with respect to any subject, invention, material, or deliverable in which the City [and subrecipient] retain title resulting from this subaward, the federal

government shall ha.ve a nonexclusive, nontransferable, irrevocable paid-up license to practice or have practiced for or on behalf of the United States the subject invention, material or deliverable throughout the world. The City and Subrecipient will credit the federal award agency on any materials, inventions or deliverables produced under the federal award and subaward.

c. Suspension and Debarment. Subrecipient represents that neither it nor any of its principals has been debarred, suspended or determined ineligible to participate in federal assistance awards or contracts as defined in regulations implementing Office of Management and Budget Guidelines on Governmentwide Debarment and Suspension (Non-procurement) in Executive Order 12549. Subrecipient further agrees that it will notify the City immediately if it or any of its principals is placed on the list of parties excluded from federal procurement or non-procurement programs available at www.sam.gov.;
d. DUNS Number. Subrecipient agrees and acknowledges the City may not grant the Subaward and Subrecipient may not receive the Subaward unless Subrecipient has provided its Data Universal Numbering System ("DUNS") number to the City. The DUNS number is the nine-digit number established and assigned by Dun and Bradstreet, Inc. to uniquely identify business entities;
e. Federal Funding Accountability and Transparency Act of 2006. Subrecipient agrees to provide the City with all information requested by the City to enable the City to comply with the reporting requirements of the Federal Funding Accountability and Transparency Act of 2006;
f. Licenses, Certifications, Permits, Accreditation. Subrecipient shall procure and keep current any license, certification, permit or accreditation required by federal, state or local law and shall submit to the City proof of any licensure, certification, permit or accreditation upon request; and
g. Other City Agreements. Subrecipient shall fulfill all other agreements with the City and shall comply with all federal, state and local laws applicable to programs funded by such agreements.

8. LIMITATION OF FUNDING AND COMPENSATION: **It is expressly agreed and understood that upon execution of the Agreement, the City agrees to allocate no more than the amount of $686,500.00 US DOLLARS for full and complete satisfactory performance of this Agreement. Drawdowns for the advance payment of eligible expenses shall be made against the line item budgets specified in Appendix A in accordance with the following procedures:**

   a. **Subrecipient shall submit request to the City for the advance payment along with an invoice or other documentation establishing the cost of the item.**

   b. **The City will advance funds to Subrecipient for the item.**

   c. **Following Subrecipient's payment for the item, Subrecipient shall provide a receipt or other proof of payment acceptable to the City within seven (7) days of payment.**

   d. **The City may withhold advance funds for items if any required documentation has not been provided for previous purchases within the time required by 8.c**

Alternatively, the Subrecipient may request reimbursement for expenses by submitting monthly invoices, itemized by budget category, along with copies of invoices, receipts, and other documentation acceptable to

the City. The City will then remit reimbursement payments to Subrecipient within thirty (30) days of acceptance of the invoice.

9. SCOPE OF WORK: The Subrecipient shall perform all services according to the Scope of Work as indicated in **Appendix A.** Any deviation from the provisions detailed in the Scope of Work shall be prohibited unless prior approval is granted by formal change order to this Agreement.

10. PUBLICITY AND USE OF NAME:

    a. Any and all news releases, advertising, promotion, sales literature containing the City of Fayetteville logo or name shall be subject to prior written approval of the other party, and subject to the prior written approval of the City, as appropriate. Any such publicity shall credit the contributions of each party.

    b. Neither party shall use the name, insignia, or trademark of the other party, nor any adaptation thereof, nor the names of any of its employees in any advertising, promotion or sales literature without the written consent of the other party.

11. FISCAL AND ADMINISTRATIVE RESPONSIBILITIES: The Subrecipient agrees to comply with the provisions of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (2 CFR part 200) (the Uniform Guidance), including the cost principles and restrictions on general provisions for selected items of cost. as applicable, and all requirements and standards which shall include but are not limited to the following:

    a. Compliance with Federal Procurement Laws: The City hereby designates and the Subrecipient hereby agrees to receive funding through the City's ARPA funding and to administer such funding in accordance the United States Treasury **Final Rule**, 31 CFR Part 35, 87 FR 4446, Coronavirus State and Local Fiscal Recovery Funds with this agreement. Compliance with procurement laws shall be inclusive of all appendices within this Agreement.

    All contracts for services and procurement for materials shall be carried out in compliance with **2 CFR Part 200 Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.**

    b. Compliance with Other Federal, State and Local Procurement: All contracts for services and procurement for materials shall be carried out in compliance with and all other applicable federal, state, and local rules and regulations, including regulations and policies from the City's Purchasing Division.

    City of Fayetteville Procurement Thresholds:

        a. $0 - $999: No quotes required

        b. $1,000 - $2,499: minimum of 3 verbal quotes required

c. $2,500 - $34,999: minimum of 3 written quotes required

d. $35,000 and up: Formal sealed bid / solicitation process

i. Refer to State of Arkansas Procurement laws, City of Fayetteville Purchasing Policies and Ordinances for requirements for formal solicitation processes.

c. Records and Reports: The Subrecipient shall, at a minimum, submit the following reports to the City and report as required in **Appendix C**:

i. **Monthly reports** shall be submitted to the City fifteen (15) calendar days after month end. Monthly reports shall be submitted on the City provided form and will provide and outline funded activities undertaken during each month for the duration of the project as it relates to **Appendix A – Scope of Work & Project Allocation.** Failure to provide the required documentation and information will affect the funding in this agreement and future requests for funding.

ii. **A Final Summary Report** due no later than thirty (30) calendar days after the end of the Agreement period shall include a summary of all compiled information and activities related to this Agreement

iii. The Subrecipient agrees to maintain records and reports related to the project for a period of no less than **five years** following the term of this Agreement.

iv. Access to Records (See §200.332(a)(5))

a. The City, its auditors, and if necessary, the federal agency, will be provided access to the subrecipient's programmatic and financial records (§200.337(a)).

b. The Subrecipient will maintain all programmatic and financial records, including but not limited to:

i. records providing a full description of each activity undertaken;

ii. records demonstrating that each activity undertaken meets the national objectives of the federally- connected program;

iii. records required to determine the eligibility of activities;

iv. records required to document the acquisition, improvement, use or disposition of real property acquired or improved with the subaward assistance;

v. records documenting compliance with federal and local laws; and

vi. financial records required by program regulations and the Office of Management and Budget.

c. The Subrecipient shall retain all records pertinent to program activities and financial expenditures incurred under this Agreement for a period of three years after the date of submission of the final expenditure report under this award (§200.334). Notwithstanding the above, if there are litigation, claims, audits, negotiations, written notification from the federal program or cognizant agencies or the City, or other actions that involve any of the records cited and that have started before the expiration of the three year period, then such records must be retained until completion of the actions and resolutions of all issues (§200.334(a)), or the expiration of the three-year period, whichever occurs later.

d. Documentation of Costs: The Subrecipient shall maintain records on materials purchased, services performed, individuals and families served. All costs shall be supported by evidencing in proper detail the nature and propriety of charges. All checks, payrolls, invoices, contracts, vouchers, orders or other accounting documents pertaining in whole or in part to this Agreement shall be clearly identified and readily accessible.

e. Limitations on Expenditures. Subrecipient shall not be reimbursed or otherwise compensated for any expenditures incurred or services provided prior to the Effective Date or following the earlier of the expiration or termination of this Agreement. The City shall only reimburse Subrecipient for documented expenditures incurred during the Agreement Term that are: (i) reasonable and necessary to carry out the Scope of Work; (ii) documented by contracts or other evidence of liability consistent with established federal, state and local procurement guidelines; and (iii) incurred in accordance with all applicable requirements for the expenditure of funds payable under this Agreement.

f. Improper Payments. Any item of expenditure by Subrecipient under the terms of this Agreement which is found by auditors, investigators, and other authorized representatives of the City, the U.S. Government Accountability Office or the Comptroller General of the United States to be improper, unallowable, in violation of federal or state law or the terms of the Notice of Prime Award or this Agreement, or involving any fraudulent, deceptive, or misleading representations or activities of Subrecipient, shall become Subrecipient's liability, to be paid by Subrecipient from funds other than those provided by City under this Agreement or any other agreements between City and Subrecipient. This provision shall survive the expiration or termination of this Agreement.

g. Audited Financial Statements. In any fiscal year in which Subrecipient expends $750,000 or more in federal awards during such fiscal year, including awards received as a subrecipient, Subrecipient must comply with the federal audit requirements contained in 2 CFR § 200, including the preparation of an audit by an independent Certified Public Accountant in accordance with the Single Audit Act

Amendments of 1996, 31 U.S.C. 7501-7507, and with Generally Accepted Accounting Principles.[1] If Subrecipient expends less than $750,000 in federal awards in any fiscal year, it is exempt from federal audit requirements, but its records must be available for review by the City and appropriate officials of the U.S. Government Accountability Office and the Comptroller General of the United States, and it must still have a financial audit performed for that year by an independent Certified Public Accountant. Subrecipient shall provide the City with a copy of Subrecipient's most recent audited financial statements, federal Single Audit report, if applicable (including financial statements, schedule of expenditures of federal awards, schedule of findings and questioned costs, summary of prior audit findings, and corrective action plan, if applicable), and management letter within thirty (30) days after execution of this Agreement and thereafter within nine (9) months following the end of Subrecipient's most recently ended fiscal year.

h. Closeout (see 200.332(a)(6)): The City will determine whether all applicable administrative actions and all required work have been completed by the Subrecipient at the end of the period of performance. If the Subrecipient fails to complete the requirements, the federal awarding agency or pass-through will proceed to closeout the award with the information available (§200.344). The pass-through will note if closeout relates to the end of a 12-month period and termination of subaward, or if the closeout relates to the end of a 12-month period and preparation for an upcoming continuation period.
    i. The City must provide timelines for completion of tasks (see §200.344).
    ii. The City must identify submission dates of all performance and financial reports (no later than 90 calendar days after the period of performance) (§200.344(a}).
    iii. The City must describe requirements for liquidation of financial obligations if the award is ending, or identification of carry-over of funds, if needed, to the next award period (§200.344(b))
    iv. The City must include completion of any other required closeout activities, such as submission of deliverables, payments, if any, due to the Subrecipient from the City, attribution to the federal agency and/or copyright or patent rights, and any accounting of real or personal property (§200.344(c) and (f)).
    v. The Subrecipient must permit the City and auditors to have access to the subrecipient's records and financial statements as necessary for audits and monitoring during the record retention period of three years, or more as appropriate (§200.337(a)).
    vi. The federal agency and/or City has the right to return to audit the program after close-out at any time during the record retention period and as long as the records are retained, to conduct recovery audits including the recovery of funds, as appropriate (§200.337(c)}.

12. COOPERATION IN MONITORING AND EVALUATION:

a. City Responsibilities. The City shall monitor, evaluate and provide guidance and direction to Subrecipient in the conduct of Approved Services performed under this Agreement. The City has the responsibility to determine whether Subrecipient has spent funds in accordance with applicable laws,

regulations, including the federal audit requirements and agreements and shall monitor the activities of Subrecipient to ensure that Subrecipient has met such requirements. The City may require Subrecipient to take corrective action if deficiencies are found.

b. Subrecipient Responsibilities:

i. Subrecipient shall permit the City to carry out monitoring and evaluation activities, including any performance measurement system required by applicable law, regulation, funding sources guidelines or by the terms and conditions of the applicable Notice of Prime Award, and Subrecipient agrees to ensure, to the greatest extent possible, the cooperation of its agents, employees and board members in such monitoring and evaluation efforts. This provision shall survive the expiration or termination of this Agreement.

ii. Subrecipient shall cooperate fully with any reviews or audits of the activities under this Agreement by authorized representatives of the City, the U.S. Government Accountability Office or the Comptroller General of the United States and Subrecipient agrees to ensure to the extent possible the cooperation of its agents, employees and board members in any such reviews and audits. This provision shall survive the expiration or termination of this Agreement.

13. PROGRAM INCOME: It is not the intent of this Agreement to produce income relating from the Scope of Work; however, income directly generated from the use funds associated with this Agreement by the Subrecipient shall be returned to the City of Fayetteville.

14. MONITORING AND AUDITS: The City is required to ensure that federal funding requirements are met, that the funds are used for the purpose of the program, and the Subrecipient complies with reporting and auditing requirements. The City will monitor and audit the Subrecipient to assure the compliance of project.

15. REMEDIES FOR NONCOMPLIANCE: If the Subrecipient fails to comply with any term in this Agreement, the City may take one or more of the actions indicated in **2 CFR Part 200.338 Remedies for noncompliance**.

16. PERFORMANCE TERM EXTENSION: The City may consider an extension of the term of performance based on justifiable circumstances beyond the control of the Subrecipient. The Subrecipient shall make application and submit documentation to the City regarding such circumstances, and acceptance of a proposal for the new time frame constitutes an amendment to this Agreement. Any such request for extensions shall be subject to the written approval of the City. The decision of the City shall be final and conclusive.

17. TERMINATION OF AGREEMENT: This Agreement may be terminated at any time by either party, upon giving 30 calendar days written notice to the non-terminating party. This Agreement shall be automatically terminated in the event that funds under federal award are discontinued by the awarding agency for any reason. Such termination shall take effect upon receipt of written notice to Subrecipient from the City. If there is a need to settle on an early termination, partial payment up to the termination date would be determined by incurrence of allowable cost, by completion of task, by percent of time completed up to the settlement, or some other method as defined by the City upon review of the subrecipient's records.

CITY OF
FAYETTEVILLE
ARKANSAS

18. CLAIMS AGAINST THE CITY: The Subrecipient agrees to defend, indemnify and save harmless the City from any and all claims of any nature whatsoever which may arise from the Subrecipient's performance of this Agreement; provided, however, that nothing contained in this Agreement shall be construed as rendering the Subrecipient liable for acts of the City, its officers, agents or employees.

19. CONFLICTS OF INTEREST: The Subrecipient represents that none of its employees, officers, or directors presently have any interest, either directly or indirectly, which would conflict in any manner with the Subrecipient's performance or procurement under this Agreement, and that no person having such interest will be appointed or employed by the Subrecipient.

20. BINDING EFFECT: This Agreement shall be binding upon and shall ensure to the benefit of the parties hereto and their respective heirs and assigns; provided, however, that no assignment shall be effective to relieve a party of any liability under this Agreement unless the other party has consented in writing to the assignment and agreed to the release of such liability. The City and the Subrecipient hereby acknowledge receipt of a duly executed copy of this Agreement complete with all Appendices attached hereto.

21. PAYMENTS: Specific project completion dates may be negotiated during the contract term. Payment may be reduced, delayed, or denied until acceptable work products are produced.

    a. Costs shall be necessary, reasonable and directly related to the scope of the project in this agreement. All costs shall be legal and proper. The budget included in **Appendix A** shall control amounts of allowable expenditures within budget categories.

    b. The total amount invoiced to the City over the course of the contract period shall not exceed $686,500.00 US Dollars, the agreed upon contribution of the City pursuant to **Appendix A**.

    c. On or before the fifteenth (15th) day of each month and in any event no later than thirty (30) calendar days after the earlier of the expiration or termination of this Agreement, Subrecipient shall submit invoices for the most recent month ended, to the City, setting forth actual expenditures of Subrecipient in accordance with this Agreement The Subrecipient shall provide backup documentation with all invoices to show compliance with all federal, state and local laws.

    d. The City may disapprove the requested compensation. If the compensation is so disapproved, the City shall notify Subrecipient as to the disapproval. If payment is approved, no notice will be given.

22. INSURANCE: Subrecipient shall, at all times throughout the Agreement Term, carry insurance in such form and in such amounts as City may from time to time reasonably require against other insurable hazards and casualties that are commonly insured against in the performance of similar services as are to be provided under this Agreement. At a minimum, Subrecipient shall maintain during the Agreement Term at least the following types and limits of insurance coverage:

    a. Workers' compensation in amounts no less than required by law and statutory amount;
    b. Employer's Liability Insurance with a limit of no less than $1,000,000;

c. Commercial general liability insurance, including personal injury, contractual liability and property damage, with limits of $1,000,000 per occurrence and $2,000,000 aggregate;
d. Umbrella liability insurance with a limit of $1,000,000 per occurrence and in the aggregate.

All policies (other than workers' compensation and employer's liability insurance) providing such coverage shall name the City as an additional insured with respect to Subrecipient's performance of services under this Agreement. Subrecipient shall provide the City with certificates of insurance evidencing such coverage within thirty (30) calendar days after execution of this Agreement, which certificates shall provide that the City shall receive thirty (30) days' advance written notice of any pending cancellation or non-renewal of any of the coverages required by the City pursuant to this Agreement. Insurance coverages that expire before the expiration of the Agreement Term shall be promptly renewed by Subrecipient so that there is no gap in coverage and certificates of insurance evidencing such renewal coverage shall be provided to the City, by a copy provided to the City immediately upon renewal. Subrecipient's failure to maintain insurance in the form and/or amounts required by the Citypursuant to this Agreement shall be deemed a material breach of this Agreement and the City shall have the right thereupon to terminate this Agreement immediately in addition to any other remedy provided herein.

23. Changes in Scope or Price: Changes, modifications or amendments in scope, price or fees to this agreement shall not be allowed without a prior formal contract amendment approved by the City **in advance** of the change in scope, price or fees.

24. Freedom of Information Act: This Agreement is subject to the Arkansas Freedom of Information Act. If a Freedom of Information Act request is presented to the City of Fayetteville, the subrecipient shall do everything possible to provide the documents in a prompt and timely manner as prescribed in the Arkansas Freedom of Information Act (A.C.A. §25-19-101 et. seq.). Only legally authorized photocopying costs pursuant to the FOIA may be assessed for this compliance.

25. Jurisdiction: Venue to resolve any disputes shall be **Washington County, Arkansas** with **Arkansas law** applying to the case. This Agreement shall be governed by and construed in accordance with the laws of the State of Arkansas without regard to conflict of law principles.

26. Miscellaneous

a. Notices. Any notice, request, consent or approval required or permitted to be given under this Agreement or pursuant to law shall be sufficient if in writing, and if and when sent by certified or registered mail, with postage prepaid, to City's address or to the Subrecipient's address as listed below.

b. Severability. If any term, provision, covenant or condition of this Agreement, or the application thereof to any person, place or circumstance, shall be held to be invalid, unenforceable or void, the remainder of this Agreement and such term, provision, covenant or condition as applied to other persons, places and circumstances shall remain in full force and effect.

c. Construction. The headings and captions of this Agreement are provided for convenience only and are intended to have no effect in construing or interpreting this Agreement. The language in all parts of this Agreement shall be in all cases construed according to its fair meaning and not strictly for or against either party.

d. Rights Cumulative. The rights and remedies provided by this Agreement are cumulative, and the exercise of any right or remedy by either party hereto (or by its successor), whether pursuant to this Agreement, to any other agreement, or to law, shall not preclude or waive its right to exercise any or all other rights and remedies.

e. Assistance. The Subrecipient shall, during and after termination of services rendered, upon reasonable notice, furnish such information and proper assistance to the City as may reasonably be required by the City in connection with work performed by Subrecipient.

f. Compliance with Law. The Parties mutually represent that throughout the term of this Agreement their respective performance under this Agreement shall be, and shall remain, in compliance with all applicable federal, state and local laws and regulations.

CITY OF FAYETTEVILLE AMERICAN RESCUE PLAN ACT 2022 SUBRECIPIENT GRANT APPLICATION

NOTE: Submission of a Subrecipient Grant Application provides no guarantee that the applicant will receive funding. All organizations selected to receive funds will be subject to entering into a contract with the City of Fayetteville and subject to the rules and regulations pertaining to the American Rescue Plan Act.

Please review the City of Fayetteville American Rescue Plan Act 2022 Subrecipient Grant Application Guide for more information on the required items listed in this application.

PART 1 APPLICANT IDENTIFICATION	
Total Amount of Funding Requested (whole dollar) [Minimum $50,000]	$686,500
Applicant/Organization Name	Peace at Home Family Shelter
Mailing Address (street, city, zip)	PO Box 10946, Fayetteville, AR 72703
Organization Website	www.peaceathomeshelter.org
DUNS Number	029494593
Organization FEIN/SSN	71-0552563
PART 2 APPLICANT CONTACT INFORMATION	
Contact for Project (name & title)	Teresa Mills, CEO
Contact Phone Number	479-444-8310
Contact Email	tmills@peaceathomeshelter.com
Signature Authority (name, title & email address)	Teresa Mills, CEO tmills@peaceathomeshelter.com
PART 3 PROJECT INFORMATION	
Project Name	Expanding Safe Shelter for Survivors of Domestic Violence
Project Address (street, city, zip)	3045 E Ivey Ln, Fayetteville, AR 72764

PART 3 PROJECT INFORMATION continued	
Is anyone with control over the Organization (i.e. owner, manager, director, board member, or other) or any member of that person's immediate family, an employee or elected official of the City of Fayetteville	◉ Yes ○ No
If Yes, above, please identify person and position with the City	Blake Pennington, Assistant City Attorney (Peace at Home board member)
Project Summary (**brief** synopsis of proposed project)	The ongoing COVID-19 pandemic has made it more difficult and dangerous for victims of domestic violence seeking to flee abusive homes. Peace at Home Family Shelter proposes a renovation project to create 3 additional shelter bedrooms with bathrooms. This will allow Peace at Home to provide safe, emergency shelter to approximately 60 additional adults and children fleeing domestic violence each year.
Describe previous experience in providing similar services	As the first domestic violence shelter in the state of Arkansas, Peace at Home Family Shelter has been providing safe, emergency shelter to survivors of domestic violence and their children since 1979. In addition to safe shelter, Peace at Home also provides housing assistance, counseling, legal services exclusively to survivors of domestic violence and their children. In total, we serve over 1,000 individuals each year.
Programs will typically be funded for a time period not to exceed 12 months from the signed date of the subrecipient agreement. Please describe your organization's ability to plan and utilized requested funds within that timeframe.	The requested project will be for rehabilitation and construction costs in order to increase the physical capacity of our emergency shelter for survivors of domestic violence. We are already working with an architect for this and other projects and would be able to quickly begin construction to meet the limited time frame required.

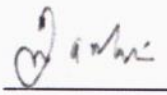
PART 4 PROJECT BENEFICIARIES	
Projected number of **Fayetteville** beneficiaries	60 per year

Because the federal rules vary depending on the type of project for which funds are being requested, the city has grouped project requests in 3 focus categories: Social Services, Economic, and Environmental. Please choose the corresponding category below that most closely identifies your project.

PART 4A **SOCIAL SERVICES APPLICATIONS ONLY**	
Will **ALL** beneficiaries live, work and/or go to school in Fayetteville	◉ Yes ○ No
Will **ALL** beneficiaries meet US Treasury Low to Moderate Income (LMI) Guidelines (please see Application Guide, Exhibit A).	◉ Yes ○ No
Will **ALL** beneficiaries have been negatively impacted by COVID-19	◉ Yes ○ No
Does this request respond to a **negative COVID-19 impact**?	◉ Yes ○ No
If answering Yes to the **question above**, please describe the COVID-19 impact and how this proposal will aid in responding to the impact	COVID-19 has made it more dangerous for victims of domestic violence to flee abusive homes and avoid homelessness. The Final Rule lists victims of domestic violence as a population disproportionately negatively impacted by COVID-19 (page 19). This proposal will increase our community's capacity to provide safe emergency housing for a vulnerable population.
Please indicate how the proposed project meets eligibility standards and requirements described in the Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds	As a project providing emergency housing assistance, this project is enumerated in the Final Rule as eligible to respond to the impacts of the pandemic on households and communities.

PART 4B **ENVIRONMENTAL APPLICATIONS ONLY**	
Please describe the effect of the proposed environmental impact or benefit. Please indicate how the proposed project meets eligibility standards under the EPA's Clean Water State Revolving Fund (CWSRF), Drinking Water State Revolving Fund (DWSRF), or eligible projects as described in Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds. See Subrecipient Application Guide for more information.	
PART 4C **ECONOMIC APPLICATIONS ONLY**	
Please describe the residents or industry sector this grant request is intended to serve or benefit. Please indicate how the proposed project meets eligibility standards and requirements described in the Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds.	This project will exclusively serve survivors of domestic violence and their children in our community. As a project providing emergency housing assistance, this project is enumerated in the Final Rule as eligible to respond to the impacts of the pandemic on households and communities.
Does this request respond to a negative COVID-19 impact	(●) Yes ( ) No
If yes, please describe the COVID-19 impact and how this proposal will aid in the City's economic recovery	COVID-19 has made it more dangerous for victims of domestic violence to flee abusive homes and avoid homelessness. The Final Rule lists victims of domestic violence as a population disproportionately negatively impacted by COVID-19 (page 19). This proposal will aid in the City's economic recovery by meeting temporary housing needs for a vulnerable population so they have the stability to find or maintain employment and permanent housing in our community and achieve self-sufficiency.

PART 5 FAYETTEVILLE BUSINESS LICENSE



City Code Chapter 118 Business Registry and Licenses delineates what businesses are required to have a Fayetteville Business License. Submission of this grant application indicates that, if required, a current business license is in place.

PART 6 SIGNATURE OF SIGNATURE AUTHORITY AND DATE

I am an authorized employee/agent of the applicant organization and I am authorized to submit this application.

I have read and reviewed the American Rescue Plan Act documentation. I understand that as a subrecipient of the City of Fayetteville's American Rescue Plan Act funds, I will be responsible for maintaining records, complying with provisions of the subrecipient agreement, and providing any/all records and information necessary for the City of Fayetteville to report on this award.

All applications and documentation are subject to disclosure pursuant to the Arkansas Freedom of Information Act. All documentation may be provided to Federal and/or State government agencies for accounting and auditing purposes.

Teresa A. Mills CEO 3/29/2022

Name/Title/Date

PART 7 ORGANIZATION DESCRIPTION Provide a brief description of your organization and the services offered.	
Year of Incorporation	1977
Philosophy, Purpose and/or Mission Statement	The mission of Peace at Home Family Shelter is to empower victims of domestic violence to survive and thrive by nurturing their self-determination and courage and to promote healthy relationships and compassionate communities through education, outreach, and advocacy. Peace at Home Family Shelter believes that everyone deserves to feel safe in their own homes. We operate with an empowerment philosophy centered on the rights of survivors of domestic violence to be the decision makers of their own lives.

Provide a brief description of your organization including information about programs and/or services other than the proposed project.

Peace at Home Family Shelter helps survivors of domestic violence and their children safely escape abusive homes and rebuild their lives. In addition to providing immediate safe shelter, our program connects survivors with the resources they need to transition out of shelter and into long-term safe housing. Our programs have five components working together to help survivors transition from homes of violence to homes of safety.

24 Hour Hotline -- First, Peace at Home operates a 24/7 crisis hotline and email inbox. Our crisis hotline is available in Spanish and English and serves as the entry point for clients. Hotline advocates assist callers with community referrals, safety planning, coming into shelter, and our additional programs. In 2021, we received 1,205 calls from members of our community seeking help.

Emergency Shelter -- The emergency shelter has 14 rooms available for women, men, children, and any person escaping violence. Bilingual staff are available to provide onsite assistance to clients. On average, families stay 45 days in shelter as they work on their individualized goals (90 day maximum stay). Peace at Home was able to provide emergency shelter to 151 individuals in the community in 2021, a reduced capacity due to COVID-19 and renovations to make the shelter safer for families during the on-going pandemic.

Advocacy -- While staying in shelter, clients are offered advocacy services to help them reach their goals. Advocates meet daily with clients to develop and implement self-sufficiency plans.

These plans are built around the current strengths of a survivor and provide steps to achieving long-term goals such as employment or affordable housing.

The purpose is to empower survivors to overcome their unique barriers such as education skill gaps, scarce work histories, unreliable transportation, career planning, affordable child-care, and self-confidence. Peace at Home maintains partnerships with life-skill agencies such as the Credit Counseling of Arkansas and Dress for Success. These agencies provide critical support for the clients to meet the variety of employment and financial goals that they have towards achieving a safe life. The Institute for Women's Policy Research indicates that 73% of respondents said that they had stayed with an abusive partner longer than they wanted or returned to them for economic reasons.

Working together, advocates eliminate barriers that might keep survivors economically or emotionally dependent on a violent partner. These advocacy services are also open to individuals in the community who are not currently living at our shelter but are survivors of domestic violence in need of assistance.

Housing Assistance -- Survivors of domestic violence in our emergency shelter and in our community also have access to support from our Home Restored and SHE housing assistance programs. These program provides direct financial support, landlord advocacy, budgeting skills, and case management to help families find permanent housing in the community that meets their long-term needs. In 2021, Peace at Home was able to provide housing-related assistance to 160 families.

Legal Services -- Peace at Home has an onsite staff attorney and a bilingual advocate to assist shelter residents and outreach clients with legal needs. Our legal services department enables Peace at Home to provide survivors of domestic violence with legal representation for divorce cases, child custody issues, and orders of protection as well as legal advocacy and financial assistance for legal fees. In 2021, Peace at Home provided legal services to 537 clients.

Mental Health/Emotional Support Services - Peace at Home employs a full-time bilingual counselor and partners with the University of Arkansas Doctorate Program in Psychology as a site for doctoral candidates in clinical psychology. These mental health professionals provide one-on-one and parent/child counseling to clients of Peace at Home free of charge. In 2021, Peace at Home provided direct counseling services to 94 individuals in our community.

All of our services are free of charge, personalized to meet individual survivor needs, and voluntary.

PART 8	PROJECT BUDGET Provide a descriptive line-item budget for the entire project including the American Rescue Plan Act (ARPA) funds being requested. **Provide specific information on how American Rescue Plan Act funds will be used and include any necessary supporting documentation. Please indicate whether any American Rescue Plan Act funds have been requested or received from other sources, and if so, provide detailed information on the source and proposed use of those funds.** Please indicate how you will spend all awarded ARPA funding by the project end date.

Peace at Home Family Shelter - Rehabilitation Project to Add Capacity

Budget (based on estimates received from WER Architects):
Construction:
1000 sf ($235 per sf renovation costs) - $235,000
1250 sf ($300 per sf building addition costs) - $375,000
Escalation - $18,000
FF&E - $35,000
Design/Engineering/Surveys/Geotech - $23,500

TOTAL PROJECT BUDGET: $686,500

Spending by Project Date - The requested funds will be for a building rehabilitation project and will be expensed within the project timeline on the above line items.

Other ARPAR Requests - Peace at Home Family Shelter has requested $25,000 in ARPAR funding from the Emergency Food and Shelter Program to support emergency shelter operations.

PART 9	PROJECT DESCRIPTION Describe the proposed project and provide the information requested under PART 9 of the American Rescue Plan Act 2022 Subrecipient Application Guide. Please provide any additional information that will assist in evaluating the project.

What Project Will Do

This project will increase the capacity of the emergency shelter for survivors of domestic violence by renovating and expanding a section of the existing shelter building to add three additional client rooms and bathrooms. This project will involve converting an existing storage space into client rooms while expanding out to replace the lost storage. Currently, Peace at Home Family Shelter has capacity for up to 14 households (survivors and their children) at the emergency shelter (40-55 people). This project would permanently increase that capacity to 17 households. Allowing approximately 60 additional individuals to access emergency shelter every year.

COVID-19 has negatively impacted victims of domestic violence, as many individuals have lost employment and social supports to help them successfully leave abusive relationships. In 2022, Peace at Home received 1,205 calls from individuals seeking support in our community, an increase from pre-pandemic 2019 numbers of 24%.

As more individuals are requesting shelter services, Peace at Home Family Shelter also had to change shelter operations due to COVID-19. Now, clients no longer share rooms or bathrooms to help prevent the spread of illness. While this change was necessary to protect the health of families in shelter, it reduced capacity for emergency shelter. The completion of this project will recover lost capacity and allow Peace at Home to safely shelter more families. Peace at Home operates with a waiting list for emergency shelter due to insufficient capacity and high community need.

This project is in alignment with the City of Fayetteville's Master Plan goals #1 and #6 as it involves the rehabilitation of an existing building and increasing access to housing.

Execution of Project

This is a building rehabilitation project that will involve the addition of three additional family rooms to Peace at Home's emergency shelter. If approved for funding, the construction would take place within the 12-month timeframe and services would continue for families residing in the newly expanded shelter. Peace at Home Family Shelter is already working with WER Architects on this project and, if approved for funding, would be able to complete the rehabilitation within the required time frame.

How Beneficiaries are Selected

Peace at Home Family Shelter advertises and operates a 24-hour crisis hotline, email help address, and limited online chat for individuals in the community to reach out to us for assistance.

PART 9 PROJECT DESCRIPTION continued

When a person contacts us for services, our only requirement is that they are a survivor of domestic violence and have a need for services. For the emergency shelter, someone must be either fleeing intimate partner violence or homeless as a result of recent intimate partner violence. Our emergency shelter program defines 'recent' as within the past three months. Per best practices laid out by the National Network to End Domestic Violence, no additional verifications are required. When a new client arrives at the shelter, they complete intake paperwork with an advocate.

Services Provided

In addition to meeting immediate needs for shelter, each emergency shelter client is assigned to a primary advocate who works with them to identify and work towards individualized goals for self-sufficiency and recovery from domestic violence. These goals can include: acquiring permanent housing, increasing income, rebuilding social support networks, legal needs, and mental wellbeing. Many of these needs can be addressed through Peace at Home's in-house programs, but advocates also offer robust community referrals to help clients connect with the community at large.

Verification of Final Rule Qualification

As a project providing emergency housing, this project is an enumerated in the Final Rule as a qualifying project. While there is no income requirement for emergency shelter services for victims of domestic violence, anyone seeking shelter at a domestic violence organization is considered homeless under Housing and Urban Development (HUD) Category 4 definition and is a presumed benefit clientele population assumed to be Low to Moderate Income according to Community Development Block Grant HUD regulations.

Benefit of Project – Limited Assistance and Creating Self-Sufficiency

This project will enhance Peace at Home Family Shelter's capacity to provide immediate, life-saving emergency shelter to survivors of domestic violence and their children at a time when survivors are more in need of shelter and our capacity has been reduced (both because of the ongoing COVID-19 pandemic). In addition to this immediate assistance, the individualized advocacy provided to all residents of Peace at Home's emergency shelter allows individuals to work towards and obtain self-sufficiency and thrive in our community.

How Project will Further Philosophy and Purpose

This project will further Peace at Home Family Shelter's philosophy and purpose by increasing our capacity to provide client-centered safe shelter and supportive services to survivors of domestic violence and their children in our community. With increased capacity, our emergency shelter can serve more families in need every day and help make our community a safe and thriving place for all of our neighbors.

PART 10	PROJECT TIMELINE Provide a complete and specific timeline for all activities related to proposed project.

Project Timeline

Upon Award Notification (0-3 months) - Finalize design details with WER Architects, receive bids from construction contractors and select a contractor for the project.

3 Months-9 Months into Project - Complete construction and renovation of shelter space to add 3 additional client rooms with bathrooms and replace storage area.

9 Months - 12 Months (if not completed sooner) - Ensure all construction is completed and payments are processed. Acquire and install all necessary furniture, fixtures, and equipment. Complete inspection. Open rooms up to survivors of domestic violence seeking safe shelter.

PART 11 DATA COLLECTION, RECORD MAINTENANCE, AND REPORTING Describe how the organization will collect data and maintain records to track program activities and eligibility verification. Please also describe your organization's ability to produce required documentation including financial reports, performance reports, progress reports, expenditure information, etc.

Data Collection and Maintenance:

Peace at Home Family Shelter utilizes a database system built for victim service organizations by Osnium called WomensShelter for all client and program tracking information, including program activities and client eligibility. This database is used to generate reports for any grant requirements and to assess program effectiveness. Data is collected by advocate staff members of Peace at Home at intake and on an ongoing basis throughout the client's stay.

Organizational Capacity

Peace at Home has extensive experience managing federal grants, including grants as a recipient and sub-recipient from the Department of Justice, Department of Health and Human Services, and the Department of Housing and Urban Development.

Peace at Home employs a full-time Chief Financial Officer (CFO) to oversee all finances, including financial reporting for grants. The CFO is a certified public accountant and successfully manages all necessary reporting for grants and ensure appropriate accounting for all restricted funding.

PART 12 PROJECT EVALUATION | OBJECTIVES AND OUTCOMES List the objectives (not activities) of the proposed project. Describe how each objective will be measured to determine if it has been met.

Use the following format

Objective #:
Outcome(s):
Method of Measurement:

Objective: More survivors of domestic violence and their children have access to safe, emergency housing in order to flee abusive homes.

Outcome: 60 more individuals will receive safe shelter in the 12 months following completion of the rehabilitation than in the 12 months previous, increasing the shelter's capacity by 25%.

Method of Measurement: Shelter stays are logged in our database system and the previous 12 months before the rooms were added can be compared to a period of time after the additional rooms are opened to measure an increase in capacity for safe shelter.

Objective: More survivors of domestic violence will have access to individualized advocacy and support to help them overcome barriers to independence.

Outcome: Peace at Home advocates will provide an average of 14 hours of individualized advocacy services to each household staying in the shelter, providing support in commonly identified needs, including: safety planning, emotional support, resource referrals, legal support, budgeting, and transportation.

Method of Measurement: Hours of advocacy services are logged in the database system and can be pulled in aggregate for all shelter clients.

PART 13 PARTIAL FUNDING Indicate whether the project can proceed with partial funding. If **YES**, indicate the minimum amount the applicant will accept with line items arranged from highest to lowest priority. Describe the impact that partial funding will have on the project. If **NO**, the project will not be considered for partial funding.

Yes, the project could proceed with partial funding. Given the limited 12-month time frame, the project would need to be funded at a minimum of 75% in order to move forward. The impact of partial funding could potentially be redirecting needed funds away from important programs serving survivors of domestic violence in our community in order to fill the budget gap and move forward.

Line Item Breakdown - All line items are equally necessary for funding as all are necessary aspects of the rehabilitation project.

PART 14 ADDITIONAL DOCUMENTATION CHECKLIST

Please provide these items with your application. See page 10 of the 2022 American Rescue Plan Act Subrecipient Application Guide for more information

AGENCY: Department of the Treasury.

ACTION: Final rule.

SUMMARY: The Secretary of the Treasury (Treasury) is adopting as final the interim final rule published on May 17, 2021, with amendments. This rule implements the Coronavirus State Fiscal Recovery Fund and the Coronavirus Local Fiscal Recovery Fund established under the American Rescue Plan Act.

DATES: The provisions in this final rule are effective April 1, 2022.

FOR FURTHER INFORMATION CONTACT: Katharine Richards, Director, Coronavirus State and Local Fiscal Recovery Funds, Office of Recovery Programs, Department of the Treasury, (844) 529–9527.

SUPPLEMENTARY INFORMATION:

I. Introduction

Overview

Since the first case of coronavirus disease 2019 (COVID–19) was discovered in the United States in January 2020, the pandemic has caused severe, intertwined public health and economic crises. In March 2021, as these crises continued, the American Rescue Plan Act of 2021 (ARPA) [1] established the Coronavirus State and Local Fiscal Recovery Funds (SLFRF) to provide state, local, and Tribal governments [2] with the resources needed to respond to the pandemic and its economic effects and to build a stronger, more equitable economy during the recovery. The U.S. Department of the Treasury (Treasury) issued an interim final rule implementing the SLFRF program on May 10, 2021 [3] and has since disbursed over $240 billion to state, local, and Tribal governments and received over 1,500 public comments on the interim final rule. Treasury is now issuing this final rule which responds to public comments, implements the ARPA statutory provisions on eligible and ineligible uses of SLFRF funds, and makes several changes to the provisions of the interim final rule, summarized below in the section Executive Summary of Major Changes.

Since Treasury issued the interim final rule in May 2021, both the public health and economic situations facing the country have evolved. On the public health front, the United States has made tremendous progress in the fight against COVID–19, including a historic vaccination campaign that has reached over 80 percent of adults with at least one dose and is reaching millions of children as well.[4] However, the disease continues to present an imminent threat to public health, especially among unvaccinated individuals. As the Delta variant spread across the country this summer and fall, the United States faced another severe wave of cases, deaths, and strain on the healthcare system, with the risk of hospitalization and mortality exponentially greater to unvaccinated Americans. COVID–19 has now infected over 50 million and killed over 800,000 Americans since January 2020; tens of thousands of Americans continue to be infected each day.[5] Even as the nation recovers, new and emerging COVID–19 variants may continue to pose threats to both public health and the economy. Moving forward, state, local, and Tribal governments will continue to play a major role in responding through vaccination campaigns, testing, and other services.

The economic recovery similarly has made tremendous progress but faces continued risks from the disease and the disruptions it has caused. In the early months of the pandemic, the United States experienced the sharpest economic downturn on record, with unemployment spiking to 14.8 percent in April 2020.[6] The economy has gradually added back jobs, with growth accelerating in the first half of 2021.[7] However, as the Delta variant spread, the intensified health risks and renewed disruptions slowed growth, demonstrating the continued risks from the virus. By fall 2021, the economy had exceeded its pre-pandemic size [8] and unemployment had fallen below 5 percent,[9] but despite this progress, too many Americans remain unemployed, out of the labor force, or unable to pay their bills, with this pain particularly acute among lower-income Americans and communities of color. Again, moving forward, state, local, and Tribal governments will remain on the frontlines of the economic response and rebuilding a stronger economy in the aftermath of the pandemic.

However, as state, local, and Tribal governments continue to face substantial needs to respond to public health and economic conditions, they have also experienced severe impacts from the pandemic and resulting recession. State, local, and Tribal governments cut over 1.5 million jobs in the early months of the pandemic amid sharp declines in revenue and remain over 950,000 jobs below their pre-pandemic levels.[10] As the Great Recession demonstrated, austerity among state, local, and Tribal governments can hamper overall economic growth and severely curtail the ability of governments to serve their constituents.

Recognizing these imperatives, the SLFRF program provides vital resources for state, local, and Tribal governments to respond to the pandemic and its economic effects and to replace revenue lost due to the public health emergency, preventing cuts to government services. Specifically, the ARPA provides that SLFRF funds [11] may be used:

(a) To respond to the public health emergency or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality;

(b) To respond to workers performing essential work during the COVID–19

[11] The ARPA adds section 602 of the Social Security Act, which creates the State Fiscal Recovery Fund, and section 603 of the Social Security Act, which creates the Local Fiscal Recovery Fund (together, SLFRF). Sections 602 and 603 contain substantially similar eligible uses; the primary difference between the two sections is that section 602 establishes a fund for states, territories, and Tribal governments and section 603 establishes a fund for metropolitan cities, nonentitlement units of local government, and counties.

public health emergency by providing premium pay to eligible workers;

(c) For the provision of government services to the extent of the reduction in revenue due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year prior to the emergency; and

(d) To make necessary investments in water, sewer, or broadband infrastructure.

In addition, Congress specified two types of ineligible uses of funds: funds may not be used for deposit into any pension fund or, for states and territories only, to directly or indirectly offset a reduction in net tax revenue resulting from a change in law, regulation, or administrative interpretation.

Issued May 10, 2021, Treasury's interim final rule provided further detail on eligible uses of funds within the four statutory categories, ineligible uses of funds, and administration of the program. The interim final rule provided state, local, and Tribal governments substantial flexibility to determine how best to use payments from the SLFRF program to meet the needs of their communities. The interim final rule aimed to facilitate swift and effective implementation by establishing a framework for determining the types of programs and services that are eligible under the ARPA along with examples of eligible uses of funds that state, local, and Tribal governments may consider.

State, local, and Tribal governments are already deploying SLFRF funds to make an impact in their communities. The SLFRF program ensures that state, local, and Tribal governments have the resources needed to fight the pandemic, sustain and strengthen the economic recovery, maintain vital public services, and make investments that support long-term growth, opportunity, and equity. Treasury looks forward to supporting and engaging with state, local, and Tribal governments as they use these funds to make transformative investments in their communities. Finally, with so many pressing and effective ways to use SLFRF funds, there is no excuse for waste, fraud, or abuse of these funds.

Treasury received over 1,500 comments spanning nearly all aspects of the interim final rule. The final rule considers and responds to comments, provides clarification to many aspects of the interim final rule, and makes several changes to eligible uses under the program, summarized immediately below.

Executive Summary of Major Changes and Clarifications

The final rule provides broader flexibility and greater simplicity in the program, in response to public comments. Among other clarifications and changes, the final rule provides for the following:

- *Public Health and Negative Economic Impacts:* In addition to programs and services, the final rule clarifies that recipients may use funds for capital expenditures that support an eligible COVID–19 public health or economic response. For example, recipients may build certain affordable housing, childcare facilities, schools, hospitals, and other projects consistent with the requirements in this final rule and the Supplementary Information.

In addition, the final rule presumes that an expanded set of households and communities are "impacted" or "disproportionately impacted" by the pandemic, thereby allowing recipients to provide responses to a broad set of households and entities without requiring additional analysis. Further, the final rule provides a broader set of enumerated eligible uses available for these communities as part of COVID–19 public health and economic response, including making affordable housing, childcare, and early learning services eligible in all impacted communities and making certain community development and neighborhood revitalization activities eligible for disproportionately impacted communities.

Further, the final rule allows for a broader set of uses to restore and support government employment, including hiring above a recipient's pre-pandemic baseline, providing funds to employees that experienced pay cuts or furloughs, avoiding layoffs, and providing retention incentives.

- *Premium Pay:* The final rule offers more streamlined options to provide premium pay, by broadening the share of essential workers who can receive premium pay without a written justification while maintaining a focus on lower-income and frontline essential workers.
- *Revenue Loss:* The final rule offers a standard allowance for revenue loss of up to $10 million, not to exceed a recipient's SLFRF award amount, allowing recipients to select between a standard amount of revenue loss or complete a full revenue loss calculation. Recipients that select the standard allowance may use that amount for government services.
- *Water, Sewer, and Broadband Infrastructure:* The final rule significantly broadens eligible broadband infrastructure investments to address challenges with broadband access, affordability, and reliability, and adds additional eligible water and sewer infrastructure investments, including a broad range of lead remediation and stormwater management projects.

Structure of the Supplementary Information

In addition to this Introduction, this Supplementary Information is organized into four sections: (1) Eligible Uses, (2) Restrictions on Use, (3) Program Administration Provisions, and (4) Regulatory Analyses.

The Eligible Uses section describes the standards to determine eligible uses of funds in each of the four eligible use categories:

(1) Responding to the public health and negative economic impacts of the pandemic (which includes several sub-categories)

(2) Providing premium pay to essential workers

(3) Providing government services to the extent of revenue loss due to the pandemic, and

(4) Making necessary investments in water, sewer, and broadband infrastructure.

Each eligible use category has separate and distinct standards for assessing whether a use of funds is eligible. Standards, restrictions, or other provisions in one eligible use category do not apply to the others. Therefore, recipients should first determine which eligible use category a potential use of funds fits within, then assess whether the potential use of funds meets the eligibility standard or criteria for that category. In the case of uses to respond to the public health and negative economic impacts of the pandemic, recipients should also determine which sub-category the eligible use fits within (*i.e.*, public health, assistance to households, assistance to small businesses, assistance to nonprofits, aid to impacted industries, or public sector capacity and workforce), then assess whether the potential use of funds meets the eligibility standard for that sub-category. Treasury does not pre-approve uses of funds; recipients are advised to review the final rule and may pursue eligible projects under it.

In some sections of the rule, Treasury identifies specific uses of funds that are eligible, called "enumerated eligible uses"; for example, Treasury provides many enumerated eligible uses of funds to respond to the public health and negative economic impacts of the pandemic. Uses of funds that are not specifically named as eligible in this

final rule may still be eligible in two ways. First, under the revenue loss eligible use category, recipients have broad latitude to use funds for government services up to their amount of revenue loss due to the pandemic. A potential use of funds that does not fit within the other three eligible use categories may be permissible as a government service, which recipients can fund up to their amount of revenue loss. For example, transportation infrastructure projects are generally ineligible as a response to the public health and negative economic impacts of the pandemic; however, a recipient could fund these projects as a government service up to its amount of revenue loss, provided that other restrictions on use do not apply. See sections Revenue Loss and Restrictions on Use for further information. Second, the eligible use category for responding to the public health and negative economic impacts of the pandemic provides a non-exhaustive list of enumerated eligible uses, which means that the listed eligible uses include some, but not all, of the uses of funds that could be eligible. The Eligible Uses section provides a standard for determining if other uses of funds, beyond those specifically enumerated, are eligible. If a recipient would like to pursue a use of funds that is not specifically enumerated, the recipient should use the standard and other guidance provided in the section Public Health and Negative Economic Impacts to assess whether the use of funds is eligible.

Next, the Restrictions on Use section describes limitations on how funds may be used. Treasury has divided the Restriction on Use section into (A) statutory restrictions under the ARPA, which include (1) offsetting a reduction in net tax revenue, and (2) deposits into pension funds, and (B) other restrictions on use, which include (1) debt service and replenishing reserves, (2) settlements and judgments, and (3) general restrictions. These restrictions apply to all eligible use categories; however, some restrictions apply only to certain types of recipient governments, and recipients are advised to review the final rule to determine which restrictions apply to their type of government (*e.g.*, state, territory, Tribal government, county, metropolitan city, or nonentitlement unit of government). To reiterate, for recipient governments covered by a specific restriction, that restriction applies to all eligible use categories and any use of funds under the SLFRF program. Specifically:

- For states and territories only, funds may not be used to offset directly or indirectly a reduction in net tax revenue resulting from a change in state or territory law.
- For all recipients except Tribal governments, funds may not be used for deposits into a pension fund.
- For all recipients, funds may not be used for debt service or replenishing financial reserves.
- All recipients must also comply with three general restrictions. First, a recipient may not use SLFRF funds for a program, service, or capital expenditure that conflicts with or contravenes the statutory purpose of ARPA, including a program, service, or capital expenditure that includes a term or condition that undermines efforts to stop the spread of COVID–19. Second, recipients may not use SLFRF funds in violation of the conflict-of-interest requirements contained in the Award Terms and Conditions, including any self-dealing or violation of ethics rules. Lastly, recipients should be aware that federal, state, and local laws and regulations, outside of SLFRF program requirements, also apply, including for example, environmental laws and federal civil rights and nondiscrimination requirements, which include prohibitions on discrimination on the basis of race, color, national origin, sex (including sexual orientation and gender identity), religion, disability, age, or familial status (having children under the age of 18).

The Program Administration Provisions section describes the processes and requirements for administering the program on an ongoing basis, specifically as relates to the following: Distribution of funds, timeline for using funds, transfer of funds from a recipient to different organizations, use of funds for program administration, reporting on use of funds, and remediation and recoupment of funds used for ineligible purposes. Of note, SLFRF funds may only be used for costs incurred within a specific time period, beginning March 3, 2021, with all funds obligated by December 31, 2024 and all funds spent by December 31, 2026. Recipients are advised to also consult Treasury's Reporting and Compliance Guidance for additional information on program administration processes and requirements, including applicability of the Uniform Guidance.

Finally, the section Regulatory Analyses provides Treasury's analysis of the impacts of this rulemaking, as required by several laws, regulations, and Executive Orders.

Throughout this Supplementary Information, statements using the terms "should" or "must" refer to requirements, except when used in summarizing opinions expressed in public comments. Statements using the term "encourage" refer to recommendations, not requirements.

II. Eligible Uses

A. Public Health and Negative Economic Impacts

Background

Since the first case of COVID–19 was discovered in the United States in January 2020, the disease has infected over 50 million and killed over 800,000 Americans.[12] The disease—and necessary measures to respond—have had an immense public health and economic impact on millions of Americans across many areas of life, as detailed below in the respective sections on Public Health and Negative Economic Impacts. Since the release of the interim final rule in May 2021, the country has made major progress in fighting the disease and rebuilding the economy but faces continued risks, as illustrated by the spread of the Delta variant and the resulting slowdown in the economic recovery. The SLFRF program, and Treasury's interim final rule, provide substantial flexibility to recipients to respond to pandemic impacts in their local community; this flexibility is designed to help state, local, and Tribal governments adapt to the evolving public health emergency and tailor their response as needs evolve and to the particular local needs of their communities.

Indeed, state, local, and Tribal governments face continued needs to respond at scale to the public health emergency. This includes continued public health efforts to slow the spread of the disease, to increase vaccination rates and provide vaccinations to new populations as they become eligible, to protect individuals living in congregate facilities, and to address the broader impacts of the pandemic on public health. Similarly, while a strong economic recovery is underway, the economy remains 3.9 million jobs below its pre-pandemic level, pointing to the continued need for response efforts, with low-income workers and communities of color facing elevated rates of unemployment and economic hardship.[13] Long-standing disparities in health and economic outcomes in

underserved [14] communities, that amplified and exacerbated the impacts of the pandemic, also present continued barriers to full and equitable recovery.

As state, local, and Tribal governments work to meet the public health and economic needs of their communities, these governments are also confronting the need to rebuild their own capacity. Facing severe budget challenges during the pandemic, many state, local, and Tribal governments have been forced to make cuts to services or their workforces, including cutting over 1.5 million jobs from February to May 2020, or delay critical investments. As of fall 2021, state, local, and Tribal government employment remained over 950,000 jobs below pre-pandemic levels.[15] In the recovery from the Great Recession, cuts to state, local, and Tribal governments became a meaningful drag on economic growth for several years, and the SLFRF program provides the resources needed to re-invest in vital public services and workers to avoid this outcome.[16]

1. General Provisions: Structure and Standards

Background: Sections 602(c)(1)(A) and 603(c)(1)(A) of the Social Security Act establish that recipients may use funds "to respond to the public health emergency with respect to COVID–19 or its negative economic impacts, including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality." The interim final rule established three categories within this eligible use: (1) Public health responses for those impacted by the pandemic, including the general public; (2) responses to the negative economic impacts that were experienced by those impacted as a result of the pandemic; and (3) additional services, either as a public health response or a response to the negative economic impacts of the pandemic, for disproportionately impacted communities.

The interim final rule established the method to determine which specific programs or services may be eligible to respond to the public health emergency or to respond to the negative economic impacts of the public health emergency within this framework. The interim final rule included multiple enumerated uses that are eligible within each of these categories when provided to eligible populations, including populations that the interim final rule presumed to have been *impacted* (in the case of public health responses and responses to negative economic impacts) or *disproportionately impacted* (in the case of disproportionately impacted communities). Finally, the interim final rule also allowed recipients to designate additional individuals or classes as impacted or disproportionately impacted. The standards for each of these criteria under the interim final rule are discussed below.

To assess whether a program or service would be eligible to respond to the public health emergency or its negative economic impacts, the interim final rule stated that, "the recipient [is required] to, first, identify a need or negative impact of the COVID–19 public health emergency and, second, identify how the program, service, or other intervention addresses the identified need or impact [. . . .] [E]ligible uses under this category must be in response to the disease itself or the harmful consequences of the economic disruptions resulting from or exacerbated by the COVID–19 public health emergency." The enumerated eligible uses were presumed to meet this criterion.

With respect to uses not specifically enumerated in the interim final rule as eligible public health responses, the interim final rule stated that, "[t]o assess whether additional uses would be eligible under this category, recipients should identify an effect of COVID–19 on public health, including either or both of immediate effects or effects that may manifest over months or years, and assess how the use would respond to or address the identified need."

With respect to uses not specifically enumerated in the interim final rule as eligible responses to a negative economic impact of the public health emergency, the interim final rule stated that "[e]ligible uses that respond to the negative economic impacts of the public health emergency must be designed to address an economic harm resulting from or exacerbated by the public health emergency. In considering whether a program or service would be eligible under this category, the recipient should assess whether, and the extent to which, there has been an economic harm, such as loss of earnings or revenue, that resulted from the COVID–19 public health emergency and whether, and the extent to which, the use would respond to or address this harm.[17] A recipient should first consider whether an economic harm exists and whether this harm was caused or made worse by the COVID–19 public health emergency." The interim final rule went on to say that: "In addition, the eligible use must 'respond to' the identified negative economic impact. Responses must be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses."

Throughout this final rule, Treasury refers to households, communities, small businesses, nonprofits, and industries that experienced public health or negative economic impacts of the pandemic as "impacted." The first section in the interim final rule under this eligible use category included public health responses for these impacted classes. The second category in the interim final rule under this eligible use category included responses to the negative economic impacts that were experienced by these impacted classes as a result of the pandemic.

The interim final rule further recognized that certain populations have experienced disproportionate health or negative economic impacts during the pandemic, as pre-existing disparities in these communities amplified the impacts of the pandemic. For example, the interim final rule recognized that the negative economic effects of the pandemic were particularly pronounced among lower-income families, who were more likely to experience income loss and more likely to have a job that required in-person work. The interim final rule recognized the role of pre-existing social vulnerabilities and disparities in driving the disparate health and economic outcomes and presumed that programs designed to address these health or economic disparities are responsive to the public health or negative economic impacts of the COVID–19 public health emergency, when provided in disproportionately impacted communities. In addition to identifying certain populations and communities

[14] Treasury uses "underserved" to refer to populations sharing a particular characteristic, as well as geographic communities, that have been systematically denied a full opportunity to participate in aspects of economic, social, and civic life. In the interim final rule, Treasury generally used the term "disadvantaged" to refer to these same populations and communities.

[15] U.S. Bureau of Labor Statistics, All Employees, State Government [CES9092000001] and All Employees, Local Government [CES9093000001], retrieved from FRED, Federal Reserve Bank of St. Louis, *https://fred.stlouisfed.org/series/CES9092000001* and *https://fred.stlouisfed.org/series/CES9093000001* (last visited December 7, 2021).

[17] In some cases, a use may be permissible under another eligible use category even if it falls outside the scope of section (c)(1)(A) of section 602 and 603 of the Social Security Act.

presumed to be disproportionately impacted, it also empowered recipients to identify other disproportionately impacted households, populations, communities, or small businesses. The interim final rule provided that, in identifying these disproportionately impacted communities, recipients should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the specific populations, households, or geographic areas to be served.

Throughout this final rule, Treasury refers to those households, communities, small businesses, and nonprofits that experienced disproportionate public health or negative economic impacts of the pandemic as "disproportionately impacted." The third category in the interim final rule under this eligible use included public health responses and responses to the negative economic impacts for these disproportionately impacted classes.

The interim final rule provided significant flexibility for recipients to determine which households, populations, communities, or small businesses have been impacted and/or disproportionately impacted by the pandemic and to identify appropriate responses. The interim final rule included several provisions to provide simple methods for recipients to identify impacts and design programs to address those impacts. First, the interim final rule allowed recipients to demonstrate a negative economic impact on a population or class and provide assistance to households or small businesses that fall within that population or class. In such cases, the recipient need only demonstrate that an individual household or business is within the class that experienced a negative economic impact, rather than requiring a recipient to demonstrate that each individual household or small business experienced a negative economic impact, because the impact was already identified for the class.

Second, in the interim final rule, Treasury presumed that certain populations have been impacted or disproportionately impacted and are thus eligible for services that respond to these impacts or disproportionate impacts. Specifically, the interim final rule permitted recipients to presume that households that experienced unemployment, increased food or housing insecurity, or are low- or moderate-income experienced a negative economic impact from the pandemic. The interim final rule also permitted recipients to presume that certain services provided in Qualified Census Tracts (QCTs), to individuals living in QCTs, or by Tribal governments are responsive to disproportionate impacts of the pandemic. In addition to the populations presumed to be impacted or disproportionately impacted, under the interim final rule, recipients could identify other impacted households or classes, as described above, as well as other populations, households, or geographic areas that are disproportionately impacted by the pandemic.

Third, as mentioned previously, the interim final rule included a non-exhaustive list of uses of funds that Treasury identified as responsive to the impacts or disproportionate impacts of the pandemic. Treasury refers to these as "enumerated eligible uses."

To summarize, the interim final rule identified certain populations that are presumed to be *impacted* by the pandemic (and specific enumerated uses of funds that are responsive to that impact) and populations that are presumed to be *disproportionately impacted* by the pandemic (and specific enumerated uses of funds that are responsive to those disproportionate impacts). In addition, the interim final rule provided standards for recipients to assess whether additional uses of funds, beyond the enumerated eligible uses, are eligible for impacted and disproportionately impacted populations and permitted recipients to identify other households or classes that experienced impacts of the pandemic or disproportionate impacts of the pandemic.

Rule Structure

Public Comment: Many commenters expressed concern regarding the structure of the eligible uses, indicating they found the structure of the public health and negative economic impacts section of the interim final rule to be confusing or difficult to navigate. Other commenters indicated that they understood the enumerated uses to be the only eligible uses and/or the presumed eligible populations to be the only eligible populations. Several commenters expressed frustration about the number of eligible uses specifically enumerated in the interim final rule, which they considered too few, and commenters proposed a wide range of additional enumerated eligible uses (for further discussion, see the section Public Health and section Negative Economic Impacts). Commenters expressed concern with pursuing uses of funds not explicitly enumerated in the eligible use section or uncertainty regarding the broad flexibility provided under the interim final rule to pursue additional programs that respond to the public health or negative economic impacts of the pandemic or the process for doing so.

Treasury Response: Treasury recognizes that many commenters felt the structure of the interim final rule could be clarified. These comments are consistent with many of the questions that Treasury has received from recipients, which requested clarification regarding the category their desired response fits into. Treasury observes that these comments and questions generally fall into four categories: (1) How to identify the correct public health or negative economic impact category for a particular response, (2) how to identify whether a particular use is eligible, (3) how to identify an impacted or disproportionately impacted class, and (4) whether an enumerated use can be provided to a class other than those presumed impacted or disproportionately impacted. In response to comments, Treasury is adjusting the structure of the public health and negative economic impacts eligible use section of the final rule to improve clarity and make it easier for recipients to interpret and apply the final rule.

Specifically, Treasury is restructuring the rule to aid recipients in determining whether a particular response is eligible and how the particular response might be eligible under a particular category. This restructuring reinforces the fundamental criteria that a use of funds is eligible based on its responsiveness to a public health or negative economic impact experienced by individuals, households, small businesses, nonprofits, or impacted industries (together "beneficiaries").[18] This restructuring is intended to make the rule easier to navigate and to implement, including any criteria or conditions on particular uses of funds.

The reorganization of the public health and negative economic impacts section of the final rule is also intended to clarify the enumerated eligible uses described in the interim final rule. The reorganization itself is not intended to change the scope of the enumerated uses that were included in the interim final rule or that were allowable under the interim final rule. In some cases, specific enumerated uses are being altered, and those changes are discussed

[18] Note that small businesses, nonprofits, and industries may also function as subrecipients. For additional information on these distinctions see section Distinguishing Subrecipients versus Beneficiaries.

as changes within the section on that enumerated use.

The final rule streamlines and aligns services and standards that are generally applicable or are provided for public health purposes. Under this approach, eligible uses to respond to the public health emergency are organized based on the type of public health problem: (1) COVID–19 mitigation and prevention, (2) medical expenses, (3) behavioral health care, and (4) preventing and responding to violence. Under this approach, eligible uses to respond to the negative economic impacts of the public health emergency are organized based on the type of beneficiary: (1) Assistance to households, (2) assistance to small businesses, and (3) assistance to nonprofits, alongside a fourth standalone eligibility category for aid to travel, tourism, hospitality, and other impacted industries. The first three categories, assistance to households, small businesses, and nonprofits, include enumerated eligible uses for impacted and disproportionately impacted beneficiaries. This change in structure is intended to provide a framework that clearly identifies the intended beneficiaries of uses of funds and provides clarity about what types of assistance are "responsive to the pandemic or its negative economic impacts" for these beneficiaries.

a. Standards for Identifying a Public Health or Negative Economic Impact

Standards: Designating a Public Health Impact

Public Comment: Many commenters expressed uncertainty about how to determine whether a use of funds, beyond those specifically enumerated as eligible, might be an eligible public health response. For example, many commenters submitted questions asking whether specific uses of funds would be eligible. Others described what they considered to be impacts of the pandemic and argued that uses of funds to respond to these issues should be eligible. Some commenters requested that Treasury provide additional detail to guide their assessments of eligible uses of funds. For example, a commenter requested more clarification around exactly what and whose medical expenses can be covered. These comments ranged in their specificity and covered the full range of the enumerated eligible uses.

Treasury Response: Treasury is clarifying that when assessing whether a program or service is an eligible use to respond to the public health impacts of the COVID–19 public health emergency, the Department will consider the two eligibility requirements discussed below. These standards apply to all proposed public health uses.

First, there must be a negative public health impact or harm experienced by an individual or a class. For ease of administration, the interim final rule allowed, and the final rule maintains the ability for, recipients to identify a public health impact on a population or group of individuals, referred to as a "class," and to provide assistance to that class. In determining whether an individual is eligible for a program designed to address a harm experienced by a class, the recipient need only document that the individual is within the class that experienced a public health impact, see section Standards: Designating Other Impacted Classes. In the case of some impacts, for example impacts of COVID–19 itself that are addressed by providing prevention and mitigation services, such a class could reasonably include the general public.

Second, the program, service, or other intervention must address or respond to the identified impact or harm. The final rule maintains the interim final rule requirement that eligible uses under this category must be in response to the disease itself or other public health harms that it caused.[19]

Responses must be reasonably designed to benefit the individual or class that experienced the public health impact or harm. Uses of funds should be assessed based on their responsiveness to their intended beneficiaries and the ability of the response to address the impact or harm experienced by those beneficiaries.

Responses must also be related and reasonably proportional to the extent and type of public health impact or harm experienced. Uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses. Reasonably proportional refers to the scale of the response compared to the scale of the harm. It also refers to the targeting of the response to beneficiaries compared to the amount of harm they experienced. In evaluating whether a use is reasonably proportional, recipients should consider relevant factors about the harm identified and the response. For example, recipients may consider the size of the population impacted and the severity, type, and duration of the impact. Recipients may also consider the efficacy, cost, cost-effectiveness, and time to delivery of the response.

If a recipient intends to fund capital expenditures in response to the public health impacts of the pandemic, recipients should refer to the section Capital Expenditures for details about the eligibility of capital expenditures.

Standards: Designating a Negative Economic Impact

Public Comment: Many commenters expressed uncertainty about how to determine whether uses of funds, beyond those specifically enumerated as eligible, might be eligible responses to negative economic impacts. For example, many commenters submitted questions asking whether specific uses of funds would be eligible. Others described what they considered to be impacts of the pandemic and argued that uses of funds to respond to these issues should be eligible. Some commenters requested that Treasury provide additional detail to guide their assessments of eligible uses of funds. These comments ranged in their specificity and covered the full range of eligible uses to respond to negative economic impacts. Several commenters asked for clarification about what types of food assistance would be considered eligible. Another commenter requested that the establishment of outdoor dining be eligible. Many commenters inquired about homeless shelters as an eligible use of SLFRF funds.

Commenters also expressed uncertainty about the ability to establish classes, including geographic areas, that experienced a negative economic impact or disagreed with the requirement that an individual entity be impacted by the pandemic in order to receive assistance. For example, a commenter argued that interventions should not be limited to individuals or businesses that experienced an economic impact and should instead be used broadly to support economic growth. These commenters argued that an expenditure that supports a more robust economy may help combat the pandemic's negative economic impacts, and it can do so even if funding is provided to individuals or entities that did not themselves experience a negative economic impact during the pandemic.

Treasury Response: The final rule maintains the standard articulated in

[19] In designing an intervention to mitigate COVID–19, the recipient should consider guidance from public health authorities, particularly the Centers for Disease Control and Prevention (CDC), in assessing appropriate COVID–19 mitigation and prevention strategies (*see* Centers for Disease Control and Prevention, COVID–19, *https://www.cdc.gov/coronavirus/2019-ncov/index.html*). A program or service that imposes conditions on participation in or acceptance of the service that would undermine efforts to stop the spread of COVID–19 or discourage compliance with practices in line with CDC guidance for stopping the spread of COVID–19 is not a permissible use of funds.

the interim final rule. For clarity, the final rule re-articulates that when assessing whether a program or service is an eligible use to respond to the negative economic impacts of the COVID–19 public health emergency, Treasury will consider the two eligibility requirements discussed below.

First, there must be a negative economic impact, or an economic harm, experienced by an individual or a class. The recipient should assess whether, and the extent to which, there has been an economic harm, such as loss of earnings or revenue, that resulted from the COVID–19 public health emergency. A recipient should first consider whether an economic harm exists and then whether this harm was caused or made worse by the COVID–19 public health emergency. This approach is consistent with the text of the statute, which provides that funds in this category must be used to "respond to the public health emergency with respect to . . . its negative economic impacts."

While economic impacts may either be immediate or delayed, individuals or classes that did not experience a negative economic impact from the public health emergency would not be eligible beneficiaries under this category. As noted above, the interim final rule permitted recipients to presume that households that experienced unemployment, increased food or housing insecurity, or are low- or moderate-income experienced a negative economic impact from the pandemic. For discussion of the final rule's approach to this presumption, see section Populations Presumed Eligible.

The final rule also maintains several provisions included in the interim final rule and subsequent guidance that are intended to ease administration of identifying that the beneficiary experienced a negative economic impact or harm. For example, the interim final rule allowed, and the final rule maintains the ability for, recipients to demonstrate a negative economic impact on a population or group, referred to as a "class," and to provide assistance to households, small businesses, or nonprofits that fall within that class. In such cases, the recipient need only demonstrate that the household, small business, or nonprofit is within the class that experienced a negative economic impact, see section Standards: Designating Other Impacted Classes. This would allow, for example, an internet access assistance program for all households with children to support those households' ability to participate in healthcare, work, and educational activities like extending learning opportunities, among other critical activities. In that case, the recipient would only need to identify a negative economic impact to the class of "households with children" and would not need to document or otherwise demonstrate that each individual household served experienced a negative economic impact.

Second, the response must be designed to address the identified economic harm or impact resulting from or exacerbated by the public health emergency. In selecting responses, the recipient must assess whether, and the extent to which, the use would respond to or address this harm or impact. This approach is consistent with the text of the statute, which provides that funds may be used to "respond to" the "negative economic impacts" of the public health emergency "including assistance to households, small businesses, and nonprofits, or aid to impacted industries such as tourism, travel, and hospitality." The list of potential responses ("assistance" or "aid") suggests that responses should address the "negative economic impacts" of particular types of beneficiaries (*e.g.*, households or small businesses).

Responses must be reasonably designed to benefit the individual or class that experienced the negative economic impact or harm. Uses of funds should be assessed based on their responsiveness to their intended beneficiary and the ability of the response to address the impact or harm experienced by that beneficiary.[20]

Responses must also be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses.[21] Reasonably proportional refers to the scale of the response compared to the scale of the harm. It also refers to the targeting of the response to beneficiaries compared to the amount of harm they experienced; for example, it may not be reasonably proportional for a cash assistance program to provide assistance in a very small amount to a group that experienced severe harm and in a much larger amount to a group that experienced relatively little harm. In evaluating whether a use is reasonably proportional, recipients should consider relevant factors about the harm identified and the response. For example, recipients may consider the size of the population impacted and the severity, type, and duration of the impact. Recipients may also consider the efficacy, cost, cost-effectiveness, and time to delivery of the response.

Finally, recipients should be aware of the distinction between beneficiaries of funds and subrecipients; a recipient may provide services to beneficiaries through subrecipients that did not experience a negative economic impact, see section Distinguishing Subrecipients versus Beneficiaries. That is, a recipient may award SLFRF funds to an entity that did not experience a negative economic impact in order to implement a program or provide a service to beneficiaries on its behalf. Such transfers, when implementing a public health or negative economic impact response, should be responsive to and designed to benefit individuals, households, small businesses, nonprofits, or impacted industries that did experience a public health or negative economic impact.

Determining the Appropriate Eligible Use Category

Public Comment: Some commenters expressed uncertainty about how to analyze negative economic impacts to different entities (*e.g.*, households, small businesses, nonprofits). For example, commenters asked whether a nonprofit, which did not experience a negative economic impact itself, could be granted funds to provide services to individuals experiencing homelessness, who did experience negative economic impacts. Other commenters proposed providing assistance to support the expansion of small businesses, under the theory that this would create more job opportunities for unemployed workers who experienced negative economic impacts.

Treasury Response: In the final rule, Treasury is clarifying that recipients should assess a potential use of funds based on which beneficiary experienced the negative economic impact, in other words, the households, small businesses, nonprofits, or impacted industries that experienced the negative economic impact.

Treasury notes that recipients may award SLFRF funds to many different types of organizations to carry out eligible uses of funds and serve beneficiaries on behalf of a recipient.

[20] For example, expenses such as excessive compensation to employees or expenses which have already been reimbursed through another federal program, are not reasonably designed to address a negative economic impact to a beneficiary.

[21] For example, a program or service that imposes conditions on participation in or acceptance of the service that would undermine efforts to stop the spread of COVID–19 or discourage compliance with practices in line with CDC guidance for stopping the spread of COVID–19 is not a permissible use of funds.

When a recipient provides funds to another entity to carry out eligible uses of funds and serve beneficiaries the entity becomes a subrecipient (see section Distinguishing a Subrecipient versus a Beneficiary). For example, a recipient may grant funds to a nonprofit organization to provide food assistance (an eligible use) to low-income households (the beneficiaries). Recipients only need to assess whether the beneficiaries experienced a negative economic impact and whether the eligible use responds to that impact, consistent with the two-part framework described above; the organization carrying out the eligible use does not need to have experienced a negative economic impact if it is serving as the vehicle for reaching the beneficiaries. When making determinations about how to implement a program, recipients should consider whether that method of program implementation is an effective and efficient method to implement the program and do so in accordance with the Uniform Guidance provisions that govern procurements and sub-granting of federal funds, as applicable.

As noted above, recipients should analyze eligible uses based on the beneficiary of the assistance or the entity that experienced a negative economic impact. Assistance to a small business or to an impacted industry must respond to a negative economic impact experienced by that small business or industry. Recipients may not provide assistance to small businesses or impacted industries that did not experience a negative economic impact, although recipients can identify negative economic impacts for classes, rather than individual businesses, and may also presume that small businesses in certain areas experienced impacts; see section General Provisions: Structure and Standards and section Assistance to Small Businesses for details.

Several examples illustrate the application of these concepts. For example, a recipient could provide assistance to households via a contract with a business to create subsidized jobs for the long-term unemployed; in this case the business is a subrecipient and need not have experienced a negative economic impact, but the recipient would need to identify a specific connection between the assistance provided and addressing the negative economic impact experienced by the unemployed households. The recipient could, for instance, document the subsidized jobs created under the contract and their reservation for long-term unemployed individuals. Similarly, a recipient might provide assistance to a small business that experienced a pandemic-related loss of revenue. This small business is a beneficiary and may use those funds in many ways, potentially including hiring or retaining staff. However, general assistance to a business that did not experience a negative economic impact under the theory that this assistance generally grows the economy and therefore enhances opportunities for unemployed workers would not be an eligible use, because such assistance is not reasonably designed to impact the individuals or classes that experienced a negative economic impact. In other words, there is not a reasonable connection between the assistance provided and an impact on the beneficiaries. Such an activity would be attenuated from and thus not reasonably designed to benefit the households that experienced the negative economic impact.

b. Populations Presumed Eligible

Presumed Eligibility: Impacted and Disproportionately Impacted Households and Communities

Background: As noted above, the interim final rule allowed recipients to presume that certain households were impacted or disproportionately impacted by the pandemic and thus eligible for responsive programs or services. Specifically, under the interim final rule, recipients could presume that a household or population that experienced unemployment, experienced increased food or housing insecurity, or is low- or moderate-income experienced negative economic impacts resulting from the pandemic, and recipients may provide services that respond to these impacts.

The interim final rule also recognized that pre-existing health, economic, and social disparities contributed to disproportionate pandemic impacts in certain communities and allowed for a broader list of enumerated eligible uses to respond to the pandemic in disproportionately impacted communities. Under the interim final rule, recipients were allowed to presume that families residing in QCTs or receiving services provided by Tribal governments were disproportionately impacted by the pandemic.

Definition of Low- and Moderate-Income

Public Comment: As noted earlier, many commenters sought a definition for "low- and moderate-income" to provide recipients greater clarity on which specific households could be presumed to be impacted by the pandemic.

Treasury Response: The final rule maintains the presumptions identified in the interim final rule and defines low- and moderate-income for the purposes of determining which households and populations recipients may presume to have been impacted. To simplify the administration of this presumption, the final rule adopts a definition of low- and moderate-income based on thresholds established and used in other federal programs.

Definitions. The final rule defines a household as *low income* if it has (i) income at or below 185 percent of the Federal Poverty Guidelines (FPG) for the size of its household based on the most recently published poverty guidelines by the Department of Health and Human Services (HHS) or (ii) income at or below 40 percent of the Area Median Income (AMI) for its county and size of household based on the most recently published data by the Department of Housing and Urban Development (HUD).[22]

The final rule defines a household as *moderate income* if it has (i) income at or below 300 percent of the FPG for the size of its household based on the most recently published poverty guidelines by HHS or (ii) income at or below 65 percent of the AMI for its county and size of household based on the most recently published data by HUD.[23]

Recipients may determine whether to measure income levels for specific households or for a geographic area based on the type of service to be provided. For example, recipients developing a program that serves specific households (*e.g.*, a subsidy for internet access, a childcare program) may measure income at the household level. Recipients providing a service that reaches a general geographic area (*e.g.*, a park) may measure median income of that area.

Further, recipients should generally use the income threshold for the size of the household to be served (*e.g.*, when providing childcare to a household of five, recipients should reference the income threshold for a household of five); however, recipients may use the income threshold for a default household size of three if providing

[22] AMI is also often referred to as median family income for the area. Since AMI is synonymous with this term and used more generally, the final rule refers to AMI.

[23] For the six New England states of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont, HUD provides AMI for towns rather than counties. Recipients in these states should use the AMI corresponding to their town when determining thresholds for both low and moderate income.

services that reach a general geographic area or if doing so would simplify administration of the program to be provided (*e.g.*, when developing a park, recipients should use the income threshold for a household size of three and compare it to median income of the geographic area to be served).

Note that recipients can also identify and serve other classes of households that experienced negative economic impacts or disproportionate impacts from the pandemic; recipients can identify these classes based on their income levels, including above the levels defined as low- and moderate-income in the final rule. For example, a recipient may identify that households in their community with incomes above the final rule threshold for low-income nevertheless experienced disproportionate impacts from the pandemic and provide responsive services. See section General Provisions: Standards for Identifying Other Eligible Populations for details on applicable standards.

Applicable levels. For reference, the FPG is commonly referred to as the federal poverty level (FPL) and is related to—although distinct from—the U.S. Census Bureau's poverty threshold. The final rule uses the FPG when referring specifically to the HHS guidelines, as these are the quantitative metrics used for determining low- and moderate-income households.

The FPG by household size for 2021 is included in the table below. Recipients should refer to HHS Poverty Guidelines for this information, which is updated annually and available on the HHS website.[24] For calculating the thresholds of 40 percent and 65 percent of AMI, recipients should refer to the annual HUD Section 8 50 percent income limits by county and household size published by HUD and available on the HUD website; in particular, recipients should calculate the 40 percent threshold as 0.8 times the 50 percent income limit, and recipients should calculate the 65 percent threshold as 1.3 times the 50 percent income limit.[25] Finally, for median income of Census Tracts and other geographic areas, recipients should refer to the most recent American Community Survey 5-year estimates available through the Census website.[26]

2021 Federal Poverty Guidelines

Household size	48 contiguous states and the District of Columbia	Alaska	Hawaii
1	$12,880	$16,090	$14,820
2	17,420	21,770	20,040
3	21,960	27,450	25,260
4	26,500	33,130	30,480
5	31,040	38,810	35,700
6	35,580	44,490	40.920
7	40,120	50,170	46,140
8	44,660	55,850	51,360

For families/households with more than 8 persons, add the following amounts for each additional person:
48 Contiguous States and the District of Columbia: $4,540.
Alaska: $5,680.
Hawaii: $5,220.

Rationale. In defining low income, the final rule uses both the FPG and AMI to account for national trends and regional differences. The metric of 185 percent of FPG aligns with some other programs; for instance, under the National School Lunch Program, students with household incomes under 185 percent of FPG qualify for free or reduced-price lunch, and schools often use eligibility for free or reduced-price lunch as an indicator of low-income status under Title 1–A of the Elementary and Secondary Education Act. Eligibility for other programs, such as the Federal Communications Commission's e-Rate program and the Special Supplemental Nutrition Program for Women, Infants and Children employ this metric as well. In addition, 185 percent of the FPG for a family of four is $49,025, which is approximately the wage earnings for a two-earner household in which both earners receive the median wage in occupations, such as waiters and waitresses and hotel clerks, that were heavily impacted by COVID–19.[27] This measure is targeted toward those at the bottom of the income distribution and thus helps to promote use of SLFRF funds towards populations with the greatest needs. At the same time, with approximately one-quarter of Americans below 185 percent of the poverty threshold, this approach is broad enough to facilitate use of SLFRF funds across many jurisdictions.[28] Because regions have different cost and income levels, this definition also allows for upward adjustment based on AMI for those regions where 40 percent of AMI exceeds 185 percent of FPG. The metric of 40 percent of AMI is based on the midpoint of values often used to designate certain categories of low-income households; specifically, it is the midpoint of the 30 percent income limit and the 50 percent income limit

used in programs such as the Community Development Block Grant (CDBG) Program.

In defining moderate income, the final rule uses both the FPG and AMI to account for national trends and regional differences. While there are different definitions of moderate income, 300 percent of FPG falls within the range commonly used by researchers.[29] Analysis of median wages among a sample of occupations likely impacted by the pandemic also suggests that an income cutoff of 300 percent of FPG would include many households with workers in such occupations.[30] Moreover, the metric of 300 percent of FPG covers households that, while above the poverty line, often lack economic security.[31] Treasury determined the AMI threshold for moderate income by maintaining the same ratio of FPG multiplier to AMI multiplier as in the definition of low income. This anchors the threshold to the existing definitions of moderate income from the literature while taking into account geographical variation in income and expenses in the same manner as the definition of low income.

Eligibility Presumptions

Public Comment: Many commenters believed that a broader range of groups should be considered presumptively impacted and disproportionately impacted, arguing that many households had been affected by the pandemic and that broader presumed eligibility would help recipients provide assistance quickly and effectively.

Treasury also received many comments on the presumption that families living in QCTs or receiving services from Tribal governments were disproportionately impacted by the pandemic. While many commenters supported the interim final rule's recognition of disproportionate impacts of the pandemic on low-income communities, many commenters disagreed with treating QCTs as the only presumed eligible group of disproportionately impacted households, apart from households served by Tribal governments. While acknowledging a potential increase in administrative burden, commenters recommended that Treasury presume other households or geographic areas, in addition to QCTs, were disproportionately impacted; suggestions included all low- and moderate-income households, geographic areas designated as Opportunity Zones, Difficult Development Areas (DDAs), areas with a certain amount of Real Estate Advantage Program (REAP) recipients, or use of eligibility criteria from the Community Reinvestment Act. One commenter generally recommended that a clearer definition of "disproportionately impacted" should be provided and that any definition should include communities of color and people of limited means. Another recommended specific eligibility for people that had recently interacted with the criminal justice system. Many commenters representing Tribal governments and groups recommended a presumption of eligibility for all Tribal uses of funds, clarification that off reservation members remained eligible, and broad flexibility on use of funds.

Additionally, commenters noted that some areas are technically eligible to be QCTs but fall short because of the aggregate population of eligible tracts. One commenter noted that these areas should be considered the same as QCTs for the purpose of SLFRF funds. Some commenters argued that rural counties typically have few QCTs despite high levels of poverty and disruption caused by the COVID–19 pandemic. Other rural commenters recommended that the designation be by county rather than at a more granular level, arguing that the QCT designation is biased towards urban areas and understates the harm done to rural America. Many commenters representing Tribal governments supported the presumption that services provided by Tribal governments respond to disproportionate impacts.

Treasury Response

Summary: While households residing in QCTs or served by Tribal governments were presumed to be disproportionately impacted, Treasury emphasizes that under the interim final rule recipients could also identify other households, populations, or geographic areas that were disproportionately impacted by the pandemic and provide services to respond.

The final rule maintains the presumptions identified in the interim final rule, as well as recipients' ability to identify other impacted or disproportionately impacted classes. The final rule also allows recipients to presume that low-income households were disproportionately impacted, and as discussed above, defines low- and moderate-income. Finally, under the final rule recipients may also presume that households residing in the U.S. territories or receiving services from territorial governments were disproportionately impacted.

Households presumed to be impacted: Impacted households are those that experienced a public health or negative economic impact from the pandemic.

With regard to public health impacts, recipients may presume that the general public experienced public health impacts from the pandemic for the purposes of providing services for COVID–19 mitigation and behavioral health. In other words, recipients may provide a wide range of enumerated eligible uses in these categories to the general public without further analysis. As discussed in the introduction, COVID–19 as a disease has directly affected the health of tens of millions of Americans, and efforts to prevent and mitigate the spread of the disease are needed and in use across the country. Further, the stress of the pandemic and resulting recession have affected nearly all Americans. Accordingly, the final rule presumes that the general public are impacted by and eligible for services to respond to COVID–19 mitigation and prevention needs, as well as behavioral health needs.

With regard to negative economic impacts, as with the interim final rule, under the final rule recipients may presume that a household or population that experienced unemployment, experienced increased food or housing insecurity, or is low- or moderate-income experienced negative economic impacts resulting from the pandemic. The final rule's definition of low- and moderate-income, by providing standard metrics based on widely available data, is intended to simplify administration for recipients.

Households presumed to be disproportionately impacted: Disproportionately impacted households are those that experienced a

[29] For instance, Melissa Kearney et al. (2013) cap the "struggling lower middle-income class" at 250 percent of the federal poverty level, while Isabel Sawhill and Edward Rodrigue (2015) define the "middle class" as those with incomes of at least 300 percent of the poverty line. Melissa Kearney et al., "A Dozen Facts about America's Struggling Lower-Middle Class," The Hamilton Project (December 2013), *https://www.hamiltonproject.org/assets/legacy/files/downloads_and_links/THP_12LowIncomeFocts_Finol.pdf;* Isabel Sawhill and Edward Rodrigue, "An Agenda for Reducing Poverty and Improving Opportunity," Brookings Institution, *https://www.brookings.edu/wp-content/uploads/2016/07/Sowhill_FINAL.pdf.*

[30] Data on median annual wages from: U.S. Bureau of Labor and Statistics, Occupational Employment and Wage Statistics, *available at https://www.bls.gov/oes/current/oes_nat.htm* (last visited December 7, 2021).

[31] For instance, households earning between 200 and 300 percent of the FPG have significantly higher rates of food and housing insecurity than those earning above 300 percent of the FPG. Table 1, Kyle J. Caswell and Stephen Zuckerman, Food Insecurity, Housing Hardship, and Medical Care Utilization, Urban Institute (June 2018), *https://www.urban.org/sites/default/files/publication/98701/2001896_foodinsecurity_housinghardship_medicalcareutilization_finalized.pdf.*

disproportionate, or meaningfully more severe, impact from the pandemic. As discussed in the interim final rule, pre-existing disparities in health and economic outcomes magnified the impact of the COVID–19 public health emergency on certain households and communities. As with the interim final rule, under the final rule recipients may presume that households residing in QCTs or receiving services provided by Tribal governments were disproportionately impacted by the pandemic. In addition, under the final rule recipients may presume that low-income households were disproportionately impacted by the pandemic. Finally, under the final rule recipients may also presume that households residing in the U.S. territories or receiving services from territorial governments were disproportionately impacted.

Treasury notes that households presumed to be disproportionately impacted would also be presumptively impacted, as these households have not only experienced pandemic impacts but have experienced disproportionate pandemic impacts; as a result, these households are presumptively eligible for responsive services for both impacted and disproportionately impacted households.

Many different geographic, income-based, or poverty-based presumptions could be used to designate disproportionately impacted populations. The combination of permitting recipients to use QCTs, low-income households, and services provided by Tribal or territorial governments as presumptions balances these varying methods. Specifically, QCTs are a commonly used designation of geographic areas based on low incomes or high poverty rates of households in the community; for recipients providing geographically targeted services, QCTs may provide a simple metric with readily available maps for use. However, Treasury recognizes that QCTs do not capture all underserved populations, including for reasons noted by commenters. By allowing recipients to also presume that low-income households were disproportionately impacted, the final rule provides greater flexibility to serve underserved households or communities. Data on household incomes is also readily available at varying levels of geographic granularity (*e.g.*, Census Tracts, counties), again permitting flexibility to adapt to local circumstances and needs. Finally, Treasury notes that, as discussed further below, recipients may also identify other households, populations, and communities disproportionately impacted by the pandemic, in addition to those presumed to be disproportionately impacted.

Additionally, Tribal and territorial governments may face both disproportionate impacts of the pandemic and administrability challenges with operationalizing the income-based standard; therefore, Treasury has presumed that services provided by these governments respond to disproportionate pandemic impacts. Given a lack of regularly published data on household incomes in most territories,[32] as well as a lack of poverty guidelines developed for these jurisdictions,[33] it may be highly challenging to assess disproportionate impact in these communities according to an income- or poverty-based standard. Similarly, data on incomes in Tribal communities are not readily available.[34] Finally, as described in the sections on Public Health and Negative Economic Impacts, Tribal communities have faced particularly severe health and economic impacts of the pandemic. Similarly, available research suggests that preexisting health and economic disparities in the territories amplified the impact of the pandemic on these communities.[35]

Categorical Eligibility

Public Comment: Several commenters suggested that the final rule permit recipients to rely on a beneficiary's eligibility for other federal benefits programs as an easily administrable proxy for identifying a group or population that experienced a negative economic impact as a result of the COVID–19 public health emergency (*i.e.*, categorical eligibility). In other words, a recipient would determine that individuals or households are eligible for an SLFRF-funded program based on the individual or household's eligibility in another program, typically another federal benefit program. Commenters noted that categorical eligibility is a common policy in program administration that can significantly ease administrative burden on both program administrators and beneficiaries.

Treasury Response: Treasury agrees that allowing recipients to identify impacted and disproportionately impacted beneficiaries based on their eligibility for other programs with similar income tests would ease administrative burden. To the extent that the other program's eligibility criteria align with a population or class that experienced a negative economic impact of the pandemic, this approach is also consistent with the process allowed under the final rule for recipients to determine that a class has experienced a negative economic impact, and then document that an individual receiving services is a member of the class. For these reasons, the final rule recognizes categorical eligibility for the following programs and populations:

- *Impacted households.* Treasury will recognize a household as impacted if it otherwise qualifies for any of the following programs:
  - Children's Health Insurance Program (CHIP)
  - Childcare Subsidies through the Child Care and Development Fund (CCDF) Program
  - Medicaid
  - National Housing Trust Fund (HTF), for affordable housing programs only
  - Home Investment Partnerships Program (HOME), for affordable housing programs only
- *Disproportionately impacted households.* Treasury will recognize a household as disproportionately impacted if it otherwise qualifies for any of the following programs:
  - Temporary Assistance for Needy Families (TANF)
  - Supplemental Nutrition Assistance Program (SNAP)
  - Free and Reduced-Price Lunch (NSLP) and/or School Breakfast (SBP) programs
  - Medicare Part D Low-income Subsidies
  - Supplemental Security Income (SSI)
  - Head Start and/or Early Head Start
  - Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)
  - Section 8 Vouchers
  - Low-Income Home Energy Assistance Program (LIHEAP)
  - Pell Grants
  - For services to address educational disparities, Treasury will recognize Title

I eligible schools [36] as disproportionately impacted and responsive services that support the school generally or support the whole school as eligible

c. Standards for Identifying Other Eligible Populations

Standards: Designating Other Impacted Classes

Public Comment: Treasury received multiple comments requesting additional clarification about how classes of impacted individuals may be designated, as well as questions asking whether recipients must demonstrate a specific public health or negative economic impact to each entity served (*e.g.*, each household receiving assistance under a program). There were several comments requesting that specific geographic designations, like a county or Impact Zone, be eligible to use as a determining boundary.

Treasury Response: The interim final rule allowed, and the final rule maintains, the ability for recipients to demonstrate a public health or negative economic impact on a class and to provide assistance to beneficiaries that fall within that class. Consistent with the scope of beneficiaries included in sections 602(c)(1)(A) and 603(c)(1)(A) of the Social Security Act, Treasury is clarifying that a recipient may identify such impacts for a class of households, small businesses, or nonprofits. In such cases, the recipient need only demonstrate that the household, small business, or nonprofit is within the relevant class. For example, a recipient could determine that restaurants in the downtown area had generally experienced a negative economic impact and provide assistance to those small businesses to respond. When providing this assistance, the recipient would only need to demonstrate that the small businesses receiving assistance were restaurants in the downtown area. The recipient would not need to demonstrate that each restaurant served experienced its own negative economic impact.

In identifying an impacted class and responsive program, service, or capital expenditure, recipients should consider the relationship between the definition of the class and proposed response. Larger and less-specific classes are less likely to have experienced similar harms and thus the responses are less likely to be responsive to the harms identified. That is, as the group of entities being served by a program has a wider set of fact patterns, or the type of entities, their circumstances, or their pandemic experiences differ more substantially, it may be more difficult to determine that the class has actually experienced the same or similar negative economic impact and that the response is appropriately tailored to address that impact.

Standard: Designating Other Disproportionately Impacted Classes

Summary of Interim Final Rule: As noted above, the interim final rule provided a broad set of enumerated eligible uses of funds in disproportionately impacted communities, including to address pre-existing disparities that contributed to more severe pandemic impacts in these communities. The interim final rule presumed that these services are eligible uses when provided in a QCT, to families and individuals living in QCTs, or when these services are provided by Tribal governments. Recipients may also provide these services to "other populations, households, or geographic areas disproportionately impacted by the pandemic" and, in identifying these disproportionately impacted communities, should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the group identified.

Public Comment: A significant number of commenters expressed uncertainty regarding the process for determining eligibility for disproportionately impacted communities beyond QCTs. A commenter noted that a clearer definition of "disproportionately impacted" should be delineated and that any definition should include communities of color and people of limited means. Some commenters suggested a template or checklist to see if an area meets the standard for disproportionately impacted communities outside of QCTs. Some commenters stated that QCT and non-QCT beneficiaries should be treated the same.

Treasury Response: Under the interim final rule, presuming eligibility for services in QCTs, for populations living in QCTs, and for Tribal governments was intended to ease administrative burden, providing a simple path for recipients to offer services in underserved communities, and is not an exhaustive list of disproportionately impacted communities. To further clarify, the final rule codifies the interpretive framework discussed above, including presumptions of groups disproportionately impacted, as well as the ability to identify other disproportionately impacted populations, households, or geographies (referred to here as disproportionately impacted classes).

As discussed in the interim final rule, in identifying other disproportionately impacted classes, recipients should be able to support their determination that the pandemic resulted in disproportionate public health or economic outcomes to the specific populations, households, or geographic areas to be served. For example, the interim final rule considered data regarding the rate of COVID–19 infections and deaths in low-income and socially vulnerable communities, noting that these communities have experienced the most severe health impacts, compared to national averages. Similarly, the interim final rule considered the high concentration of low-income workers performing essential work, the reduced ability to socially distance, and other pre-existing public health challenges, all of which correlate with more severe COVID–19 outcomes. The interim final rule also considered the disproportionate economic impacts of the pandemic, citing, for example, the rate of job losses among low-income persons as compared to the general population. The interim final rule then identified QCTs, a common, readily accessible, and geographically granular method of identifying communities with a large proportion of low-income residents, as presumed to be disproportionately impacted by the pandemic.

In other words, the interim final rule identified disproportionately impacted populations by assessing the impacts of the pandemic and finding that some populations experienced meaningfully more severe impacts than the general public. Similarly, to identify disproportionately impacted classes, recipients should compare the impacts experienced by that class to the typical or average impacts of the pandemic in their local area, state, or nationally.

Recipients may identify classes of households, communities, small businesses, nonprofits, or populations that have experienced a disproportionate impact based on academic research or government research publications, through analysis of their own data, or through analysis of other existing data sources. To augment their analysis, or when quantitative data is not readily available, recipients may also consider qualitative research and sources like resident interviews or

[36] *Title I eligible schools* means schools eligible to receive services under section 1113 of Title I, Part A of the Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 6313), including schools served under section 1113(b)(1)(C) of that Act.

feedback from relevant state and local agencies, such as public health departments or social services departments. In both cases, recipients should consider the quality of the research, data, and applicability of analysis to their determination.

In designing a program or service that responds to a disproportionately impacted class, a recipient must first identify the impact and then identify an appropriate response. To assess disproportionate impact, recipients should rely on data or research that measures the public health or negative economic impact. An assessment of the effects of a response (*e.g.*, survey data on levels of resident support for various potential responses) is not a substitute for an assessment of the impact experienced by a particular class. Data about the appropriateness or desirability of a response may be used to assess the reasonableness of a response, once an impact or disproportionate impact has been identified but should not be the basis for assessing impact.

2. Public Health

Background

On January 21, 2020, the Centers for Disease Control and Prevention (CDC) identified the first case of novel coronavirus in the United States.[37] Since that time, and through present day, the United States has faced numerous waves of the virus that have brought acute strain on health care and public health systems. At various points in the pandemic, hospitals and emergency medical services have seen significant influxes of patients; response personnel have faced shortages of personal protective equipment; testing for the virus has been scarce; and congregate living facilities like nursing homes have seen rapid spread.

Since the initial wave of the COVID–19 pandemic, the United States has faced several additional major waves that continued to impact communities and stretch public health services. The summer 2020 wave impacted communities in the south and southwest. As the weather turned colder and people spent more time indoors, a wave throughout fall and winter 2020 impacted communities in almost every region of the country as the virus reached a point of uncontrolled spread and over 3,000 people died per day due to COVID–19.[38]

In December 2020, the Food and Drug Administration (FDA) authorized COVID–19 vaccines for emergency use, and soon thereafter, mass vaccination in the United States began. At the time of the interim final rule publication in May 2021, the number of daily new infections was steeply declining as rapid vaccination campaigns progressed across the country. By summer 2021, COVID–19 cases had fallen to their lowest level since early months of the pandemic, when testing was scarce. However, throughout late summer and early fall, the Delta variant, a more infectious and transmittable variant of the SARS–CoV–2 virus, sparked yet another surge. From June to early September, the seven-day moving average of reported cases rose from 12,000 to 165,000.[39]

As of December 2021, COVID–19 in total has infected over 50 million and killed over 800,000 Americans.[40] Preventing and mitigating the spread of COVID–19 continues to require a major public health response from federal, state, local, and Tribal governments.

First, state, local, and Tribal governments across the country have mobilized to support the national vaccination campaign. As of December 2021, more than 80 percent of adults have received at least one dose, with more than 470 million total doses administered.[41] Additionally, more than 15 million children over the age of 12 have received at least one dose of the vaccine and over 47 million people have received a booster dose.[42] Vaccines for younger children, ages 5 through 11, have been approved and are reaching communities and families across the country. As new variants continue to emerge globally, the national effort to administer vaccinations and other COVID–19 mitigation strategies will be a critical component of the public health response.

In early reporting on uses of SLFRF funds, recipients have indicated that they plan to put funds to immediate use to support continued vaccination campaigns. For example, one recipient has indicated that it plans to use SLFRF funds to support a vaccine incentive program, providing $100 gift cards to residents at community vaccination clinics. The program aimed to target communities with high public health needs.[43] Another recipient reported that it is partnering with multiple agencies, organizations, and providers to distribute COVID–19 vaccinations to homebound residents in assisted living facilities.[44]

State, local, and Tribal governments have also continued to execute other aspects of a wide-ranging public health response, including increasing access to COVID–19 testing and rapid at-home tests, contact tracing, support for individuals in isolation or quarantine, enforcement of public health orders, new public communication efforts, public health surveillance (*e.g.*, monitoring case trends and genomic sequencing for variants), enhancement to health care capacity through alternative care facilities, and enhancement of public health data systems to meet new demands or scaling needs.

State, local, and Tribal governments have also supported major efforts to prevent COVID–19 spread through safety measures at key settings like nursing homes, schools, congregate living settings, dense worksites, incarceration settings, and in other public facilities. This has included, for example, implementing infection prevention measures or making ventilation improvements.

In particular, state, local, and Tribal governments have mounted significant efforts to safely reopen schools. A key factor in school reopening is the ability to implement COVID–19 mitigation strategies such as providing masks and other hygiene resources, improving air-quality and ventilation, increasing outdoor learning and eating spaces, testing and contact tracing protocols, and a number of other measures.[45] For example, one recipient described plans to use SLFRF funds to further invest in school health resources that were critical components of school reopening and reducing the spread of COVID–19 in schools. Those investments include the increasing school nurses and social

workers, improved ventilation systems, and other health and safety measures.

The need for public health measures to respond to COVID–19 will continue moving forward. This includes the continuation of vaccination campaigns for the general public, booster doses, and children. This also includes monitoring the spread of COVID–19 variants, understanding the impact of these variants, developing approaches to respond, and monitoring global COVID–19 trends. Finally, the long-term health impacts of COVID–19 will continue to require a public health response, including medical services for individuals with "long COVID," and research to understand how COVID–19 impacts future health needs and raises risks for the tens of millions of Americans who have been infected.

The COVID–19 pandemic also negatively impacted other areas of public health, particularly mental health and substance use. In January 2021, over 40 percent of American adults reported symptoms of depression or anxiety, up from 11 percent in the first half of 2019.[46] The mental health impacts of the pandemic have been particularly acute for adults ages 18 to 24, racial and ethnic minorities, caregivers for adults, and essential workers, with all reporting significantly higher rates of considering suicide.[47] The proportion of children's emergency department visits related to mental health has also risen noticeably.[48] Similarly, rates of substance use and overdose deaths have spiked: Preliminary data from the CDC show a nearly 30 percent increase in drug overdose mortality from April 2020 to April 2021, bringing the estimated overdose death toll for a 12-month period over 100,000 for the first time ever.[49] The CDC also found that 13 percent of adults started or increased substance use to cope with stress related to COVID–19 and 26 percent reported having symptoms of trauma- and stressor-related disorder (TRSD) related to the pandemic.[50]

Another public health challenge exacerbated by the pandemic was violent crime and gun violence, which increased during the pandemic and has disproportionately impacted low-income communities.[51] According to the Federal Bureau of Investigation (FBI), although the property crime rate fell 8 percent in 2020, the violent crime rate increased 6 percent in 2020 compared to 2019 data.[52] In particular, the estimated number of aggravated assault offenses rose 12 percent, while murder and manslaughter increased 30 percent from 2019 to 2020.[53] The proportion of homicides committed with firearms rose from 73 percent in 2019 to 76 percent in 2020.[54] Exposure to violence can create serious short-term and long-term harmful effects to health and development, and repeated exposure to violence may be connected to negative health outcomes.[55] Addressing community violence as a public health issue may help prevent and even reduce additional harm to individuals, households, and communities.[56]

Many communities are using SLFRF funds to invest in holistic approaches in violence prevention that are rooted in targeted outreach and addressing root causes. For example, the City of St. Louis is planning to invest in expanding a "community responder" model designed to provide clinical help and to divert non-violent calls away from the police department. Additionally, the city will expand access to mental health services, allowing residents to seek support at city recreation centers, libraries, and other public spaces.[57] Similarly, Los Angeles County will further invest in its "Care First, Jails Last" program which seeks to replace "arrest and incarceration" responses with health interventions.[58]

While the pandemic affected communities across the country, it disproportionately impacted some demographic groups and exacerbated health inequities along racial, ethnic, and socioeconomic lines.[59] The CDC has found that racial and ethnic minorities are at increased risk for infection, hospitalization, and death from COVID–19, with Hispanic or Latino and Native American or Alaska Native patients at highest risk.[60]

Similarly, low-income and socially vulnerable communities have seen the most severe health impacts. For example, counties with high poverty rates also have the highest rates of infections and deaths, with 308 deaths per 100,000 compared to the U.S. average of 238 deaths per 100,000, as of December 2021.[61] Counties with high social vulnerability, as measured by factors such as poverty and educational attainment, have also fared more poorly than the national average, with 325 deaths per 100,000 as of December 2021.[62] Over the course of the

Continued

pandemic, Native Americans have experienced more than one and a half times the rate of COVID–19 infections, more than triple the rate of hospitalizations, and more than double the death rate compared to White Americans.[63] Low-income and minority communities also exhibit higher rates of pre-existing conditions that may contribute to an increased risk of COVID–19 mortality.[64] In addition, individuals living in low-income communities may have had more limited ability to socially distance or to self-isolate when ill, resulting in faster spread of the virus, and were over-represented among essential workers, who face greater risk of exposure.[65]

Social distancing measures in response to the pandemic may have also exacerbated pre-existing public health challenges. For example, for children living in homes with lead paint, spending substantially more time at home raises the risk of developing elevated blood lead levels, while screenings for elevated blood lead levels declined during the pandemic.[66] The combination of these underlying social and health vulnerabilities may have contributed to more severe public health outcomes of the pandemic within these communities, resulting in an exacerbation of pre-existing disparities in health outcomes.[67]

Summary of the Interim Final Rule Approach to Public Health

Summary: As discussed above, the interim final rule provided flexibility for recipients to pursue a wide range of eligible uses to "respond to" the COVID–19 public health emergency. Uses of funds to "respond to" the public health emergency address the SARS-CoV–2 virus itself, support efforts to prevent or decrease spread of the virus, and address other impacts of the pandemic on public health. The interim final rule implemented these provisions by identifying a non-exhaustive list of programs or services that may be funded as responding to COVID–19 ("enumerated eligible uses"), along with considerations for evaluating other potential uses of funds not explicitly listed. Enumerated eligible uses are discussed below. For guidance on how to determine whether a particular use is allowable, beyond those enumerated, see section Standards: Identifying a Public Health Impact.

Enumerated eligible uses under this section built and expanded upon permissible expenditures under the Coronavirus Relief Fund; for clarity, the interim final rule expressly listed as eligible uses the uses permissible under the Coronavirus Relief Fund, with minor exceptions.[68] The interim final rule also recognized that the nature of the COVID–19 public health emergency, and responsive policy measures, programs, and services, had changed over time and is expected to continue evolving.

The interim final rule categorized enumerated eligible uses to respond to the public health emergency into several categories: (1) COVID–19 mitigation and prevention, (2) medical expenses, (3) behavioral health care, (4) public health and safety staff, (5) expenses to improve the design and execution of health and public health programs, and (6) eligible uses to address disparities in public health outcomes. For each category in turn, this section describes public comments received and Treasury's responses, as well as comments received proposing additional enumerated eligible uses.

Reorganizations and Cross-References: In some cases, enumerated eligible uses included in the interim final rule under responding to the public health emergency have been re-categorized in the organization of the final rule to enhance clarity. For discussion of eligible uses for public health and safety staff and to improve the design and execution of public health programs, please see section Public Sector Capacity and Workforce in General Provisions: Other. For discussion of eligible uses to address disparities in public health outcomes, please see section Assistance to Households in Negative Economic Impacts.

Conversely, discussion of eligible assistance to small businesses and nonprofits to respond to public health impacts has been moved from Assistance to Small Businesses and Assistance to Nonprofits in Negative Economic Impacts to this section. This change is consistent with the interim final rule, which provides that appropriate responses to address the public health impacts of COVID–19 may be provided to any type of entity.

a. COVID–19 Mitigation and Prevention

COVID–19 public health response and mitigation tactics. Recognizing the broad range of services and programming needed to contain COVID–19, the interim final rule provided an extensive list of enumerated eligible uses to prevent and mitigate COVID–19 and made clear that the public health response to the virus is expected to continue to evolve over time, necessitating different uses of funds.

Enumerated eligible uses of funds in this category included: Vaccination programs; medical care; testing; contact tracing; support for isolation or quarantine; supports for vulnerable populations to access medical or public health services; public health surveillance (*e.g.,* monitoring case trends, genomic sequencing for variants); enforcement of public health orders; public communication efforts; enhancement to health care capacity, including through alternative care facilities; purchases of personal protective equipment; support for prevention, mitigation, or other services in congregate living facilities (*e.g.,* nursing homes, incarceration settings, homeless shelters, group living facilities) and other key settings like schools; ventilation improvements in congregate settings, health care settings, or other key locations; enhancement of

[68] Generally, funding uses eligible under CRF as a response to the direct public health impacts of COVID–19 will continue to be eligible under the ARPA, including those not explicitly listed in the final rule, with the following two exceptions: (1) The standard for eligibility of public health and safety payrolls has been updated (see section Public Sector Capacity and Workforce in General Provisions: Other) and (2) expenses related to the issuance of tax-anticipation notes are no longer an eligible funding use (see section Restrictions on Use: Debt Service).

public health data systems; other public health responses; and capital investments in public facilities to meet pandemic operational needs, such as physical plant improvements to public hospitals and health clinics or adaptations to public buildings to implement COVID–19 mitigation tactics. These enumerated uses are consistent with guidance from public health authorities, including the CDC.

Public Comment: Many commenters were supportive of expansive enumerated eligible uses for mitigating and preventing COVID–19, noting the wide range of activities that governments may undertake and the continued changing landscape of pandemic response. Some commenters requested that Treasury engage in ongoing consideration of and consultation on evolving public health needs and resulting eligible expenses. Some commenters noted that their jurisdiction does not have an official public health program, for example smaller jurisdictions or those that do not have a health department, and requested clarification on whether their public health expenses would still be eligible in compliance with program rules.

Treasury Response: In the final rule, Treasury is maintaining an expansive list of enumerated eligible uses to mitigate and prevent COVID–19, given the wide-ranging activities that governments may take to further these goals, including "other public health responses." Note that the final rule discusses several of these enumerated uses in more detail below.

Treasury is further clarifying that when providing COVID–19 prevention and mitigation services, recipients can identify the impacted population as the general public. Treasury presumes that all enumerated eligible uses for programs and services, including COVID–19 mitigation and prevention programs and services, are reasonably proportional responses to the harm identified unless a response is grossly disproportionate to the type or extent of harm experienced. Note that capital expenditures are not considered "programs and services" and are not presumed to be reasonably proportional responses to an identified harm except as provided in section Capital Expenditures in General Provisions: Other. In other words, recipients can provide any COVID–19 prevention or mitigation service to members of the general public without any further analysis of impacts of the pandemic on those individuals and whether the service is responsive.

This approach gives recipient governments an extensive set of eligible uses that can adapt to local needs, as well as evolving response needs and developments in understanding of transmission of COVID–19. Treasury emphasizes how the enumerated eligible uses can adapt to changing circumstances. For example, when the interim final rule was released, national daily COVID–19 cases were at relatively low levels and declining;[69] as the Delta variant spread and cases peaked in many areas of the country, particularly those with low vaccination rates, government response needs and tactics evolved, and the SLFRF funds provided the ability to quickly and nimbly adapt to new public health needs. Treasury also notes that funds may be used to support compliance with and implementation of COVID–19 safety requirements, including vaccination requirements, testing programs, or other required practices.

Recipient governments do not need to have an official health or public health program in order to utilize these eligible uses; any recipient can pursue these eligible uses, though Treasury recommends consulting with health and public health professionals to support effective implementation.

The CDC has provided recommendations and guidelines to help mitigate and prevent COVID–19. The interim final rule and final rule help support recipients in stopping the spread of COVID–19 through these recommendations and guidelines.[70] The final rule reflects changing circumstances of COVID–19 and provides a broad range of permissible uses for mitigating and preventing the spread of the disease, in a manner consistent with CDC guidelines and recommendations.

The purpose of the SLFRF funds is to mitigate the fiscal effects stemming from the COVID–19 public health emergency, including by supporting efforts to stop the spread of the virus. The interim final rule and final rule implement this objective by, in part, providing that recipients may use SLFRF funds for COVID–19 mitigation and prevention.[71] A program or service that imposes conditions on participation in or acceptance of the service that would undermine efforts to stop the spread of COVID–19 or discourage compliance with recommendations and guidelines in CDC guidance for stopping the spread of COVID–19 is not a permissible use of funds. In other words, recipients may not use funds for a program that undermines practices included in the CDC's guidelines and recommendations for stopping the spread of COVID–19. This includes programs that impose a condition to discourage compliance with practices in line with CDC guidance (*e.g.*, paying off fines to businesses incurred for violation of COVID–19 vaccination or safety requirements), as well as programs that require households, businesses, nonprofits, or other entities not to use practices in line with CDC guidance as a condition of receiving funds (*e.g.*, requiring that businesses abstain from requiring mask use or employee vaccination as a condition of receiving SLFRF funds).

Vaccination programs and vaccine incentives. At the time of the interim final rule release, many vaccination programs were using mass vaccination tactics to rapidly reach Americans en masse for first vaccine doses.[72] Since that time, the FDA has authorized booster vaccine doses for certain groups and certain vaccines and has also authorized vaccines for youths.[73] [74] The inclusion of "vaccination programs" as an eligible use allows for adaptation as the needs of programs change or new groups become eligible for different types of vaccinations.

Public Comment: Since the release of the interim final rule, many recipient governments have also requested clarification on whether vaccine incentives are a permissible use of funds.

Treasury Response: Treasury issued guidance clarifying that "[vaccine] programs that provide incentives reasonably expected to increase the number of people who choose to get vaccinated, or that motivate people to get vaccinated sooner than they otherwise would have, are an allowable

[74] U.S. Food and Drug Administration, FDA Authorizes Pfizer-BioNTech COVID–19 Vaccine for Emergency Use in Children 5 through 11 Years of Age, *https://www.fda.gov/news-events/press-announcements/fda-authorizes-pfizer-biontech-covid-19-vaccine-emergency-use-children-5-through-11-years-age* (last visited November 8, 2021).

use of funds so long as such costs are reasonably proportional to the expected public health benefit." [75] This use of funds remains permissible under the final rule.

Capital Expenditures

Public Comment: Many commenters requested clarification around the types and scope of permissible capital investments in public facilities to meet pandemic operational needs; ventilation improvements in congregate settings, health care settings, or other key locations; and whether support for prevention and mitigation in congregate facilities could include facilities renovations, improvements, or construction of new facilities, or if the facilities must solely be used for COVID–19 response.

Treasury Response: For clarity, Treasury has addressed the eligibility standard for capital expenditures, or investments in property, facilities, or equipment, in one section of this Supplementary Information; see section Capital Expenditures in General Provisions: Other. In recognition of the importance of capital expenditures in the COVID–19 public health response, Treasury enumerates that the following projects are examples of eligible capital expenditures, as long as they meet the standards for capital expenditures in section Capital Expenditures in General Provisions: Other:

- Improvements or construction of COVID–19 testing sites and laboratories, and acquisition of related equipment;
- Improvements or construction of COVID–19 vaccination sites;
- Improvements or construction of medical facilities generally dedicated to COVID–19 treatment and mitigation (*e.g.*, emergency rooms, intensive care units, telemedicine capabilities for COVID–19 related treatment);
- Expenses of establishing temporary medical facilities and other measures to increase COVID–19 treatment capacity, including related construction costs;
- Acquisition of equipment for COVID–19 prevention and treatment, including ventilators, ambulances, and other medical or emergency services equipment;
- Improvements to or construction of emergency operations centers and acquisition of emergency response equipment (*e.g.*, emergency response radio systems);
- Installation and improvements of ventilation systems;
- Costs of establishing public health data systems, including technology infrastructure;
- Adaptations to congregate living facilities, including skilled nursing facilities, other long-term care facilities, incarceration settings, homeless shelters, residential foster care facilities, residential behavioral health treatment, and other group living facilities, as well as public facilities and schools (excluding construction of new facilities for the purpose of mitigating spread of COVID–19 in the facility); and
- Mitigation measures in small businesses, nonprofits, and impacted industries (*e.g.*, developing outdoor spaces).

Other clarifications on COVID–19 mitigation: Medical care, supports for vulnerable populations, data systems, carceral settings. Based on public comments and questions received from recipients following the interim final rule, Treasury is making several further clarifications on enumerated eligible uses in this category.

Public Comment: Several commenters requested clarification on eligible uses of funds for medical care; Treasury addresses those comments in the section Medical Expenses below.

Public Comment: Recipients posed questions on the type and scope of activities eligible as "supports for vulnerable populations to access medical or public health services."

Treasury Response: Enumerated eligible uses should be considered in the context of the eligible use category or section where they appear; in this case, "supports for vulnerable populations to access medical or public health services" appears in the section COVID–19 Mitigation and Prevention. As such, these eligible uses should help vulnerable or high-risk populations access services that mitigate COVID–19, for example, transportation assistance to reach vaccination sites, mobile vaccination or testing programs, or on-site vaccination or testing services for homebound individuals, those in group homes, or similar settings.

Public Comment: Some commenters asked whether "enhancement of public health data systems" could include investments in software, databases, and other information technology resources that support responses to the COVID–19 public health emergency but also provide benefits for other use cases and long-term capacity of public health departments and systems.

Treasury Response: These are permissible uses of funds under the interim final rule and remain eligible under the final rule.

Assistance to Businesses and Nonprofits To Implement COVID–19 Mitigation Strategies

Background: As detailed above, Treasury received many public comments describing uncertainty about which eligible use category should be used to assess different potential uses of funds. As a result, Treasury has re-categorized some uses of funds in the final rule to provide greater clarity, consistent with the principle that uses of funds should be assessed based on their intended beneficiary. For example, COVID–19 mitigation and prevention serves the general public or specific populations within the public. However, in the interim final rule, assistance to small businesses, nonprofits, and impacted industries to implement COVID–19 mitigation and prevention strategies was categorized in the respective sections within Negative Economic Impacts. The final rule consolidates all COVID–19 mitigation and prevention within Public Health.

Public Comment: Treasury has received multiple comments and questions about which eligible use permits the recipient to provide assistance to businesses and nonprofits to address the public health impacts of COVID–19.

Treasury Response: In the final rule, these services have been re-categorized under COVID–19 mitigation and prevention to reflect the fact that this assistance responds to public health impacts of the pandemic rather than the negative economic impacts to a small business, nonprofit, or impacted industry. When providing COVID–19 mitigation and prevention services, recipients can identify the impacted entity as small businesses, nonprofits, or businesses in impacted industries in general. As with all enumerated eligible uses, recipients may presume that all COVID–19 mitigation and prevention programs and services are reasonably proportional responses to the harm identified unless a response is grossly disproportionate to the type or extent of harm experienced. Note that capital expenditures are not considered "programs and services" and are not presumed to be reasonably proportional responses to an identified harm except as provided in section Capital Expenditures in General Provisions: Other. In other words, recipients can provide any COVID–19 prevention or mitigation service to small businesses, nonprofits, and businesses in impacted

[75] Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.* Note that programs may provide incentives to individuals who have already received a vaccination if the incentive is reasonably expected to increase the number of people who choose to get vaccinated or motivate people to get vaccinated sooner and the costs are reasonably proportional to the expected public health benefit.

industries without any further analysis of impacts of the pandemic on those entities and whether the service is responsive.

In some cases, this means that an entity not otherwise eligible to receive assistance to respond to negative economic impacts of the pandemic, for example an entity that did not experience a negative economic impact, may still be eligible to receive assistance under this category for COVID–19 mitigation and prevention services.

Uses of funds can include loans, grants, or in-kind assistance to small businesses, nonprofits, or other entities to implement COVID–19 prevention or mitigation tactics, such as vaccination; testing; contact tracing programs; physical plant changes to enable greater use of outdoor spaces or ventilation improvements; enhanced cleaning efforts; and barriers or partitions. For example, this would include assistance to a restaurant to establish an outdoor patio, given evidence showing much lower risk of COVID–19 transmission outdoors.[76] Uses of funds can also include aid to travel, tourism, hospitality, and other impacted industries to implement COVID–19 mitigation and prevention measures to enable safe reopening, for example, vaccination or testing programs, improvements to ventilation, physical barriers or partitions, signage to facilitate social distancing, provision of masks or personal protective equipment, or consultation with infection prevention professionals to develop safe reopening plans.

Recipients providing assistance to small businesses, nonprofits, or impacted industries that includes capital expenditures (*i.e.*, expenditures on property, facilities, or equipment) should also review the section Capital Expenditures in General Provisions: Other, which describes eligibility standards for these expenditures. Recipients providing assistances in the form of loans should review the section Treatment of Loans Made with SLFRF Funds in General Provisions: Other.

Recipients should also be aware of the difference between beneficiaries of assistance and subrecipients when working with small businesses, nonprofits, or impacted industries. As noted above, Treasury presumes that the general public, as well as small businesses, nonprofits, and impacted industries in general, has been impacted by the COVID–19 disease itself and is eligible for services that mitigate or prevent COVID–19 spread. As such, a small business, nonprofit, or impacted industry receiving assistance to implement COVID–19 mitigation measures is a beneficiary of assistance (*e.g.*, granting funds to a small business to develop an outdoor patio to reduce transmission). In contrast, if a recipient contracts with, or grants funds to, a small business, nonprofit, or impacted industry to carry out an eligible use for COVID–19 mitigation on behalf of the recipient, the entity is a subrecipient (*e.g.*, contracting with a small business to operate COVID–19 vaccination sites). For further information on distinguishing between beneficiaries and subrecipients, as well as the impacts of the distinction on reporting and other requirements, see section Distinguishing Subrecipients versus Beneficiaries.

b. Medical Expenses

Background: The interim final rule also included as an enumerated eligible use medical expenses, including medical care and services to address the near-term and potential longer-term impacts of the disease on individuals infected.

Public Comment: Some commenters sought clarification on the types of medical expenses eligible and for whom, including whether funds could be used under this category for expanding health insurance coverage (*e.g.*, subsidies for premiums, expanding a group health plan), improvements to healthcare facilities or establishment of new medical facilities, direct costs of medical services, and costs to a self-funded health insurance plan (*e.g.*, a county government health plan) for COVID–19 medical care.

Treasury Response: In the final rule, Treasury is maintaining this enumerated eligible use category and clarifying that it covers costs related to medical care provided directly to an individual due to COVID–19 infection (*e.g.*, treatment) or a potential infection (*e.g.*, testing). This can include medical costs to uninsured individuals; deductibles, co-pays, or other costs not covered by insurance; costs for uncompensated care at a health provider; emergency medical response costs; and, for recipients with a self-funded health insurance plan, excess health insurance costs due to COVID–19 medical care. These are medical expenses due to COVID–19 and distinguish this category of eligible uses from other related eligible uses, like COVID–19 mitigation and prevention and health insurance expenses to households, to provide greater clarity for recipients in determining which category of eligible uses they should review to assess a potential use of funds. For discussion of eligibility for programs to expand health insurance coverage, see section Assistance to Households.

c. Behavioral Health Care

Background: Recognizing that the public health emergency, necessary mitigation measures like social distancing, and the economic downturn have exacerbated mental health and substance use challenges for many Americans, the interim final rule included an enumerated eligible use for mental health treatment, substance use treatment, and other behavioral health services, including a non-exhaustive list of specific services that would be eligible under this category.

Public Comment: Many commenters expressed support for the interim final rule's recognition of behavioral health impacts of the pandemic and eligible uses under this category. Several commenters requested clarification on the types of eligible services under this category, specifically whether both acute and chronic care are included as well as services that often do not directly accept insurance payments, like peer support groups. Some commenters highlighted the importance of cultural competence in providing effective behavioral health services. Some commenters suggested that funding should be available broadly and quickly for this purpose, recommending that funding available for behavioral health not be tied to the amount of revenue loss experienced by the recipient.

Treasury Response: In the final rule, Treasury is maintaining this enumerated eligible use category and clarifying that it covers an expansive array of services for prevention, treatment, recovery, and harm reduction for mental health, substance use, and other behavioral health challenges caused or exacerbated by the public health emergency. The specific services listed in the interim final rule also remain eligible.[77]

Treasury is further clarifying that when providing behavioral health services, recipients can identify the impacted population as the general public and, as with all enumerated eligible uses, presume that all programs and services are reasonably proportional responses to the harm identified unless a response is grossly disproportionate to the type or extent of harm experienced. In contrast, capital expenditures are not

[76] *See* Centers for Disease Control and Prevention, Participate in Outdoor and Indoor Activities, *https://www.cdc.gov/coronavirus/2019-ncov/daily-life-coping/outdoor-activities.html* (last visited November 8, 2021).

[77] Hotlines or warmlines, crisis intervention, overdose prevention, infectious disease prevention, and services or outreach to promote access to physical or behavioral health primary care and preventative medicine.

considered "programs and services" and are not presumed to be reasonably proportional responses to an identified harm except as provided in section Capital Expenditures in General Provisions: Other.

In other words, recipients can provide behavioral health services to members of the general public without any further analysis of impacts of the pandemic on those individuals and whether the service is responsive. Recipients may also use this eligible use category to respond to increased rates of behavioral health challenges at a population level or, at an individual level, new behavioral health challenges or exacerbation of pre-existing challenges, including new barriers to accessing treatment.

Services that respond to these impacts of the public health emergency may include services across the continuum of care, including both acute and chronic care, such as prevention, outpatient treatment, inpatient treatment, crisis care, diversion programs (*e.g.*, from emergency departments or criminal justice system involvement), outreach to individuals not yet engaged in treatment, harm reduction, and supports for long-term recovery (*e.g.*, peer support or recovery coaching, housing, transportation, employment services).

Recipients may also provide services for special populations, for example, enhanced services in schools to address increased rates of behavioral health challenges for youths, mental health first responder or law enforcement-mental health co-responder programs to divert individuals experiencing mental illness from the criminal justice system, or services for pregnant women with substance use disorders or infants born with neonatal abstinence syndrome. Finally, recipients may use funds for programs or services to support equitable access to services and reduce racial, ethnic, or socioeconomic disparities in access to high-quality treatment.

Eligible uses of funds may include services typically billable to insurance[78] or services not typically billable to insurance, such as peer support groups, costs for residence in supportive housing or recovery housing, and the 988 National Suicide Prevention Lifeline or other hotline services. Recipients may also use funds in conjunction with other federal grants or programs (see section Program Administration Provisions), though eligible services under SLFRF are not limited to those eligible under existing federal programs.

Given the public health emergency's exacerbation of the ongoing opioid and overdose crisis, Treasury highlights several ways that funds may be used to respond to opioid use disorder and prevent overdose mortality.[79] Specifically, eligible uses of funds include programs to expand access to evidence-based treatment like medications to treat opioid use disorder (*e.g.*, direct costs or incentives for emergency departments, prisons, jails, and outpatient providers to offer medications and low-barrier treatment), naloxone distribution, syringe service programs, outreach to individuals in active use, post-overdose follow up programs, programs for diversion from the criminal justice system, and contingency management interventions.

Finally, for clarity, Treasury has addressed the eligibility standard for capital expenditures, or investments in property, facilities, or equipment, in one section of this Supplementary Information; see section Capital Expenditures in General Provisions: Other. Examples of capital expenditures related to behavioral health that Treasury recognizes as eligible include behavioral health facilities and equipment (*e.g.*, inpatient or outpatient mental health or substance use treatment facilities, crisis centers, diversion centers), as long as they adhere to the standards detailed in the Capital Expenditures section.

d. Preventing and Responding to Violence

Background: The interim final rule highlighted that some types of violence had increased during the pandemic and that the ability of victims to access services had decreased, noting as an example the challenges that individuals affected by domestic violence face in accessing services. Accordingly, the interim final rule enumerated as an eligible use, in disproportionately impacted communities, evidence-based community violence intervention programs. Following the release of the interim final rule, Treasury received several recipient questions regarding whether and how funds may be used to respond to an increase in crime, violence, or gun violence in some communities during the pandemic. Treasury released further guidance identifying how enumerated eligible uses and eligible use categories under the interim final rule could support violence reduction efforts, including rehiring public sector staff, behavioral health services, and services to address negative economic impacts of the pandemic that may aid victims of crime. The guidance also identified an expanded set of enumerated eligible uses to address increased gun violence.

Public Comment: Several commenters expressed support for this use of funds.

Treasury Response: In the final rule, Treasury is maintaining enumerated eligible uses in this area and clarifying how to apply eligibility standards. Throughout the final rule, enumerated eligible uses should respond to an identified impact of the COVID–19 public health emergency in a reasonably proportional manner to the extent and type of harm experienced. Many of the enumerated eligible uses—like behavioral health services, services to improve employment opportunities, and services to address educational disparities in disproportionately impacted communities—that respond to the public health and negative economic impacts of the pandemic may also have benefits for reducing crime or aiding victims of crime. For example, the pandemic exacerbated the impact of domestic violence, sexual assault, and human trafficking; enumerated eligible uses like emergency housing assistance, cash assistance, or assistance with food, childcare, and other needs could be used to support survivors of domestic violence, sexual assault, or human trafficking who experienced public health or economic impacts due to the pandemic.

Public Comment: Several commenters expressed support for community violence intervention programs or argued that traditional public safety approaches had negatively impacted the social determinants of health in their communities. Several commenters recommended inclusion of approaches like mental health or substance use diversion programs.

Treasury Response: Treasury recognizes the importance of comprehensive approaches to challenges like violence. The final rule includes an enumerated eligible use for community violence intervention programs in all communities, not just the disproportionately impacted communities eligible under the interim final rule. Given the increased rate of violence during the pandemic, Treasury has determined that this enumerated

[78] However, SLFRF funds may not be used to reimburse a service that was also billed to insurance.

[79] In line with the Department of Health and Human Services, Overdose Prevention Strategy, *https://www.hhs.gov/overdose-prevention/*, and the Office of National Drug Control Policy, Administration's Statement on Drug Policy Priorities for Year One (April 1, 2021), *https://www.whitehouse.gov/wp-content/uploads/2021/03/BidenHarris-Statement-of-Drug-Policy-Priorities-April-1.pdf*.

eligible use is responsive to the impacts of the pandemic in all communities. The final rule incorporates guidance issued after the interim final rule on specifically types of services eligible, including:

- Evidence-based practices like focused deterrence, street outreach, violence interrupters, and hospital-based violence intervention models, complete with wraparound services such as behavioral therapy, trauma recovery, job training, education, housing and relocation services, and financial assistance; and
- Capacity-building efforts at community violence intervention programs like funding more intervention workers, increasing their pay, providing training and professional development for intervention workers, and hiring and training workers to administer the programs.

Public Comment: Some commenters sought further clarification on whether some of the enumerated eligible uses are considered responsive to all crime, violent crime, or gun violence.

Treasury Response: Enumerated eligible uses that respond to an increase in gun violence may be pursued in communities experiencing an increase in gun violence associated with the pandemic, specifically: (1) Hiring law enforcement officials—even above pre-pandemic levels—or paying overtime where the funds are directly focused on advancing community policing strategies for gun violence, (2) additional enforcement efforts to reduce gun violence exacerbated by the pandemic, including prosecuting gun traffickers, dealers, and other parties contributing to the supply of crime guns, as well as collaborative federal, state, and local efforts to identify and address gun trafficking channels, and (3) investing in technology and equipment to allow law enforcement to more efficiently and effectively respond to the rise in gun violence resulting from the pandemic, for example technology to assist in the identification of guns whose serial numbers have been damaged.

3. Negative Economic Impacts

a. Assistance to Households

Background

While the U.S. economy is now on the path to a strong recovery, the public health emergency, including the necessary measures taken to protect public health, resulted in significant economic and financial hardship for many Americans. As businesses closed, consumers stayed home, schools shifted to remote education, and travel declined precipitously, over 22 million jobs were lost in March and April 2020.[80] One year later, in April 2021, the economy still remained over 8 million jobs below its pre-pandemic peak,[81] and the unemployment rate hovered around 6 percent.[82]

In the months since Treasury issued the interim final rule in May 2021, the economy has made large strides in its recovery. The economy gained over 4 million jobs in the seven months from May to November 2021;[83] the unemployment rate fell more than 1.5 percentage points to 4.2 percent, which is the lowest rate since February 2020;[84] and the size of the nation's economy surpassed the pre-pandemic peak in the second quarter of 2021.[85]

While the economy has made immense progress in its recovery since May 2021, the economy has also faced setbacks that illustrate the continued risks to the recovery. As the Delta variant spread across the country this summer and fall, the United States faced another severe wave of cases, deaths, and strain on the healthcare system, which contributed to a slowdown in the pace of recovery in the third quarter.[86] Supply chain disruptions have also demonstrated the difficulties of restarting a global economy.[87] Moreover, although many Americans have returned to work as of November 2021, the economy remains 3.9 million jobs below its pre-pandemic peak,[88] and 2.4 million workers have dropped out of the labor market altogether relative to February 2020.[89] Thus, despite much progress, there is a continued need to respond to the pandemic's economic effects to ensure a full, broad-based, and equitable recovery.

Indeed, the pandemic's economic impacts continue to affect some demographic groups more than others. Rates of unemployment remain particularly severe among workers of color and workers with lower levels of educational attainment; for example, the overall unemployment rate in the United States was 4.2 percent in November 2021, but certain groups saw much higher rates: 6.7 percent for Black workers, 5.2 percent for Hispanic or Latino workers, and 5.7 percent for workers without a high school diploma.[90] Job losses have also been particularly steep among low-wage workers, with these workers remaining furthest from recovery as of the end of 2020.[91] A severe recession, and its concentrated impact among low-income workers, has amplified food and housing insecurity, with an estimated nearly 20 million adults living in households where there is sometimes or often not enough food to eat and an estimated 12 million adults living in households that were not current on rent.[92]

While economic effects have been seen across many communities, there are additional disparities by race and income. For example, approximately

[92] Center on Budget and Policy Priorities, Tracking the COVID–19 Recession's Effects on Food, Housing, and Employment Hardships, *https://www.cbpp.org/research/poverty-and-inequality/tracking-the-covid-19-economys-effects-on-food-housing-and* (last visited December 17, 2021).

half of low-income, Black, and Hispanic parents reported difficulty covering costs related to food, housing, utility, or medical care.[93] Over the course of the pandemic, inequities also manifested along gender lines, as schools closed to in-person activities, leaving many working families without childcare during the day.[94] Women of color have been hit especially hard: The labor force participation rate for Black women has fallen by 3.6 percentage points[95] during the pandemic as compared to 1.3 percentage points for Black men[96] and 1.7 percentage points for White women.[97]

As the economy recovers, the effects of the pandemic-related recession may continue to impact households, including a risk of longer-term effects on earnings and economic potential. For example, unemployed workers, especially those who have experienced longer periods of unemployment, earn lower wages over the long term once rehired.[98] In addition to the labor market consequences for unemployed workers, recessions can also cause longer-term economic challenges through, among other factors, damaged consumer credit scores[99] and reduced familial and childhood wellbeing.[100] These potential long-term economic consequences underscore the continued need for robust policy support.

Low- and moderate-income households, those with income levels at or below 300 percent of the federal poverty level (FPL), face particular hardships and challenges. These households report much higher rates of food insecurity and housing hardships than households with higher incomes. For example, households with incomes at or below 300 percent FPL are several times more likely to have reported struggling with food insecurity compared to households with income above 300 percent FPL.[101] Similarly, low- and moderate-income households reported being housing insecure[102] at rates more than twice as high as higher-income households, and low- and moderate-income households reported housing quality hardship[103] at rates statistically significantly greater than the rate for higher-income households.[104] The economic crisis caused by the pandemic worsened economic outcomes for workers in many low- and moderate-income households. Industries that employed low-wage workers experienced a disproportionate level of job loss. For example, from February 2020 to February 2021, the hospitality and leisure industry lost nearly 3.5 million jobs.[105] While the entire industry was impacted, 72 percent of the job losses occurred in the lowest wage service occupations compared to only a 6 percent rate of job loss in the highest wage management and finance jobs.[106] Similar trends exist in other heavily impacted industries. In public education, the lowest wage occupations, service and transportation jobs, saw a job loss rate of 20 and 26 percent, respectively.[107] During that same time period, the highest wage occupations in public education, management, actually saw jobs increase by 7 percent.[108]

While many households suffered negative economic outcomes as a result of the COVID–19 pandemic and economic recession, households with low incomes were impacted in disproportionate and exceptional ways. From January 2020 to March 2021, low-wage workers experienced job loss at a rate five times higher than middle-wage workers, and high-wage workers actually experienced an increase in job opportunities.[109] Because workers in low-income households were more likely to lose their job or experience reductions in pay, those same households were also more likely to experience economic hardships like trouble paying utility bills, affording rent or mortgage payments, purchasing food, and paying for medical expenses.[110] The disproportionate negative impacts the pandemic has had on low-income families extend beyond financial insecurity. For example, low-income families have reported higher levels of social isolation, stress, and other negative mental health outcomes during the pandemic. While over half of all U.S. adults report that their mental health was negatively affected by the pandemic, adults with low incomes reported major negative mental health impacts at a rate nearly twice that of adults with high incomes.[111]

Summary of Interim Final Rule and Final Rule Structure

Summary: The interim final rule provided a non-exhaustive list of enumerated eligible uses to respond to the negative economic impacts of the pandemic through assistance to households, as well as a standard for assessing whether uses of funds beyond those enumerated are eligible.

The interim final rule described enumerated eligible uses for assistance to households in several categories: (1) Assistance to unemployed workers, (2) state Unemployment Insurance Trust Funds, (3) assistance to households, and (4) expenses to improve the efficacy of economic relief. Note that the interim final rule posed several questions to the public on enumerated eligible uses for assistance to households; comments on these questions are addressed in the relevant subject matter section below.

In addition, in recognition that pre-existing health, economic, and social disparities contributed to disproportionate pandemic impacts in certain communities, the interim final rule also provided a broader list of enumerated eligible uses to respond to the pandemic in disproportionately impacted communities, specifically: (1) Building stronger communities through investments in housing and neighborhoods, (2) addressing educational disparities, and (3) promoting healthy childhood environments. In the interim final rule, under the Public Health section, recipients could also provide services to address health disparities and increase access to health and social services; these eligible uses have been re-organized into the Assistance to Households section to consolidate responses in disproportionately impacted communities and enhance clarity.

This section addresses enumerated eligible uses in the final rule to respond to negative economic impacts to households. As a reminder, recipients may presume that a household or population that experienced unemployment, experienced increased food or housing insecurity, or is low or moderate income experienced negative economic impacts resulting from the pandemic, and recipients may provide services to them that respond to these impacts, including these enumerated eligible uses.

For guidance on how to determine whether a particular use, beyond those enumerated, is eligible; further detail on which households and communities are presumed eligible for services; and how to identify eligible households and communities beyond those presumed eligible, see section General Provisions: Structure and Standards.

Reorganizations and Cross-References: The final rule reorganizes all enumerated eligible uses for impacted and disproportionately impacted households into the section Assistance to Households, with the exception that expenses to improve the efficacy of economic relief has been re-categorized into a different section of the final rule for increased clarity; for discussion of that use category, see section General Provisions: Other.

Note that in conducting this reorganization, and based on further analysis and in response to comments, Treasury has determined that several enumerated uses included in the interim final rule for disproportionately impacted communities are directly responsive to negative economic impacts experienced by impacted households. In the final rule, these uses have been moved from "disproportionately impacted" to "impacted" households accordingly, making these services available to both disproportionately impacted and impacted households. These uses include assistance applying for public benefits or services; programs or services that address or mitigate the impacts of the COVID–19 public health emergency on childhood health or welfare, including childcare, early learning services, programs to provide home visits, and services for families involved in the child welfare system and foster youth; programs to address the impacts of lost instructional time for students;[112] and programs or services that address housing insecurity, lack of affordable housing, or homelessness.

The following activities remain enumerated eligible uses for disproportionately impacted households: Remediation of lead paint or other lead hazards; housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity; and programs or services that address educational disparities, including assistance to high-poverty school districts to advance equitable funding across districts and geographies and evidence-based services to address the academic, social, emotional, and mental health needs of students.

Enumerated Eligible Uses for Impacted Households

The interim final rule included several enumerated eligible uses to provide assistance to households or populations facing negative economic impacts due to COVID–19. Enumerated eligible uses included: Food assistance; rent, mortgage, or utility assistance; counseling and legal aid to prevent eviction or homelessness; emergency assistance for burials, home repairs, weatherization, or other needs; internet access or digital literacy assistance; cash assistance; or job training to address negative economic or public health impacts experienced due to a worker's occupation or level of training. It also posed a question as to what other types of services or costs Treasury should consider as eligible uses to respond to the negative economic impacts of COVID–19.

This section addresses each of these enumerated eligible uses in turn, with the exception of job training, which has been re-categorized for increased clarity to the eligible use for "assistance to unemployed and underemployed workers." In general, commenters supported inclusion of these enumerated eligible uses to address key economic needs among households due to the pandemic, and Treasury is maintaining these eligible uses in the final rule, in line with commenters' recommendations.

1. Food assistance. The interim final rule included an enumerated eligible use for food assistance. Some commenters expressed support for this eligible use and emphasized the importance of aid to address food insecurity. Some commenters raised questions as to whether food assistance funds could be used to augment services provided through organizations like food banks, churches, and other food delivery services, or generally be sub-awarded to these organizations.

Treasury Response: Treasury is maintaining this enumerated eligible use without change. Recipients may, as was the case under the interim final rule, administer programs through a wide range of entities, including nonprofit and for-profit entities, to carry out eligible uses on behalf of the recipient government (see section Distinguishing Subrecipients versus Beneficiaries). Further, Treasury is clarifying that capital expenditures related to food banks and other facilities primarily dedicated to addressing food insecurity are eligible; recipients seeking to use funds for capital expenditures should refer to the section Capital Expenditures in General

www.kff.org/coronavirus-covid-19/issue-brief/the-implications-of-covid-19-for-mental-health-and-substance-use/.

[112] For which recipients may presume that any student who did not have access to in-person instruction for a significant period of time was impacted by the pandemic.

Provisions: Other for additional eligibility standards that apply to uses of funds for capital expenditures.

2. Emergency housing assistance. The interim final rule included an enumerated eligible use for rent, mortgage, or utility assistance and counseling and legal aid to prevent eviction or homelessness.

Public Comment: Several commenters supported the inclusion of eviction prevention activities as an eligible use given the high number of households behind on rent and potentially at risk of eviction. Following release of the interim final rule, Treasury had also received requests for elaboration on the types of eligible services in this category. Some commenters also recommended including assistance to households for delinquent property taxes, for example to prevent tax foreclosures on homes, as an enumerated eligible use.

Treasury Response: In response to requests for elaboration on the types of eligible services for eviction prevention, Treasury has provided further guidance that these services include "housing stability services that enable eligible households to maintain or obtain housing, such as housing counseling, fair housing counseling, case management related to housing stability, outreach to households at risk of eviction or promotion of housing support programs, housing related services for survivors of domestic abuse or human trafficking, and specialized services for individuals with disabilities or seniors that support their ability to access or maintain housing," as well as "legal aid such as legal services or attorney's fees related to eviction proceedings and maintaining housing stability, court-based eviction prevention or eviction diversion programs, and other legal services that help households maintain or obtain housing."[113] Treasury also emphasized that recipients may work with court systems, nonprofits, and a wide range of other organizations to implement strategies to support housing stability and prevent evictions.

In the final rule, Treasury is maintaining these enumerated eligible uses, including those described in the interim final rule and later guidance, in line with commenters' recommendations. To enhance clarity, Treasury is also elaborating on some types of services included under this eligible use category; this remains a non-exhaustive list of eligible services. For example, eligible services under this use category include: Rent, rental arrears, utility costs or arrears (*e.g.*, electricity, gas, water and sewer, trash removal, and energy costs, such as fuel oil), reasonable accrued late fees (if not included in rental or utility arrears), mortgage payment assistance, financial assistance to allow a homeowner to reinstate a mortgage or to pay other housing-related costs related to a period of forbearance, delinquency, or default, mortgage principal reduction, facilitating mortgage interest rate reductions, counseling to prevent foreclosure or displacement, relocation expenses following eviction or foreclosure (*e.g.*, rental security deposits, application or screening fees). Treasury is clarifying that assistance to households for delinquent property taxes, for example to prevent tax foreclosures on homes, was permissible under the interim final rule and continues to be so under the final rule. In addition, Treasury is also clarifying that recipients may administer utility assistance or address arrears on behalf of households through direct or bulk payments to utility providers to facilitate utility assistance to multiple consumers at once, so long as the payments offset customer balances and therefore provide assistance to households.

This eligible use category also includes emergency assistance for individuals experiencing homelessness, either individual-level assistance (*e.g.*, rapid rehousing services) or assistance for groups of individuals (*e.g.*, master leases of hotels, motels, or similar facilities to expand available shelter).

Further, Treasury is clarifying that transitional shelters (*e.g.*, temporary residences for people experiencing homelessness) are eligible capital expenditures. Recipients seeking to use funds for capital expenditures should refer to the section Capital Expenditures in General Provisions: Other for additional eligibility standards that apply to uses of funds for capital expenditures.

Note that this enumerated eligible use describes "emergency housing assistance," or assistance for responses to the immediate or near-term negative economic impacts of the pandemic. The final rule also clarifies and expands the ability of recipients to use SLFRF funds to address the general lack of affordable housing and housing challenges underscored by the pandemic. For discussion of affordable housing eligible uses, including services that primarily increase access to affordable, high-quality housing and support stable housing and homeownership over the long term, see the eligible use for "promoting long-term housing security: Affordable housing and homelessness."

3. Emergency assistance for pressing needs: Burials, home repairs, weatherization, or other needs. The interim final rule included an enumerated eligible use for emergency assistance for burials, home repairs, weatherization, and other needs; these types of programs may provide emergency assistance for pressing and unavoidable household needs. Treasury did not receive comments on this eligible use and is maintaining it in the final rule.

Background on Home Repairs and Weatherization: The economic downturn has meant fewer households had the resources needed to make necessary home repairs and improvements. In May 2021, 28 percent of landlords reported deferring maintenance and 27 percent of tenants reported maintenance requests going unanswered.[114] While small and cosmetic repairs can often wait, deferring major repairs, such as plumbing needs, can result in unsafe and unhealthy living environments and, eventually, the need for more expensive repairs and fixes.

In addition to repairs, many homes are in need of weatherization. Weatherization assistance helps low- and moderate-income Americans save energy, reduce their utility bills, and keeps them and their homes safe. One in three households is energy insecure,[115] meaning they do not have the ability to meet their energy needs.[116] Weatherization efforts are particularly important for low- and moderate-income households. Households of color, renters, and households with low or moderate incomes are all more likely to report energy insecurity.[117] These

disparities are partially a result of economic hardship but are also caused by inequitable access to housing with proper insulation, up to date heating, cooling, and ventilation systems, and functioning and up to date lighting and appliances.[118] While programs that address the effects of energy hardships, like the Low-Income Home Energy Assistance Program (LIHEAP), are critical, weatherization attempts to address root causes by addressing issues that lead to energy insecurities.

4. Internet access or digital literacy assistance. The interim final rule included an enumerated eligible use for assistance to households for internet access or digital literacy assistance. This enumerated eligible use, which responds to the negative economic impacts of the pandemic on a household by providing assistance that helps them secure internet access or increase their ability to use computers and the internet, is separate from the eligible use category for investments in broadband infrastructure, under Sections 602(c)(1)(D) and 603(c)(1)(D), which is used to build new broadband networks through infrastructure construction or modernization. For discussion of broadband infrastructure investment in the final rule, see section Broadband Infrastructure in Infrastructure.

Background: The COVID–19 public health emergency has underscored the importance of universally available, high-speed, reliable, and affordable broadband coverage as millions of Americans rely on the internet to participate in, among other critical activities, school, healthcare, and work. Recognizing the need for such connectivity, SLFRF funds can be used to make necessary investments in broadband infrastructure that increase access over the long term, as well as the necessary supports to purchase internet access or gain digital literacy skills needed to complete activities of daily living during the pandemic.

The National Telecommunications and Information Administration (NTIA) highlighted the growing necessity of broadband in daily lives through its analysis of NTIA internet Use Survey data, noting that Americans turn to broadband internet service for every facet of daily life including work, study, and healthcare.[119] With increased use of technology for daily activities and the movement by many businesses and schools to operating remotely during the pandemic, broadband has become even more critical for people across the country to carry out their daily lives.

However, even in areas where broadband infrastructure exists, broadband access may be out of reach for millions of Americans because it is unaffordable, as the United States has some of the highest broadband prices in the Organisation for Economic Co-operation and Development (OECD).[120] According to a 2021 Pew Research Center study, 20 percent of non-broadband users say that the monthly cost of home broadband is the primary reason they do not have broadband at home, and 40 percent say that cost is one reason for their lack of home broadband.[121] Further, according to another survey, 22 percent of parents with homebound schoolchildren during the COVID–19 pandemic say that it is very or somewhat likely that their children will have to rely on public wi-fi to finish their schoolwork because there is no reliable internet connection at home; this percentage nearly doubles for lower-income parents, 40 percent of whom noted that their children will have to rely on public wi-fi.[122] The same survey showed that 36 percent of lower-income parents with homebound children say their child will not be able to complete their schoolwork because they do not have access to a computer at home.[123]

Public Comment: Many commenters highlighted the importance of broadband access during the pandemic, including for remote work and education, and argued that affordability presents a major barrier to broadband adoption by households; in other words, many households live in areas that have broadband infrastructure and service available but are unable to purchase service for their household due to the high cost. These commenters argued that broadband must be affordable to be accessible.

Commenters proposed several potential responses to affordability concerns. Some commenters recommended that building "gap networks," or broadband networks built at low cost to provide affordable service in areas where it is lacking, be eligible as assistance to households to respond to the negative economic impacts of the pandemic, even if they do not meet the technical standards for eligibility under the eligible use category of broadband infrastructure investment, especially the required speed standards for new service. These commenters argued that the networks have shown promise as a timely means to expand access to affordable broadband internet during the pandemic, even if they may not provide service speeds needed for more intensive internet uses. Another commenter requested eligible uses include funding cellular towers to decrease costs. One commenter recommended that affordability should be addressed through other programs but not SLFRF given that affordability and availability may require nuanced solutions that would be complex to combine.

Treasury Response: The interpretive framework and enumerated eligible uses allow recipients flexibility to address identified pandemic impacts, including through solutions that take into account the particularized issues in their community. Given extensive commenter feedback on the importance of affordability to achieving broadband access, and the centrality of broadband to participating in work, education, healthcare, and other activities during the pandemic, affordability programs are an appropriate eligible use to respond to the negative economic impacts of the pandemic and Treasury is maintaining the enumerated eligible use for assistance to households for internet access and digital literacy programs in the final rule.

Building or constructing new broadband networks is an infrastructure investment and is governed by a separate clause in the statute. Treasury has addressed comments on "gap networks" that require infrastructure build-out in the section Broadband Infrastructure in Infrastructure.

[123] *Id.*

Public Comment: Some commenters also use the term "gap networks" to refer to equipment installed as part of wi-fi systems, such as routers, repeaters, and access points; this equipment provides consumer access to an existing broadband network and does not require new network build-out or construction. These commenters recommended that Treasury permit, as assistance to households for internet access, investments in public wi-fi networks, free wi-fi in public housing communities, and other equipment that offers internet access to end users by utilizing existing broadband networks.

Other commenters recommended that eligible uses in this category include providing devices and equipment necessary to access the internet, like computers and routers, directly to low-income households.

Treasury Response: Treasury has determined that these services, which expand internet access without constructing new networks, are an appropriate enumerated eligible use as assistance to households to respond to a negative economic impact, and they are permitted under the final rule. Treasury is clarifying that eligible uses under this category can also include a wide range of programs and services to expand internet access and digital literacy, such as subsidies for the cost of internet service, other programs that support adoption of internet service where available, digital literacy programs, or programs that provide devices and equipment to access the internet (*e.g.*, programs that provide equipment like tablets, computers, or routers) to households. Recipients seeking to use funds for equipment should refer to the section Capital Expenditures in General Provisions: Other for additional eligibility standards that apply to uses of funds for capital expenditures (*e.g.*, equipment, property, and facilities).

5. Cash assistance. The interim final rule included as an enumerated eligible use cash assistance and provided that cash transfers must be "reasonably proportional" to the negative economic impact they address and may not be "grossly in excess of the amount needed to address" the impact. In assessing whether a transfer is reasonably proportional, recipients may "consider and take guidance from the per person amounts previously provided by the Federal Government in response to the COVID–19 crisis," and transfers "grossly in excess of such amounts" are not eligible.

Public Comment: Several commenters expressed support for this eligible use, noting that this is a common policy tool for some governments to support the well-being of households and individuals in their communities. Some commenters requested that Treasury set a specific dollar amount for permissible cash transfers, and Treasury has also received recipient questions on whether specific types of transfers, such as those to a substantial share of the population in the jurisdiction, would be a permissible use of funds.

Treasury Response: Treasury is maintaining this enumerated eligible use in the final rule, in line with commenters' recommendations. Because the final rule is intended to provide flexibility to recipients to respond to the particularized pandemic impacts in their communities, which may vary in type and intensity, setting a specific dollar threshold for eligible cash transfers would fail to recognize the particularized needs of communities and limit recipients' flexibility to tailor their response to those needs.

To provide greater clarity, Treasury is elaborating on the analysis that recipients may undertake to assess the eligibility of specific cash assistance programs or transfers. Cash transfers, like all eligible uses in this category, must respond to the negative economic impacts of the pandemic on a household or class of households. For the reasons discussed above, recipients may presume that low- and moderate-income households (as defined in the final rule), as well as households that experienced unemployment, food insecurity, or housing insecurity, experienced a negative economic impact due to the pandemic.

Recipients may also identify other households or classes of households that experienced a negative economic impact of the pandemic and provide cash assistance that is reasonably proportional to, and not grossly in excess of, the amount needed to address the negative economic impact. For example, in the ARPA, Congress authorized Economic Impact Payments to households at certain income levels, identifying and responding to a negative economic impact of the pandemic on these households.

Finally, Treasury has reiterated in the final rule that responses to negative economic impacts should be reasonably proportional to the impact that they are intended to address. Uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses. Reasonably proportional refers to the scale of the response compared to the scale of the harm. It also refers to the targeting of the response to beneficiaries compared to the amount of harm they experienced; for example, it may not be reasonably proportional for a cash assistance program to provide assistance in a very small amount to a group that experienced severe harm and in a much larger amount to a group that experienced relatively little harm.

6. Survivor's benefits. The interim final rule included an enumerated eligible use for survivor's benefits to surviving family members of individuals who have died from COVID–19, including cash assistance to widows, widowers, or dependents.

Public Comment: Treasury did not receive any comments on the inclusion of survivor's benefits as an enumerated use for impacted households in the interim final rule.

Treasury Response: This use of funds remains eligible under the final rule. Consistent with the general reorganization noted above, the final rule organizes survivor's benefits under assistance to households to clarify that households are the intended beneficiaries of survivor's benefits.

7. Assistance accessing or applying for public benefits or services. Recognizing that eligible households often face barriers to accessing public benefits or services that improve health and economic outcomes, the interim final rule included as an enumerated eligible use in disproportionately impacted communities, public benefits navigators to assist community members with navigating and applying for available federal, state, and local public benefits or services. Treasury also clarified in subsequent guidance after the interim final rule that this eligible use category would include outreach efforts to increase uptake of the Child Tax Credit.

Background: The under-enrollment of eligible households in social assistance programs is a well-recognized and persistent challenge. There are many reasons why a household may not be receiving a particular benefit even though they are eligible. For many federal programs, enrollment processes vary from state-to-state. Sometimes, households are simply unaware that they are eligible for a particular benefit.[124] For example, despite having one of the highest rates of participation of any benefits program, nearly 20 percent of eligible individuals do not participate in the Supplementary Nutritional Assistance Program

[124] Amy Finkelstein & Matthew J Notowidigdo, Take-Up and Targeting: Experimental Evidence from SNAP, The Quarterly Journal of Economics, vol 134(3), pages 1505–1556 (2019), *https://www.nber.org/papers/w24652.*

(SNAP).[125] In other cases, policies like public charge and asset testing can discourage otherwise eligible households.[126] While the gap between households that need assistance and the number of households participating in public benefit programs has always existed, narrowing that gap and ensuring households receive the support they need is critical in mitigating the negative economic impacts of the pandemic.

Public Comment: Treasury has also received feedback from recipients and stakeholders noting the need to increase awareness and uptake of assistance programs, including gaps that remain in enrollment of eligible households in programs to address the negative economic impacts of the pandemic.[127]

Treasury Response: Treasury has determined that this impact of the pandemic is widely experienced across many jurisdictions and programs or services to increase awareness and uptake of assistance programs would respond to the pandemic's negative economic impact in all communities. As such, in the final rule, this use is eligible for any impacted household or class of households, not only in disproportionately impacted communities.

8. Promoting healthy childhood environments. The interim final rule included programs and services that promote healthy childhood environments as an enumerated eligible use for disproportionately impacted households. The interim final rule listed three programs or services included under this use: Childcare; programs to provide home visits by health professionals, parent educators, and social service professionals to individuals with young children to provide education and assistance for economic support, health needs, or child development; and services for child welfare-involved families and foster youth to provide support and education on child development, positive parenting, coping skills, or recovery for mental health and substance use. The interim final rule also included an enumerated eligible use for early learning services in disproportionately impacted communities, to address disparities in education.

Public Comment: Childcare and Early Learning: Treasury received multiple comments that were supportive of the provision of childcare. Treasury has also received multiple comments and questions indicating that recipients have identified a need for childcare for a broader range of households and communities, for example those that may need childcare in order to return to work, in addition to households and communities disproportionately impacted by the pandemic. Several commenters expressed uncertainty about how childcare facilities should interact with the boundaries of a QCT. Finally, one commenter recommended that pre-K or early learning services encompass care for infants and toddlers, arguing that these types of care are often more expensive or challenging to access for families.

Background: Childcare and Early Learning: As daycares and schools closed in-person activities during the pandemic, many working families were left without childcare during the day.[128] Although daycare centers and schools have since reopened in many communities, there remains a persistent childcare shortage as childcare employment levels have not fully rebounded since the sharp decline in childcare employment at the beginning of the pandemic.[129] As a result, working parents in communities across the country, and more specifically women, may face challenges entering or reentering the labor force.[130]

Low-income households are also more likely to lose access to quality childcare.[131] The widespread closure of childcare centers combined with a lack of access to paid family leave means parents in low-income households are more likely to experience a reduction of income or leave their jobs due to a lack of childcare options.[132]

Additionally, childcare providers serving primarily low-income families were less likely to remain open during the pandemic because of tighter profit margins and general community financial insecurity, compared to childcare providers serving primarily high-income families.[133] [134]

In addition to disruptions to childcare, early learning services were also significantly impacted by the pandemic, and the disruption of these services had widespread ramifications for learning loss, parental support, and equity. Early learning centers have seen declined enrollment across the board, though there was a larger dip in enrollment for low-income households.[135] This lower enrollment coincides with a diminishing workforce, as similarly to childcare, early childhood educators have been leaving the profession due to long hours, low pay,[136] and health and safety concerns.[137] As a result, children's school readiness has suffered, leading to potential long-term impacts on life outcomes.[138] The impact also extended

to parents. Parents, especially mothers, may face challenges reentering or remaining in the workforce if early learning services are unavailable.

Treasury Response: Childcare and Early Learning Services: Treasury agrees with commenters' analysis that challenges accessing or affording childcare have been widespread during the pandemic, affecting many jurisdictions and populations across the country. Disruptions to early care and learning services similarly have had broad impact and likely result in negative impacts for young children and their parents. As such, these enumerated eligible uses are generally responsive to the negative economic impacts of the pandemic in all communities, not just in disproportionately impacted communities. Under the final rule, childcare and early learning services are available to impacted households or classes of households, not just those disproportionately impacted. These eligible uses can include new or expanded services, increasing access to services, efforts to bolster, support, or preserve existing providers and services, and similar activities.

Further, Treasury is clarifying that improvements to or new construction of childcare, daycare, and early learning facilities are eligible capital expenditures. Recipients seeking to use funds for capital expenditures should refer to the section Capital Expenditures in General Provisions: Other for additional eligibility standards that apply to uses of funds for capital expenditures.

Public Comment: Home Visiting: Treasury has also received questions about whether the provision of home visiting services would be responsive to the health and mental health needs of impacted new mothers, citing the positive mental health impacts shown on the mother as well as improved outcomes for children.

Background: Home Visiting: Pregnant and recently pregnant individuals are at an increased risk for serious illness from COVID–19.[139] Furthermore, pregnant individuals with COVID–19 are more likely to experience preterm birth (delivering the baby earlier than 37 weeks).[140] In addition to heightened health risks from COVID–19, pregnant individuals may have experienced significant changes to their prenatal care during the pandemic[141] or may also have experienced increased mental health challenges, including high levels of depression, anxiety, loneliness, and post-traumatic stress during the pandemic.[142]

Home visiting services provided to families, particularly new mothers and newborns, feature regular home visits from trained nurses, social workers, and/or counselors who provide health care, mental health resources, positive parenting support, support in making personal health decisions, and awareness of other potentially helpful services. These functions have become even more essential at mitigating negative factors associated with the pandemic. Home visits give professionals a chance to flag potential domestic violence, which has risen worldwide over the course of the pandemic.[143] Racial health disparities can also be driven down by home visits. For example, Black women are more likely to avoid hospitals during the pandemic, and home visitors can help either assuage concerns around hospitals or give effective advice for alternative methods of childbirth.[144] Given the disproportionate effect of the pandemic on people of color, home visits are an essential equity tool that tackle major negative effects of the pandemic. These are just a few selections from the evidence that suggests many home visiting models can have a positive effect on maternal physical and mental health.[145]

Treasury Response: Home Visiting: Given the widespread impact of COVID–19 on pregnant and recently pregnant individuals, Treasury is re-categorizing home visiting services as an eligible use for impacted communities, not just disproportionately impacted communities. Under the final rule, these eligible uses are available to impacted households or classes of households.

Public Comment: Child Welfare: While the interim final rule noted that certain types of assistance, particularly around child development and parenting, were eligible for child welfare-involved families, Treasury has received some recipient questions asking whether financial, educational, housing, or other supports and services are eligible uses for foster youth, including those aging out of the system, and child welfare-involved families. Other commenters asked about whether funding for kinship care would be eligible.

Background: Child Welfare: The COVID–19 pandemic placed meaningful strain on the child welfare and foster care system. Court hearings were delayed,[146] essential mental health care was shifted to a virtual environment, and attendance and performance in school among foster children dropped sharply.[147] Additionally, there was a nationwide rise of new children entering the foster care system and many states placed temporary moratoria on children aging out of the foster care system.[148] As these temporary moratoria expire, additional support will be needed to assist children exiting the system.

Additionally, financial and material hardship are causal factors in the increase of new children entering the foster care system, whether through loss of a caregiver, domestic violence,[149] or other associated costs of the pandemic. Therefore, support to decrease these hardships will support families and increase positive outcomes for youth

and families that may otherwise become involved in the child welfare system.

Treasury Response: In the final rule, Treasury is clarifying that services to foster youth, including those aging out of the system, and child welfare-involved families may encompass a wide array of financial, educational, child development, or health supports, or other supports necessary, including supports for kinship care.

9. Addressing the impacts of lost instructional time.

Public Comment: The interim final rule included an enumerated eligible use to address educational disparities in disproportionately impacted communities, recognizing that underserved students have been more severely impacted by the pandemic and including responsive services for early learning, enhance funding to high-poverty districts, and providing evidence-based services to address the academic, social, emotional, and mental health needs of students. Some commenters expressed concerns that learning loss or the negative impacts of lost instructional time due to school closures or remote education during the pandemic had affected a significant share of students in grades kindergarten through twelve (K–12), including students who may not fall within a disproportionally impacted group.

Background: The COVID–19 pandemic resulted in the widespread closure of schools across the nation. While many schools and districts reopened to in-person instruction or implemented remote learning, the shift was not immediate or without consequence. Children who received virtual only or combined remote and in-person instruction were more likely to report experiencing negative mental- and physical health outcomes than children who received in-person instruction.[150]

Treasury Response: Under the final rule, addressing the impact of lost instructional time and/or learning loss is an enumerated eligible use for impacted households. When providing services to address lost instructional time, recipients may presume that any K–12 student who lost access to in-person instruction for a significant period of time has been impacted by the pandemic and is thus eligible for responsive services.

Interventions or services that address the impact of lost instructional time may include offering high-quality tutoring and other extended learning opportunities, providing differentiated instruction, implementing activities to meet the comprehensive needs of students, expanding and improving language access for parents and families, providing information and assistance to parents and families on how they can effectively support students, including in a distance learning environment, improving student engagement in distance education, and administering and using high-quality assessments to assess students' academic progress, among others. In designing services under this eligible use, recipients may wish to reference guidance from the Department of Education on strategies for addressing lost instructional time.[151]

The final rule also maintains a separate enumerated eligible use for addressing educational disparities in disproportionately impacted communities. This eligible use includes services to address disparities in educational outcomes that predate the pandemic and amplified its impact on underserved students; these include, for example, enhanced funding to high-poverty districts and providing evidence-based services to address the academic, social, emotional, and mental health needs of students.

Finally, as described in the section Public Health, recipients can provide a broad range of behavioral health services, including services for children and youth in schools, to respond to the impacts of the pandemic on mental health and other behavioral health issues. When providing behavioral health services, recipients may presume that the general public was impacted by the pandemic and provide behavioral health services to members of the general public, including children and youth in schools, without any further analysis of impacts of the pandemic on those individuals and whether the service is responsive.

10. Promoting long-term housing security: affordable housing and homelessness. Under the interim final rule, recipients may use SLFRF funds to provide a set of housing services to communities that have been disproportionately impacted by the pandemic. Specifically, the interim final rule provided that programs or services that address housing insecurity, lack of affordable housing, or homelessness, were responsive to the negative economic impacts of the pandemic when provided to disproportionately impacted households and communities. The enumerated uses included supportive housing or other programs or services to improve access to stable, affordable housing among individuals who are homeless and development of affordable housing to increase supply of affordable and high-quality living units. Many recipients have already announced plans to use SLFRF funds for affordable housing interventions in all of these categories. Treasury received many comments asking for additional clarity or flexibility in these uses.

As detailed below, based on multiple public comments and questions and Treasury's subsequent analysis, Treasury has determined that supportive housing or other programs or services to improve access to stable, affordable housing among individuals who are homeless, and the development of affordable housing to increase supply of affordable and high-quality living units are responsive to the needs of impacted populations, not only disproportionately impacted populations. This final rule reflects this clarification and builds on the objectives stated in the interim final rule to improve access to stable, affordable housing, including through interventions that increase the supply of affordable and high-quality living units, improve housing security, and support durable and sustainable homeownership.

Finally, note that "emergency housing assistance," or assistance for responses to the immediate negative economic impacts of the pandemic through services like financial assistance for rental arrears or mortgage payments, is also an eligible use category for assistance to households under the final rule; see the eligible use for "emergency housing assistance" above. The provision of housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity remains an eligible use under assistance to disproportionately impacted households; for discussion, see the eligible use for "housing vouchers and assistance relocating" below.

Background: Affordable Housing: It is clear that the ongoing pandemic and resulting economic crisis are having a profound, long-term negative effect on the pre-existing affordable housing crisis facing low-income households.[152]

[152] Consumer Financial Protection Bureau, Housing insecurity and the COVID–19 pandemic

Continued

The combination of a large number of higher-income households who have weathered the pandemic without significant income losses, low interest rates, and housing supply constraints exacerbated by the pandemic, have driven a sharp increase in the sale price of homes.[153] Meanwhile, many low-income renters and homeowners are struggling with lost employment and income and are behind on their housing payments.[154]

Public Comment: Affordable Housing Outside of Low-Income Geographies: A major theme in comments was that affordable housing interventions, especially development of affordable housing, should be allowed outside of QCTs, as concentrating the supply of affordable housing in low-income geographies can have the effect of increasing both concentrated poverty and racial and economic segregation, while locking lower-income households in need of housing support out of high-opportunity neighborhoods with access to employment and amenities.

Treasury Response: Affordable Housing Outside Low-Income Geographies: As previously stated, affordable housing is not confined to low-income geographies under the interim final rule. As discussed elsewhere, the interim final rule presumed that QCTs, as well as communities served by Tribal governments, were disproportionately impacted for administrative convenience, but recipients may identify other populations, households, or geographic areas with disparate impacts of COVID–19 and provide affordable housing services to them. For example, under the interim final rule, a city could determine that its low-income residents faced disproportionate impacts of COVID–19 and develop affordable housing targeted to these households. Such a scenario could include, for example, affordable projects in higher-income neighborhoods that would allow residents to live closer to jobs and well-resourced schools.

Additionally, as noted above, Treasury is finalizing the rule with some changes to the treatment of affordable housing development designed to clarify that permanent supportive housing or other programs or services to improve access to stable, affordable housing among individuals who are homeless, and the development of affordable housing to increase supply of affordable and high-quality living units, are responsive to individuals and households that were impacted by the pandemic in addition to those that were disproportionately impacted. This shift is in line with commenters' recommendations and consistent with the facts described above, which demonstrate that lack of supply of affordable housing units contributed to the pandemic's impact on housing insecurity and unsustainable housing cost burdens and that these impacts were experienced broadly across the country.

Public Comment: Eligible Activities: Many commenters asked for clarity on what types of activities (*e.g.,* land acquisition, construction, pre-construction costs, operating costs, etc.) are eligible uses of SLFRF, and what affordability criteria must be applied to affordable housing development. Commenters encouraged Treasury to allow the full array of affordable housing activities, including particular requests for broad flexibility for Tribal communities, and to specify that "development" should include construction, preservation, rehabilitation, and operation. Other commenters requested clarification about permissible program administration approaches for affordable housing, such as contracting methods and distribution of funds.

Some commenters asked that Treasury require SLFRF funds to be focused on the lowest-income households, who suffer the most severe rent burdens and risks of housing instability, and whose housing situation has left them particularly vulnerable to COVID–19. For example, one commenter argued that SLFRF funds should only be used to support affordable housing for households making 50 percent of AMI or less and that recipients should be required to set aside significant portions of any developments for renters making 30 percent of AMI or less and persons with physical and sensory disabilities. Other commenters requested a more flexible approach to affordable housing definitions.

Treasury Response: Eligible Activities: The final rule clarifies eligibility of affordable housing development for recipients; these uses were eligible under the interim final rule, but Treasury is providing further guidance to enhance clarity and respond to recipient and commenter questions.

As with all interventions to address the negative economic impacts of the pandemic, affordable housing projects must be responsive and proportional to the harm identified. This test may be met by affordable housing development projects—which may involve large expenditures and capital investments—if the developments increase the supply of long-term affordable housing for low-income households. While there may be less costly (or non-capital) alternatives to affordable housing development, a comprehensive response to the widespread housing challenges underscored by the pandemic will require the production of additional affordable homes, and targeted affordable housing development is a cost-effective and proportional response to this need.

For purposes of this test, Treasury will presume that any projects that would be eligible for funding under either the National Housing Trust Fund (HTF) or the Home Investment Partnerships Program (HOME) are eligible uses of SLFRF funds. Note that these programs use different income limits than the definition of low- and moderate-income adopted by Treasury. Given the severity of the affordable housing shortage, and the ways in which the pandemic has exacerbated the need for affordable, high-quality dwelling units, Treasury has determined that the households served by these federal housing programs have been impacted by the pandemic and its negative economic impacts and that development of affordable housing consistent with these programs is a related and reasonably proportional response to those impacts. Additionally, affordable housing projects provided by a Tribal government are eligible uses of SLFRF if they would be eligible for funding under the Indian Housing Block Grant program, the Indian Community Development Block Grant program, or the Bureau of Indian Affairs Housing Improvement Program. Alignment with these programs, which define "affordable housing" in a manner consistent with a proportionate response to the affordable housing challenges faced by low- and moderate-income households as a result of the negative economic impacts of the pandemic, is intended to give recipients comfort and clarity as they design a

wide variety of affordable housing interventions, including production, rehabilitation, and preservation of affordable rental housing and, in some cases, affordable homeownership units. These programs allow the financing of a wide range of affordable housing activities and set clear eligibility criteria that many recipients are already familiar with.

Finally, to further support sustainable and durable homeownership, recipients may consider offering down payment assistance, such as through contributions to a homeowner's equity at origination or that establish a post-closing, mortgage reserve account on behalf of the borrower that may be utilized to make a missed or partial mortgage payment at any point during the life of the loan (*e.g.*, if the borrower faces financial stress). Homeownership assistance that would be eligible under the Community Development Block Grant (at 24 CFR 507.201(n)) is also an eligible use of SLFRF funds.

Public Comment: Permanent Supportive Housing: Treasury has received comments encouraging the use of SLFRF funds for permanent supportive housing. This is an eligible use under the interim final rule: Both the development of affordable housing (including operating subsidies) and wraparound services such as behavioral health services, employment services, and other supportive services, are eligible responses to the public health crisis or its negative economic impacts.

Treasury Response: The final rule maintains the eligibility of permanent supportive housing as an enumerated use. Treasury is also clarifying that other affordable housing developments targeted to specialized populations are also eligible, for example recovery housing for individuals in recovery from substance use.

Public Comment: Operating Expenses: Commenters specifically asked that Treasury allow the use of SLFRF funds for operating expenses of affordable housing units, as operating subsidies are typically required to reach extremely low-income households, whose affordable rents may be lower than the ongoing cost of operating their unit.

Treasury Response: Operating expenses for eligible affordable housing were an eligible use of funds under the interim final rule and the final rule maintains this treatment. This may include capitalized operating reserves.

Rehabilitation and repair of public housing will also be considered an eligible use of SLFRF funds.

Public Comment: Affordable Housing Loans and Revolving Loan Funds: Some commenters requested that loans with maturities beyond the period of performance or revolving loan funds that revolve beyond the period of performance be eligible uses of SLFRF funds if used for affordable housing. Some commenters pointed out that for-profit developers of low-income housing through the Low-Income Housing Tax Credit (LIHTC) may be deterred from accepting grants to bridge funding gaps in current LIHTC deals by the treatment of grants to for-profit entities in the calculation of eligible basis for the LIHTC.

Treasury Response: The final rule does not change the treatment of loans from the interim final rule. For more details see section Treatment of Loans in Program Administration Provisions. Similarly, the final rule does not change the treatment of grants to support affordable housing development, including developments supported by the LIHTC: such grants are an eligible use of funds.

Additional enumerated eligible uses for assistance to impacted households. As noted above, the interim final rule posed a question on what other types of services or costs Treasury should consider as eligible uses to respond to the negative economic impacts of COVID–19. In response, commenters proposed a wide variety of additional recommended enumerated eligible uses to assist households, ranging from general categories of services (*e.g.*, legal and social services) to services that respond to needs widely experienced across the country (*e.g.*, access to and affordability of health insurance) to services that are most applicable to the particularized needs of certain populations or geographic areas of the United States (*e.g.*, senior citizens, SNAP recipients, immigrants, formerly-incarcerated individuals, responding to environmental issues in certain geographic regions). Other commenters generally requested a high degree of flexibility to respond to the particular needs of their communities.

Treasury Response: Given the large number and diversity of SLFRF recipients, Treasury's approach to assistance to households in the final rule aims to clarify additional enumerated eligible uses that respond to negative economic impacts of the pandemic experienced widely in many jurisdictions across the country, making it clear and simple for recipients to pursue these enumerated eligible uses under the final rule. In the final rule, Treasury is clarifying several additional uses, which generally respond to pandemic impacts experienced broadly across jurisdictions and populations, are eligible under the interim final rule as assistance to households and continue to be so under the final rule, as outlined below.

11. Paid sick, medical, or family leave.

Public Comment: Some commenters argued that the pandemic increased the need for paid sick or medical leave, as staying home when ill is recommended by the CDC to prevent spread of the virus but lack of access to paid sick leave often prevents workers from staying home. Other commenters recommended paid family leave as an eligible use, arguing that shortages in access to childcare or home health assistance, as well as school closures, may increase the need for family members to serve as caretakers.

Background: The COVID–19 pandemic highlighted the importance of paid leave as well as the number of workers who do not have access to paid sick and/or family leave. When workers have access to paid leave, they are less likely to report to work sick, and therefore less likely to spread illnesses in the workplace: One study demonstrates that the emergency sick leave provision of the Families First Coronavirus Response Act (FFCRA) reduced the spread of COVID–19.[155]

The lack of paid leave exacerbates financial hardships experienced as a result of the public health emergency. A 2018 survey by the Department of Labor found that two-thirds of employees that took unpaid or partial-paid leave experienced financial hardship.[156] Furthermore, because the Family and Medical Leave Act (FMLA) excludes small employers, part-time workers, and workers who have been with their employer for less than a year, 44 percent of workers do not have access to even unpaid leave.[157] Workers of color and workers with lower incomes are less likely to have access to paid leave.[158] [159]

Continued

For workers that are also caregivers for children, seniors, or other family members, there may be a similar need for—and benefits of—paid family leave. For example, some workers may have struggled during the pandemic to balance caring for children, as schools and daycares closed, and working. For new parents, paid parental leave results in fewer infant hospitalizations, lowering parental stress, increasing parental involvement, and improving the overall health of parent and child.[160] COVID–19 has also increased the levels of "caregiving intensity" [161] and "caregiving burden" [162] for those providing care to seniors or older family members.[163] [164] When surveyed, more than half of caregivers reported that COVID–19 increased both the amount of caregiving responsibilities they had as well as the negative physical and mental impacts their caregiving responsibilities had on themselves.[165]

Treasury Response: Treasury agrees that these constitute impacts of the pandemic, and accordingly, under the final rule, creating, expanding, or financially supporting paid sick, medical, or family leave programs is an enumerated eligible use of funds to respond to the negative economic impacts of the pandemic.

12. Health insurance.

Public Comment: Several commenters recommended that uses of funds to expand access to health insurance be enumerated eligible uses; commenters believed that the heightened risk of illness or hospitalization due to COVID–19 had increased the negative economic impacts of lacking health insurance.

Background: In 2019, prior to the pandemic, it was estimated that 11 percent of nonelderly adults lacked health insurance.[166] By mid-2020, job loss had resulted in an estimated 3.3 million people losing their employer sponsored insurance, resulting in an additional 2 million uninsured adults.[167] Participation in Medicaid, the Children's Health Insurance Program (CHIP), and the Affordable Care Act (ACA) marketplace played an important role in minimizing the number of people who completely lost health insurance during the early phases of the pandemic; Medicaid and CHIP enrollment increased by 9 percent from February to September 2020 [168] and 8.3 million people enrolled in insurance through the ACA marketplace.[169]

Although the ACA, CHIP, and Medicaid have significantly reduced the number of uninsured Americans through the pandemic and the economic downturn, adequate coverage and affordability still remains an issue for many. In 2020, 21 percent of working-age adults were inadequately insured, meaning even if they had insurance, they incurred a significant amount of out-of-pocket costs.[170] Additionally, 37 percent of adults reported struggling with medical bills or medical debt and 71 percent of adults who did not purchase insurance cited affordability as the main factor.[171]

Treasury Response: Treasury agrees that loss of health insurance, increased financial risk from lacking health insurance, or excessive out-of-pocket healthcare costs constitute negative economic impacts of the pandemic. Under the final rule, programs or services to expand access to health insurance coverage are an enumerated eligible use as assistance to households, for example, subsidies for health insurance premiums or expansion of a recipient's health insurance plan to cover additional employees who currently lack coverage.

13. Services for the unbanked and underbanked.

Public Comment: One commenter expressed support for the inclusion of services to increase banking access as an allowable expense under SLFRF. The commenter recommended that states be encouraged to offer opportunities for consumers to open safe and affordable accounts capable of receiving direct payments. The commenter emphasized that allowing unbanked and underbanked households to receive funds securely through no-fee, direct deposit will help connect or reconnect consumers to the mainstream financial system.

Background: Banking inequities can make it difficult for unbanked or underbanked households to access housing, jobs, and other important economic opportunities. Being unbanked or underbanked can also make it challenging for households to apply for and receive financial assistance, including services like pandemic emergency housing assistance.

Safe, affordable, and accessible financial services play a critical role in assisting households in the United States in managing income volatility and cash flow shortages.[172] Currently, over 5 percent of families, or 7 million households are "unbanked," meaning they do not have a bank account.[173] Low-income households, non-white households, and households with individuals with disabilities were even more likely to be unbanked. In 2019, 16 percent of Native American households, 14 percent of Black households, and 12 percent of Hispanic households were unbanked, compared to 2.5 percent of white households. Additionally,

[173] Federal Deposit Insurance Corporation, How America Banks: Household Use of Banking and Financial Services 2019 FDIC Survey, *https://www.fdic.gov/analysis/household-survey/2019report.pdf.*

underbanked households—those that have a bank account but rely on alternative financial services, such as money orders, payday loans, and check cashing services— account for 16 percent of all households in the United States.[174] As a result of the COVID–19 pandemic, new social distancing protocols have, in some instances, made it more difficult to perform financial transactions with paper instruments, like banknotes, coinage, paper checks, or money orders. Households constrained to these payment methods may face challenges receiving government assistance. Additionally, businesses have transitioned to cashless payments systems to promote contactless payments.[175] As a result, unbanked individuals may face additional challenges conducting financial transactions.

Treasury Response: Recognizing these challenges, Treasury is clarifying that recipients may use SLFRF funds to provide financial services that facilitate the delivery of federal, state, or local benefits (*e.g.*, Child Tax Credit, Earned Income Tax Credit, tax refunds, or emergency housing or food assistance funds). The following includes a non-exhaustive list of uses to provide financial services to unbanked and underbanked households:

- Provide low or no cost financial services, including in conjunction with administration of benefits, such as pre-paid debit cards, *e.g.*, via Economic Impact Payment or General Purpose Reloadable pre-paid cards or for the development of public banking infrastructure that can support benefit delivery.
- Provide transitional services to facilitate long-term access to banking and financial services.
- Provide financial literacy programs and conduct community outreach and deploy engagement resources to increase awareness about low-cost, no-overdraft fee accounts, pilot new strategies and approaches that help overcome barriers to banking access and support the gathering and sharing of information in ways that improve equity, such as community meetings, partnerships with community-based organizations, online surveys, focus groups, human-centered design activities, and other community engagement activities.

Assistance to Unemployed and Underemployed Workers

The interim final rule included assistance to unemployed workers as an enumerated eligible use, including "services like job training to accelerate rehiring of unemployed workers." Treasury provided further guidance, based on recipient questions after the interim final rule, that eligible uses under this section also include "other efforts to accelerate rehiring and thus reduce unemployment, such as childcare assistance, assistance with transportation to and from a jobsite or interview, and incentives for newly employed workers[,]" as well as assistance to unemployed workers seeking to start small businesses. Finally, further guidance also provided that "public jobs programs, subsidized employment, combined education and on-the-job training programs, or job training to accelerate rehiring or address negative economic or public health impacts experienced due to a worker's occupation or level of training" are all enumerated eligible uses as assistance to unemployed or underemployed workers.

The interim final rule defined eligible beneficiaries of assistance as "individuals who want and are available for work, including those who have looked for work sometime in the past 12 months or who are employed part time but who want and are available for full-time work." This definition is based on definitions used by the Bureau of Labor Statistics to define individuals currently unemployed, as well as persons marginally attached to the labor force and working part-time for economic reasons.[176] The latter two classifications are types of labor underutilization, or "underemployed" workers.[177] Finally, the interim final rule specified that assistance to unemployed workers included both workers who lost their job during the pandemic and resulting recession and workers unemployed when the pandemic began who saw further deterioration of their economic prospects due to the pandemic.

Public Comment: Commenters generally supported the inclusion of this enumerated eligible use. One commenter recommended including assistance for underemployed workers who took jobs due to the pandemic that did not fully utilize their skillset or did not provide the hours, wages, or job quality desired. Treasury has also received recipient questions on whether job fairs or grants to businesses to hire underserved workers are eligible uses under this category. Another commenter recommended flexibility in eligible workforce development programs, arguing that rural areas may face particular challenges.

Treasury Response: Treasury is maintaining this eligible use in the final rule, including the enumerated eligible services in the interim final rule and subsequent guidance. Treasury is also confirming that job fairs or grants to businesses to hire underserved workers are eligible uses under this section.

Treasury is also enumerating that job and workforce training centers are eligible capital expenditures, so long as they adhere to the standards and presumptions detailed in the section Capital Expenditures in General Provisions: Other.

The final rule maintains the definition of eligible beneficiaries, which is aligned with the Bureau of Labor Statistics' definitions of unemployed workers and other labor underutilization, using a common, widely known definition that incorporates a broad group of individuals both unemployed or whose skills are otherwise underutilized in the labor market.

In addition, recognizing that the pandemic has generated broad workforce disruption, in the final rule, Treasury is making clear that recipients may provide job training or other enumerated types of assistance to individuals that are currently employed but are seeking to move to a job that provides better opportunities for economic advancement, such as higher wages or more opportunities for career advancement.

Recipient Unemployment Insurance Trust Funds and Related Expenses

Under the interim final rule, a recipient may use funds to make deposits into its account of the Unemployment Trust Fund established under section 904 of the Social Security Act (42 U.S.C. 1104) up to the level needed to restore the pre-pandemic balance of such account as of January 27, 2020 or to pay back advances received under Title XII of the Social Security Act (42 U.S.C. 1321) for the payment of benefits between January 27, 2020 and May 17, 2021. These costs support the solvency of the unemployment insurance system and, ultimately, unemployment insurance benefits provided to unemployed

[177] *Id.*

workers during the pandemic.[178] The interim final rule also posed the question of what, if any, conditions should be considered to ensure that funds used under this eligible use category repair economic impacts of the pandemic and strengthen unemployment insurance systems.

Public Comment: Inclusion as an Eligible Use and Conditions: Commenters expressed mixed perspectives on this eligible use category. Some commenters supported its inclusion, arguing that unemployment insurance systems have faced significant costs to support unemployed workers during the pandemic and that this constitutes a negative economic impact that SLFRF funds should be able to address. Other commenters opposed this eligible use category, arguing that funds used under this category may not ultimately support unemployed workers. Some commenters noted that unemployment insurance taxes on businesses automatically increase when trust fund balances are low and suggested that permitting the deposit of funds into unemployment insurance trust funds prevents a tax increase on businesses, some of which may not have faced negative economic impacts from the pandemic, rather than providing assistance to unemployed workers. Other comments suggested that deposits are better thought of as savings for future needs than assistance to unemployed workers in the near term.

Responding to the interim final rule's question, several commenters suggested that, if Treasury maintains this eligible use, the final rule should require detailed reporting on funds used under this category or place conditions on this category to increase the likelihood that funds ultimately support unemployed workers. For example, some commenters suggested that recipients that deposit SLFRF funds into their trust fund should be barred from cutting unemployment insurance benefits for workers during the period of performance or from erecting new barriers to accessing benefits (*e.g.*, through the application process and ongoing requirements to receive benefits). One commenter, noting that unemployment insurance benefits often provide low rates of wage replacement and do not cover some types of unemployed workers, argued that recipients should not be permitted to deposit funds into the trust fund unless the recipient concurrently expands benefits. Finally, one commenter suggested a cap on the amount of funds that can be used for this purpose.

Treasury Response: Inclusion as an Eligible Use and Conditions: In the final rule, Treasury is maintaining the inclusion of this eligible use category. Because unemployment insurance trust funds directly fund benefits to unemployed workers, maintaining the solvency of the trust fund is critical to the continued provision of assistance to unemployed workers. Further, funds deposited into the trust fund must be used as assistance to unemployed workers, an eligible use of SLFRF funds. Finally, while, in the absence of the SLFRF, trust fund deposits would likely be funded through increases on employer payroll taxes, the eligibility of uses of SLFRF funds does not depend on how obligations would otherwise be satisfied if the SLFRF were not available for this use.

While deposits to unemployment insurance trust funds generally serve as assistance to unemployed workers, recipients that make deposits but also cut unemployment insurance benefits to workers substantially decrease the likelihood that the deposited funds will assist unemployed workers. In other words, SLFRF funds deposited into an unemployment insurance trust fund generally serve as assistance to unemployed workers, unless recipients take policy actions that substantially decrease the extent to which SLFRF funds would flow to unemployed workers. As such, through December 31, 2024, recipients that deposit SLFRF funds into an unemployment insurance trust fund or use SLFRF funds to repay principal on Title XII advances, may not take action to reduce benefits available to unemployed workers by changing the computation method governing regular unemployment compensation in a way that results in a reduction of average weekly benefit amounts or the number of weeks of benefits payable (*i.e.*, the maximum benefit entitlement).

Finally, until the final rule becomes effective on April 1, 2022, the interim final rule remains binding and effective.[179] These requirements were not in effect under the interim final rule and do not apply to funds used (*i.e.*, obligated or expended) under the interim final rule while it is in effect. In addition, recognizing that some recipients have taken significant steps toward making a trust fund deposit or repaying principal on Title XII advances under the interim final rule, such as the legislative appropriation of funds for this purpose, even if a formal obligation has not occurred, Treasury will exercise enforcement discretion to not pursue violations of this final rule provision (*i.e.*, the requirement not to reduce benefits) for recipients that have appropriated funds for this purpose prior to the date of adoption of the final rule consistent with the laws and procedures in their jurisdiction. Recipients should refer to Treasury's Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule, which provides additional detail on these issues.

Public Comment and Treasury Response: Technical Corrections and Amendments: Following the interim final rule, Treasury received recipient questions on whether paying interest on advances received under Title XII of the Social Security Act (42 U.S.C. 1321) is an eligible use of SLFRF funds; Treasury is clarifying that such use is permissible, consistent with Treasury's treatment of the eligibility of interest on Title XII advances under the Coronavirus Relief Fund.

Treasury is further clarifying that recipients may only use SLFRF funds for contributions to unemployment insurance trust funds and repayment of the principal amount due on advances received under Title XII of the Social Security Act up to an amount equal to (i) the difference between the balance in the recipient's unemployment insurance trust fund as of January 27, 2020 and the balance of such account as of May 17, 2021, plus (ii) the principal amount outstanding as of May 17, 2021 on any advances received under Title XII of the Social Security Act between January 27, 2020 and May 17, 2021. Further, recipients may use SLFRF funds for the payment of any interest due on such Title XII advances. In other words, excluding interest due on Title XII advances, the magnitude of the decrease of the balance in the unemployment insurance trust fund plus the principal outstanding on any Title XII borrowings made from the beginning of the public health emergency to the date of publication of the SLFRF interim final rule sets a cap on the amount of SLFRF funds a recipient may use for trust fund contributions and repayment of principal on Title XII advances. Further, a recipient that deposits SLFRF funds into its unemployment insurance trust fund to fully restore the pre-pandemic balance may not draw down that

[178] Note that, while the economic harm being addressed accrued before March 3, 2021, the cost incurred to address the harm occurs after March 3, 2021 and provides assistance to unemployed workers, an eligible use of SLFRF funds.

[179] *See, e.g.*, U.S. Department of the Treasury, More Information on the Conclusion of the Public Comment Period and the Interim Final Rule on the Coronavirus State and Local Fiscal Recovery Funds, *https://home.treasury.gov/system/files/136/IFR-Explainer.pdf.*

balance and deposit more SLFRF funds, back up to the pre-pandemic balance.

Enumerated Eligible Uses for Disproportionately Impacted Households

Background

The COVID–19 pandemic has had disproportionally negative impacts on many households and communities that were already experiencing inequality related to race, gender, age, or income before the pandemic. People of color, low-income workers, and women disproportionately lost their jobs during the COVID–19 pandemic and experienced disproportionate rates of negative health outcomes.[180] [181]

These disproportionate negative impacts experienced by systemically underserved communities are not novel to the COVID–19 pandemic and the economic downturn. Research shows that historically underserved communities that are experiencing economic and social disparities typically experience disproportionate impacts of economic downturns and natural disasters.[182] This pattern held true for the effects of COVID–19 and the economic downturn: Historically undeserved groups experienced amplified negative impacts, further widening inequality.[183]

Many communities facing systemic barriers had not yet recovered from the impact of the Great Recession before experiencing the impacts of COVID–19 and the economic downturn. For example, in 2009, at the end of the Great Recession, households without a high school diploma had an average annual income of $32,300 (measured in 2018 dollars). By 2018, nine years into the economic recovery, those same households saw their average income increase by $600. During that same time period, households with a bachelor's degree saw an increase in their average household income of $6,100 (measured in 2018 dollars).[184]

The impact pre-existing inequalities have on a household or community's ability to recover is intersectional. Research shows that pre-existing racial and gender disparities exacerbated the disproportionate economic and health impact COVID–19 and the economic downturn had on workers of color, and specifically, women of color.[185] Another study found that during the first six months of the pandemic counties that were both high-poverty and majority non-white experienced COVID–19 infection rates eight times higher than high-poverty, majority white counties.[186] Many residents in these communities are still coping with the negative health and economic impacts.

Summary of the Interim Final Rule and Final Rule Structure

As described previously, the interim final rule provided a broader list of enumerated eligible uses to respond to the pandemic in disproportionately impacted communities, in recognition that pre-existing health, economic, and social disparities contributed to disproportionate pandemic impacts in certain communities and that addressing the root causes of those disparities constitutes responding to the public health and negative economic impacts of the pandemic. The interim final rule described eligible uses in disproportionately impacted communities in four categories, spread across public health and negative economic impacts: (1) Addressing disparities in public health outcomes, (2) building stronger communities through investments in housing and neighborhoods, (3) addressing educational disparities, and (4) promoting healthy childhood environments. As described above, Treasury has moved eligible uses related to community violence intervention, assistance accessing or applying to public benefits and services, affordable housing development, healthy childhood environments, and addressing lost instructional time in K–12 schools into the category "assistance to impacted households," recognizing that these pandemic impacts were widely shared across the country.

This section discusses enumerated eligible uses to address health disparities, to build stronger communities through investments in neighborhoods, to address educational disparities, to provide rental assistance vouchers or assistance relocating to areas of greater economic opportunity, and additional eligible uses to respond to negative economic impacts in disproportionately impacted communities. While many of these services impact both health and economic outcomes, Treasury has consolidated them into a single section for simplicity and clarity and to reflect the intertwined nature of these issues.

As a reminder, recipients can presume these uses are eligible when provided in a QCT, to families and individuals living in QCTs, by Tribal or territorial governments, or to low-income households or communities. As provided in section Standards: Designating Other Disproportionately Impacted Classes, recipients can also provide these services to other populations, households, or geographic areas disproportionately impacted by the pandemic. Recipients may also identify additional disproportionate impacts of the pandemic and design an appropriate response to address that harm. For details on eligibility standards and presumed eligible populations, see section General Provisions: Structure and Standards.

Enumerated Eligible Uses for Disproportionately Impacted Households

1. Addressing health disparities.

Public Comment: General: In general, commenters supported eligible uses to address health disparities and support health equity; several commenters highlighted the disparities faced by communities of color and low-income populations, as well as the importance of community engagement in developing effective programs to serve disproportionately impacted communities. Many commenters recommended additional enumerated eligible uses to address health disparities; these are discussed further below in this section.

Treasury Response: In line with commenters' recommendations, the final rule maintains several enumerated eligible uses to address health disparities, specifically:

a. Community health workers. Treasury received few comments on community health workers, though one

requested further clarification on their role.[187] Treasury is maintaining this eligible use in the final rule.

b. Remediation of lead paint or other lead hazards. The interim final rule included remediation of lead paint or other lead hazards as an enumerated eligible use to address health disparities.

Public Comment: Treasury received several comments asking for clarification on the eligibility of a particular use that would indirectly address lead pollution. For example, a commenter requested the ability to fund remedial actions, such as filtration and plumbing procedures to help address lead pollution. One commenter requested that private wells be eligible for funding to address contamination with substances such as lead. Other commenters requested that Treasury allow replacement of lead pipes as an eligible use of funds.

Treasury Response: Recipients may make a broad range of water infrastructure investments under section 602(c)(1)(d) and 603(c)(1)(d), which can include lead service line replacement and other activities to identify and remediate lead in water. These uses are discussed in greater detail in section Water and Sewer Infrastructure of this Supplemental Information.

Treasury has further determined that several of the services identified by commenters are appropriate responses to address health disparities in disproportionately impacted households. These services were eligible under the interim final rule and continue to be so under the final rule. These services include remediation to address lead-based public health risk factors, outside of lead in water, including evaluation and remediation of lead paint, dust, or soil hazards; testing for blood lead levels; public outreach and education; and emergency protection measures, like bottled water and water filters, in areas with an action level exceedance for lead in water in accordance with the Environmental Protection Agency's Lead and Copper Rule.[188]

Further, Treasury had determined that certain capital expenditures, including improvements to existing facilities to remediate lead contaminants (*e.g.*, removal of lead paint), are eligible responses, although this does not include construction of new facilities for the purpose of lead remediation. Recipients should make sure that all capital expenditures adhere to the standards and presumptions detailed in section Capital Expenditures in General Provisions: Other.

c. Medical facilities. Treasury received a few comments from recipients seeking to use SLFRF funds to build new medical facilities, such as hospitals or public health clinics, to serve disproportionately impacted communities. Given the central role of access to high-quality medical care in reducing health disparities and addressing the root causes that led to disproportionate impact COVID–19 health impacts in certain communities, the final rule recognizes that medical equipment and facilities designed to address disparities in public health outcomes are eligible capital expenditures. This includes primary care clinics, hospitals, or integrations of health services into other settings. Recipients should make sure that all capital expenditures adhere to the standards and presumptions detailed in section Capital Expenditures in General Provisions: Other.

2. Housing vouchers and assistance relocating. In addition to other housing services, the interim final rule permitted a variety of rental assistance approaches to support low-income households in securing stable, long-term housing, including housing vouchers, residential counseling, or housing navigation assistance to facilitate household moves to neighborhoods with high levels of economic opportunity and mobility for low-income residents. Examples could include SLFRF-funded analogues to Section 8 Housing Choice vouchers; other kinds of rent subsidies, including shallow subsidies; and programs to help residents move to areas with higher levels of economic mobility.[189] Treasury did not receive public comments on these enumerated eligible uses.

Treasury Response: Treasury maintains the eligibility of vouchers and relocation assistance in the final rule.

3. Building strong, healthy communities through investments in neighborhoods. While the interim final rule included a category of enumerated eligible uses for "building stronger communities through investments in housing and neighborhoods," the examples of services provided generally focused on housing uses. In response to questions following release of the interim final rule, Treasury issued further guidance clarifying that "investments in parks, public plazas, and other public outdoor recreation spaces may be responsive to the needs of disproportionately impacted communities by promoting healthier living environments."

Public Comment: General: A significant theme across many public comments was the importance of neighborhood environment to health and economic outcomes and the potential connections between residence in an underserved neighborhood and disproportionate impacts from the pandemic. Many commenters highlighted the connection between neighborhoods and health outcomes, including citing public health research linking neighborhood traits to health outcomes. For example, the CDC states that "neighborhoods people live in have a major impact on their health and well-being."[190] As such, CDC identifies "neighborhoods and built environment" as one of five key social determinants of health[191] and includes "creat[ing] neighborhoods and environments that promote health and safety" as one of the agency's goals for social determinants of health outcomes.

a. Neighborhood features that promote improved health and safety outcomes.

Public Comment: Commenters argued that neighborhoods impact physical health outcomes in several ways. First, some commenters reasoned that the physical environment and amenities in a community[192] influence a person's level of physical activity, with features like parks, recreation facilities, and safe sidewalks promoting increased physical activity that improves health outcomes. Conversely, commenters argued that a lack of these features in a neighborhood could dampen physical activity and contribute to health conditions like obesity that are risk factors for more severe COVID–19 health outcomes.

Second, some commenters also suggested that access to healthy food in a neighborhood impacts health outcomes. These commenters reasoned

[191] Social determinants of health are "the conditions in the places where people live, learn, work, and play that affect a wide range of health risks and outcomes." Centers for Disease Control and Prevention, About Social Determinants of Health (SDOH), *https://www.cdc.gov/social determinants/about.html* (last visited November 9, 2021).

[192] In public health, this is referred to as "built environment," or the man-made physical aspects of a community (*e.g.*, homes, buildings, streets, open spaces, and infrastructure).

that lacking adequate access to affordable, healthy food or living in a "food desert" may contribute to disparities in diet that influence health outcomes, including contributing to pre-existing conditions that increased risk for severe COVID–19 outcomes. These commenters cited public health research finding "clear evidence for disparities in food access in the United States by income and race." [193]

Some commenters also suggested that neighborhood environment is connected to other public health outcomes, like mental health and public safety. For example, some research suggests that living in neighborhoods with green space and tree cover correlates with improved mental health outcomes.[194] Finally, some commenters argued that activities like installing streetlights, greening or cleanup of public spaces or land, and other efforts to revitalize public spaces would support improved public safety.[195] [196]

These commenters recommended that Treasury include as an enumerated eligible use in disproportionately impacted communities projects to develop neighborhood features that promote improved health and safety outcomes, such as parks, green spaces, recreational facilities, sidewalks, pedestrian safety features like crosswalks, projects that increase access to healthy foods, streetlights, neighborhood cleanup, and other projects to revitalize public spaces.

Background: Investments in neighborhood features, including parks, recreation facilities, sidewalks, and healthy food access, can work to improve physical and mental health outcomes. Allowing people access to nature, including parks, has been connected to decreased levels of mortality and illness and increased well-being.[197] Urban park use during the COVID–19 pandemic may have declined among lower-income individuals.[198] Encouraging physical activity can also play a role in health outcomes, as a sedentary lifestyle is a risk factor for chronic diseases and more severe COVID–19 outcomes.[199] Parks, recreation facilities, and sidewalks can promote healthier living environments by allowing for safe and socially distanced recreation during the COVID–19 pandemic.

Additionally, food insecurity rates, which are higher among lower-income households and households of color, doubled among all households and tripled among households with children during the onset of COVID–19 from February 2020 to May 2020.[200] Improving healthy food access supports public health, particularly among lower-income households and households of color that face disproportionate outcomes.

Treasury Response: Treasury recognizes the connection between neighborhood built environment and physical health outcomes as discussed in the research and analysis provided by commenters, including risk factors that may have contributed to disproportionate COVID–19 health impacts in low-income communities. The final rule also recognizes that the public health impacts of the pandemic are broader than just the COVID–19 disease itself and include substantial impacts on mental health and public safety challenges like rates of violent crime, which are correlated with a neighborhood's built environment and features. As such, neighborhood features that promote improved health and safety outcomes respond to the pre-existing disparities that contributed to COVID–19's disproportionate impacts on low-income communities.

The final rule includes enumerated eligible uses in disproportionately impacted communities for developing neighborhood features that promote improved health and safety outcomes, such as parks, green spaces, recreational facilities, sidewalks, pedestrian safety features like crosswalks,[201] projects that increase access to healthy foods, streetlights, neighborhood cleanup, and other projects to revitalize public spaces. Recipients seeking to use funds for capital expenditures should refer to the section Capital Expenditures in General Provisions: Other, which describes additional eligibility standards that apply to uses of funds for capital expenditures.

b. Vacant or abandoned properties. As discussed above, the interim final rule included enumerated eligible uses for building stronger communities through investments in housing and neighborhoods in disproportionately impacted communities. The interim final rule also posed a question of whether other potential uses in this category, specifically "rehabilitation of blighted properties or demolition of abandoned or vacant properties," address the public health or economic impacts of the pandemic.

Public Comment: Several commenters argued that programs or services to address vacant or abandoned property would respond to the public health and negative economic impacts of the pandemic in disproportionately impacted communities. Some commenters cited research suggesting that living near such property is correlated with worse physical health and mental health outcomes, noted that such properties pose an environmental hazard, or argued that such properties present a barrier to economic recovery. These commenters suggested that renovation or demolition of vacant or abandoned property could benefit community health and raise property values. Other commenters recommended that Treasury include an enumerated eligible use for the operation of land banks that redevelop or renew vacant properties and land.

Treasury Response: As noted throughout the final rule, the pandemic underscored the importance of safe, affordable housing and healthy

[201] However, Treasury cautions recipients that general infrastructure development, including street or road construction, remains a generally ineligible use of funds under the final rule. Sidewalks and pedestrian safety should be the predominant component of uses of funds in this category. While projects may include ancillary construction needed to execute the predominant component, a project that predominantly involves street construction or repair to benefit vehicular traffic would be ineligible.

neighborhood environments to public health and economic outcomes. Treasury agrees with commenters that high rates of vacant or abandoned properties in a neighborhood may exacerbate public health disparities, for example through environmental contaminants that contribute to poor health outcomes or by contributing to higher rates of crime. As such, certain services for vacant or abandoned properties are eligible to address the public health and negative economic impacts of the pandemic on disproportionately impacted households or communities. Eligible activities include:

- Rehabilitation, renovation, maintenance, or costs to secure vacant or abandoned properties to reduce their negative impact
- Costs associated with acquiring and securing legal title of vacant or abandoned properties and other costs to position the property for current or future productive use
- Removal and remediation of environmental contaminants or hazards from vacant or abandoned properties, when conducted in compliance with applicable environmental laws or regulations
- Demolition or deconstruction of vacant or abandoned buildings (including residential, commercial, or industrial buildings) paired with greening or other lot improvement as part of a strategy for neighborhood revitalization
- Greening or cleanup of vacant lots, as well as other efforts to make vacant lots safer for the surrounding community
- Conversion of vacant or abandoned properties to affordable housing
- Inspection fees and other administrative costs incurred to ensure compliance with applicable environmental laws and regulations for demolition, greening, or other remediation activities

Vacant or abandoned properties are generally those that have been unoccupied for an extended period of time or have no active owner.[202] Such properties may be in significant disrepair (*e.g.*, major structural defects; lack of weather tight conditions; or lack of useable plumbing, kitchen facilities, electricity, or heating infrastructure (not to include utilities currently out of service or disconnected but able to be reconnected and used)), or may be declared unfit for inhabitants by a government authority.

As noted above, demolition and greening (or other structure or lot remediation) of vacant or abandoned properties, including residential, commercial, or industrial buildings, is an eligible use of funds. Treasury encourages recipients to undertake these activities as part of a strategy for neighborhood revitalization and to consider how the cleared property will be used to benefit the disproportionately impacted community. Activities under this eligible use should benefit current residents and businesses, who experienced the pandemic's impact on the community.

Treasury encourages recipients to be aware of potential impacts of demolition of vacant or abandoned residential properties. Demolition activities that exacerbate the pandemic's impact on housing insecurity or lack of affordable housing are not eligible uses of funds. This risk is generally more acute in jurisdictions with low or reasonable vacancy rates and less acute in jurisdictions with high or hyper-vacancy.[203]

Treasury presumes that demolition of vacant or abandoned residential properties that results in a net reduction in occupiable housing units for low- and moderate-income individuals in an area where the availability of such housing is lower than the need for such housing would exacerbate the impacts of the pandemic on disproportionately impacted communities and that use of SLFRF funds for such activities would therefore be ineligible. This includes activities that convert occupiable housing units for low- and moderate-income individuals into housing units unaffordable to current residents in the community. Recipients may assess whether units are "occupiable" and what the housing need is for a given area taking into account vacancy rates (as described above), local housing market conditions (including conditions for different types of housing like multi-family or single-family), and applicable law and housing codes as to what units are occupiable. Recipients should also take all reasonable steps to minimize the displacement of persons due to activities under this eligible use category, especially the displacement of low-income households or longtime residents.

Recipients engaging in these activities and other construction activities with SLFRF funds should be mindful of the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended, 42 U.S.C. 4601, and the Department of Transportation's implementing regulations, 49 CFR part 24, that apply to projects funded with federal financial assistance, such as SLFRF funds. Recipients should also be aware of federal, state, and local laws and regulations, outside of SLFRF program requirements, that apply to this activity. Recipients must comply with the applicable requirements of the Uniform Guidance regarding procurement, contracting, and conflicts of interest and must follow the applicable laws and regulations in their jurisdictions. Recipients must also comply with all federal, state, and local public health and environmental laws or regulations that apply to activities under this eligible use category,[204] for example, requirements around the

[202] A state or locality may use its existing classifications of what is considered vacant or abandoned property under state law and local ordinances, as well as any corresponding processes for demolition, for these eligible uses. A recipient without a definition of vacant or abandoned property may refer to definitions used in the Department of Housing and Urban Development's Neighborhood Stabilization Program (available at the citations below); however, recipients should be aware that other federal, state, or local requirements may apply such as compliance with the Uniform Relocation Act (*see* U.S. Department of Housing and Urban Development, Real Estate Acquisition and Relocation Overview in HUD Programs, *https://www.hudexchange.info/programs/relocation/overview/#overview-of-the-ura* (last visited November 9, 2021) and other state and local requirements like condemnation and code enforcement. U.S. Department of Housing and Urban Development, What is the definition of vacant properties as referenced in NSP Eligible Use E—Redevelop Demolished or Vacant Properties? (October 2012), *https://www.hudexchange.info/faqs/programs/neighborhood-stabilization-program-nsp/redevelopment/what-is-the-definition-of-vacant-properties-as-referenced-in-nsp-eligible/*. (October 2012), *https://www.hudexchange.info/faqs/programs/neighborhood-stabilization-program-nsp/program-requirements/eligible-activitiesuses/what-are-the-definitions-of-abandoned-and-foreclosed/*.

[203] For analysis of vacancy rates considered low or high, see, *e.g.*, page 12 of Alan Mallach, The Empty House Next Door, Lincoln Institute (May 2018), *https://www.lincolninst.edu/publications/policy-focus-reports/empty-house-next-door#:~:text=%E2%80%9CAlan%20Mallach%20is%20the%20sage,through%20data%20and%20model%20* practices. Recipients may determine the appropriate geographic unit for which to analyze vacancy rates (*e.g.*, county, census tract) based on their circumstances. As needed, recipients may refer to the Current Population Survey/Housing Vacancy Survey data series on Housing Vacancies and Homeownership as one data source to assess vacancy rates. See *https://www.census.gov/housing/hvs/index.html*. Other data sources include the American Community Survey five-year estimates, for smaller geographic areas, or tabulations by the Department of Housing and Urban Development based on United States Postal Service Vacancy Data. See, respectively, *https://data.census.gov/cedsci/table?q=DP04&tid=ACSDP5Y2019.DP04&hidePreview=true* or *https://www.huduser.gov/portal/datasets/usps.html*.

[204] *See* U.S. Environmental Protection Agency, Large-Scale Residential Demolition, *https://www.epa.gov/large-scale-residential-demolition* (last visited November 9, 2021) for a primer on requirements that may apply.

handling and disposal of asbestos-containing materials, lead paint, and other harmful materials may apply, as well as environmental standards for any backfill materials used at demolition sites. Treasury encourages recipients to consult and apply best practices from the Environmental Protection Agency as well.

Recipients must evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward related to safely and properly conducting activities under this eligible use. This may include checking for any past violations recorded by state or local environmental, workplace safety, licensing, and procurement agencies, as well as regular reviews for suspensions, debarments, or stop work orders. Recipients must establish rigorous oversight and internal controls processes to monitor compliance with any applicable requirements, including compliance by subrecipients.

4. Addressing educational disparities. The interim final rule included an enumerated eligible use for addressing educational disparities in disproportionately impacted communities and outlined some enumerated eligible services under this use. These enumerated uses included early learning services, assistance to high-poverty school districts to advance equitable funding across districts and geographies, and educational and evidence-based services to address the academic, social, emotional, and mental health needs of students. Addressing the many dimensions of resource equity—including equitable and adequate school funding; access to a well-rounded education; well-prepared, effective, and diverse educators and staff; and integrated support services—can also begin to mitigate the impact of COVID–19 on schools and students and can close long-standing gaps in educational opportunity. As discussed above, in the final rule, early learning services and addressing the impacts of lost instructional time for K–12 students are enumerated eligible uses for impacted communities, not just disproportionately impacted communities.

Public Comment: Treasury received some comments in this category. Generally, commenters expressed agreement with the elements of the interim final rule regarding use of funds for addressing educational disparities. Some commenters had questions about whether a few specific uses of funds qualified under this category. For example, commenters inquired about whether the funds could be used for behavioral health in a school setting or cultural language classes.

Treasury Response: Treasury is maintaining these enumerated eligible uses in the final rule, which are now organized under the heading of "services to address educational disparities." Treasury reiterates that these uses include addressing educational disparities exacerbated by COVID–19, including but not limited to: increasing resources for high-poverty school districts, educational services like tutoring or afterschool programs, summer education and enrichment programs, and supports for students' social, emotional, and mental health needs. This also includes responses aimed at addressing the many dimensions of resource equity—including equitable and adequate school funding; access to a well-rounded education; well-prepared, effective, and diverse educators and staff; and integrated support services—in order to close long-standing gaps in educational opportunity.

Further, Treasury is clarifying that improvements or new construction of schools and other educational facilities or equipment are eligible capital expenditures for disproportionately impacted communities. Recipients seeking to use funds for capital expenditures should refer to the section Capital Expenditures in General Provisions: Other for additional eligibility standards that apply to uses of funds for capital expenditures.

Treasury notes that services to promote healthy childhood environments, including childcare, early learning services, and home visiting programs that serve infants and toddlers, is a separate category of enumerated eligible uses for households impacted by the pandemic (see eligible uses for "promoting healthy childhood environments"). Similarly, education services to address the impact of lost instructional time during the pandemic are a separate eligible use category for households impacted by the pandemic; when providing these services, recipients may presume that any K–12 student who lost access to in-person instruction for a significant period of time has been impacted by the pandemic and is thus eligible for responsive services (see eligible uses for "addressing the impact of lost instructional time").

Proposed Additional Enumerated Eligible Uses Not Incorporated

The interim final rule posed a question on what other types of services or costs Treasury should consider as eligible uses to respond to the disproportionate public health or negative economic impacts of COVID–19 on low-income populations and communities.

In response, commenters proposed a wide variety of additional recommended enumerated eligible uses to assist disproportionately impacted households, ranging from general categories of services (*e.g.*, long-term investments to remediate long-term disparities) to highly specific examples of services (*e.g.*, a specific type of healthcare equipment). As discussed above, Treasury is including several additional categories of enumerated eligible uses in the final rule in response to public comments.

Given the large number and diversity of SLFRF recipients, Treasury's approach to assistance to households in disproportionately impacted communities in the final rule aims to provide enumerated eligible uses that respond to disproportionate impacts of the pandemic experienced widely in many jurisdictions across the country and are intended to simplify and clarify these enumerated eligible uses. At the same time, Treasury recognizes that the impacts of the pandemic vary over time, by jurisdiction, and by population; as such, the final rule provides flexibility for recipients to identify additional disproportionate impacts to additional households or classes of households and pursue programs and services that respond to those disproportionate impacts.

In the final rule, Treasury has not chosen to include as enumerated uses all uses proposed by commenters; given the significant range, and in some cases highly specific nature, of the proposed uses Treasury was not able to assess that the proposed uses would respond to disproportionate impacts experienced in many jurisdictions across the country, supporting an enumerated eligible use available to all recipients presumptively. However, the final rule continues to provide a framework to allow recipients to identify and respond to additional disproportionate impacts (for details, see section General Provisions: Structure and Standards). Some types of proposed additional enumerated eligible uses for assistance to households in disproportionately impacted communities were recommended by several commenters:

- Capital expenditures. Many commenters recommended that capital expenditures on many different types of public and private facilities be enumerated eligible uses. For clarity, Treasury has addressed all comments on the eligibility of capital expenditures on property, facilities, or equipment in one

section (see section Capital Expenditures in General Provisions: Other).

• Equity funds. Several commenters recommended that Treasury permit SLFRF funds to be deposited into an equity fund to support long-term racial and economic equity investments. The eligibility of such use would depend on the specific structure and uses of funds. Under the statute, SLFRF funds can only support costs incurred until December 31, 2024; see section Timeline for Use of SLFRF Funds in Program Administration Provisions. Further, recipients may calculate the cost incurred with respect to investments in revolving loan funds based on the methodology described in section Treatment of Loans in Program Administration Provisions. Projects funded by a revolving loan fund using SLFRF funds would also need to be eligible uses of SLFRF funds.

• Environmental quality and climate resilience. Several commenters recommended eligible uses to enhance environmental quality, remediate pollution, promote recycling or composting, or increase energy efficiency or electrical grid resilience. Whether these projects respond to the disproportionate impacts of the pandemic on certain communities would depend on the specific issue they address and its nexus to the public health and economic impacts of the pandemic.

b. Assistance to Small Businesses

Background

The pandemic has severely impacted many businesses, with small businesses hit especially hard. Small businesses make up nearly half of U.S. private-sector employment [205] and play a key role in supporting the overall economic recovery as they are responsible for two-thirds of net new jobs.[206] Since the beginning of the pandemic, however, 400,000 small businesses have closed, with many more at risk.[207] Sectors with a large share of small business employment have been among those with the most drastic drops in employment.[208] The negative outlook for small businesses has continued: As of November 2021, approximately 66 percent of small businesses reported that the pandemic has had a moderate or large negative effect on their business, and over a third expect that it will take over 6 months for their business to return to their normal level of operations.[209]

This negative outlook is likely the result of many small businesses having faced periods of closure and having seen declining revenues as customers stayed home.[210] In general, small businesses can face greater hurdles in accessing credit,[211] and many small businesses were already financially fragile at the outset of the pandemic.[212]

While businesses everywhere faced significant challenges during the pandemic, minority-owned and very small businesses have faced additional obstacles. Between February and April 2020, the number of actively self-employed Black business owners decreased by 41 percent.[213] During that same time period, Asian and Latino business owners decreased by 26 and 32 percent, respectively, compared to a 17 percent decrease in white business owners.[214] Female business owners also saw significant impacts, with businesses owned by women falling by 25 percent.[215]

Many of the disparities in how minority business owners experienced the pandemic are rooted in systemic issues present even before the pandemic. For example, before the economic downturn, only 12 percent of Black-owned businesses and 19 percent of Hispanic-owned businesses had annual earnings of over $1 million compared to 31 percent of white-owned businesses.[216] Minority-owned businesses were also overrepresented in industries hit hardest by the economic downturn (*e.g.*, services, transportation and warehousing, healthcare and social assistance, administrative and support and waste management, and accommodation and food services).[217] Approximately 22 percent of all minority-owned business fell into the hardest hit industries compared to 13 percent of nonminority-owned businesses.[218]

Although disparities in annual revenue are not a direct indication of a business's ability to weather an economic downturn, they do highlight other disparities that make it more challenging for these businesses to survive the effects of the pandemic. Black-owned startups, for example, face larger challenges in raising capital, including securing business loans.[219]

Summary of the Interim Final Rule and Final Rule Structure

Summary of Interim Final Rule: As discussed above, small businesses faced significant challenges in covering payroll, mortgages or rent, and other operating costs as a result of the public health emergency and measures taken to contain the spread of the virus. Under Sections 602(c)(1)(A) and 603(c)(1)(A), recipients may "respond to the public health emergency or its negative economic impacts," by, among other things, providing "assistance to . . . small businesses." Accordingly, the interim final rule allowed recipients to provide assistance to small businesses to address the negative economic impacts faced by those businesses. A

"small business" is defined as a business concern or other organization that:

(1) Has no more than 500 employees or, if applicable, the size standard in number of employees established by the Administrator of the Small Business Administration for the industry in which the business concern or organization operates; and

(2) Is a small business concern as defined in section 3 of the Small Business Act (15 U.S.C. 632).

Specifically, the interim final rule provided that recipients may provide assistance to small businesses to adopt safer operating procedures, weather periods of closure, or mitigate financial hardship resulting from the COVID–19 public health emergency, including:

- Loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure;
- Loans, grants, or in-kind assistance to implement COVID–19 prevention or mitigation tactics; and
- Technical assistance, counseling, or other services to assist with business planning needs.

The interim final rule further provided that recipients may consider additional criteria to target assistance to businesses in need, including small businesses. Such criteria may include businesses facing financial insecurity, substantial declines in gross receipts (*e.g.*, comparable to measures used to assess eligibility for the Paycheck Protection Program), or other economic harm due to the pandemic, as well as businesses with less capacity to weather financial hardship, such as the smallest businesses, those with less access to credit, or those serving underserved communities. The interim final rule also indicated that recipients should consider local economic conditions and business data when establishing such criteria. Finally, the interim final rule posed a question on whether there are other services or costs that Treasury should consider as eligible uses to respond to the disproportionate impacts of COVID–19 on low-income populations and communities.

Final Rule Structure: Consistent with the interim final rule approach, the final rule provides a non-exhaustive list of enumerated eligible uses for assistance to small businesses that are impacted or disproportionately impacted by the pandemic. Further, within Assistance to Small Business, a recipient may also identify a negative economic impact experienced by small businesses and design and implement a response to that negative economic impact, beyond the uses specifically enumerated in the final rule, according to the standard described in the section Standards: Identifying a Negative Economic Impact. A recipient may also identify small businesses that have been disproportionately impacted by the public health emergency and design and implement a program that responds to the source of that disproportionate impact.

Consistent with other eligible use categories to respond to the public health and economic impacts of the pandemic, recipients may identify and serve small businesses that experienced a negative economic impact or disproportionate impact due to the pandemic, as described in the section Standards for Identifying Other Eligible Populations. For example, to identify impacted small businesses, a recipient may consider whether the small businesses faced challenges in covering payroll, mortgage or rent, or other operating costs as a result of the public health emergency and measures taken to contain the spread of the virus. In order to ease administrative burden, the final rule presumes that small businesses operating in QCTs, small businesses operated by Tribal governments or on Tribal Lands, and small businesses operating in the U.S. territories were disproportionately impacted by the pandemic.

Reorganizations and Cross-References: As detailed above, Treasury has re-categorized some uses of funds in the final rule to provide greater clarity. For discussion of assistance to small businesses and impacted industries to implement COVID–19 mitigation and prevention strategies, see section COVID–19 Mitigation and Prevention in Public Health.

Small Businesses Eligible for Assistance

Public Comment: Treasury received many comments about the general benefits or drawbacks of use of SLFRF funds to provide assistance to small businesses. Some commenters suggested that SLFRF funds should be available to assist all small businesses, rather than only businesses that experienced direct negative economic impacts due to the public health emergency. Other commenters argued that aid to small businesses should be narrowed in the final rule, asserting that SLFRF funds should instead focus on assistance to households or building public sector capacity.

Treasury also received comments requesting clarification of the types of small businesses eligible for assistance. For example, some commenters requested clarification about whether microbusinesses were included in the definition of small business. Comments also suggested that self-employed individuals and Tribal enterprises be classified as small businesses, respectively. Commenters argued that these types of small businesses are more common among low-income and minority businessowners and serve as important institutions in underserved communities.

Finally, some commenters suggested that Treasury permit broader enumerated eligible uses to assist small businesses in disproportionately impacted communities and generally strengthen economic growth in these communities. These commenters recommended that Treasury presume small businesses operating in QCTs are disproportionately impacted and eligible for broader enumerated uses.

Treasury Response: As discussed in the section Designating a Negative Economic Impact, in the final rule, recipients must identify an economic harm caused or exacerbated by the pandemic on a small business or class of small businesses to provide services that respond.

As discussed above, programs or services in this category must respond to a harm experienced by a small business or class of small businesses as a result of the public health emergency. To identify impacted small businesses and necessary response measures, recipients may consider impacts such as lost revenue or increased costs, challenges covering payroll, rent or mortgage, or other operating costs, the capacity of a small business to weather financial hardships, and general financial insecurity resulting from the public health emergency.

Recognizing the difficulties faced by small businesses in certain communities, the final rule presumes that small businesses operating in QCTs, small businesses operated by Tribal governments or on Tribal Lands, and small businesses operating in the U.S. territories were disproportionately impacted by the pandemic. This presumption parallels the final rule's approach to assistance to households, reflecting the more severe pandemic impacts in underserved communities and creating a parallel structure across different categories of eligible uses to make the structure simpler for recipients to understand and navigate.

Treasury notes that recipients may also designate a class of small businesses that experienced a negative economic impact or disproportionate negative economic impact (*e.g.*, microbusinesses, small businesses in certain economic sectors), design an intervention to fit the impact, and

document that the individual entity is a member of the class. Additional information about this framework is included in the section General Provisions: Structure and Standards.

Further, Treasury is maintaining the interim final rule definition of "small business," which used the Small Business Administration's (SBA) definition of fewer than 500 employees, or per the standard for that industry, as defined by SBA. This definition includes businesses with very few employees, self-employed individuals, and Tribally owned businesses.[220] Finally, Treasury notes that recipients may award SLFRF funds to many different types of organizations, including small businesses, to function as a subrecipient in carrying out eligible uses of funds on behalf of a recipient government. In this case, a small business need not have experienced a negative economic impact in order to serve as a subrecipient. See section Distinguishing Subrecipients versus Beneficiaries for more detailed discussion of interactions with subrecipients, in contrast to beneficiaries of assistance.

Enumerated Eligible Uses for Assistance to Small Businesses

Public Comment: Treasury received comments requesting clarification of the types of assistance available to small businesses. For example, one commenter suggested that outdoor dining be an eligible use for SLFRF funds as assistance to small businesses. Other commenters asked for clarification about how SLFRF funds could be used to support new businesses and start-ups.

Several commenters requested clarification of whether and how recipients may provide services to business districts or downtown areas, particularly those that exist in whole or in part within a QCT, and requested reduced documentation of the specific negative economic impact for the businesses operating within those areas. These commenters argued in favor of allowing redevelopment or other support, including capital investments, in business districts that were negatively impacted by COVID–19. Several commenters also argued that funds should be available to support and grow microbusinesses, or businesses with five or fewer employees, which are more likely to be owned by women and people of color.

Treasury Response: In the final rule, Treasury is maintaining and clarifying the enumerated eligible uses of funds for assistance to small businesses that are impacted or disproportionately impacted by the pandemic.

Impacted small businesses. Specifically, Treasury is maintaining enumerated eligible uses from the interim final rule for assistance to impacted small businesses. These include but are not limited to:

- Loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, for example by supporting payroll and benefits costs, costs to retain employees, mortgage, rent, or utilities costs, and other operating costs;
- Loans, grants, or in-kind assistance to implement COVID–19 prevention or mitigation tactics (see section Public Health for details on these eligible uses); and
- Technical assistance, counseling, or other services to assist with business planning needs.

Treasury acknowledges a range of potential circumstances in which assisting small businesses could be responsive to the negative economic impacts of COVID–19, including for small businesses startups and microbusinesses and individuals seeking to start small or microbusinesses. For example:

- As noted above, a recipient could assist small business startups or microbusinesses with additional costs associated with COVID–19 mitigation tactics; see section Public Health for details on these eligible uses.
- A recipient could identify and respond to a negative economic impact of COVID–19 on new small business startups or microbusinesses; for example, if small business startups or microbusinesses in a locality faced greater difficulty accessing credit than prior to the pandemic or faced increased costs to starting the business due to the pandemic or if particular small businesses or microbusinesses had lost expected startup capital due to the pandemic.
- The interim final rule also discussed, and the final rule maintains, eligible uses that provide support for individuals who have experienced a negative economic impact from the COVID–19 public health emergency, including uses that provide job training for unemployed individuals. These initiatives also may support small business start-ups, microbusinesses, and individuals seeking to start small or microbusinesses.

Disproportionately impacted small businesses. Additionally, Treasury agrees with commenters that disproportionately impacted small businesses may benefit from additional assistance to address the sources of that disparate impact.

As such, the final rule provides a broader set of enumerated eligible uses for disproportionately impacted small businesses and/or small businesses in disproportionately impacted business districts. Recipients may use SLFRF funds to assist these businesses with certain capital investments, such as rehabilitation of commercial properties, storefront improvements, and façade improvements. Recipients may also provide disproportionately impacted microbusinesses additional support to operate the business, including financial, childcare, and transportation supports.

Recipients could also provide technical assistance, business incubators, and grants for start-ups or expansion costs for disproportionately impacted small businesses. Note that some of these types of assistance are similar to those eligible to respond to small businesses that experienced a negative economic impact ("impacted" small businesses). However, because the final rule presumes that some small businesses were disproportionately impacted, these enumerated eligible uses can be provided to those businesses without any specific assessment of whether they individually experienced negative economic impacts or disproportionate impacts due to the pandemic.

Cross-References: Recipients providing assistance to small businesses for capital expenditures (*i.e.*, expenditures on property, facilities, or equipment) should also review the section Capital Expenditures in General Provisions: Other, which describes eligibility standards that apply to capital expenditures. Recipients should also note that services to address vacant or abandoned commercial or industrial properties are addressed in section Vacant or Abandoned Properties in Assistance to Households.

Loans to Small Businesses

Public Comment: Treasury received many comments requesting clarification on using SLFRF funds to establish funds that provide loans to small businesses. For example, commenters sought clarification of how eligible use

[220] In regard to counting employees, businesses owned and controlled by a Tribal government are not considered affiliates of the Tribal government and are not considered affiliates of other businesses owned by the Tribal government because of their common ownership by the Tribal government or common management, as described in 13 CFR 121.103(b)(2). This definition is consistent with the Small Business Administration (SBA) HUBZone definition of a "small business concern" relating to Tribal governments as well as how Tribal enterprises are defined for the State Small Business Credit Initiative (SSBCI).

requirements and applicable dates for SLFRF funds would apply to third party organizations (like economic development organizations) who receive SLFRF funds in order to establish a loan fund. In addition, commenters requested clarification on what requirements apply to loan programs with available funds remaining after December 31, 2024.

Treasury Response: SLFRF funds may be used to make loans, including to small businesses, provided that the loan is an eligible use, and the cost of the loan is tracked and reported in accordance with Treasury's Compliance and Reporting Guidance. Funds that are unobligated after December 31, 2024 must be returned to Treasury. See section Treatment of Loans for more information about using SLFRF funds for loan programs.

c. Assistance to Nonprofits

Background: Nonprofits have faced significant challenges because of the pandemic, including increased demand for services and changing operational needs.[221] Prior to the pandemic, the median U.S. nonprofit reported that it had six months of cash on hand.[222] This varied by sector, however, with some sectors like disaster relief organizations reporting a median of 17 months cash on hand, and others, like mental health and crisis intervention organizations reporting only three months.[223] Evidence suggests that the pandemic has damaged the financial health of nonprofits, with small nonprofits, which tend to rely more heavily on donations than large nonprofits, reporting relatively larger declines in donations — 42 percent versus 29 percent, respectively.[224] Among nonprofits that collect fees for services, the median revenue amount collected from such fees fell by 30 percent from 2019 to 2020, with arts organization experiencing a 50 percent decline.[225] Nonprofits also experienced significant job losses. While employment in the nonprofit sector has recovered from its low point in 2020, as of November 2021, the sector remained 485,000 jobs below its pre-pandemic level.[226] In addition, some nonprofits may have experienced declines in volunteer staffing during the pandemic.[227]

At the same time, nonprofits provide a host of services for their communities, including helping Americans weather the multitude of challenges presented by the pandemic. The ARPA and the interim final rule recognized this dichotomy—nonprofits as entities that have themselves been negatively impacted by the pandemic and as entities that provide services that respond to the public health and negative economic impacts of the pandemic on households and others —by creating two roles for nonprofits.

First, under Sections 602(c)(1)(A) and 603(c)(1)(A), recipients may "respond to the public health emergency or its negative economic impacts," by, among other activities, providing "assistance to . . . nonprofits." The interim final rule defined assistance to nonprofits to include "loans, grants, in-kind assistance, technical assistance or other services, that responds to the negative economic impacts of the COVID–19 public health emergency," and "nonprofit" to mean a tax-exempt organization under Section 501(c)(3) of the U.S. Internal Revenue Code.[228]

Second, as discussed above, ARPA and the interim final rule provided that nonprofit organizations may also receive funds as subrecipients of a recipient government (*i.e.*, a government that received SLFRF funds); subrecipients carry out an eligible use of SLFRF funds on behalf of a recipient government (*e.g.*, a recipient government that would like to provide food assistance to impacted households may grant funds to a nonprofit organization to carry out that eligible use). Recipients generally have wide latitude to award funds to many types of organizations, including nonprofit or for-profit organizations, as subrecipients to carry out eligible uses of funds on their behalf. For further information on distinguishing between beneficiaries and subrecipients, as well as the impacts of the distinction on reporting and other requirements, see section Transfers of Funds and section Distinguishing Subrecipients versus Beneficiaries under the Public Health and Negative Economic Impacts eligible use category.[229]

Reorganization and Cross-References: Under the interim final rule, assistance to disproportionately impacted communities was a separate, stand-alone category. The final rule reorganizes the disproportionate impact analysis within the sections Assistance to Households, Assistance to Small Business, and Assistance to Nonprofits to better articulate how recipients can serve disproportionately impacted beneficiaries in each of those categories.

As detailed above in the Public Health subsection, in response to public comments describing uncertainty on which eligible use category should be used to assess different potential uses of funds, Treasury has re-categorized some uses of funds in the final rule to provide greater clarity. For discussion of assistance to nonprofits to implement COVID–19 mitigation and prevention strategies, see section COVID–19 Mitigation and Prevention in Public Health.

Recipients providing assistance via nonprofits involving capital expenditures (*i.e.*, expenditures on property, facilities, or equipment) should also review the section Capital Expenditures in General Provisions: Other, which describes eligibility standards for these expenditures. Recipients providing assistances in the form of loans should review the section Treatment of Loans.

Public Comment: Eligible Assistance to Impacted and Disproportionately Impacted Nonprofits: A few commenters asked Treasury to be more explicit in the final rule that recipients may use funds to provide relief directly to nonprofit organizations and to explain how nonprofits might qualify themselves for assistance and what expenses SLFRF funds may be used to cover.[230] Commenters requested that Treasury note that the pandemic is

[227] Elizabeth T. Boris et al. *supra* note 224 at p. 38.

[228] § 35.3 Definitions.

[229] The ARPA also states under "Transfer Authority" that a Recipient may transfer funds to a private nonprofit organization such as those defined in paragraph (17) of section 401 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11360(17). *See* 602 & 603(c)(3) of the Social Security Act. *See* section Transfers of Funds for additional information on other types of entities, including other forms of nonprofits, that may receive transfers.

[230] While not stated specifically in the interim final rule, the Department does not require or have a preference as to the payment structure for recipients that transfer funds to subrecipients (*e.g.*, advance payments, reimbursement basis, etc.). Ultimately, recipients must comply with the eligible use requirements and any other applicable laws or requirements and are responsible for the actions of their subrecipients or beneficiaries.

leading to a changing financial landscape for nonprofits.

Treasury Response: Eligible Assistance to Impacted and Disproportionately Impacted Nonprofits: The interim final rule provided for, and the final rule maintains, the ability for recipients to provide direct assistance to nonprofits that experienced public health or negative economic impacts of the pandemic. Specifically, recipients may provide direct assistance to nonprofits if the nonprofit has experienced a public health or negative economic impact as a result of the pandemic. For example, if a nonprofit organization experienced impacts like decreased revenues or increased costs (*e.g.*, through reduced contributions or uncompensated increases in service need), and a recipient provides funds to address that impact, then it is providing direct assistance to the nonprofit as a beneficiary under Subsection (c)(1) of Sections 602 and 603. Direct assistance may take the form of loans, grants, in-kind assistance, technical assistance, or other services that respond to the negative economic impacts of the COVID–19 public health emergency.

A recipient may identify a negative economic impact experienced by a nonprofit, or class of nonprofits, and design and implement a response to that negative economic impact, see section Standards: Designating a Negative Economic Impact. The final rule provides a non-exhaustive list of enumerated eligible uses for assistance to nonprofits that are impacted or disproportionately impacted by the pandemic.

A recipient may also identify a class of nonprofits that have been disproportionately impacted by the public health emergency and design and implement a program that responds to the source of that disproportionate impact. For example, a recipient may determine that nonprofits offering after-school programs within its jurisdiction were disproportionately impacted by the pandemic due to the previous in-person, indoors nature of the work and the nonprofits' reliance on fees received for services (*e.g.*, attendance fees). The recipient might then design an intervention to assist those nonprofits in adapting their programming (*e.g.*, to outdoor or online venues), their revenue structure (*e.g.*, adapting the fee for service structure or developing expertise in digital donation campaigns), or both. Additional information about this framework is included in General Provisions: Structure and Standards. In order to ease administrative burden, the final rule presumes that nonprofits operating in QCTs, operated by Tribal governments or on Tribal Lands, or operating in the U.S. territories were disproportionately impacted by the pandemic.

To summarize, a recipient may determine that certain nonprofits were impacted by the pandemic or were disproportionately impacted by the pandemic and provide responsive services.

Public Comment: Beneficiaries and Subrecipients: As noted elsewhere in this final rule, Treasury received multiple comments expressing uncertainty on how to categorize a particular activity in the eligible use categories. For instance, some commenters requested that recipients be able to use SLFRF funds for certain expenses incurred by nonprofits (*e.g.*, unemployment charges) as a response to a public health or negative economic impact to that nonprofit; others asked if nonprofits providing certain services (*e.g.*, social services) made them eligible for direct assistance. Commenters also requested that Treasury acknowledge that engagement directly with nonprofit organizations in low-income communities and communities of color may allow the recipient to better assess economic harms in these areas.

Treasury Response: Beneficiaries and Subrecipients: Treasury recognizes that many nonprofits play important roles in their communities, and some may have experienced public health or negative economic impacts during the pandemic. As such, under the interim final rule and the final rule, nonprofits may be impacted by the pandemic and receive assistance as a beneficiary, as described above, and/or be a subrecipient providing services on behalf of a recipient.[231]

Specifically, the interim final rule also allowed for, and the final rule maintains, the ability for the recipient to transfer, *e.g.*, via grant or contract, funds to nonprofit entities to carry out an eligible use on behalf of the recipient. Treasury notes that recipients may award SLFRF funds to many different types of organizations to carry out eligible uses of funds and serve beneficiaries on behalf of a recipient government (*e.g.*, assisting in a vaccination campaign, operating a job training program, developing affordable housing). When a recipient provides funds to an organization to carry out eligible uses of funds and serve beneficiaries, the organization becomes a subrecipient. In this case, a nonprofit need not have experienced a negative economic impact in order to serve as a subrecipient.

In the context of SLFRF, nonprofits of all types may be subrecipients. Treasury is not restricting the types of nonprofits that can operate as subrecipients, rather allowing recipients to decide what form best meets the needs of their community. Therefore, a "nonprofit" that is acting as subrecipient could include, but is not limited to, a nonprofit as that term is defined in paragraph (17) of section 401 of the McKinney-Vento Homeless Assistance.[232] See section Distinguishing Subrecipients versus Beneficiaries for further information. Additional guidance on determining subrecipient status may be found in the Uniform Guidance.[233]

Recipients may transfer funds to subrecipients in several ways, including advance payments and on a reimbursement basis. Ultimately, recipients must comply with the eligible use requirements and any other applicable laws or requirements and are responsible for the actions of their subrecipients or beneficiaries.

As part of accepting the Award Terms and Conditions for SLFRF, each recipient agreed to maintain a conflict-of-interest policy consistent with 2 CFR 200.318(c) that is applicable to all activities funded with the SLFRF award. Pursuant to this requirement, decisions concerning SLFRF funds must be free of undisclosed personal or organizational conflicts of interest, both in fact and in appearance. Recipients may avoid conflicts of interest in providing assistance to nonprofits or making subrecipient awards by, *inter alia,* making aid available to nonprofits on generally applicable terms or utilizing a competitive grant process, respectively. A recipient may not use control over SLFRF funds for their own private gain. Furthermore, no employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a federal award if he or she has a real or apparent conflict of interest.

Public Comment: Definition of Nonprofit: Treasury also received several requests to expand the definition of nonprofits so that other tax-exempt entities (*e.g.*, 501(c)(7)s, 501(c)(9)s, 501(c)(19)s, nonprofits with "historical

[231] Note, this response is meant to clarify the difference between nonprofits as beneficiaries and nonprofits as subrecipients. It is not meant to limit the types of relationships that a recipient may enter into with a nonprofit as permitted under the Uniform Guidance.

[232] *See* sections 602(c)(3) and 603(c)(3) of the Social Security Act. *See also* Section 401 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11360(17), which defines a "private nonprofit organization."

significance") could be eligible for direct assistance as beneficiaries.

Treasury Response: Definition of Nonprofit: The final rule expands the definition of nonprofits to mean 501(c)(3) organizations and 501(c)(19) organizations.[234] The 501(c)(3) classification includes a wide range of organizations with varying charitable or public service-oriented goals (*e.g.*, housing, food assistance, job training). As discussed above, these nonprofit organizations often experienced hardship due to increased needs for services combined with decreased donations and other sources of funding. In response to comments, Treasury has expanded the definition of nonprofit to include 501(c)(19) organizations, which includes veterans' organizations, to provide recipients more flexibility and in alignment with the definition of nonprofit adopted by the CARES Act, wherein 501(c)(3)s and 501(c)(19)s were eligible for assistance.[235]

Public Comment: Reporting Requirements: One commenter asked Treasury to clarify if nonprofits that receive direct assistance as beneficiaries are required to comply with guidelines and reporting requirements.

Treasury Response: Reporting Requirements: Nonprofits that receive direct assistance as beneficiaries are not subrecipients under SLFRF and are therefore not required to comply with SLFRF reporting requirements. However, the recipient must comply with SLFRF reporting requirements, which would require reporting obligations and expenditures for assistance to nonprofits. The recipient may also choose to establish other forms of reporting or accountability as a part of the recipient's direct assistance program.

A nonprofit entity that receives a transfer from a recipient is a subrecipient. Per the Uniform Guidance, subrecipients must adhere to the same requirements as recipients. Therefore, a nonprofit subrecipient may only receive funds to carry out an eligible use of SLFRF funds and must comply with any reporting and compliance requirements. Note that recipients are ultimately responsible for reporting information to Treasury and must collect any necessary information from their subrecipients to complete required reporting.

d. Aid to Impacted Industries

The interim final rule allowed for "aid to tourism, travel, and hospitality, and other impacted industries" that responds to the negative economic impacts of the COVID–19 public health emergency. In designating other impacted industries, Treasury specified that recipients should consider the "extent of the economic impact as compared to tourism, travel, and hospitality" and "whether impacts were due to the COVID–19 pandemic, as opposed to longer-term economic or industrial trends unrelated to the pandemic."[236] Treasury identified declines in employment and revenue as possible metrics to compare the economic impact on a particular industry relative to the tourism, travel, and hospitality industries.

Treasury further provided that aid should be limited to businesses, attractions, business districts, and Tribal development districts[237] that were operating prior to the pandemic and affected by required closures and other efforts to contain the pandemic. Examples of eligible aid include assistance to implement COVID–19 mitigation and infection prevention measures, aid to support safe reopening of businesses in these industries, as well as aid for a planned expansion or upgrade of tourism, travel, and hospitality facilities delayed due to the pandemic. The interim final rule and Treasury's subsequent Compliance and Reporting Guidance also required governments to publicly report assistance provided to private-sector businesses under this eligible use and maintain records of their assessments to facilitate transparency and accountability.

Reorganization and Cross-References: As detailed above, Treasury has re-categorized some uses of funds in the final rule to provide greater clarity. In the interim final rule, aid to impacted industries to implement COVID–19 mitigation and prevention strategies was categorized under Aid to Impacted Industries; the final rule addresses these items under the section COVID–19 Mitigation and Prevention in Public Health. Recipients should also be aware of the difference between beneficiaries of assistance and subrecipients when working with impacted industries; for further information, see section Distinguishing Subrecipients versus Beneficiaries.

Designating an Impacted Industry

Public Comment: Many commenters requested greater clarity on how to designate "other impacted industries" within their jurisdiction. Commenters requested greater specificity as to the metrics used to measure impact, with some suggesting metrics such as the change in the size of an industry's workforce due to the pandemic, as well as consideration of whether and why employees are choosing to return to work at slower rates in certain industries. One commenter asked if this meant nearly every industry was "disproportionately impacted." Some commenters encouraged Treasury to focus on industries most negatively impacted by the pandemic, including disallowing across-the-board business subsidies to businesses that were not negatively impacted by the pandemic and saw revenue or profit growth. Other commenters asked for flexibility for recipients to determine impacted industries based on their local knowledge of the economic landscape.

Treasury Response: The final rule maintains the interim final rule's approach of allowing recipients to designate impacted industries outside the travel, tourism, and hospitality industries, and, in response to comments, provides greater clarity as to how recipients may designate such impacted industries.

Sections 602(c)(1)(A) and 603(c)(1)(A) recognize that the tourism, travel, and hospitality industries are severely negatively impacted by the pandemic. Under the final rule, recipients may provide eligible aid (described in further detail herein) to the tourism, travel, and hospitality industries. Treasury considers Tribal development districts, which are commercial centers for Tribal hospitality, gaming, tourism, and entertainment and can include Tribal enterprises, as part of the tourism, travel, and hospitality industries that have been severely hit by the pandemic. Therefore, Treasury reaffirms that Tribal development districts are considered impacted industries and recipients may provide eligible aid to them.

To identify other industries comparably impacted to the tourism, travel, and hospitality industries, recipients should undertake a two-step process: Identifying an industry and determining whether that industry is comparably impacted.

[234] § 35.3 Definitions.

[235] Treasury considered expanding the definition of nonprofit to include 501(c)(6) orgauizations, as Congress later did in the Coronavirus Response and Consolidated Appropriations Act of 2021, but ultimately decided to retain the original CARES Act definition. To the extent impacted by the pandemic, 501(c)(6) organizations may be eligible to receive funds to support eligible uses that align with their overall purpose (e.g., tourism promotion in aid of an impacted industry).

[236] Coronavirus State and Local Fiscal Recovery Funds, 86 FR at 26795.

[237] For a definition of "Tribal development districts," please see FAQ 2.9 at the following: Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

First, recipients should identify an industry to be assessed. In identifying this industry, the final rule provides recipients the flexibility to define its substantive or geographic scope.[238] Recipients may identify a broad sector that encompasses a number of sub-industries, or they may identify a specific sub-industry to be assessed. For example, a recipient may identify "personal care services" as an industry, or they may identify a more specific category within the "personal care services" industry (*e.g.*, barber shops) as an industry. In defining the industry, Treasury encourages recipients to define narrow and discrete industries eligible for aid. Recipients are not required to follow, but may consider following, industry classifications under the North American Industry Classification System (NAICS). Treasury notes that the larger and more diverse the sector, the more difficult it may be to demonstrate that the larger and less specific sector is negatively impacted in the same way given the scale and diversity of businesses within it.

State or territory recipients may also define a constituent industry with greater geographic precision than state or territory-wide. For example, a state may identify a particular industry in a certain region of the state that was negatively impacted by the pandemic, even if the same industry in the rest of the state did not see a meaningful negative economic impact from the pandemic. State recipients oversee large and diverse industries, sometimes with differences in economic activity between geographic regions. Allowing greater geographic precision allows recipients to target aid to those that need it most, ensuring that state averages do not conceal hard-hit areas in their state.

Second, to determine whether the industry is "impacted," recipients should compare the negative economic impacts of the public health emergency on the identified industry to the impacts observed on the travel, tourism, and hospitality industries.

1. *Simplified test.* An industry is presumed to be impacted if the industry experienced employment loss of at least 8 percent.

Specifically, a recipient should compare the percent change in the number of employees of the recipient's identified industry and the national Leisure & Hospitality sector in the three months before the pandemic's most severe impacts began (a straight three-month average of seasonally-adjusted employment data from December 2019, January 2020, and February 2020) with the latest data as of the final rule release (a straight three-month average of seasonally-adjusted employment data from September 2021, October 2021, and November 2021).[239] The national Leisure & Hospitality sector largely represents the national travel, tourism, and hospitality industries enumerated in the statute. According to the Bureau of Labor Statistics, employment has fallen by approximately 8 percent for the national Leisure & Hospitality sector when comparing the most recent three-month period available as of the date of adoption of the final rule to the three-month period immediately before the public health emergency. Therefore, if the identified industry has suffered an employment loss of at least 8 percent, the final rule presumes the industry to be an "impacted industry."

For parity and simplicity, smaller recipients without employment data that measure industries in their specific jurisdiction may use data available for a broader unit of government for this calculation (*e.g.*, a county may use data from the state in which it is located; a city may use data for the county, if available, or state in which it is located) solely for purposes of determining whether a particular industry is an impacted industry.

2. *If simplified test is not met.* If an industry does not satisfy the test above or data are unavailable, the recipient may still designate the industry as impacted by demonstrating the following:

a. The recipient can show that the totality of relevant major economic indicators demonstrate that the industry is experiencing comparable or worse economic impacts as the national tourism, travel, and hospitality industries at the time of the publication of the final rule, and that the impacts were generally due to the COVID–19 public health emergency. Example economic indicators include gross output, GDP, net profits, employment levels, and projected time to restore employment back to pre-pandemic levels. Recipients may rely on available economic data, government research publications, research from academic sources, and other quantitative sources for this determination.

. If quantitative data is unavailable, the recipient can rely on qualitative data to show that the industry is experiencing comparable or worse economic impacts as the national tourism, travel, and hospitality industries, and the impacts were generally due to the COVID–19 public health emergency. Recipients may rely on sources like community interviews, surveys, and research from relevant state and local government agencies.

As the public health emergency and economic recovery evolves, recipients should assess how industry impacts shift over time. Impacted industries may recover in a short period of time and no longer face a negative economic impact; in those circumstances, the recipient should ensure that the extent and length of aid is reasonably proportional to the negative economic impact that is experienced, as detailed further below and in section General Provisions: Structure and Standards. Recipients may add to their list of impacted industries by showing that the negative economic impacts to the industry at the time of the designation are comparable to the negative economic impacts to the national tourism, travel, and hospitality sectors as of the date of the final rule adoption, as detailed herein.

Eligible Aid

Public Comment: Commenters asked for further clarification as to the definition of eligible aid to an impacted industry, with many requesting that a broad range of aid be eligible. Examples of aid that recipients asked to be considered eligible include aid to businesses to cover COVID–19 mitigation costs and planned renovations or improvements to tourism, travel, and hospitality facilities, as well as marketing and in-kind incentives to attract visitors. Commenters also asked about the eligibility of aid to broadly cover losses incurred by facilities such as convention centers and hotels due to the pandemic's economic impact. Commenters also asked for further clarification about the requirements related to private-sector reporting. Further, some commenters asked for clarification about eligible aid to impacted industries owned and operated by Tribal governments, including for Tribal construction projects that have been delayed due to the pandemic's economic impacts, and for deference to Tribal determinations of negative economic impacts.

[238] Once an industry is designated as impacted, aid should be generally broadly available to businesses in the industry that qualify. Recipients should document how they defined the scope of their industry and how they determined that the industry was impacted. For states and territories, this includes documenting their justification for defining a constituent industry with greater geographic precision than state or territory-wide.

[239] National Leisure & Hospitality supersector employment data can be found on the U.S. Bureau of Labor Statistics website: U.S. Bureau of Labor Statistics, Leisure and Hospitality, *https://www.bls.gov/iag/tgs/iag70.htm* (last visited December 7, 2021).

Treasury Response: In response to commenters' requests for clarification on eligible aid, the final rule requires that aid to impacted industries, including to Tribal development districts, be designed to address the harm experienced by the impacted industry.

First, recipients should identify a negative economic impact, *i.e.*, an economic harm, that is experienced by businesses in the impacted industry. Second, recipients should select a response that is designed to address the identified economic harm resulting from or exacerbated by the public health emergency. Responses must also be related and reasonably proportional to the extent and type of harm experienced; uses that bear no relation or are grossly disproportionate to the type or extent of harm experienced would not be eligible uses. Recipients should consider the further discussion of this standard provided in the sections Standards: Designating a Public Health Impact and Standards: Designating a Negative Economic Impact.

These responses may take the form of direct spending by recipients to promote an industry or support for businesses within an "impacted" industry that experienced a negative economic impact (*e.g.*, through a grant program). Examples of eligible responses include:

- Aid to mitigate financial hardship due to declines in revenue or profits by supporting payroll costs and compensation of returning employees for lost pay and benefits during the COVID–19 pandemic, as well as support of operations and maintenance of existing equipment and facilities, such as rent, leases, and utilities;
- Aid for technical assistance, counseling, and other services to assist with business planning needs; and
- Aid to implement COVID–19 mitigation and infection prevention measures, such as vaccination or testing programs, is broadly eligible for many types of entities, including travel, tourism, hospitality, and other impacted industries. Recipients providing aid to impacted industries for COVID–19 public health measures should review the section Assistance to Businesses to Implement COVID–19 Strategies in Public Health, which describes types of eligible uses of funds in this category.

To address the identified harms, responses (*e.g.*, aid through a grant program) should be generally broadly available to all businesses within the impacted industry to avoid the risk of self-dealing, preferential treatment, and conflicts of interest.[240] Treasury encourages recipients to design aid programs such that funds are first used for operational expenses that are generally recognized as ordinary and necessary for the recipient's operation, such as payroll, before being used on other types of costs. As noted in the section General Standards: Structure and Standards, uses of funds that do not respond to the negative economic impacts of the pandemic, such as excessive compensation to employees, is ineligible.

The final rule maintains the interim final rule's requirement that aid may only be considered responsive to the negative economic impacts of the pandemic if it supports businesses, attractions, and Tribal development districts operating prior to the pandemic and affected by required closures and other efforts to contain the pandemic. Further, to facilitate transparency and accountability, the final rule maintains the interim final rule's requirement that recipients publicly report assistance provided to private-sector businesses under this eligible use, including tourism, travel, hospitality, and other impacted industries, and its connection to negative economic impacts of the public health emergency. Recipients also should maintain records to support their assessment of how businesses receiving assistance were affected by the negative economic impacts of the public health emergency and how the aid provided responds to these impacts.

Recipients providing aid to impacted industries for capital expenditures (*i.e.*, expenditures on property, facilities, or equipment), including Tribal governments providing aid to Tribal development districts, should also review the section Capital Expenditures in General Provisions: Other, which describes eligibility standards that are applicable to these expenditures, depending on the type of aid. Recipients providing assistance in the form of loans should review the section Treatment of Loans in Program Administration Provisions.

[240] As part of accepting the Award Terms and Conditions for SLFRF, each recipient agreed to maintain a conflict-of-interest policy consistent with 2 CFR 200.318(c) that is applicable to all activities funded with the SLFRF award. Pursuant to this policy, decisions concerning SLFRF must be free of undisclosed personal or organizational conflicts of interest, both in fact and in appearance. Recipients may avoid conflicts of interest in awarding aid to impacted industries by, inter alia, making aid available to businesses in the industry on generally applicable terms or utilizing a competitive grant process. A recipient may not use control over SLFRF for their own private gain. Furthermore, no employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a federal award if he or she has a real or apparent conflict of interest.

4. General Provisions: Other

As noted above, the final rule consolidates into a General Provisions section several types of uses of funds; in the interim final rule, the eligibility of these uses of funds was discussed within specific categories of eligible uses for public health and negative economic impacts. Treasury anticipates that this re-organization will enhance recipient clarity in assessing eligible uses of funds. These General Provisions apply across all uses of funds under public health and negative economic impacts.

Specifically, this section considers eligible uses for:

- *Public Sector Capacity and Workforce,* which includes several separate and non-mutually exclusive categories articulated in the interim final rule: public health and safety staff; rehiring state, local, and Tribal government staff; expenses for administering COVID–19 response programs; expenses to improve the efficacy of public health or economic relief programs; and administrative expenses caused or exacerbated by the pandemic. Treasury recognizes that these are closely related and frequently overlapping categories. The final rule treats them as a single purpose, supporting public sector capacity, and provides coordinated guidance on the standards and presumptions that apply to them.
- *Capital Expenditures,* which was addressed only under Public Health in the interim final rule. The final rule moves this expense to General Provisions and provides more clarity on the eligibility of capital expenditures across all aspects of the public health and negative economic impacts eligible use category.
- *Distinguishing Subrecipients versus Beneficiaries,* which describes the differences between these two categories. Recipient governments responding to the public health and negative economic impacts of the pandemic may provide assistance to beneficiaries or execute an eligible use of funds through a subrecipient; some types of entities (*e.g.*, nonprofits) could fit into either category depending on the specific purpose of the use of funds.
- *Uses Outside the Scope of this Category,* which addresses uses of funds that are ineligible or generally ineligible under this eligible use category in the interim final rule. These uses of funds remain ineligible under the final rule, but Treasury has re-categorized where they are addressed, as described below.

This section also addresses enumerated eligible uses proposed by commenters that Treasury has not incorporated into the final rule.

Recipients should also note that the Office of Management and Budget's (OMB) *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (commonly called the "Uniform Guidance") generally applies to SLFRF.

a. Public Sector Capacity and Workforce

Public Safety, Public Health, and Human Services Staff

Summary of Interim Final Rule: Under the interim final rule, funds may be used for payroll and covered benefits [241] for *public safety, public health, health care, human services, and similar employees* [242] of a recipient government, for the portion of the employee's time that is spent responding to COVID–19. For administrative convenience, the recipient may consider *public health and safety* employees to be entirely devoted to responding to COVID–19, and therefore their full payroll and covered benefits eligible to be covered, if the employee, or his or her operating unit or division, is "primarily dedicated" to responding to COVID–19, meaning that more than half of the employee, unit, or division's time is dedicated to responding to COVID–19. Recipients may consider other presumptions for assessing the extent to which an employee, division, or operating unit is responding to COVID–19. Recipients must periodically reassess their determination and maintain records to support their assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence; recipients need not track staff hours. The interim final rule also posed a question on how long recipients should be able to use funds for staff responding to COVID–19 and what other measures or presumptions might Treasury consider to assess the extent to which public sector staff are engaged in COVID–19 response in an easily administrable manner.

Treasury also provided further guidance on the types of employees covered by this category of eligible use, specifically: "Public safety employees would include police officers (including state police officers), sheriffs and deputy sheriffs, firefighters, emergency medical responders, correctional and detention officers, and those who directly support such employees such as dispatchers and supervisory personnel. Public health employees [243] would include employees involved in providing medical and other health services to patients and supervisory personnel, including medical staff assigned to schools, prisons, and other such institutions, and other support services essential for patient care (*e.g.,* laboratory technicians, medical examiner, or morgue staff) as well as employees of public health departments directly engaged in matters related to public health and related supervisory personnel. Human services staff include employees providing or administering social services; public benefits; child welfare services; and child, elder, or family care, as well as others."

Public Comment: Measuring Time Spent on COVID–19 Response: Treasury received public comments on several components of this eligible use category. Many commenters argued that it poses an administrative burden to identify the extent to which staff are responding to COVID–19 and to maintain records to support that assessment. Largely citing administrative burden in assessing eligibility, several commenters recommended revisions to the administrative convenience that the full payroll and covered benefits for public health and safety staff "primarily dedicated" to responding to COVID–19 may be paid with SLFRF funds. Some commenters recommended presuming that all public health and safety staff are primarily dedicated to COVID–19 response, while others proposed that public health and safety workers who primarily serve QCTs or low- and moderate-income areas be presumed to be primarily dedicated to COVID–19 response, given the disproportionate impacts of the pandemic in those communities. Similarly, Tribal communities recommended that their public health staff be presumed eligible due to the disproportionate impact of the pandemic on their communities. Some commenters proposed that they be able to use the administrative convenience for staff outside of public health and safety that are responding to COVID–19 (*i.e.,* to be able to pay the full payroll and covered benefits for any staff "primarily dedicated" to COVID–19 response).

Treasury Response: In the final rule, Treasury is maintaining the approach in the interim final rule, including elaborations issued in further guidance, but providing additional clarification on its application, including methods to apply the approach to minimize administrative burden. Treasury notes that recipients may assess the extent to which staff are dedicated to responding to COVID–19 through a variety of means, including establishing presumptions or assessing public health and safety staff at the division or operating unit level. For example, a recipient could consider the amount of time spent by employees in its public health department's epidemiology division in responding to COVID–19 and, if a majority of its employees are dedicated to responding to COVID–19, determine that the entire division is primarily dedicated to responding to COVID–19. Treasury also clarifies that recipients may use reasonable estimates to establish administrable presumptions; for example, a recipient could estimate, based on discussions with staff, the general share of time that employees in a specific role or type of position spend on COVID–19 related tasks and apply that share of time to all employees in that position.

Recipients are generally required to be able to support uses of SLFRF funds as eligible, including, in this instance, maintenance of records to support an assessment that public health and safety staff are primarily dedicated to responding to COVID–19. As noted above, recipients may use reasonable estimates to implement this provision. Recipients should maintain records on how they developed these estimates and need not track staff hours. Treasury notes that records retained can include payroll records (*e.g.,* the number and type of staff in various positions), attestations from supervisors or staff (*e.g.,* self-attestation of share of time spent on COVID–19), or regular work product or correspondence (*e.g.,* calendars, email correspondence, documents, and other electronic

[241] In general, if an employee's wages and salaries are an eligible use of SLFRF funds, recipients may treat the employee's covered benefits as an eligible use of SLFRF funds. For purposes of SLFRF funds, covered benefits include costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (federal and state), workers compensation insurance, and Federal Insurance Contributions Act (FICA) taxes (which includes Social Security and Medicare taxes). As described further in the section Deposits into Pension Funds in Restrictions on Use, that limitation on use does not apply to pension contributions that are part of regular payroll contributions for employees whose wages and salaries are an eligible use of SLFRF funds.

[242] Note that the interim final rule adapted prior guidance issued for CRF that described these four categories of employees; however, when listing the specific occupations or types of employees in each of these categories, the guidance collapses health care and public health into one category titled "public health." Therefore, the presumption described around public health employees also covers health care employees.

[243] Note that this category encompasses both public health and health care employees; both are treated as public health employees for the purposes of this eligible use category.

records). Treasury anticipates that these types of records are generally retained in many government settings; recipients should also consult the Award Terms and Conditions for SLFRF funds for requirements on length of record retention. For example, a recipient could establish a reasonable presumption about the share of time that an employee, division, or operating unit is responding to COVID–19 and simply retain those employees' electronic records as a record to support their assessment.

Public Comment: Public Health and Safety Staff Primarily Dedicated to COVID–19 Response: Some commenters recommended expanding the administrative convenience for public health and safety staff primarily dedicated to COVID–19 response to further types of staff, to all public health and safety staff, or to public health and safety staff serving underserved areas.

Treasury Response: The interim final rule recognized that COVID–19 response continues to require substantial staff resources and provides an administrative convenience to make it relatively simpler to identify the eligibility of the types of workers—public health and safety workers—generally most involved in COVID–19 response. At the same time, many public health and safety workers perform roles unrelated to COVID–19; coverage of all roles would be overbroad compared to the workers responding to COVID–19 in actuality. For this reason, the final rule maintains the interim final rule's approach to permitting SLFRF funds to be used for public health and safety staff primarily dedicated to responding to COVID–19. Finally, to the extent that a greater proportion of public health and safety staff time is needed to respond to COVID–19 in disproportionately impacted communities, the "primarily dedicated" approach recognizes this increased need.

Public Comment: Eligible Types of COVID–19 Response: Some public commenters also sought further clarification on how to identify eligible types of "COVID–19 response." For example, commenters requested clarification on delineating COVID–19 response from general public health response and defining COVID–19 response for public safety employees.

Treasury Response: Treasury is clarifying that "responding to" COVID–19 entails work needed to respond to the public health or negative economic impacts of the pandemic, apart from the typical pre-pandemic job duties or workload of an employee in a comparable role, if one existed. For example, responding to COVID–19 for a public safety worker may entail working in an emergency operations center to coordinate pandemic-related supply distribution, responding to an increased volume of 911 calls, or implementing COVID–19 prevention and mitigation protocols in a carceral setting.

Public Comment: Eligible Employees: Some commenters requested clarification on the types of eligible employees or expansion of eligible employees to include additional types of staff, including in behavioral health; administrative, management, or financial management positions; social services; morgue staff; and nonprofit staff supporting projects to undertake eligible uses of funds under SLFRF.

Treasury Response: Treasury provided further guidance on eligible types of employees following the interim final rule, which expressly included social services and morgue staff, and incorporates that guidance into the final rule. In addition, Treasury is clarifying that public health "employees involved in providing medical and other health services to patients and supervisory personnel" includes behavioral health services as well as physical health services.

Treasury also is clarifying that this provision only addresses employees of the recipient government responding to COVID–19. For discussion of eligible expenses to administer SLFRF, including eligible costs for subrecipients performing eligible activities on behalf of a recipient government, see section Administrative Expenses in Program Administration Provisions.

Finally, Treasury is clarifying that indirect costs for administrative, management, and financial management personnel to support public health and safety staff responding to COVID–19 are not permissible under this provision, given the relatively greater challenge of differentiating the marginal increase in staff time and workload due to pandemic response for indirect versus direct costs.

Public Comment: Time Period: Finally, some commenters made recommendations on the time period during which this eligible use should be available. Some commenters recommended eligibility begin before March 3, 2021, the period when Treasury's interim final rule permitted recipients to begin to incur costs using SLFRF funds; for discussion of this topic, see section Timeline for Use of SLFRF Funds in Program Administration Provisions. As noted above, Treasury also posed a question in the interim final rule asking for how long Treasury should maintain the administrative convenience that SLFRF funds may be used for the full payroll and covered benefits of public health and safety staff primarily dedicated to COVID–19 response. Several commenters recommended that Treasury maintain this approach throughout the program or through December 31, 2024. Other commenters requested clarification on whether eligibility for this use of funds was tied to the length of the state of emergency or whether a jurisdiction has an active state of emergency.

Treasury Response: In the final rule, Treasury is clarifying that recipients will be permitted to fund the full payroll and covered benefits of public health and safety staff primarily dedicated to COVID–19 response throughout the period of performance for the SLFRF program, though recipients should periodically reassess their determination of primarily dedicated staff, including as the public health emergency and response evolves.

Government Employment and Rehiring Public Sector Staff

The interim final rule permitted use of funds for costs associated with rehiring state, local, and Tribal government staff in order to bolster the government's ability to effectively administer services. Specifically, recipients may pay for payroll, covered benefits, and other costs associated with the recipient increasing the number of its employees up to the pre-pandemic baseline, or the number of employees that the recipient government employed on January 27, 2020.

Public Comment: Many commenters requested greater flexibility and additional clarification on the provision's requirements, including the pre-pandemic baseline and re-hiring process. Some commenters requested that the final rule allow for hiring above the pre-pandemic baseline given historic underinvestment in the public sector workforce. Commenters suggested a number of adjustments to the pre-pandemic baseline, including adjusting based on population or revenue growth, while some recommended allowing recipients to set their own hiring levels. Others requested clarification on the definition of the baseline and the re-hiring process, including whether the pre-pandemic baseline referred to budgeted or filled positions and whether new hires had to fill the same roles as the previous hires. Commenters also asked whether recipients need to show if the reduction in number of employees was due to the pandemic in order to qualify for funding and requested that workers dedicated to

COVID–19 response be exempted from the calculation of number of employees.

Many commenters also requested an expanded set of eligible uses beyond restoring their workforce up to the pre-pandemic baseline. Commenters requested that funding be able to be used to avoid layoffs, provide back pay, retain employees through pay increases and other retention programs, or reimburse salaries and benefits already paid. Some commenters also requested clarification as to whether recipients can fund re-hired positions through the period of performance and on the definition of payroll and benefits. Other commenters requested preferential hiring for workers laid off, a strong commitment to equity, and a requirement that funds would not be used to pay for contract or temporary replacement workers during a labor dispute.

Treasury Response: The final rule allows for an expanded set of eligible uses to restore and support public sector employment. Eligible uses include hiring up to a pre-pandemic baseline that is adjusted for historic underinvestment in the public sector, providing additional funds for employees who experienced pay cuts or were furloughed, avoiding layoffs, providing worker retention incentives, and paying for ancillary administrative costs related to hiring.

Restoring pre-pandemic employment. In response to comments and recognizing underinvestment in public sector employment, the final rule expands the ability to use SLFRF funds to restore pre-pandemic employment. Treasury is also clarifying how, and the extent to which, recipients may use SLFRF funds to rehire public employees.

The final rule provides two options to restore pre-pandemic employment, depending on recipient's needs. Under the first and simpler option, recipients may use SLFRF funds to rehire staff for pre-pandemic positions that were unfilled or were eliminated due the pandemic without undergoing further analysis. Under the second option, the final rule provides recipients an option to hire above the pre-pandemic baseline, by adjusting the pre-pandemic baseline for historical growth in public sector employment over time, as well as flexibility on roles for hire. Recipients may choose between these options but cannot use both.

To pursue the first option, recipients may use SLFRF funds to hire employees for the same positions that existed on January 27, 2020 but that were unfilled or eliminated as of March 3, 2021, without undergoing further analysis. For these employees, recipients may use SLFRF funds for payroll and covered benefit costs that are obligated by December 31, 2024 and expended by December 31, 2026, consistent with the Uniform Guidance's Cost Principles at 2 CFR part 200 Subpart E. This option provides administrative simplicity for recipients that would simply like to restore pre-pandemic positions and would not like to hire above the pre-pandemic baseline.

To pursue the second option, recipients should undergo the analysis provided below. In short, this option allows recipients to pay for payroll and covered benefits associated with the recipient increasing its number of budgeted full-time equivalent employees (FTEs) up to 7.5 percent above its pre-pandemic employment baseline, which adjusts for the continued underinvestment in state and local governments since the Great Recession. State and local government employment as a share of population in 2019 remained considerably below its share prior to the Great Recession in 2007, which presented major risks to recipients mounting a response to the COVID–19 public health emergency. The *adjustment factor* of 7.5 percent results from estimating how much larger 2019 state and local government employment would have needed to be for the share of state and local government employment to population in 2019 to have been back at its 2007 level and is intended to correct for this gap.

Recipients should complete the steps described below. Recipients may choose whether to conduct this analysis on a government-wide basis or for an individual department, agency, or authority.

- *Step One:* Identify the recipient's budgeted FTE level on January 27, 2020. This includes all budgeted positions, filled and unfilled. This is called the *pre-pandemic baseline.*
- *Step Two:* Multiply the *pre-pandemic baseline* by 1.075 (that is, 1 + *adjustment factor*). This is called the *adjusted pre-pandemic baseline.*
- *Step Three:* Identify the recipient's budgeted FTE level on March 3, 2021, which is the beginning of the period of performance for SLFRF funds. Recipients may, but are not required to, exclude FTEs dedicated to responding to the COVID–19 public health emergency.[244] This is called the *actual number of FTEs.*
- *Step Four:* Subtract the *actual number of FTEs* from the *adjusted pre-pandemic baseline* to calculate the number of FTEs that can be hired and covered by SLFRF funds.

Recipients may use SLFRF funds to cover payroll and covered benefit costs obligated by December 31, 2024, and expended by December 31, 2026, up to the number of FTEs calculated in Step Four, consistent with the Uniform Guidance's Cost Principles at 2 CFR part 200 Subpart E. Recipients may only use SLFRF funds for additional FTEs hired over the March 3, 2021 level of budgeted FTEs (*i.e.,* the *actual number of FTEs*); note again that recipients may choose whether to conduct the analysis of FTEs that can be covered by SLFRF funds on a government-wide basis or for an individual department, agency, or authority.

These FTEs must have begun their employment on or after March 3, 2021, which is the beginning of the period of performance. For administrative convenience, recipients do not need to demonstrate that the reduction in number of FTEs was due to the COVID–19 pandemic, as Treasury assumes the vast majority of employment reductions during this time were due to pandemic fiscal pressures on state and local budgets. Recipients do not need to hire for the same roles that existed pre-pandemic.

For illustration, consider a hypothetical recipient with 1,000 budgeted FTEs on January 27, 2020 (950 filled FTE positions and 50 unfilled FTE positions). The recipient's *pre-pandemic baseline* is 1000 FTEs; its *adjusted pre-pandemic baseline* is 1,000 * 1.075 = 1075 FTEs. Now, assume that on March 3, 2021, the recipient had 800 budgeted FTEs in total (795 filled FTE positions and 5 unfilled FTE positions), with 50 FTEs primarily dedicated to responding to the COVID–19 public health emergency. The recipient would have the option of using either 800 FTEs or 750 FTEs as its *actual number of FTEs* for the calculation; assuming it chooses the lower number, it would be able to fund up to 325 FTEs with SLFRF funds (that is, 1,075 − 750 = 325 FTEs).

[244] Recipients may determine that a portion of an FTE's time is dedicated to responding to the COVID–19 public health emergency. Further, for administrative convenience, the recipient may consider public health and safety FTEs to be entirely devoted to mitigating or responding to the COVID–19 public health emergency if the FTE, or his or her operating unit of division, is primarily dedicated to responding to the COVID–19 public health emergency. Recipients may also consider other presumptions for assessing the extent to which an FTE, division, or operating unit is engaged in activities that respond to the COVID–19 public health emergency, provided that the recipient reassesses periodically and maintains records to support its assessment, such as payroll records, attestations from supervisors or staff, or regular work product or correspondence demonstrating work on the COVID–19 response.

Specifically, the recipient would be able to use SLFRF to fund payroll and covered benefits for up to 325 FTEs that begin their employment on or after March 3, 2021, for costs obligated by December 31, 2024, and expended by December 31, 2026, consistent with the Uniform Guidance's Cost Principles, as long as SLFRF funds are used for additional FTEs hired over the recipient's 750 FTE level (which is its March 3, 2021 budgeted FTE level).

In hiring new employees, the final rule encourages recipients to ensure a diverse workforce. The final rule also prohibits recipients from using funds to temporarily fill positions during a labor dispute, as this would not constitute responding to the public health or negative economic impacts of the pandemic. Further, recipients must ensure that its hiring practices do not violate conflict-of-interest policies.[245] Total compensation for a hired employee that is substantially in excess of typical compensation for employees of their experience and tenure within the recipient's government, without a corresponding business case, may indicate a potential conflict-of-interest in fact or appearance.

Providing additional funding for employees who experienced pay cuts and furloughs. In recognition of the economic hardship caused by pay cuts and furloughs, additional funds may be provided to employees who experienced pay cuts or were furloughed since the onset of the pandemic on January 27, 2020. Recipients must be able to substantiate that the pay cut or furlough was substantially due to the public health emergency or its negative economic impacts (*e.g.*, fiscal pressures on state and local budgets) and should document their assessment. As a reminder, this additional funding must be reasonably proportional to the negative economic impact of the pay cut or furlough on the employee, which would include taking into account unemployment insurance (UI) benefits that a furloughed employee may have received during the furloughed period. Treasury presumes that additional funds beyond the difference in pay had the employee not received a pay cut or been furloughed would not be reasonably proportional.

Recipients may also provide premium pay to certain employees, as detailed further in section Premium Pay.

Avoiding layoffs. Funds may be used to maintain current compensation levels, with adjustments for inflation, in order to prevent layoffs that would otherwise be necessary. Recipients must be able to substantiate that layoffs were likely in the absence of SLFRF funds and would be substantially due to the public health emergency or its negative economic impacts (*e.g.*, fiscal pressures on state and local budgets) and should document their assessment.

Retaining workers. Funds may be used to provide worker retention incentives, which are designed to persuade employees to remain with the employer as compared to other employment options. Recipients must be able to substantiate that the employees were likely to leave employment in the absence of the retention incentive and should document their assessment. For example, a recipient may determine that a retention bonus is necessary based on the presence of an alternative employment offer for an employee.

All worker retention incentives must be narrowly tailored to need and should not exceed incentives traditionally offered by the recipient or compensation that alternative employers may offer to compete for the employees. Further, because retention incentives are intended to provide additional incentive to remain with the employer, they must be entirely additive to an employee's regular rate of wages and other remuneration and may not be used to reduce or substitute for an employee's normal earnings. Treasury will presume that retention incentives that are less than 25 percent of the rate of base pay for an individual employee or 10 percent for a group or category of employees are reasonably proportional to the need to retain employees, as long as the other requirements are met.

Ancillary administrative costs. Funds may be used to pay for ancillary administrative costs associated with administering SLFRF-funded hiring and retention programs detailed above, including costs to publish job postings, review applications, and onboard and train new hires. For additional information on administrative expenses, see section Administrative Expenses in Program Administration Provisions.

Effective Service Delivery: Administrative Expenses

The interim final rule provided that funds could be used for: "Expenses to improve efficacy of public health or economic relief programs: Administrative costs associated with the recipient's COVID–19 public health emergency assistance programs, including services responding to the COVID–19 public health emergency or its negative economic impacts, that are not federally funded." In the final rule, Treasury is clarifying that there are several categories of eligible administrative expenses.

First, recipients may use funds for administrative costs to improve the efficacy of public health or economic relief programs through tools like program evaluation, data analysis, and targeted consumer outreach (see section Effective Service Delivery: Program Evaluation, Data, and Outreach).

Second, recipients may use funds for administrative costs associated with programs to respond to the public health emergency and its negative economic impacts, including programs that are not funded by SLFRF or not federally funded. In other words, Treasury recognizes that responding to the public health and economic impacts of the pandemic requires many programs and activities, some of which are not funded by SLFRF. Executing these programs effectively is a component of responding to the public health and negative economic impacts of the pandemic.

Finally, recipients may use funds for direct and indirect administrative costs for administering the SLFRF program and projects funded by the SLFRF program. See section Administrative Expenses in Program Administration Provisions for details on this eligible use category.

Effective Service Delivery: Program Evaluation, Data, and Outreach

The Supplementary Information of the interim final rule provided that state, local and Tribal governments may use SLFRF funds to improve the design and execution of programs responding to the COVID–19 pandemic and to improve the efficacy of programs addressing negative economic impacts. The interim final rule included high-level guidance about how SLFRF funds could be used in this eligible use category, including the use of targeted consumer outreach, improvements to data or technology infrastructure, impact evaluations, and data analysis.

Since the publication of the interim final rule, Treasury has also released

[245] As part of accepting the Award Terms and Conditions for SLFRF, each recipient agreed to maintain a conflict-of-interest policy consistent with 2 CFR 200.318(c)112 that is applicable to all activities funded with the SLFRF award. Pursuant to this policy, decisions concerning SLFRF must be free of undisclosed personal or organizational conflicts of interest, both in fact and in appearance. A recipient may not use control over SLFRF for their own private gain. Furthermore, no employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a federal award if he or she has a real or apparent conflict of interest.

supplementary information on data analysis, evidence building, and program evaluation in the Compliance and Reporting Guidance.

Public Comment: Treasury received positive comments about the opportunity to invest in data and technology upgrades with SLFRF funds. For example, one commenter noted that investing in technology for better connectivity, coupled with software and hardware upgrades, will allow the workforce to be more productive. Treasury also received comments seeking clarification on using funds for investments in data and technology, including whether upgrading government websites to improve community outreach and investing in technologies that support social distancing were eligible uses.

Treasury Response: Governments with high capacity to use data and evidence to administer programs are more likely to be responsive to the needs of their community, more transparent about their community impact, and more resilient to emergencies such as the pandemic and its economic impacts.[246] Treasury recognizes that collecting high-quality data and developing community-driven, evidence-based programs requires resources to hire and build the capacity of staff, adopt new processes and systems, and use new technology and tools in order to effectively develop, execute, and evaluate programs. As such, Treasury is clarifying that recipients may use SLFRF funds toward the following non-exhaustive list of uses to address the data, evidence, and program administration needs of recipients. Additional information may be provided in the Compliance and Reporting Guidance.

- *Program evaluation and evidence resources* to support building and using evidence to improve outcomes, including development of Learning Agendas[247] to support strategic evidence building, selection of evidence-based interventions, and program evaluations including impact evaluations (randomized control trials and quasi-experimental designs) as well as rapid-cycle evaluations, process or implementation evaluations, outcome evaluations, and cost-benefit analyses. Recipients are encouraged to undertake rigorous program evaluations when practicable, assess the impact of their programs by beneficiary demographics (including race, ethnicity, gender, income, and other relevant factors), and engage with community stakeholders (including intended beneficiaries) when developing Learning Agendas and designing evaluations to ensure that programmatic, cultural, linguistic, and historical nuances are accurately and respectfully addressed.

Recipients are also encouraged to use relevant evidence Clearinghouses,[248] among other sources, to assess the level of evidence for their interventions and identify evidence-based models that could be applied in their jurisdiction (meaning models with strong or moderate evidence; see Compliance and Reporting Guidance for details on these terms).

- *Data analysis resources* to gather, assess, and use data for effective policy-making and real-time tracking of program performance to support effective implementation of SLFRF-funded programs and programs that respond to the public health emergency and its negative economic impacts, or which households, small businesses, or impacted industries are accessing during the pandemic that are funded by other sources. These resources include but are not limited to data gathering, data cleaning, data analysis, data infrastructure, data management, data sharing, data transparency, performance management, outcomes-based budgeting, outcomes-based procurement, and other data needs. Treasury encourages the disaggregation of data to identify disparate program impacts and the use of cross-jurisdictional data sharing to better measure and implement government programs.
- *Technology infrastructure* resources to improve access to and the user-experience of government information technology systems, including upgrades to hardware and software as well as improvements to public-facing websites or to data management systems, to increase public access and improve public delivery of government programs and services (including in the judicial, legislative, or executive branches).
- *Community outreach and engagement* resources to support the gathering and sharing of information in ways that improve equity and effective implementation of SLFRF-funded programs and programs that respond to the public health emergency and its negative economic impacts, or which households, small businesses, or impacted industries are accessing during the pandemic that are funded by other sources. These methods include but are not limited to community meetings, online surveys, focus groups, human-centered design activities, behavioral science techniques, and other community engagement tools.
- *Capacity building* resources to support using data and evidence in designing, executing, and evaluating programs, including hiring public sector staff, contractors, academics, consultants, and others with expertise in evaluation, data, technology, and community engagement as well as technical assistance support for public sector staff, staff of subrecipients, and community partners to support effective implementation of SLFRF-funded programs and programs that respond to the public health emergency and its negative economic impacts, or which households, small businesses, or impacted industries are accessing during the pandemic that are funded by other sources.

Administrative Needs Caused or Exacerbated by the Pandemic

As described in guidance and the interim final rule, SLFRF funds may be used to address administrative needs of recipient governments that were caused or exacerbated by the pandemic. Guidance following the interim final rule included several examples of this, for example, uses of funds to address backlogs resulting from pandemic-related shutdowns (*e.g.*, backlogs in court systems).[249] This also includes

[246] Results for America, Invest in What Works State Standard of Excellence (August 2020), *https://2020state.results4america.org/2020_State-Standard-of-Excellence.pdf.*

[247] Learning Agendas are systematic plans to identify, prioritize, answer important questions about programs and policies using analytic techniques that are appropriate to the type of question asked. For more information on learning agendas, please see OMB Memorandum M–19–23, available at: *https://www.whitehouse.gov/wp-content/uploads/2019/07/M-19-23.pdf* and OMB Memorandum M–21–27, available at: *https://www.whitehouse.gov/wp-content/uploads/2021/06/M-21-27.pdf.*

[248] Evidence Clearinghouses are databases of research in particular program areas. Frequently these Clearinghouses identify evidence-based programs, the strength of the evidence for those programs, and provide contextual or supporting information in easy to understand formats. Many federal departments have developed rigorous and helpful Clearinghouses that cover a wide range of uses enumerated in this final rule as well as other programs that may be responsive to public health or negative economic impacts of the pandemic. For more information on Clearinghouses, please see the Compliance and Reporting Guidance: U.S. Department of the Treasury, Recipient Compliance and Reporting Responsibilities, as of November 5, 2021; *https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds/recipient-compliance-and-reporting-responsibilities.*

[249] *See FAQ 2.19.* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.* In the case of courts specifically, this includes "implementing COVID–19 safety measures to facilitate court operations, hiring additional court staff or attorneys to increase speed of case

using funds for increased repair or maintenance needs to respond to significantly greater use of public facilities during the pandemic (*e.g.*, increased use of parks resulting in damage or increased need for maintenance). Some commenters expressed support for the ability to use funds for these purposes. Treasury is maintaining these enumerated eligible uses in the final rule and clarifying that capital expenditures such as technology infrastructure to adapt government operations to the pandemic (*e.g.*, video-conferencing software, improvements to case management systems or data sharing resources), reduce government backlogs, or meet increased maintenance needs are eligible.

b. Capital Expenditures

The interim final rule expressly permitted use of funds for a limited number of capital expenditures that mostly pertained to COVID–19 prevention and mitigation. These included capital investments in public facilities to meet pandemic operational needs, such as physical plant improvements to public hospitals and health clinics; adaptations to public buildings to implement COVID–19 mitigation tactics; ventilation improvements in congregate settings, health care settings, or other key locations; assistance to small businesses and nonprofits and aid to impacted industries to implement COVID–19 prevention or mitigation tactics, such as physical plant changes to enable social distancing. For disproportionately impacted populations and communities, the interim final rule also expressly permitted development of affordable housing to increase the supply of affordable and high-quality living units.

Public Comment: Many commenters supported the interim final rule's allowance of capital expenditures in facilities to meet pandemic operational needs but requested that the final rule explicitly allow for a broader range of capital expenditures. Commenters expressed an interest in investing in equipment, real property, and facilities that they argued will yield lasting benefits beyond the SLFRF period of performance. Some commenters stated that the approach in the interim final rule limited the vast majority of capital expenditures to governments that experienced revenue loss under Sections 602(c)(1)(C) and 603(c)(1)(C) and that this approach may prevent some governments from fully meeting the needs of their residents. A few commenters argued that Treasury should limit use of funds on capital expenditures not related to addressing a direct pandemic harm, such as general economic development or workforce development, and some expressed support for generally limiting capital expenditures to those that address the needs of low-income communities and communities of color.

Many commenters requested that capital expenditures related to direct COVID–19 public health response be included as enumerated eligible uses. The requested types of expenditures include improvements and construction of hospitals and health clinics (including behavioral health clinics), as well as other health-related infrastructure improvements, such as improvements to medical equipment or public health information technology. These commenters stated that investments in health and public health systems are vital to ensuring critical infrastructure necessary to respond to continued impacts of COVID–19 or to address disparities in health, due to lack of access to health care, that contributed to disproportionate impacts of COVID–19 on some communities. Further, some commenters requested that construction or improvements of emergency management and public safety facilities be deemed eligible, citing that some of these sites serve as remote vaccination sites or are otherwise crucial to the pandemic public health response.

Commenters also requested use of funds for capital expenditures that support community needs apart from health care, such as new construction or improvements to schools, affordable housing (beyond presumed disproportionately impacted communities), childcare facilities, and community centers; some suggested that all types of projects permissible under the Community Development Block Grant Program should be eligible both for policy and administrability reasons. Further, some commenters also asked for clarification as to whether parks and recreational facilities are eligible if built in certain disproportionately impacted areas, as well as public transportation infrastructure.

Finally, some commenters also requested use of funds for capital expenditures in government administration buildings, such as public courthouses, as well as technology infrastructure that would allow for remote delivery of public benefits. Others also asked about whether funds could be used to renovate vacant business district buildings or commercial spaces to spur economic recovery.

Treasury Response: Capital expenditures, in certain cases, can be appropriate responses to the public health and economic impacts of the pandemic, in addition to programs and services. Like other eligible uses of SLFRF funds in this category, capital expenditures should be a related and reasonably proportional response to a public health or negative economic impact of the pandemic. The final rule clarifies and expands how SLFRF funds may be used for certain capital expenditures, including criteria and documentation requirements specified in this section, as applicable.

Treasury provides presumptions and guidelines for capital expenditures that are enumerated earlier in sections Public Health, Negative Economic Impacts, and General Provisions: Other under the Public Health and Negative Economic Impact eligible use category ("enumerated projects"), along with capital expenditures beyond those enumerated by Treasury. In addition to satisfying the two-part framework in Standards: Designating a Public Health Impact and Standards: Designating a Negative Economic Impact for identifying and designing a response to a pandemic harm, Treasury will require projects with total expected capital expenditure costs of $1 million or greater to undergo additional analysis to justify their capital expenditure. Increased reporting requirements will be required for projects that are larger in size, as well as projects that are not enumerated as eligible by Treasury, with certain exceptions for Tribal governments discussed below. Smaller projects with total expected capital expenditures below $1 million will not be required to undergo additional analysis to justify their capital expenditure, as such projects will be presumed to be reasonably proportional, provided that they are responding to a harm caused or exacerbated by the public health emergency. These standards and documentation requirements are designed to minimize administrative burden while also ensuring that projects are reasonably proportional and supporting Treasury's risk-based approach to overall program management and monitoring.

This section provides (1) an overview of general standards governing capital expenditures; (2) presumptions on capital expenditures, which help guide recipients in determining whether the expenditure meets the standards and the associated documentation requirements; and (3) additional standards and requirements that may apply.

resolution, and other expenses to expedite case resolution are eligible uses."

Overview of General Standards

In considering whether a capital expenditure would be eligible under the public health and negative economic impacts eligible use category, recipients must satisfy the requirements for all uses under the public health and negative economic impacts eligible use category, including identifying an impact or harm and designing a response that addresses or responds to the identified impact or harm. Responses must be reasonably designed to benefit the individual or class that experienced the impact or harm and must be related and reasonably proportional to the extent and type of impact or harm. Recipients should consult further details on this standard provided in the sections Standards: Designating a Public Health Impact and Standards: Designating a Negative Economic Impact under General Provisions: Structure and Standards.

In addition to the framework described above, for projects with total expected capital expenditures of $1 million or greater, recipients must complete and meet the substantive requirements of a Written Justification for their capital expenditure, except for Tribal governments as discussed below. This Written Justification helps clarify the application of this interpretive framework to capital expenditures, while recognizing that the needs of communities differ. In particular, this justification reflects the fact that the time required for a large construction project may make capital expenditures less responsive to pandemic-related needs relative to other types of responses. In addition, as discussed in section Timeline for Use of SLFRF Funds of this Supplemental Information, SLFRF funds must be obligated by December 31, 2024 and expended by December 31, 2026. Capital expenditures may involve long lead-times, and the Written Justification may support recipients in analyzing proposed capital expenditures to confirm that they conform to the obligation and expenditure timing requirements. Further, such large projects may be less likely to be reasonably proportional to the harm identified. For example, construction of a new, larger public facility for the purpose of increasing the ability to socially distance generally would not be considered a reasonably proportional response compared to other less time- and resource-intensive options that may be available and would be equally or more effective. Other solutions, such as improvements in ventilation, could be made more quickly and are typically more cost effective than construction of a new, larger facility. The needs of communities differ, and recipients are responsible for identifying uses of SLFRF funds that best respond to these needs. The Written Justification recognizes this while also establishing consistent documentation and reporting to support monitoring and compliance with the ARPA and final rule. Finally, the Written Justification also reflects the fact that infrastructure projects are generally not within scope of this eligible use category. See section Uses Outside the Scope of this Category in General Provisions: Other.

As noted above, Tribal governments are not required to complete the Written Justification for projects with total capital expenditures of $1 million or greater. Tribal governments generally have limited administrative capacity due to their small size and corresponding limited ability to supplement staffing for short-term programs. In addition, Tribal governments are already subject to unique considerations that require additional administrative processes and administrative burden for Tribal government decision making, including capital expenditures. Tribal governments generally are subject to a jurisdictionally complex sets of rules and regulations in the case of improvements to land for which the title is held in trust by the United States for a Tribe (Tribal Trust Lands).[250] This includes the requirement in certain circumstances to seek the input or approval of one or more federal agencies such the Department of the Interior, which holds fee title of Tribal Trust Lands.

As a result of their limited administrative capacity and unique and complex rules and regulations applicable to Tribal governments operating on Tribal Trust Lands, Tribal governments would experience significant and redundant administrative burden by also being required to complete a Written Justification for applicable capital expenditures. While Tribal governments are not required to complete the Written Justification for applicable capital expenditures, the associated substantive requirements continue to apply, including the requirement that a capital expenditure must be reasonably designed to benefit the individual or class that experienced the identified impact or harm and must be related and reasonably proportional to the extent and type of impact or harm. Note that, as a general matter, Treasury may also request further information on SLFRF expenditures and projects, including capital expenditures, as part of the regular SLFRF reporting and compliance process, including to assess their eligibility under the final rule.

The Written Justification should (1) describe the harm or need to be addressed; (2) explain why a capital expenditure is appropriate to address the harm or need; and (3) compare the proposed capital expenditure against alternative capital expenditures that could be made. The information required for the Written Justification reflects the framework applicable to all uses under the public health and negative economic impacts eligible use category, providing justification for the reasonable design, relatedness, and reasonable proportionality of the capital expenditure in response to the harm or impact identified.

1. *Description of harm or need to be addressed:* Recipients should provide a description of the specific harm or need to be addressed, and why the harm was exacerbated or caused by the public health emergency. When appropriate, recipients may provide quantitative information on the extent and type of the harm, such as the number of individuals or entities affected.

2. *Explanation of why a capital expenditure is appropriate:* Recipients should provide an independent assessment demonstrating why a capital expenditure is appropriate to address the specified harm or need. This should include an explanation of why existing capital equipment, property, or facilities would be inadequate to addressing the harm or need and why policy changes or additional funding to pertinent programs or services would be insufficient without the corresponding capital expenditures. Recipients are not required to demonstrate that the harm or need would be irremediable but for the additional capital expenditure; rather, they may show that other interventions would be inefficient, costly, or otherwise not reasonably designed to remedy the harm without additional capital expenditure.

3. *Comparison of the proposed capital expenditure against alternative capital expenditures:* Recipients should provide an objective comparison of the proposed capital expenditure against at least two alternative capital expenditures and demonstrate why their proposed capital expenditure is superior to alternative capital expenditures that could be made. Specifically, recipients should assess the proposed capital expenditure against at least two alternative types or sizes of capital expenditures that are potentially effective and reasonably

[250] See 25 U.S.C. 5108.

feasible. Where relevant, recipients should compare the proposal against the alternative of improving existing capital assets already owned or leasing other capital assets. Recipients should use quantitative data when available, although they are encouraged to supplement with qualitative information and narrative description. Recipients that complete analyses with minimal or no quantitative data should provide an explanation for doing so.

In determining whether their proposed capital expenditure is superior to alternative capital expenditures, recipients should consider the following factors against each selected alternative.

a. *A comparison of the effectiveness of the capital expenditures in addressing the harm identified.* Recipients should generally consider the effectiveness of the capital expenditures in addressing the harm over the useful life of the capital asset and may consider metrics such as the number of impacted or disproportionately impacted individuals or entities served, when such individuals or entities are estimated to be served, the relative time horizons of the project, and consideration of any uncertainties or risks involved with the capital expenditure.

b. *A comparison of the expected total cost of the capital expenditures.* Recipients should consider the expected total cost of the capital expenditure required to construct, purchase, install, or improve the capital assets intended to address the public health or negative economic impact of the public health emergency. Recipients should include pre-development costs in their calculation and may choose to include information on ongoing operational costs, although this information is not required.

Recipients should balance the effectiveness and costs of the proposed capital expenditure against alternatives and demonstrate that their proposed capital expenditure is superior. Further, recipients should choose the most cost-effective option unless it substantively reduces the effectiveness of the capital investment in addressing the harm identified.

As an example, a recipient considering building a new diagnostic testing laboratory to enhance COVID–19 testing capacity may consider whether existing laboratories sufficiently meet demand for COVID–19 testing, considering the demand for test results (along with their turnaround time) as well as the impact of current testing availability on the spread of COVID–19. Recipients may also consider other public health impacts of the level of diagnostic testing capacity, for example if insufficient capacity has decreased testing for other health conditions. The recipient may consider alternatives such as expanding existing laboratories or building a laboratory of a different size. In comparing the effectiveness of the capital expenditures, examples of factors that the recipient may consider include when the facilities will become operational and for how long; the daily throughput of COVID–19 tests; and the effect on minimizing delays in test results on the populations that such tests will serve. In comparing costs, the recipient may compare the total expected cost of the new laboratory (including costs of acquisition of real property, construction of the laboratory, and purchase of any necessary equipment needed to operationalize the lab), against the expected costs of expanding existing laboratories (whether by replacing current equipment with higher throughout devices or physically expanding space to accommodate additional capacity) or building a new laboratory of a different size, including by leasing property. As a reminder, recipients should only consider alternatives that are potentially effective and reasonably feasible.

Because, in all cases, uses of SLFRF funds to respond to public health and negative economic impacts of the pandemic must be related and reasonably proportional to a harm caused or exacerbated by the pandemic, some capital expenditures may not eligible. For example, constructing a new correctional facility would generally not be a proportional response to an increase in the rate of certain crimes or overall crime as most correctional facilities have historically accommodated fluctuations in occupancy.[251] In addition, construction of new congregate facilities, which would generally be expected to involve expenditures greater than $1 million, would generally not be a proportional response to mitigate or prevent COVID–19, because such construction is generally expected to be more costly than alternative approaches or capital expenditures that may be equally or more effective in decreasing spread of the disease.[252] These alternatives include personal protective equipment, ventilation improvements, utilizing excess capacity in other facilities or wings, or temporary facility capacity expansions.

Large capital expenditures intended for general economic development or to aid the travel, tourism, and hospitality industries—such as convention centers and stadiums—are, on balance, generally not reasonably proportional to addressing the negative economic impacts of the pandemic, as the efficacy of a large capital expenditure intended for general economic development in remedying pandemic harms may be very limited compared to its cost.[253]

Presumptions on Capital Expenditures

For administrative convenience, the final rule provides presumptions on whether a Written Justification is required—and required to be submitted to Treasury through reporting—based on the type and size of the capital expenditure, as detailed in the table below.

As discussed above, Tribal governments are not required to complete the Written Justification for applicable capital expenditures, but the associated substantive requirements continue to apply, including the requirement that a capital expenditure must be reasonably designed to benefit the individual or class that experienced the identified impact or harm and must be related and reasonably proportional to the extent and type of impact or harm.

[251] *See, e.g.*, "Economic Perspectives on Incarceration and the Criminal Justice System," Council of Economic Advisers (April 2016), pg. 36–43.

[252] For instance, the CDC has published detailed recommendations for nursing homes, long-term care facilities, and correctional and detention facilities, on infection prevention and control. Many of these recommendations are relatively low cost, such as proper use of PPE. In addition, increasing vaccination rates among nursing home staff is among the most important ways to decrease the spread of the disease. Centers for Disease Control and Prevention, Interim Infection Prevention and Control Recommendations to Prevent SARS–CoV–2 Spread in Nursing Homes (September 10, 2021), *https://www.cdc.gov/coronavirus/2019-ncov/hcp/long-term-care.html#anchor_1631030153017.*

[253] For instance, researchers have found no consistent positive relationship between building sports facilities and local economic development. As Siegfried and Zimbalist (2000, 103) write in a review of the literature, "independent work on the economic impact of stadiums and arenas has uniformly found that there is no statistically significant positive correlation between sports facility construction and economic development." John Siegfried and Andrew Zimbalist, The Economics of Sports Facilities and Their Communities, Journal of Economic Perspectives 14, no. 3 (Summer 2000): 95–114, *https://www.aeaweb.org/articles?id=10.1257/jep.14.3.95.*

If a project has total expected capital expenditures of	and the use is enumerated by Treasury as eligible, then [254]	and the use is beyond those enumerated by Treasury as eligible, then [255]
Less than $1 million	No Written Justification required	No Written Justification required.
Greater than or equal to $1 million, but less than $10 million.	Written Justification required but recipients are not required to submit as part of regular reporting to Treasury.	Written Justification required and recipients must submit as part of regular reporting to Treasury.
$10 million or more	Written Justification required and recipients must submit as part of regular reporting to Treasury.	

In selecting these thresholds, Treasury recognized that capital expenditures vary widely in size and therefore would benefit from tiered treatment to implement eligibility standards while minimizing administrative burden, especially for smaller projects. For example, Treasury selected $1 million as a threshold for whether a recipient needs to complete a Written Justification as well as a threshold under which capital expenditures would be presumed reasonably proportional. Treasury estimates that $1 million would encapsulate the costs of a significant portion of equipment or small renovations. These types of smaller projects are often a necessary and reasonably proportional part of a response to the public health emergency; therefore, the $1 million threshold provides a simplified pathway to complete smaller projects more likely to meet the eligibility standard. At the same time, Treasury selected $10 million as the threshold for more intensive reporting requirements, estimating that projects larger than $10 million would likely constitute significant improvements or construction of mid- or large-sized facilities. As discussed above, given their scale and longer time to completion, these types of larger projects may be less likely to be reasonably proportional responses. The $10 million threshold also generally aligns with thresholds in other parts of the SLFRF program, such as for enhanced reporting on labor practices.

Expenditures from closely related activities directed toward a common purpose are considered part of the scope of one project. These expenditures can include capital expenditures, as well as expenditures on related programs, services, or other interventions. A project includes expenditures that are interdependent (*e.g.*, acquisition of land, construction of the school on the land, and purchase of school equipment), or are of the same or similar type and would be utilized for a common purpose (*e.g.*, acquisition of a fleet of ambulances that would be used for COVID–19 emergency response). Recipients must not segment a larger project into smaller projects in order to evade review. A recipient undertaking a set of identical or similar projects (*e.g.*, development of a number of new affordable housing complexes across the recipient jurisdiction) may complete one Written Justification comprehensively addressing the entire set of projects.

Projects Enumerated as Eligible by Treasury

Under the public health and negative economic impacts eligible use category, the final rule provides a non-exclusive list of eligible uses of funding for projects that respond to the public health emergency or its negative economic impacts. Treasury has determined that these enumerated projects are related to the public health emergency and its negative economic impacts; however, recipients (other than Tribal governments) undertaking these projects with total expected capital expenditures of $1 million or greater must still complete and meet the substantive requirements of a Written Justification as part of their demonstration that the project is a related and reasonably proportional response to the harm identified.

- *Projects with total expected capital expenditures of under $1 million:* Treasury provides a safe harbor for projects with total expected capital expenditures of less than $1 million and will not require recipients to complete, submit, or meet the substantive requirements of a Written Justification for the capital expenditure. In essence, recipients may pursue an enumerated project with total expected capital expenditures of under $1 million without having to undergo additional assessments to meet SLFRF requirements.
- *Projects with total expected capital expenditures of at least $1 million but under $10 million:* Recipients should complete a Written Justification for the capital expenditure and make an independent assessment of whether their proposed capital expenditure meets the substantive requirements of the Written Justification. Recipients will not be required to submit the Written Justification as part of regular reporting to Treasury but should keep documentation for their records.
- *Projects with total expected capital expenditures of at least $10 million:* Similar to the above, recipients should complete a Written Justification of the capital expenditure and make an independent assessment of whether their proposed capital expenditure meets the substantive requirements of the Written Justification. Further, recipients will be asked to submit the Written Justification as part of regular reporting to Treasury. Similar to other parts of the SLFRF program, such as on reporting on labor practices, Treasury recognizes that projects with expected total capital expenditures of at least $10 million may be less likely to meet eligibility requirements and therefore requires recipients to provide an enhanced level of information to Treasury.

Projects Beyond Those Enumerated as Eligible by Treasury

As with all uses, recipients that undertake capital expenditures beyond those enumerated as eligible by Treasury must meet the two-part framework under Standards: Designating a Public Health Impact and Standards: Designating a Negative Economic Impact under General Provisions: Structure and Standards,

[254] Whether or not a Written Justification is required, recipients should still determine that the response is related and reasonably proportional to the public health emergency and its negative economic impacts. Treasury recognizes that enumerated eligible uses are "related" to the public health emergency and its negative economic impacts and presumed to be reasonably proportional, except recipients pursuing projects with expected total capital expenditures equal to or greater than $1 million should still independently determine that the expenditures are a reasonably proportional response. Enumerated projects with total expected capital expenditures under $1 million receive a safe harbor and deemed to meet the related and reasonably proportional standard.

[255] Whether or not a Written Justification is required, recipients should still determine that the response is related and reasonably proportional to the public health emergency and its negative economic impacts. Treasury presumes that projects with total expected capital expenditures under $1 million are reasonably proportional in size to responding to the public health emergency and its negative economic impacts; however, recipients should determine that the response otherwise meets the requirements of the standard, including that the response is related to the public health emergency and its negative economic impacts.

including the requirement that responses are related and reasonably proportional to the harm or impact identified. As part of that assessment, these recipients may also be asked to complete a Written Justification. Recipients (other than Tribal governments) are subject to the following presumptions for the Written Justification of the capital expenditure, based on the total expected capital expenditures of the project:

- *Projects with total expected capital expenditures of under $1 million:* Treasury provides a safe harbor for unenumerated projects with total expected capital expenditures of under $1 million and will not require recipients to complete, submit, or meet the substantive requirements of a Written Justification of the capital expenditure. Recipients should still make a determination as to whether the capital expenditure is part of a response that is related and reasonably proportional to the public health emergency or its negative economic impacts.
- *Projects with total expected capital expenditures of $1 million or over:* Recipients should complete a Written Justification of the capital expenditure and make an independent assessment that their proposed capital expenditure meets the substantive requirements of the Written Justification. Further, recipients will be asked to submit the Written Justification as part of regular reporting to Treasury.

Treasury employs a risk-based approach to overall program management and monitoring, which may result in heightened scrutiny on larger projects. Accordingly, recipients pursuing projects with larger capital expenditures should complete more detailed analyses for their Written Justification, commensurate with the scale of the project.

Additional Provisions, Standards, and Definitions

Strong Labor Standards in Construction

Treasury encourages recipients to carry out projects in ways that produce high-quality work, avert disruptive and costly delays, and promote efficiency. Treasury encourages recipients to use strong labor standards, including project labor agreements (PLAs) and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions. Treasury also recommends that recipients prioritize in their procurement decisions employers who can demonstrate that their workforce meets high safety and training standards (*e.g.*, professional certification, licensure, and/or robust in-house training), that hire local workers and/or workers from historically underserved communities, and who directly employ their workforce or have policies and practices in place to ensure contractors and subcontractors meet high labor standards. Treasury further encourages recipients to prioritize employers (including contractors and subcontractors) without recent violations of federal and state labor and employment laws.

Treasury believes that such practices will promote effective and efficient delivery of high-quality projects and support the economic recovery through strong employment opportunities for workers. Such practices will reduce likelihood of potential project challenges like work stoppages or safety accidents, while ensuring a reliable supply of skilled labor and minimizing disruptions, such as those associated with labor disputes or workplace . injuries. That will, in turn, promote on-time and on-budget delivery.

Furthermore, among other requirements contained in 2 CFR 200, Appendix II, all contracts made by a recipient or subrecipient in excess of $100,000 with respect to a capital expenditure that involve employment of mechanics or laborers must include a provision for compliance with certain provisions of the Contract Work Hours and Safety Standards Act, 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR part 5).

Treasury will seek information from recipients on their workforce plans and practices related to capital expenditures undertaken under the public health and negative economic impacts eligible use category with SLFRF funds. This reporting will support transparency and competition by enhancing available information on the services being provided.

Environmental, Uniform Guidance, and Other Generally Applicable Requirements

Treasury cautions that, as is the case with all projects using SLFRF funds, all projects must comply with applicable federal, state, and local law. In the case of capital expenditures in particular, this includes environmental and permitting laws and regulations. Likewise, as with all capital expenditure projects using the SLFRF funds, projects must be completed in a manner that is technically sound, meaning that it must meet design and construction methods and use materials that are approved, codified, recognized, fall under standard or acceptable levels of practice, or otherwise are determined to be generally acceptable by the design and construction industry.

Further, as with all other uses of funds under the SLFRF program, the Uniform Guidance at 2 CFR part 200 applies to capital expenditures unless stated otherwise. Importantly, this includes 2 CFR part 200 Subpart D on post-federal award requirements, including property standards pertaining to insurance coverage, real property, and equipment; procurement standards; sub-recipient monitoring and management; and record retention and access.

Definitions

Treasury adopts several definitions from the Uniform Guidance at 2 CFR 200.1 under this section, including for capital expenditures, capital assets, equipment, and supplies.

Per the Uniform Guidance, the term "capital expenditures" means "expenditures to acquire capital assets or expenditures to make additions, improvements, modifications, replacements, rearrangements, reinstallations, renovations, or alterations to capital assets that materially increase their value or useful life." The term "capital assets" means "tangible or intangible assets used in operations having a useful life of more than one year which are capitalized in accordance with [Generally Accepted Accounting Principles]."

Capital assets include lands, facilities, equipment, and intellectual property. Equipment means "tangible personal property (including information technology systems) having a useful life of more than one year and a per-unit acquisition cost which equals or exceeds the lesser of the capitalization level established by the non-Federal entity for financial statement purposes, or $5,000." Supplies, which means all tangible personal property other than those included as "equipment," are not considered capital expenditures.

Recipients may also use SLFRF funds for pre-project development costs that are tied to or reasonably expected to lead to an eligible capital expenditure. For example, pre-project costs associated with planning and engineering for an eligible project are considered an eligible use of funds.

c. Distinguishing Subrecipients Versus Beneficiaries

Under the interim final rule, state, local, and Tribal governments that receive a federal award directly from a federal awarding agency, such as Treasury, are designated as "recipients,"

and state, local, and Tribal governments are authorized to transfer funds to other entities, including private entities like nonprofits. The interim final rule stated that, "[a] transferee receiving a transfer from a recipient under sections 602(c)(3) and 603(c)(3) will be a subrecipient. Subrecipients are entities that receive a subaward from a recipient to carry out a program or project on behalf of the recipient with the recipient's Federal award funding."

For funds transferred to a subrecipient, the interim final rule noted that "[r]ecipients continue to be responsible for monitoring and overseeing the subrecipient's use of SLFRF funds and other activities related to the award to ensure that the subrecipient complies with the statutory and regulatory requirements and the terms and conditions of the award. Recipients also remain responsible for reporting to Treasury on their subrecipients' use of payments from the SLFRF funds for the duration of the award."

Public Comment: Treasury received many comments requesting clarification about which entities qualify as subrecipients and are, in turn, subject to subrecipient monitoring and reporting requirements. For example, commenters sought clarification about whether a nonprofit that received a grant to provide services under a program to carry out an enumerated eligible use would qualify as a subrecipient and be subject to subrecipient monitoring and reporting requirements. Similarly, commenters also wondered if a nonprofit that received a grant in recognition of experiencing a negative economic impact of the public health emergency would also be a subrecipient and subject to subrecipient reporting requirements.

Treasury Response: Treasury is clarifying the distinction between a subrecipient and beneficiary in the final rule. The Uniform Guidance definitions for subaward and subrecipient inform Treasury's distinction between subrecipients and beneficiaries.

First, per 2 CFR 200.1 of Uniform Guidance "[s]ubaward means an award provided by a pass-through entity [256] to a subrecipient for the subrecipient to carry out part of a Federal award received by the pass-through entity. It does not include payments to a contractor or payments to an individual that is a beneficiary of a Federal program. A subaward may be provided through any form of legal agreement, including an agreement that the pass-through entity considers a contract."

Further, 2 CFR 200.1 of the Uniform Guidance defines a subrecipient, in that "[s]ubrecipient means an entity, usually but not limited to non-Federal entities, that receives a subaward from a pass-through entity to carry out part of a Federal award; but does not include an individual that is a beneficiary of such award. A subrecipient may also be a recipient of other Federal awards directly from a Federal awarding agency." Treasury is aligning the definition of subrecipient in the final rule with the definition of subrecipient in the Uniform Guidance.

Treasury is maintaining the monitoring and subrecipient reporting requirements outlined in the final rule. Per 2 CFR 200.101 (b)(2) of the Uniform Guidance, the terms and conditions of federal awards flow down to subawards to subrecipients. Therefore, non-federal entities, as defined in the Uniform Guidance, must comply with the applicable requirements in the Uniform Guidance regardless of whether the non-federal entity is a recipient or subrecipient of a federal award. This includes requirements such as the treatment of eligible uses of funds, procurement, and reporting requirements.

The Uniform Guidance definitions for both subaward and subrecipient specify that payments to individuals or entities that are direct beneficiaries of a federal award are not considered subrecipients. The final rule adopts this definition of a beneficiary and outlines that households, communities, small businesses, nonprofits, and impacted industries are all potential beneficiaries of projects carried out with SLFRF funds. Beneficiaries are not subject to the requirements placed on subrecipients in the Uniform Guidance, including audit pursuant to the Single Audit Act and 2 CFR part 200, subpart F or subrecipient reporting requirements.

The distinction between a subrecipient and a beneficiary, therefore, is contingent upon the rationale for why a recipient is providing funds to the individual or entity. If the recipient is providing funds to the individual or entity for the purpose of carrying out a SLFRF program or project on behalf of the recipient, the individual or entity is acting as a subrecipient. Acting as a subrecipient, the individual or entity is subject to subrecipient monitoring and reporting requirements. Conversely, if the recipient is providing funds to the individual or entity for the purpose of directly benefitting the individual or entity as a result of experiencing a public health impact or negative economic impact of the pandemic, the individual or entity is acting as a beneficiary. Acting as a beneficiary, the individual or entity is not subject to subrecipient monitoring and reporting requirements.

d. Uses Outside the Scope of This Category

Summary of the Interim Final Rule and Final Rule Structure

In the interim final rule, Treasury noted that certain uses of funds are not permissible under the eligible use category of responding to the public health and negative economic impacts of the pandemic. In the final rule, these uses remain impermissible, but Treasury has re-categorized where they are addressed to increase clarity.

Specifically, the interim final rule provided that the following uses of funds are not eligible under this eligible use category: Contributions to rainy day funds, financial reserves, or similar funds; payment of interest or principal on outstanding debt instruments; fees or issuance costs associated with the issuance of new debt; and satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring plan in a judicial, administrative, or regulatory proceeding, except to the extent the judgment or settlement requires the provision of services that would respond to the COVID–19 public health emergency. These uses of funds remain ineligible under the final rule; Treasury has re-categorized these issues to the section Restrictions on Use, which describes restrictions that apply to all eligible use categories, to clarify that these uses are not eligible under any eligible use category of SLFRF. Treasury responds to public comments on this issue in the section Restrictions on Use.

As noted above, the interim final rule also posed several questions on what other types of services or costs Treasury should consider as eligible uses to respond to the public health and negative economic impacts of COVID–19, including in disproportionately impacted communities. In this section, Treasury addresses proposed uses of funds suggested by commenters that Treasury has not included as enumerated eligible uses of funds in this eligible use category.

General Eligible Uses

Public Comment: Commenters proposed a wide variety of additional recommended enumerated eligible uses

[256] In this context, a pass-through entity means a recipient of SLFRF funds.

in all sections of the public health and negative economic impacts eligible use category, including in impacted and disproportionately impacted communities. The proposed additional uses included general categories of services (*e.g.*, legal and social services, long-term investments to remediate long-term disparities, response to natural disasters). Other suggested uses of funds respond to needs widely experienced across the country (*e.g.*, access to and affordability of health insurance). Finally, other suggested uses of funds were highly specific (*e.g.*, healthcare equipment for a specific health condition, fire hydrants, weather alert systems) or most applicable to the particularized needs to certain populations or geographic areas of the United States (*e.g.*, senior citizens, immigrants, formerly incarcerated individuals, responding to environmental issues in certain geographic regions). Other commenters generally requested a high degree of flexibility to respond to the particular needs of their communities.

Treasury Response: Given the large number and diversity of SLFRF recipients, Treasury has aimed to include as enumerated eligible uses programs, services, and capital expenditures that respond to public health and negative economic impacts of the pandemic experienced widely in many jurisdictions across the country, making it clear and simple for recipients to pursue these enumerated eligible uses under the final rule. This provides enumerated eligible uses that many recipients may want to pursue, while including uses that are responsive to the pandemic's impacts across the diverse range of SLFRF recipients. In the final rule, Treasury has clarified several additional uses that generally respond to pandemic impacts experienced broadly across jurisdictions and populations.

Treasury has not chosen to include as enumerated uses all uses proposed by commenters; given the significant range, and in some cases highly specific nature, of the proposed uses Treasury was not able to assess that the proposed uses would respond to negative economic impacts experienced generally across the country, supporting an enumerated eligible use available to all recipients presumptively.

However, Treasury emphasizes that the enumerated eligible uses are non-exhaustive and that other uses, beyond those enumerated, are eligible. Treasury recognizes that the impacts of the pandemic vary over time, by jurisdiction, and by population; as such, the final rule provides flexibility for recipients to identify other public health or negative economic impacts to additional households, small businesses, or nonprofits, including classes of these entities, and pursue programs and services that respond to those impacts. Treasury also notes that some populations are presumed to be impacted or disproportionately impacted by the pandemic, and thus eligible for responsive services; these presumed eligible populations may encompass many individuals in the specific populations for whom commenters recommended services. For details on these issues, see section General Provisions: Structure and Standards.

Infrastructure, Community Development, and General Economic Development

Some potential additions to enumerated eligible uses were also recommended by several commenters each but are not included as enumerated eligible uses in the final rule.

Public Comment: Infrastructure: In the interim final rule, Treasury noted that a "general infrastructure project, for example, typically would not be included [in this eligible use category] unless the project responded to a specific pandemic public health need."

Numerous commenters requested that Treasury permit investments in infrastructure as a response to the public health and negative economic impacts of the pandemic. While these comments most commonly recommended that constructing and maintaining roads and surface transportation infrastructure be eligible, the proposed uses for infrastructure ranged widely and included parking lots, bridges, traffic management infrastructure, solid waste disposal facilities, and utility infrastructure (outside of water, sewer, and broadband).

Many commenters argued that infrastructure development and maintenance is a pressing need in their communities and that their communities had less need for water, sewer, and broadband infrastructure or other eligible uses to respond to the public health and negative economic impacts of the pandemic. Other commenters argued that these uses would stimulate the economy, attract businesses, or allow for tourist movement; these commenters argued that, by generally supporting a stronger economy or facilitating conditions that are more conducive to business activity and tourism, these uses respond to the negative economic impacts of the pandemic.

Treasury Response: In the final rule, Treasury is maintaining the approach under the interim final rule that general infrastructure projects, including roads, streets, and surface transportation infrastructure, would generally not be eligible, unless the project responded to a specific pandemic public health need or a specific negative economic impact.

The ARPA expressly includes infrastructure if it is "necessary" and in water, sewer, or broadband, suggesting that the statute contemplates only those types of infrastructure. Further, responding to the public health and negative economic impacts of the pandemic requires identifying whether, and the extent to which, there has been a harm that resulted from the COVID–19 public health emergency and whether, and the extent to which, the use would respond or address this harm. Uses of funds intended to generally grow the economy and therefore enhance opportunities for workers and businesses would not be an eligible use, because such assistance is not reasonably designed to impact individuals or classes that have been identified as having experienced a negative economic impact. In other words, there is not a reasonable connection between the assistance provided and an impact on the beneficiaries. Such an activity would be attenuated from and thus not reasonably designed to benefit the households that experienced the negative economic impact.

Note, however, that Treasury has clarified that capital expenditures that are related and reasonably proportional to responding to the public health and economic impacts of the pandemic are eligible uses of funds, in addition to programs and services; for details on eligibility criteria for capital expenditures, see section Capital Expenditures in General Provisions: Other.

Public Comment: Community Development Block Grant: Several commenters recommended that Treasury enumerate as eligible uses those eligible under the Department of Housing and Urban Development's Community Development Block Grant (CDBG) or the Housing and Community Development Act of 1974, which established the CDBG program. Commenters requested that these uses be eligible either to respond to the negative economic impacts of the pandemic, or in the alternate the disproportionate negative economic impacts of the pandemic in certain communities. Under the CDBG program, recipient governments may undertake a wide range of community and economic

development services and projects. Commenters reasoned that many state and local governments are familiar with this program, and that aligning to its eligible uses may help recipients easily understand and pursue eligible projects. Commenters also noted that Treasury had chosen to align with existing federal programs in other eligible use categories, namely water infrastructure, in the interim final rule.

Treasury Response: In the final rule, Treasury is not including all categories of projects permissible under CDBG as enumerated eligible uses to respond to the public health and negative economic impacts of the pandemic. Because CDBG permits such a broad range of activities, including services to individual households, communities, small businesses, general economic development activities, and capital expenditures, Treasury determined that it was more appropriate to assess the underlying types of projects eligible within CDBG and whether each type of project responds to the negative economic impacts of the pandemic. In other words, Treasury considered whether various types of community and economic development projects respond to the impacts of the pandemic in different communities and circumstances. In the final rule, Treasury addresses the eligibility of these various types of projects in each relevant eligible use category within public health and negative economic impacts under SLFRF, including assistance for impacted households, disproportionately impacted households, disproportionately impacted small businesses, and capital expenditures.

Public Comment: General Economic Development: Treasury provided guidance following the interim final rule that general economic development or workforce development would generally not be eligible as it does not respond to a negative economic impact of the COVID–19 public health emergency.

Some commenters recommended that Treasury expand enumerated eligible uses to include general economic development activities, beyond those that respond to negative economic impacts of the pandemic, such as creating an economic development strategy for the jurisdiction's overall economic growth, creating a general workforce development strategy, or providing funds to businesses that did not experience negative economic impacts to carry out economic development activities or to incentivize the addition or retention of jobs. Commenters supportive of assistance to businesses for general economic development activities argued that subsidies to businesses increase job growth and that, in some cases, assistance to companies that excelled during the public health emergency would help create more job opportunities for workers or expand the jurisdiction's tax base and produce funds to support government services. In contrast, other commenters argued that academic research consistently finds that economic development subsidies have a negligible, or even negative, economic effect, citing research findings to this effect.[257]

Treasury Response: In the final rule, Treasury maintains the interim final rule's approach that general economic development or workforce development, meaning activities that do not respond to negative economic impacts of the pandemic and rather seek to more generally enhance the jurisdiction's business climate, would generally not be eligible under this eligible use category. As noted above, to identify an eligible use of funds under this category, a recipient must identify a beneficiary or class of beneficiaries that experienced a harm or impact due to the pandemic, and eligible uses of funds must be reasonably designed to respond to the harm, benefit the beneficiaries that experienced it, and be related and reasonably proportional to that harm or impact.

As noted above, recipients should analyze eligible uses based on the beneficiary of the assistance, and recipients may not provide assistance to small businesses or impacted industries that did not experience a negative economic impact. Provision of assistance to a business that did not experience a negative economic impact, under the theory that such assistance would generally grow the economy and therefore enhance opportunities for workers, would not be an eligible use, because such assistance is not reasonably designed to impact individuals or classes that have been identified as having experienced a negative economic impact. In other words, there is not a reasonable connection between the assistance provided and an impact on the beneficiaries. Such an activity would be attenuated from and thus not reasonably designed to benefit the households that experienced the negative economic impact. Research cited by some commenters finding that business subsidies have limited or negative economic impact also suggests that such a response may not be reasonably designed to benefit households and other entities impacted by the pandemic. Similarly, planning activities for an economic development or workforce strategy regarding general future economic growth do not provide a program, service, or capital expenditure that responds to negative economic impacts of the pandemic.

However, Treasury notes that the final rule includes as enumerated eligible uses many types of assistance that respond to negative economic impacts of the pandemic and may produce economic development benefits. For example, see sections Assistance to Unemployed Workers, Assistance to Small Businesses, and Capital Expenditures.

B. Premium Pay

Background and Summary of the Interim Final Rule

Sections 602(c)(1)(B) and 603(c)(1)(B) of the Social Security Act, as added by the ARPA, provide that SLFRF funds may be used "to respond to workers performing essential work during the COVID–19 public health emergency by providing premium pay to eligible workers of the . . . government that are performing such essential work, or by providing grants to eligible employers

that have eligible workers who perform essential work."

Premium pay is designed to compensate workers that, by virtue of their employment, were forced to take on additional burdens and make great personal sacrifices as a result of the COVID–19 pandemic. Premium pay can be thought of as hazard pay by another name.[258]

During the public health emergency, employers' policies on COVID–19-related premium pay or hazard pay have varied widely, with many essential workers not yet compensated for the heightened risks they have faced and continue to face.[259] Many of these workers earn lower wages on average and live in socioeconomically underserved communities as compared to the general population.[260] A recent study found that 25 percent of essential workers were estimated to have low household income, with 13 percent in high-risk households.[261] The low pay of many essential workers makes them less able to cope with the financial consequences of the pandemic or their work-related health risks. As Americans return to work and governments relax certain rules, essential workers will continue to bear the brunt of the risk of maintaining the ongoing operation of vital facilities and services. The added health risk to essential workers is one prominent way in which the pandemic has amplified pre-existing socioeconomic inequities. Premium pay is designed to address the disparity between the critical services provided by and the risks taken by essential workers and the relatively low compensation they tend to receive.

The interim final rule established a three-part framework for recipients seeking to use SLFRF funds for premium pay. First, to receive premium pay one must be an eligible worker. Second, an eligible worker must also perform essential work. Finally, premium pay must respond to workers performing essential work during the COVID–19 public health emergency. Most of the comments received by Treasury pertaining to premium pay related to these three requirements. Comments also addressed the definition of premium pay generally and posed questions regarding premium pay program structuring. This section responds to the comments by addressing the three requirements in turn, then the overall definition of premium pay and, finally, program structure.

Eligible Workers

The ARPA defines "eligible workers" as "those workers needed to maintain continuity of operations of essential critical infrastructure sectors and additional sectors as each . . . [government] may designate as critical to protect the health and wellbeing of [its] residents." The interim final rule supplemented this definition by identifying a list of "essential critical infrastructure sectors" whose workers are eligible workers, based on the list of sectors in the HEROES Act, a bill introduced in the House of Representatives in 2020 that would have provided premium pay to essential workers.[262] In addition to the critical infrastructure sectors defined in the interim final rule, the chief executive (or equivalent) of a recipient government may designate additional non-public[263] sectors as critical so long as doing so is necessary to protecting the health and wellbeing of the residents of such jurisdiction.

Public Comment: Treasury received multiple comments on the definition of "eligible worker" included in the interim final rule. Many commenters agreed with the definition of eligible worker adopted by Treasury. Other commenters sought clarification about or changes to the definition of eligible worker, including the definition of eligible sectors, the inclusion of government workers in the definition of eligible workers, and the process for designating additional non-public sectors as eligible.

Some commenters asked Treasury to change how it identifies eligible sectors, including suggestions to add to or subtract from the list of eligible sectors. For example, some commenters asked Treasury to consider using Bureau of Labor Statistics (BLS)-Standard Occupational Classifications to identify specific sectors or occupations, in contrast to the approach taken in the interim final rule, which included a mixture of economic sectors, industries, and occupations. Many commenters asked Treasury to explicitly clarify that a particular industry or occupation is covered by the definition of "essential critical infrastructure sector." Some of these commenters represented public employees, *e.g.*, employees of facilities and public works; public utilities; courthouse employees; police, fire, and emergency medical services; and waste and wastewater services. Others were a mixture of public and private sector employees, *e.g.*, coroners and medical examiners; transportation infrastructure (specifically electric vehicle infrastructure and supply equipment); electric utilities, natural gas, and steam supply; and grocery employees. Other commenters requested that Treasury prohibit certain occupations currently included in the eligible workers definition (*e.g.*, police and corrections officers) from receiving premium pay for performance of regular duties.

Commenters also asked Treasury to clarify which government workers are included in the definition of eligible workers. The interim final rule included as an essential critical infrastructure sector, "any work performed by an employee of a State, local, or Tribal government." Some commenters requested that Treasury adopt a definition of eligible worker that includes all employees of the recipient government; however, all public employees of state, local, and Tribal governments are already included in the interim final rule definition of "eligible worker." Commenters asked whether this includes governments that did not receive SLFRF funds (*i.e.*, "non recipient governments"). Many commenters from Tribal governments requested that the definition of eligible worker, which includes "any work performed by an employee of a . . . Tribal government," also include an employee of a "Tribal enterprise" to remove uncertainty regarding which employees are included.

Finally, commenters made suggestions for the process by which the chief executive (or equivalent) of a recipient government may designate additional non-public sectors as critical. Commenters asked that Treasury adopt a requirement that Treasury must approve or deny any additional non-public sector identified by the chief executive of a recipient government prior to implementation of the recipient's program.

Some commenters asked Treasury to clarify whether their chief executive (or equivalent) could designate particular, and in some cases *all*, employees of the recipient government as eligible for premium pay.

Treasury Response: In the final rule, Treasury will preserve the definition of "eligible worker" as it was defined in the interim final rule with minor modifications to clarify that all public

[263] Note that the sectors defined in the interim final rule already include all state, local, and Tribal government employees.

employees of recipient governments are already included in the interim final rule definition of "eligible worker." A more specific eligibility system (*e.g.*, linking eligibility to specific occupational or industry codes) would have provided more certainty but would have been much more rigid. In contrast, the current definition is flexible enough to give recipients the ability to tailor their premium pay programs to meet their needs while ensuring that programs focus on sectors where workers were forced to shoulder substantial risk as a result of the COVID–19 pandemic. Furthermore, the critical infrastructure sectors defined in the interim final rule already include many of the occupations that commenters requested be added. For example, Treasury received many comments from public workers asking to be included in the definition of "eligible worker" even though these workers already fall within the scope of "any work performed by an employee of a State, local, or Tribal government." Treasury has clarified in the final rule that the chief executive's discretion to designate additional sectors as critical relates only to "non-public" sectors, since all public employees of recipient governments are already included in the definition of "eligible worker." While all such public employees are "eligible workers" and the chief executive (or equivalent) of a recipient government may designate additional non-public sectors as critical, in order to receive premium pay, these workers must still meet the other premium pay requirements (*e.g.*, performing essential work).

Treasury recognizes that the list of "essential critical infrastructure sectors" includes both occupations and sectors. Recipients, if uncertain which occupations are included in a critical infrastructure sector, may consult government occupational classifications if helpful but are not required to do so.[264] Furthermore, a recipient government does not need to submit to Treasury for approval its designation of a sector as essential critical infrastructure; rather, Treasury will defer to the reasonable interpretation of the recipient government and the discretion of the recipient's chief executive in making such designations. If a recipient is unsure if a non-public sector is covered by the definition in the final rule,[265] the chief executive (or equivalent) of a recipient government may also identify the non-public sector as critical so long as the chief executive deems the non-public sector necessary to protecting the health and wellbeing of residents. Treasury has, where possible, clarified the definition of "essential critical infrastructure sectors." For instance, Treasury has clarified in the final rule that work performed by an employee of a Tribal government includes an employee of a Tribal enterprise and discussed in this Supplementary Information how a recipient may qualify other non-public sectors as essential critical infrastructure.

Essential Work

The interim final rule defined "essential work" as work that (1) is not performed while teleworking from a residence and (2) involves either (i) regular, in-person interactions with patients, the public, or coworkers of the individual that is performing the work or (ii) regular physical handling of items that were handled by, or are to be handled by, patients, the public, or coworkers of the individual that is performing the work. Treasury adopted this definition of essential work to ensure that premium pay is targeted to workers that faced or face heightened risks due to the character of their work during a pandemic.

Public Comment: Some commenters found the definition unclear and asked Treasury to clarify what constitutes "essential work." Others disagreed with the essential work test altogether, arguing that it forces recipients to distinguish between essential and non-essential employees, which may be difficult to do. Accordingly, these commenters asked Treasury to allow recipients to determine which workers qualify as essential. Treasury also received several requests that specific occupations be explicitly deemed essential, including all public employees, veterinarians, election administrators, detention staff and sheriff's deputies, and employees of utilities, such as electric power, natural gas, steam supply, water supply, and sewage removal.

Several commenters requested that Treasury not distinguish between remote and in-person work or amend the standard so that employees providing essential services would still be eligible even if they worked remotely. Finally, a few commenters requested clarification as to the definition of "regular" in-person interactions and whether Treasury could clarify which job functions merit more (or less) premium pay.

Treasury Response: Treasury is maintaining the definition of "essential work" in the final rule without modification. The test adopted in the interim final rule was designed to compensate workers facing disproportionate risk due to the pandemic. COVID–19 is transmitted through person-to-person interactions, and therefore, workers with regular in-person interactions are the primary group facing increased health risks. Although COVID–19 is not transmitted primarily by people handling items, such work may present increased risk in certain cases, and the final rule maintains the interim final rule's inclusion of such work in order to give recipient governments the flexibility to include workers performing such work as they determine appropriate. Changing the test as some commenters suggested, *e.g.*, by eliminating the in-person work requirement or allowing recipients to designate which employees are essential, even if not working in person, would no longer focus the program on workers taking on additional health risks and instead allow premium pay to be awarded to individuals who experienced relatively little risk of exposure to COVID–19. To maintain flexibility, Treasury is not defining the term "regular" with regard to in-person interactions, allowing recipients to develop programs based on the specific workforce to be served and local circumstances. Generally speaking, however, recipients are encouraged to consider an eligible worker's risk of exposure in designing premium pay programs.

Respond To

As required by the ARPA, the interim final rule required that premium pay programs "respond to" eligible workers performing essential work during the COVID–19 public health emergency. Premium pay responds to eligible workers performing essential work if it prioritizes low- and moderate-income persons, given the significant share of essential workers that are low- and moderate-income and may be least able to bear added costs associated with illness. The level of the award limit—up to $13 per hour not to exceed $25,000 in aggregate—in the ARPA supports this reasoning.

Accordingly, the interim final rule required written justification for how premium pay to certain higher-income workers responds to eligible workers performing essential work: If a recipient

[264] *See, e.g.*, sources such as Bureau of Labor Statistics, Occupational Outlook Handbook, which provide information on which professions or occupations are typically included in interpretations of a sector, *https://www.bls.gov/ooh/*.

[265] Public sector workers are "eligible workers" under the interim final rule and final rule.

(or grantee) uses SLFRF funds to provide premium pay to an employee and the pay or grant would increase a worker's total pay above 150 percent of their residing state or county's average annual wage for all occupations, as defined by the BLS Occupational Employment and Wage Statistics, whichever is higher, on an annual basis, then the recipient must provide, whether for themselves or on behalf of a grantee, written justification to Treasury detailing how the award responds to eligible workers performing essential work.

Public Comment: Treasury received numerous comments on the wage threshold and the written justification requirement. Several commenters supported the threshold as a way to encourage recipients to target premium pay to lower-income, eligible workers. Some commenters even asked Treasury to make the wage threshold a firm restriction, above which an eligible worker could not receive premium pay. Others agreed with the threshold but also requested flexibility to use existing worker classifications as an administratively simple way to identify workers for whom premium pay would be responsive. For instance, a few commenters asked Treasury to allow recipients or grantees to presume that premium pay "responds to" eligible workers performing essential work when it is provided to employees who are not exempt from the Fair Labor Standards Act (FLSA) overtime provisions—a test that employers are routinely required to apply.[266]

In contrast, several commenters disagreed with the threshold and the requirement for written justification. A few commenters thought the threshold was too low to capture employees in certain critical infrastructure sectors (*e.g.*, public safety, waste collection) and that it did not sufficiently account for the variance in economic need across different geographic areas and family structures. Some smaller communities argued that the threshold was difficult to calculate and apply.

Other commenters proposed revisions for how the threshold is calculated. For instance, a few commenters asked Treasury to consider using alternative earnings measures such as median income. Similarly, another commenter asked Treasury to consider the incomes of workers with different levels of seniority in developing any income thresholds for permitting or reporting on premium pay.

Finally, there was also some uncertainty as to the threshold and the requirement for written justification. Some commenters interpreted the threshold as a hard cap on who was eligible for premium pay, which is not the case. Relatedly, some commenters also requested further guidance on what recipients should include in the written justification submitted to the Secretary.

Treasury Response: The final rule makes some modifications to the determination of when premium pay "responds to" eligible workers performing essential work during the public health emergency. Under the interim final rule, premium pay was responsive if either the workers' pay was below a wage threshold or, if the pay was above a wage threshold, the recipient submitted written justification to Treasury explaining how the premium pay was responsive. The final rule retains these two means of establishing premium pay in response to workers performing essential work and adds an additional means of demonstrating that premium pay is responsive. Under the final rule, a recipient may also show that premium pay is responsive by demonstrating that the eligible worker receiving premium pay is not exempt from the FLSA overtime provisions.[267] This change will expand the number of workers eligible to receive premium pay[268] and does not require recipients to provide written justification to Treasury regarding the workers who are not exempt from the FLSA overtime provisions, making the program easier to administer for recipients. Incorporating this change further simplifies application of the final rule for recipients because Treasury understands that most employers, public and private, are familiar with and are routinely required to apply the FLSA.

With this addition, the final rule provides that premium pay is responsive to eligible workers performing essential work during the public health emergency if each eligible worker who receives premium pay falls into one of three categories: (1) The worker's pay is below the wage threshold, (2) the worker is not exempt from the FLSA overtime provisions, or (3) the recipient has submitted a written justification to Treasury.

The final rule makes it clear that written justification to Treasury is not necessary with respect to eligible workers whose pay is less than the wage threshold. Nor is written justification necessary with respect to eligible workers who are not exempt from the FLSA overtime provisions. The written justification is only necessary if the worker's pay (with or without the premium) exceeds the threshold, *and* the worker is exempt from the FLSA overtime provisions. The final rule also clarifies that a worker's pay exceeds the threshold if either the premium pay increases the worker's total pay above the wage threshold or the worker's total pay was already above the threshold, before receiving premium pay.

Treasury has also updated the final rule to clarify that written justification means a brief, written narrative justification of how the premium pay or grant is responsive to workers performing essential work during the public health emergency. This could include a description of the essential workers' duties, health or financial risks faced due to COVID–19, and why the recipient determined that the premium pay was responsive despite the workers' higher income.

Recipients should refer to SLFRF program reporting guidance, user guides, and other documentation for further guidance on the form and content of the written justification. Treasury anticipates that recipients will easily be able to satisfy the justification requirement for front-line workers, like nurses and hospital staff.

Definition of Premium Pay

The statute defines premium pay as "an amount of up to $13 per hour . . . , in addition to wages or remuneration the eligible worker otherwise receives, for all work performed by the eligible worker during the COVID–19 public health emergency. Such amount may not exceed $25,000 with respect to any single eligible worker." The interim

[267] Department of Labor, Overtime Pay, *https://www.dol.gov/agencies/whd/overtime; see also* 29 U.S.C. 207.

[268] Among workers that report working overtime, roughly 41–44 percent of workers earn above $50,000 per year, which is slightly less than the national average annual wage for all employees according to the Bureau of Labor Statistics' Occupational Employment and Wage Statistics, available at *https://www.bls.gov/oes/.* See also U.S. Census Bureau, Basic Monthly CPS, January 2019 through December 2019, available at *https://www.census.gov/data/datasets/time-series/demo/cps/cps-basic.html.* Notes: Annual earnings reflect weekly wages multiplied by 52. Usual weekly earnings are computed by BLS to include earnings from work such as tips, overtime, regular wages, etc., but not non-labor sources of income such as government transfers and capital gains. Pre-overtime earnings are computed by taking the difference of usual weekly earniugs and earnings from overtime last week and multiplying by 52. Note, some sources multiply weekly earnings by 50 instead of 52 to account for unpaid time off and holidays, so these figures may be slightly larger than those reported elsewhere. Either assumption may overestimate earnings if workers do not work year-round.

final rule incorporated this definition and emphasized that premium pay should be in addition to compensation typically received.

Public Comment: Several submitted comments related to the definition of "premium pay." Several commenters asked Treasury to clarify certain aspects of the interim final rule and statutory definition of premium pay. For instance, a few commenters asked whether the $25,000 limit applies to the annual amount of premium pay received or the aggregate amount of premium pay received over the period of performance. A few commenters requested flexibility as to how premium pay may be awarded, including flexibility to make monthly or quarterly payments or lump sum payments. Finally, commenters requested additional clarification as to how premium pay should be calculated. For instance, a commenter asked how to calculate the amount of and account for overtime pay and other incentive pay.[269]

Treasury Response: Treasury has clarified some of these issues in the final rule. For example, Treasury has clarified in the final rule that the $25,000 per employee limit is for the entire period of performance, not an annual cap. Further, recipients have discretion with respect to the way in which premium pay is awarded to eligible workers (*e.g.*, monthly, quarterly, lump sum), provided that the total premium pay awarded to any eligible worker does not exceed $13 per hour or $25,000 over the period of performance. Finally, a recipient may award premium pay to an eligible worker in addition to the overtime pay already earned by the eligible worker but in no instance may the portion of the compensation funded with SLFRF funds exceed $13 per hour, even if strict time-and-a-half calculation requires more.[270] To the extent that an employer is required under the FLSA to make payments to an eligible worker in excess of $13 per hour or $25,000 in the aggregate over the period of performance, the employer must use a source of funding other than the SLFRF funds to satisfy those obligations.

Program Structure

Public Comment: Several commenters also requested elaboration on eligible types of employees and permissible structures for awarding premium pay. A few commenters asked if premium pay could be awarded to volunteers or those in irregular and non-hourly or salaried employment positions. Similarly, various commenters asked if part-time workers were eligible for premium pay.

Some commenters asked Treasury to provide more detail on when premium pay may be paid retroactively or if a government could reimburse its general fund for hazard pay already paid before the start of the period of performance.

Treasury Response: Treasury has also made clear in the final rule that a recipient may award premium pay to non-hourly or salaried workers as well as part-time workers. Premium pay may not, however, be awarded to volunteers. If a recipient is interested in compensating volunteers with SLFRF funds, then it must do so consistent with the requirements set forth in other eligible use categories; for example, see section Public Sector Capacity and Workforce in Public Health and Negative Economic Impacts.

Under the final rule, recipients may award premium pay retroactively; however, SLFRF funds may not be used to reimburse a recipient or eligible employer grantee for premium pay or hazard pay already received by the employee. To make retroactive premium payments funded with SLFRF funds, a recipient or eligible employer grantee must make a new cash outlay for the premium payments and the payments must be in addition to any wages or remuneration the eligible worker already received, subject to the other requirements and limitations set forth in the ARPA and this final rule.

Finally, as part of accepting the Award Terms and Conditions for SLFRF, each recipient agreed to maintain a conflict-of-interest policy consistent with 2 CFR 200.318(c) that is applicable to all activities funded with the SLFRF award. This award term requires recipients and subrecipients to report to Treasury or the pass-through agency, as appropriate, any potential conflict of interest related to the award funds per 2 CFR 200.112. Pursuant to this policy, decisions concerning SLFRF funds must be free of undisclosed personal or organizational conflicts of interest, both in fact and in appearance. Consistent with this policy, elected officials are prohibited from using their official position and control over SLFRF funds for their own private gain. This policy also prohibits, among other things, elected officials from steering funds to projects in which they have a financial interest or using funds to pay themselves premium pay.

C. Revenue Loss

Background

Sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act provide that SLFRF funds may be used "for the provision of government services to the extent of the reduction in revenue of such . . . government due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year of the . . . government prior to the emergency." This provision allows recipients experiencing budget shortfalls to use payments from the SLFRF funds to avoid cuts to government services and, thus, enables state, local, and Tribal governments to continue to provide valuable services and ensures that fiscal austerity measures do not hamper the broader economic recovery.

State and local government budgets experienced stress in fiscal year 2020 as delayed tax filings and pandemic-related business closures caused revenues to decline sharply.[271] Twenty-two state governments took actions to close budget gaps in fiscal year 2020[272] and nearly 80 percent of cities reported being less able to meet the fiscal needs of their communities relative to fiscal year 2019.[273] Surveys of Tribal governments and Tribal enterprises conducted in 2020 found majorities of respondents reporting substantial cost increases and revenue decreases, with Tribal governments reporting reductions in health care, housing, social services, and economic development activities as a result of reduced revenues.[274]

The economic recovery, aided by the broad distribution of COVID–19 vaccines and the deployment of federal stimulus, has led to a strong rebound in total state and local government revenue and is contributing to a brighter fiscal

[269] *See* 29 U.S.C. 207(a) ("[A]t a rate not less than one and one-half times the regular rate at which he is employed.").

[270] All recipients are required to comply with otherwise applicable laws, including any wage and hour requirements in the Fair Labor Standards Act. *See generally,* Department of Labor, *Wages and the Fair Labor Standards Act, https://www.dol.gov/agencies/whd/flsa.*

[271] In the second quarter of 2020, quarterly state and local tax revenues as reported by the U.S. Census Bureau fell 19 percent compared to the second quarter of 2019; U.S. Census Bureau, Quarterly Summary of State and Local Tax Revenue, *https://www.census.gov/programs-surveys/qtax.html.*

[274] Surveys conducted by the Center for Indian Country Development at the Federal Reserve Bank of Minneapolis in March, April, and September 2020. Elijah Moreno & Heather Sobrepena, Tribal entities remain resilient as COVID–19 batters their finances, Federal Reserve Bank of Minneapolis (Nov. 10, 2020), *https://www.minneapolisfed.org/article/2020/tribal-entities-remain-resilient-as-covid-19-batters-their-finances.*

outlook for most jurisdictions as compared to the earlier months of the public health emergency. For the fiscal year ending June 30, 2021, total state and local government tax revenues increased 21 percent relative to the same period in 2020, reflecting the combined impact of the modified tax filing deadline in 2020 and an improving economy.[275] However, despite a stable budget situation overall, many governments face uncertainty as the COVID–19 pandemic continues to impact commuting patterns, hospitality and tourism, and other drivers of jurisdictions' economies. Thirty-five percent of cities still report being less able to meet financial needs than in fiscal year 2020,[276] and over half of surveyed Tribal governments and Tribal enterprises reported losing at least 40 percent of their revenue since the start of the pandemic.[277] Budget challenges persist as governments work to mitigate and contain COVID–19 and help citizens weather the economic downturn.

State, local, and Tribal government budgets affect the broader economic recovery. During the period following the 2007–2009 recession, state and local government budget pressures led to fiscal austerity that was a significant drag on the overall economic recovery.[278] Inflation-adjusted state and local government revenue did not return to the previous peak until 2013,[279] while employment in the sector returned to the previous peak in August 2019, nearly a decade later.[280] Just months after recouping losses from the previous downturn, the COVID–19 pandemic caused state and local government employment to contract again, but this time more sharply: By May 2020, state and local government payrolls fell 7.7 percent compared to February 2020. Despite improvement, non-federal public sector job growth continues to lag behind the rest of the U.S. labor market recovery.[281]

Summary of Interim Final Rule

As stated above, the Social Security Act provides that SLFRF funds may be used "for the provision of government services to the extent of the reduction in revenue of such . . . government due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year of the . . . government prior to the emergency." The interim final rule provided a formula for calculating revenue loss through a four-step process:

- *Step 1:* Identify revenues collected in the most recent full fiscal year prior to the public health emergency (*i.e.*, last full fiscal year before January 27, 2020), called the *base year revenue.*
- *Step 2:* Estimate *counterfactual revenue,* which is the amount of revenue the recipient would have expected in the absence of the downturn caused by the pandemic. The counterfactual revenue is equal to *base year revenue* * [(1 + *growth adjustment*) ^ (*n*/12)], where *n* is the number of months elapsed since the end of the base year to the calculation date, and *growth adjustment* is the greater of the average annual growth rate across all State and Local Government "General Revenue from Own Sources" in the most recent three years prior to the emergency, 5.2 percent, or the recipient's average annual revenue growth in the three full fiscal years prior to the COVID–19 public health emergency.[282] This approach to the growth rate provides recipients with the option to use a standardized growth adjustment when calculating the counterfactual revenue trend and thus minimizes administrative burden, while not disadvantaging recipients with revenue growth that exceeded the national average prior to the COVID–19 public health emergency by permitting these recipients to use their own revenue growth rate over the preceding three years.
- *Step 3:* Identify *actual revenue,*[283] which equals revenues collected over the twelve months immediately preceding the calculation date.
- *Step 4:* The extent of the reduction in revenue is equal to *counterfactual revenue* less *actual revenue.* If *actual revenue* exceeds *counterfactual revenue,* the extent of the reduction in revenue is set to zero for that calculation date.

For illustration, consider a hypothetical recipient with *base year revenue* equal to 100 (Step 1) that ends on June 30, 2019. In Step 2, the hypothetical recipient finds that the average annual growth across all state and local government "General Revenue from Own Sources" in the most recent three years of available data, 5.2 percent, is greater than the recipient's average annual revenue growth in the three full fiscal years prior to the public health emergency. In this illustration, *n* (months elapsed) and *counterfactual revenue* would be equal to:

As of:	12/31/2020	12/31/2021	12/31/2022	12/31/2023
n (months elapsed)	18	30	42	54
Counterfactual revenue:	107.9	113.5	119.4	125.6

[282] At the time the interim final rule was published, the average annual growth across all state and local government "General Revenue from Own Sources" in the most recent three years of available data (2015–2018) was 4.1%, which was presented as one option for the growth adjustment. Since the interim final rule was published, 2019 data has been made available, which increases this rate to 5.2%. The final rule updates the percentage to 5.2%, as shown in Step 2.

[283] As explained below, in the final rule, recipients must adjust actual revenue amounts based on certain tax policy changes.

The figure below illustrates the reduction in revenue for the hypothetical recipient calculated in accordance with the methodology.

Finally, as explained in greater detail below, the clear meaning of the statutory phrase "due to the COVID–19 public health emergency" is that it is referring to revenue reductions caused by the public health emergency. As such, it does not include revenue reduced for reasons other than the public health emergency. Treasury in the interim final rule presumed that any reduction in revenue relative to the counterfactual estimate would be considered revenue lost due to the pandemic and thereby relieved recipients of the administrative burden of determining the extent to which reduction in revenue was due to the public health emergency. The calculation methodology in the interim final rule implicitly assumed that recipients did not suffer a loss in revenue due to the public health emergency if they did not experience a reduction in aggregate revenue compared to the counterfactual estimate. The interim final rule invited comments on whether Treasury should revise its presumption to "take into account other factors, including actions taken by the recipient as well as the expiration of the COVID–19 public health emergency, in determining whether to presume that revenue losses are 'due to' the COVID–19 public health emergency."

Treasury received a substantial number of comments on the revenue loss provisions set forth in the interim final rule. These comments largely pertained to the following topics: The overall methodology for calculating revenue loss; the definition of "revenue"; whether revenue should be aggregated or calculated on some alternative basis (*e.g.*, source-by-source or fund-by-fund); the appropriate calculation dates (*i.e.*, fiscal year or calendar year); the presumption that all revenue loss is due to the pandemic; the base year; and the definition of "government services."

Overall Methodology for Calculating Revenue Loss

As noted above, the interim final rule provided a formula for recipients to calculate revenue loss by comparing actual revenues received during a given time-period with a counterfactual amount of revenue based on revenues in the base year and an adjustment for expected growth in revenue each year.

Public Comment: Treasury received many public comments on the overall methodology for calculating revenue loss. Some recipients, including smaller governments, have expressed concern regarding the burden associated with the calculation of revenue loss, particularly the burden involved in calculating the amount of general revenue, given that the definition of general revenue in the interim final rule does not always align with the definition of revenue already calculated by recipients for other purposes, and requested clarifications regarding a number of components, including the definition of revenue. Commenters also asked for clarification on the relationship between revenue loss calculations across different calculation dates. Other commenters argued that the revenue loss formula does not precisely capture the nuances of local revenues or their particular situation. For example, some commenters stated that requiring that revenues be aggregated fails to capture decreases in revenue sources that cannot easily be made up for with other revenue sources.

Treasury Response: In the final rule, Treasury is largely maintaining the revenue loss formula as set forth in the interim final rule. To address comments that the formula for calculating revenue loss was difficult to apply, Treasury is including an option for recipients to use a standard allowance for revenue loss. Specifically, in the final rule, recipients will be permitted to elect a fixed amount of loss that can then be used to fund government services. This fixed

amount, referred to as the "standard allowance," is set at up to $10 million total for the entire period of performance not to exceed the recipient's SLFRF award amount. Although Treasury anticipates that this standard allowance will be most helpful to smaller local governments and Tribal governments, any recipient can use this standard allowance instead of calculating revenue loss pursuant to the formula above, so long as recipients employ a consistent methodology across the period of performance (*i.e.*, choose either the standard allowance or the regular formula). Treasury intends to amend its reporting forms to provide a mechanism for recipients to make a one-time, irrevocable election to utilize either the revenue loss formula or the standard allowance.

The $10 million level is based on average revenue loss across state and local governments, taking into consideration potential variation in revenue types and losses and continued uncertainty faced by many recipients regarding revenue shortfalls. To calculate this estimate, Treasury applied a variation of the final rule's revenue loss calculation on available aggregate state and local government tax revenue data as reported by the Census Bureau for the first calculation date of December 31, 2020. This estimate accounts for expected variation across recipient experiences and reflects the fact that the final rule revenue loss calculation provides recipients several options for specific aspects (*e.g.*, calendar year or fiscal year basis; use of average state and local revenue growth rate or specific local rate). Treasury compared actual calendar year 2020 tax revenues, in aggregate for all state and local governments, to several counterfactual trends that vary based on the end date of the fiscal base year.[284] Treasury also assessed counterfactual trends using different revenue growth rates (*e.g.*, the three-year average growth rates of total state and local government general revenue for both fiscal years ending in 2016–2018 and fiscal years ending in 2017–2019; the three-year average growth rates of total state and local government tax revenues for fiscal years ending in 2017–2019; and the one-year growth rate for total state and local government tax revenue in the last full fiscal year before the public health emergency). To account for the fact that the initial estimate, based on tax revenue, only includes a subset of recipient aggregate general revenue, Treasury applied a scaling factor to recognize that tax revenues generally make up just over half of general revenue collected by state and local governments (*i.e.*, Treasury scaled up its estimate based on tax revenue to produce an estimate for total general revenue).[285] The resulting calculation was then extrapolated over the four-year period of performance and divided by a population of interest to arrive at an average loss estimate.

As noted above, Treasury estimated a range of scenarios to account for different values of the variables that would impact average losses. For example, the end date of the fiscal base year and growth rate of counterfactual revenue impact the overall estimate of revenue loss. In addition, this estimate takes into consideration the limitations in the available data. The governments covered by the Census Bureau's survey do not entirely align with SLFRF recipients. The Census Bureau's figures are based on 50 state governments, all local government property tax collectors and local government non-property tax imposers, representing at a minimum the more than 38,000 "General Purpose Governments" defined by Census. However, there are only roughly 32,000 recipients of SLFRF funds. Thus, Treasury considered the difference between the number and type of entities in the Census Bureau data and the SLFRF recipients.

Based on this methodology, Treasury estimates that average revenue loss (determined by comparing the counterfactual revenue to actual revenue) may range from $0 to $11.7 million per recipient over the period of performance.[286] Treasury settled on a point estimate toward the upper end of the range of potential averages, in part, to account for significant variation in the experiences of recipient governments: Some recipients likely experienced losses at the upper end of this range of potential averages. A point estimate toward the upper end of the range errs toward ensuring more recipients' experiences are covered and increases the utility of the standard allowance for SLFRF recipients. Specifically, the program includes a very large number of recipients with relatively smaller awards; these recipients have tended to describe having greater difficulty completing the regular revenue loss calculation. Thus, selecting a point estimate toward the higher end of the expected range not only increases the likelihood that the standard allowance will reflect the experience of a larger number of SLFRF recipients but is more responsive to the comments of those with smaller awards. In addition, using a point estimate toward the upper end of the range accounts for the difficulty and uncertainty in predicting revenue losses years into the future, throughout the period of performance.[287]

Finally, Treasury selected a single allowance level, as opposed to varying levels, to further the goals of simplicity, flexibility, and administrability. Furthermore, data limitations make it difficult to distinguish between types of local governments.[288]

General Revenue

The interim final rule adopted a definition of "general revenue" based largely on the components reported under "General Revenue from Own Sources" in the Census Bureau's Annual Survey of State and Local Government Finances. Under the interim final rule, general revenue included revenue collected by a recipient and generated from its underlying economy, and it would capture a range of different types of tax revenues, as well as other types of revenue that are available to support government services.[289] Specifically, revenue under the interim final rule included money that is received from tax revenue, current charges, and miscellaneous general revenues and excluded refunds and other correcting transactions, proceeds from issuance of debt or the sale of investments, agency or private trust transactions, revenue from utilities, social insurance trust revenues, and intergovernmental

[284] Because the Census Bureau's state and local government tax revenue data is reported on a quarterly frequency, fiscal base year end dates of March 31, June 30, September 30, and December 31 were used in this assessment.

[285] Annual Survey of State and Local Government Finances (2019).

[286] This is the range of averages that Treasury calculated by varying the aforementioned assumptions.

[287] See, *e.g.*, Government Accountability Office, State and Local Governments: Fiscal Conditions During the COVID–19 Pandemic in Selected States (July 2021) (noting that "[s]tate and local government revenues partly depend on the overall economy, and actions to stem the spread of the virus drastically reduced economic activity."); Board of Governors of the Federal Reserve System, Monetary Policy Report (July 9, 2021) (noting that the pandemic "pushed down state and local government tax collections" and that while some of the drag is "abating" state and local "government payrolls . . . have only edged up from their lows at the onset of the pandemic").

[288] Local government tax revenue data in the Census Bureau's Quarterly Summary of State and Local Tax Revenue, *supra* note 271, is provided on an aggregated basis.

[289] The Department also released guidance clarifying how a recipient may determine whether a particular entity is "part of the recipient's government." *See FAQ 3.14.* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

transfers from the federal government, including transfers made pursuant to section 9901 of the ARPA.[290] In the case of Tribal governments, it also included revenue from Tribal business enterprises.

Public Comment: Many commenters asked Treasury to include certain items in the definition of "general revenue." For instance, several commenters that operate their own utilities asked that revenue from utilities be included, arguing that declines in utility revenue directly affect contributions to their general funds. Many of these commenters noted that moratoriums on utility shutoffs and a decline in collections have resulted in significant budgetary pressures.

Some commenters also asked for the exclusion of certain intergovernmental transfers in the definition of general revenue, including transfers of shared revenue from the state.[291] Other commenters asked for the inclusion of certain transfers from the federal government, including fees paid for services and grants that are, in effect, paid for the provision of services.

Treasury also received multiple requests to include revenue from Tribal enterprises in the definition of "general revenue" and that "Tribal enterprise" be defined broadly. Others asked for the ability to choose whether to include revenue from Tribal enterprises.

Finally, some commenters requested that the definition of general revenue exclude certain sources of revenue, such as revenue sources that do not support a general fund (*i.e.*, revenue sources that are restricted in use). Commenters also asked that general revenue exclude revenue from special assessments, settlements that make the recipient whole for past expenditures, and one-time revenues such as revenue from the sale of property.

Treasury Response: In the final rule, Treasury has maintained the definition of "general revenue" from the interim final rule with two exceptions.

Treasury has adjusted the definition to allow recipients that operate utilities that are part of their own government to choose whether to include revenue from these utilities in their revenue loss calculation. This change responds to comments from recipients indicating that revenue from utilities is used to fund other government services and that utility revenues have declined on aggregate.[292] This approach is consistent with other eligible uses, which recognize decreased ability of many households to make utility payments; see section Assistance to Households, which identifies utility assistance as an enumerated eligible use of funds, including through direct or bulk payments to utilities for consumer assistance. Furthermore, for utilities or other entities (*e.g.*, certain service districts) that are not part of the recipient government, a transfer from the utility to the recipient constitutes an intergovernmental transfer and therefore is included in the definition of "general revenue."[293]

Treasury has also added liquor store revenue to the definition of general revenue. The Supplemental Information to the interim final rule stated that the definition of tax revenue would include liquor store revenue, but the text of the rule did not include it. Accordingly, in the final rule, Treasury is clarifying that revenue includes liquor store revenue. However, Treasury believes revenue from government-owned liquor stores is better classified as general revenue than it is as tax revenue, so the final rule includes it as part of general revenue.

In response to requests that the definition of general revenue exclude revenue from special assessments, settlements that make the recipient whole for past expenditures, and one-time revenues such as revenue from the sale of property, Treasury is maintaining its position in the final rule that such revenue is included in general revenue. While such revenues may be less predictable than other sources of revenue (*e.g.*, property taxes), these are not uncommon sources of revenue for recipients, and their inclusion provides a more complete view of the financial health of a recipient government and is consistent with the Census Bureau methodology. Treasury is also maintaining the exclusion of all payments from the federal government (including payments for services) from general revenue in order to avoid substantial dilution of the definition of revenue, particularly in light of extraordinary fiscal support provided during the pandemic. Treasury is maintaining the inclusion of intergovernmental transfers other than from the federal government for the reasons provided in the Supplemental Information to the interim final rule; to do otherwise would be to significantly distort the revenue calculations for local governments that regularly receive revenue sharing payments, for example, from their state governments. Treasury is also maintaining the approach that "general revenue" includes revenue from Tribal enterprises. This approach recognizes that these enterprises often form the revenue base for Tribal governments' budgets.

To ease the burden on recipients and account for anomalous variations in revenue, as mentioned above, Treasury has incorporated a "standard allowance" option into the final rule. A recipient may choose to use the standard allowance, which under the final rule is set at up to $10 million, not to exceed the recipient's SLFRF award amount, as an alternative to calculating revenue loss according to the formula described above. This addition will promote administrative efficiency and simplify the revenue loss calculation for the vast majority of recipients. Treasury intends to amend its reporting forms to provide a mechanism for recipients to elect to utilize either the revenue loss formula or the standard allowance, in addition to other changes made as part of the final rule.

Aggregate Revenue Loss Calculation

Under the interim final rule, revenue loss was calculated based on aggregate revenues and therefore loss in one type of revenue could be offset by gains in another. The amount of SLFRF funds available to provide government services was based on overall net revenue loss. In the Supplementary Information to the interim final rule, Treasury asked commenters to discuss the advantages and disadvantages of, and any potential concerns with, this approach, including circumstances in which it could be necessary or

[290] The interim final rule stated that "general revenue" and "tax revenue" excludes refunds and other correcting transactions. Instead of "excluding" refunds and other correcting transactions, the Census Bureau methodology upon which those definitions are based provides that general revenue and tax revenue are determined "net of" refunds and other correcting transactions. The use of "excluding" in the interim final rule is substantively the same as the Census Bureau methodology. However, to be consistent with the terminology used by the Census Bureau, the final rule uses "net of" instead of "excluding." Current charges are defined as "charges imposed for providing current services or for the sale of products in connection with general government activities." It includes revenues such as public education institution, public hospital, and toll revenues. Miscellaneous general revenue comprises of all other general revenue of governments from their own sources (*i.e.*, other than utility and insurance trust revenue), including rents, royalties, lottery proceeds, and fines.

[291] The interim final rule excluded governmental transfers from the Federal Government, but it did not exclude intergovernmental transfers from other governmental units for purposes of the revenue loss provisions.

[292] U.S. Energy Information Administration, Annual Electric Utility Data (October 2021), *available at https://www.eia.gov/electricity/sales_revenue_price/.*

[293] FAQ 3.14 provides further guidance on how to determine what entities constitute a government for purposes of calculating revenue loss. *See* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

appropriate to calculate the reduction in revenue by source.

Public Comment: Treasury received many comments stating that revenue loss should be calculated on a source-by-source basis. Some commenters argued that a source-by-source approach would be administratively simpler. Other commenters argued that calculating revenue loss source-by-source would better reflect the impact of the COVID–19 pandemic on their ability to fund government services because revenue gains in one source cannot always be used to make up for losses in another. For similar reasons, other commenters asked that revenue loss be calculated on a fund basis.

Treasury Response: Treasury considered alternative methods (*e.g.*, source-by-source, fund-by-fund) but ultimately determined to maintain the calculation of revenue loss in the aggregate. The pandemic has had different effects on recipients (and their revenues), and Treasury recognized that one particular type of revenue or one particular source may have experienced a greater amount of loss for some recipients. However, the statute refers only to "*the* reduction in revenue of such State, local government, or Tribal government." The statute is thus clear that Treasury is to refer to the aggregate revenue reduction of the recipient due to the public health emergency. Further, this provision is designed to address declines in the recipients' overall ability to pay for governmental services, and calculating revenue loss on an aggregate basis provides a more accurate representation of the effect of the pandemic on overall revenues and the fiscal health of the recipient. In many circumstances, recipient governments have flexibility to use revenues from an array of sources and offset declines in some sources with gains in others. While the details and configuration of this flexibility vary widely across recipient governments, calculating revenue loss on a source-by-source or fund-by-fund basis would not capture how recipient governments balance their budgets in the regular course of business. Accordingly, the final rule maintains the requirement that revenue loss is to be calculated on an aggregate basis.

Calculation Dates

Public Comment: Under the interim final rule, recipients calculate revenue loss as of the end of the calendar year. Treasury received many comments requesting that recipients be permitted to calculate revenue loss as of the end of their fiscal year. Commenters argued that doing so would be simpler and less burdensome on recipients and that financial data as of the end of the fiscal year is audited and therefore more reliable. Commenters also argued that recipients' fiscal years are structured around the timing of major revenue sources, and that the Census Bureau uses fiscal years in its Annual Survey.

Treasury also received comments about the use of multiple calculation dates. Several Tribal governments stated that they would not see ongoing revenue losses due to the COVID–19 public health emergency and asked to be able to determine revenue loss as of the first calculation date. Several commenters asked whether revenue loss is determined independently for each year, so that a gain in one year does not offset a loss in another, or whether revenue loss is cumulative from the beginning of the pandemic.

Treasury Response: In the final rule, Treasury has made adjustments to give recipients more flexibility with respect to calculation dates and to clarify certain elements. Specifically, the final rule provides recipients the option to choose whether to calculate revenue loss on a fiscal year or calendar year basis, though they must choose a consistent basis for loss calculations throughout the period of performance. Treasury has also clarified in the final rule that revenue loss is calculated separately for each year such that the calculation of revenue lost in one year does not affect the calculation of revenue lost in prior or future years.

Presumption That Revenue Loss Is Due to the Pandemic

As stated above, sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act provide that SLFRF funds may be used "for the provision of government services to the extent of the reduction in revenue of such . . . government due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year of the . . . government prior to the emergency." As discussed in the interim final rule, although revenue may decline for reasons unrelated to COVID–19, in order to minimize the administrative burden on recipients in calculating revenue loss and take into consideration the devastating effects of the COVID–19 public health emergency, any reduction in revenue relative to the counterfactual estimate was presumed in the interim final rule to be considered revenue lost due to the pandemic.

Treasury stated in the Supplementary Information to the interim final rule that it was considering when, if ever, during the period of performance it would be appropriate to reevaluate the presumption that all losses are attributable to the public health emergency. Treasury also sought comment on whether to take into account other factors, including actions taken by the recipient as well as the expiration of the COVID–19 public health emergency, in determining whether to presume that revenue losses are "due to" the COVID–19 public health emergency.

Public Comment: Treasury received many comments in support of the presumption, as well as some opposed. Some commenters argued that the presumption eases the administrative burden on recipients because, without it, it would be difficult to identify which losses are attributable to the COVID–19 public health emergency. Many commenters also argued that Treasury should maintain the presumption because recipients are likely to experience losses due to the public health emergency even after the end of the public health emergency. Treasury also received comments asking that it adjust any revenue loss calculation to account for tax changes enacted by the recipient. In particular, some commenters noted that some recipients had increased taxes in order to meet additional demands for government services or to address declines in revenue due to the pandemic. These tax increases have in some cases offset some or all of the actual revenue loss attributable to the public health emergency. Because the interim final rule calculates revenue loss by reference to actual revenue collected, commenters argued that the calculation of revenue loss "due to" the public health emergency needs to take into consideration the effects of tax increases by deducting the effect of these tax increases from actual revenue collected.

Treasury Response: In the final rule, Treasury has maintained the presumption that a reduction in a recipient's revenue is due to the public health emergency with certain adjustments to respond to comments and to better account for revenue loss "due to the COVID–19 public health emergency." The final rule makes adjustments to the presumption to take into account certain government actions to change tax policy. In particular, Treasury is adjusting the presumption to account for changes to tax policy by providing that changes in revenue that are caused by tax increases or decreases adopted after the issuance of the final rule will not be treated as due to the public health emergency.

Presumption of Revenue Loss "Due To" the Pandemic

In enacting sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act, Congress provided that a state, local government, or Tribal government could use funds to "cover costs . . . for the provision of government services," but only "to the extent of the reduction in revenue . . . due to the COVID–19 public health emergency relative to revenues collected in the most recent full fiscal year . . . prior to the emergency." In doing so, Congress recognized that the pandemic was causing significant disruption to economic activity and sought to minimize the impact of associated revenue losses on the ability of the recipient to provide government services when such services were needed most.[294] The text of the statute itself reinforces this important context: The law specifically limits funds to cover revenue losses that both are "due to the COVID–19 public health emergency" and could impact "the provision of government services."

Courts have recognized that the phrase "due to" can refer to various causal standards.[295] Here, in the context of Congress's addressing economic disruptions caused by the COVID–19 pandemic that could impact both revenues and government services, the key consideration is whether a revenue loss experienced by the recipient resulted from the exogenous impacts of the public health emergency (and were thus "due to" the pandemic) or instead from the recipient's own discretionary actions (and, in this context, were not "due to" the pandemic). Reductions in revenue due to the public health emergency does not cover revenue reductions that resulted from a recipient's own discretionary actions.

In the interim final rule, Treasury included a presumption that all revenue loss is due to the pandemic in order to minimize the administrative burden on recipients discussed above and take into consideration the devastating effects of the COVID–19 public health emergency. Based on comments, Treasury believes that the reasons for the presumption continue to be valid and has determined to maintain the presumption in the final rule with certain modifications. In particular, at this point in the course of the pandemic, with the fiscal pressure on state and local governments having been significantly reduced, it is appropriate for Treasury to reassess aspects of this presumption. As discussed below, the final rule requires recipients to exclude the value of tax policy changes adopted after January 6, 2022.

Recipients of the SLFRF range from states to the smallest local governments. At the time that the interim final rule was adopted, it was important for recipients to be able to calculate with ease and certainty their amount of revenue loss so that they could begin deploying these funds to continue to maintain essential government services. To this end, the presumption in the interim final rule provided a relatively simple formula for all recipients to use, but the exigent need for recipients to immediately deploy funds for the provision of government services has decreased and the benefit of the presumption in reducing administrative burden is less relevant for those governments that are not likely to avail themselves of the standard allowance described above.

Consistent with these considerations, the final rule requires recipients to exclude revenue loss due to tax changes adopted after January 6, 2022. Eliminating revenue loss due to tax changes from the presumption is appropriate given the significance of tax revenue as a portion of all revenue for state and local governments, the direct impact of tax policy decisions on revenue collected, and the relative ease with which recipients can isolate the estimated effect of a tax change on revenue.[296] Most state budgeting processes require a "budget score," often developed through a consensus process with executive and legislative branch experts,[297] and Treasury expects that larger localities, those most likely to utilize the revenue loss formula rather than the standard allowance, also regularly use revenue or budget estimates when considering changes to tax policies. As such, in many cases, recipients already prepare estimates of the impact of tax changes on revenue, and as discussed below, Treasury will generally permit recipients to rely on such estimates in adjusting their revenue loss calculations.

Reductions in revenue that are not attributable to tax changes would continue to be subject to the presumption. A requirement that recipients evaluate the revenue effect of changes in discretionary policy actions other than tax changes would be more difficult for recipients than evaluating the changes attributable to tax changes given that state and local governments do not generally prepare estimates of the revenue effects of other actions. Finally, as noted above, taxes are the single largest source of revenue for state and local government recipients in the aggregate.

Revisions to Presumption To Address Tax Reductions

For these reasons, Treasury is providing in the final rule that changes in general revenue that are caused by tax cuts adopted after the date of adoption of the final rule (January 6, 2022) will not be treated as due to the public health emergency, and the estimated fiscal impact of such tax cuts must be added to the calculation of "actual revenue" for purposes of calculation dates that occur on or after April 1, 2022. Tax cuts include final legislative or regulatory action or a new or changed administrative interpretation that reduces any tax (by providing for a reduction in a rate, a rebate, a deduction, a credit, or otherwise) or delays the imposition of any tax or tax increase and that the recipient assesses has had the effect of reducing tax revenue relative to current law. This includes the phase-in or taking effect of any statute or rule if the phase-in or taking effect was not prescribed prior to the issuance of the final rule.

In assessing whether a tax change has had the effect of reducing tax revenue, recipients may either calculate the actual effect on revenue or rely on estimates prepared at the time the tax change was adopted. More specifically, recipients may rely on information typically prepared in the course of developing the budget (*e.g.*, expected revenues) and/or considering tax changes (*e.g.*, budget scores, revenue notes) to determine the amount of revenue that would have been collected in the absence of the tax cut, as long as those estimates are based on reasonable assumptions and do not use dynamic methodologies that incorporate the projected effects of macroeconomic growth, given that macroeconomic

[294] *See also* sections 602(a)(1) and 603(a) of the Social Security Act (appropriating the funds for payment to recipients in order to "mitigate the fiscal effects stemming from the public health emergency").

[296] Treasury considered whether to also eliminate the presumption with respect to losses resulting from other changes in policy, such as decreases in user fees or fines. However, the effects of these changes are more minor overall and would be more challenging to accurately identify and quantify, so the administrability benefit of the presumption for recipients outweighs whatever distortion there might be as a result of not reflecting such changes.

[297] *See generally*, National Association of State Budget Officers, Budget Processes in the States, (2021), available at *https://higherlogicdownload.s3.amazonaws.com/NASBO/9d2d2db1-c943-4f1b-b750-0fca152d64c2/UploadedImages/Budget%20Processess/NASBO_2021_Budget_Processes_in_the_States_S.pdf.*

growth is accounted for in the counterfactual growth assumptions. Recipients that choose to calculate the actual effect of a tax change on revenue must similarly base their calculations on reasonable estimates that do not use dynamic methodologies. Recipients should apply this adjustment in determining their actual revenue totals at Step 3 in the revenue loss calculation described above.

Revisions to Presumption To Address Tax Increases

As noted above, the calculation methodology in the interim final rule implicitly assumed that recipients did not experience a reduction in revenue due to the public health emergency if they did not experience a reduction in aggregate revenue relative to the counterfactual estimate. Treasury recognizes that some recipients may have experienced a reduction in revenue due to the public health emergency that was offset by other revenue, particularly in the case of increases to tax revenue resulting from a tax increase. The final rule requires recipients that increased taxes to deduct the amount of increases to revenue attributable to such tax increase. This change is also consistent with the incorporation in the interim final rule and final rule of a counterfactual growth rate, which effectively permits recipients to count revenue losses due to the public health emergency that are offset by increased tax revenue resulting from organic growth.

For these reasons, Treasury is providing in the final rule that recipients must subtract from their calculation of actual revenue the effect of tax increases adopted after the date of adoption of this final rule (January 6, 2022) for purposes of calculation dates that occur on or after April 1, 2022. This change and the change to the final rule described above treat tax changes in a consistent manner: In the case of reduction in revenue resulting from a tax cut, a recipient must add the amount of that reduction to its calculation of actual revenue, and in the case of an increase in revenue resulting from a tax increase, a recipient must subtract the amount of additional revenue collected as a result of the tax increase from its calculation of actual revenue.[298]

As is the case with tax cuts, discussed above, tax increases that must be reflected in the calculation of revenue include final legislative or regulatory action or a new or changed administrative interpretation that increases any tax and that the recipient assesses has had the effect of increasing tax revenue relative to current law. In assessing whether a tax change has had the effect of increasing tax revenue, recipients may either calculate the actual effect on revenue or rely on estimates prepared at the time the tax change was adopted. Recipients may rely on information typically prepared in the course of developing the budget (*e.g.*, expected revenues) and/or considering tax changes (*e.g.*, budget scores, revenue notes) to determine the amount of revenue that was collected as a result of the tax increase as long as those estimates are based on reasonable assumptions and do not use dynamic methodologies that incorporate the projected effects of macroeconomic growth, given that macroeconomic growth is accounted for in the counterfactual growth assumptions. Recipients that choose to calculate the actual effect of a tax change on revenue must similarly base their calculations on reasonable estimates that do not use dynamic methodologies. Recipients should apply this adjustment in determining their actual revenue totals at Step 3 in the revenue loss calculation described above.

Previously Adopted Tax Changes

As discussed above, the final rule will not require recipients to reflect the revenue effects of tax increases or decreases adopted prior to the adoption of the final rule. Recipients that adopted a tax change in a previous period will not be required to recalculate the amount of revenue loss as of prior calculation dates or to reflect the fiscal impacts of such tax changes in calculation dates after the effective date of the final rule. However, the final rule will permit recipients to elect to reflect the revenue effects of their tax changes adopted between the beginning of the public health emergency and the adoption of the final rule.[299] If a recipient elects to do so, it must do so with respect to all of its tax changes adopted between the beginning of the public health emergency and the adoption of the final rule. Treasury intends to revise its reporting requirements to permit recipients to amend their previously reported calculation periods to reflect such changes.

Determination of the Base Year

Under the ARPA and interim final rule, SLFRF funds may be used "for the provision of government services to the extent of the reduction in revenue . . . relative to revenues collected in the most recent full fiscal year" of the recipient. Therefore, the base year for the revenue loss calculation is the most recent full fiscal year prior to the COVID–19 public health emergency.

Public Comment: Treasury received multiple comments asking for flexibility in determining base year revenues. For instance, some commenters asked to use a different base year than the "most recent full fiscal year" prior to the pandemic for calculating revenue loss; others asked to be able to average prior years. Commenters stated that, for various reasons, revenue was artificially low in the last full fiscal year prior to the public health emergency, and, therefore, using revenue in that year as the base year did not accurately reflect expected revenue in a normal year. For example, several Tribes stated that unforeseeable weather events resulted in forced closure of casinos which, in turn, artificially deflated revenues in the base year. Other commenters indicated that one-time anomalies in the timing of tax collection in that year artificially pushed revenue into the following fiscal year. Similarly, a few commenters noted that tax changes that took effect in the middle of the base year may artificially skew the size of the revenue loss experienced by the recipient government.

Treasury Response: Treasury understands that recipients may have experienced events in the base year that led to lower or higher revenues than what they otherwise would have collected. The ARPA provides that revenue loss is to be determined with respect to revenue in the most recent full fiscal year prior to the pandemic, and therefore the final rule maintains its incorporation of the statutory definition.

In calculating revenue loss, recipients may use data on a cash, accrual, or modified accrual basis, provided that recipients are consistent in their choice of methodology throughout the covered period, which might help recipients adjust to certain delays in revenue receipt. Both the standard allowance and elements of the formula (*e.g.*,

[298] The final rule does not permit recipients to reflect the effects of other changes in policy, such as increases in fees adopted after adoption of the final rule. Treasury understands that the main beneficiaries of such a change would be those recipients that will benefit from the standard allowance provided for in the final rule and that for other recipients the administrative burden on recipients needed to calculate these adjustments would outweigh the benefit of having a somewhat larger amount of funds available for government services.

[299] The final rule also addresses the possibility that some recipients may have fiscal years ending during the period between January 6, 2022 and April 1, 2022; such recipients' election to reflect tax changes from prior periods would also apply to changes during this period with respect to the calculation date in this period.

counterfactual growth rate) incorporate generous assumptions to give recipients flexibility and to account for variation among recipients' experiences during the pandemic.

Government Services

The **SUPPLEMENTAL INFORMATION** to the interim final rule provided a non-exhaustive list of examples of services that are government services. The interim final rule also discussed why neither payment of debt service nor replenishing financial reserves constitutes government services, as these expenditures do not provide services but relate to the financing of such services. Similarly, government services under the interim final rule did not include satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring in a judicial, administrative, or regulatory proceeding, unless the judgment or settlement required the provision of government services.

Public Comment: Treasury received several comments requesting further clarification regarding the scope of government services, including asking for either a specific definition of government services or that a specific use be expressly deemed to be a government service. Some commenters disagreed with the exclusions from government services in the interim final rule. For instance, many of the comments Treasury received suggested that replenishing reserve funds and at least certain types of debt service should be treated as providing governmental services. Some commenters also suggested that a recipient should be able to use funds for costs incurred before March 3, 2021. Other commenters asked Treasury to maintain the prohibition on using the funds to pay debt service.

Treasury Response: Treasury continues to believe that the lists of activities that either are or are not providing government services are accurate but is clarifying here that, generally speaking, services provided by the recipient governments are "government services" under the interim final rule and final rule, unless Treasury has stated otherwise. Government services include, but are not limited to, maintenance or pay-go funded building [300] of infrastructure, including roads; modernization of cybersecurity, including hardware, software, and protection of critical infrastructure; health services; environmental remediation; school or educational services; and the provision of police, fire, and other public safety services.

The aforementioned list of government services is not exclusive. However, recipients should be mindful that other restrictions may apply, including those articulated in the section Restrictions on Use. In the final rule, Treasury is maintaining the limitations on government services included in the interim final rule and has addressed and responded to public commenters on these issues in the section Restrictions on Use.

D. Investments in Water, Sewer, and Broadband Infrastructure

Summary of Interim Final Rule

Under the ARPA, recipients may use funds to make necessary investments in water, sewer, and broadband infrastructure. The interim final rule provided recipients with the ability to use funds for a broad array of uses within these categories.

The interim final rule discussed two general provisions that apply across all water, sewer, and broadband infrastructure investments. First, the interim final rule addressed the meaning of "necessary" investments as meaning those designed to provide an adequate minimum level of service and unlikely to be made using private sources of funds. Second, the interim final rule encouraged recipients to use strong labor standards in water, sewer, and broadband projects, as discussed below.

Necessary Investments

The statute limits investments to those that are necessary. As discussed in more detail below, Treasury determined that the types of water and sewer projects that were authorized under the interim final rule by reference to existing Environmental Protection Agency (EPA) programs would in all cases be necessary investments given the conditions applicable to such EPA programs. Similarly, the interim final rule's definition of eligible broadband projects as those designed to provide a certain standard of service to those households and businesses with limited existing service was based on the statutory requirement that investments in water, sewer, and broadband must be "necessary."

As discussed further below, Treasury has expanded the scope of what is an eligible water and sewer infrastructure project to include additional uses. In particular, the final rule permits use of SLFRF funds for certain dam and reservoir restoration projects and certain drinking water projects to support population growth. The nature of these additional uses is such that additional factors must be considered in determining whether one of these additional uses is a necessary project. In addition, Treasury recognizes that there may be a need for improvements to broadband beyond those households and businesses with limited existing service as defined in the interim final rule. Treasury has replaced this specific requirement based on an understanding that broadband investments may be necessary for a broader set of reasons.

Given this expansion of what is considered in scope as a water, sewer, or broadband infrastructure project, the final rule provides a further elaboration of Treasury's understanding of the conditions under which an infrastructure project will be considered to be a necessary investment. Treasury considers a necessary investment in infrastructure to be one that is (1) responsive to an identified need to achieve or maintain an adequate minimum level of service, which may include a reasonable projection of increased need, whether due to population growth or otherwise and (2) a cost-effective means for meeting that need, taking into account available alternatives. In addition, given that drinking water is a resource that is subject to depletion, in the case of investments in infrastructure that supply drinking water in order to meet projected population growth, the project must be projected to be sustainable over its estimated useful life.

Not included in the list of criteria above is the requirement in the interim final rule that the project be unlikely to be made using private sources of funds. Given that it may be difficult to assess in a particular case what the probability of private investment in a project would be, Treasury has eliminated this standard from the meaning of necessary but still encourages recipients to prioritize projects that would provide the greatest public benefit in their respective jurisdictions.

Strong Labor Standards in Water, Sewer, and Broadband Construction

As stated in the Supplementary Information to the interim final rule, Treasury encourages recipients to carry out investments in water, sewer, or broadband infrastructure in ways that produce high-quality infrastructure, avert disruptive and costly delays, and

[300] Pay-go infrastructure funding refers to the practice of funding capital projects with cash-on-hand from taxes, fees, grants, and other sources, rather than with borrowed sums.

promote efficiency.[301] Treasury encourages recipients to use strong labor standards, including project labor agreements (PLAs) and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions. Treasury also recommends that recipients prioritize in their procurement decisions employers who can demonstrate that their workforce meets high safety and training standards (*e.g.*, professional certification, licensure, and/or robust in-house training), that hire local workers and/or workers from historically underserved communities, and who directly employ their workforce or have policies and practices in place to ensure contractors and subcontractors meet high labor standards. Treasury further encourages recipients to prioritize employers (including contractors and subcontractors) without recent violations of federal and state labor and employment laws.

Treasury believes that such practices will promote effective and efficient delivery of high-quality infrastructure projects and support the economic recovery through strong employment opportunities for workers. Such practices will also reduce the likelihood of potential project challenges like work stoppages or safety accidents, while ensuring a reliable supply of skilled labor and minimizing disruptions, such as those associated with labor disputes or workplace injuries. That will, in turn, promote on-time and on-budget delivery.

Furthermore, among other requirements contained in 2 CFR 200, Appendix II, all contracts made by a recipient or subrecipient in excess of $100,000 with respect to water, sewer, or broadband infrastructure project that involve employment of mechanics or laborers must include a provision for compliance with certain provisions of the Contract Work Hours and Safety Standards Act, 40 U.S.C. 3702 and 3704, as supplemented by Department of Labor regulations (29 CFR part 5).

Treasury will continue to seek information from recipients on their workforce plans and water, sewer, and broadband projects undertaken with SLFRF funds. This reporting will support transparency and competition by enhancing available information on the services being provided. Since publication of the interim final rule, Treasury has provided recipients with additional guidance and instructions on the reporting requirements.[302]

Environmental and Other Generally Applicable Requirements

Treasury cautions that, as is the case with all projects engaged in using the SLFRF funds, all projects must comply with applicable federal, state, and local law. In the case of infrastructure projects in particular, this includes environmental and permitting laws and regulations. Likewise, as with all capital expenditure projects using SLFRF funds, projects must be undertaken and completed in a manner that is technically sound, meaning that they must meet design and construction methods and use materials that are approved, codified, recognized, fall under standard or acceptable levels of practice, or otherwise are determined to be generally acceptable by the design and construction industry.

1. Water and Sewer Infrastructure

Sections 602(c)(1)(D) and Section 603(c)(1)(D) of the Social Security Act provide that recipients may use the SLFRF funds "to make necessary investments in water [and] sewer . . . infrastructure." The interim final rule permitted a broad range of necessary investments in projects that improve access to clean drinking water and improve wastewater and stormwater infrastructure systems. As discussed below, after review of comments received on the interim final rule, Treasury has made changes in the final rule to expand the scope of eligible water and sewer projects.

Summary of Interim Final Rule and Final Rule Structure

Background: In the interim final rule, Treasury aligned eligible uses of the SLFRF with the wide range of types or categories of projects that would be eligible to receive financial assistance through the Clean Water State Revolving Fund (CWSRF) or Drinking Water State Revolving Fund (DWSRF) administered by the Environmental Protection Agency (EPA). By referring to these existing programs, with which many recipients are already familiar, Treasury intended to provide flexibility to recipients to respond to the needs of their communities while facilitating recipients' identification of eligible projects. Furthermore, by aligning SLFRF eligible uses with these existing programs, Treasury could ensure that projects using the SLFRF are limited to "necessary investments."

Public Comment: Treasury received many comments responding to the water and sewer infrastructure provisions of the interim final rule from state, local, and Tribal governments, industry trade associations, public interest groups, private individuals, and other interested parties. Commenters requested that Treasury provide a wider set of eligible uses for water and sewer infrastructure beyond those uses articulated by the DWSRF and CWSRF, suggesting that Treasury expand the definition of necessary water and sewer infrastructure.

Treasury Response: In response to commenters, Treasury is expanding the eligible use categories for water and sewer infrastructure, discussed in further detail below. Because the interim final rule aligned the definition of necessary water and sewer infrastructure with the eligible uses included in the DWSRF and CWSRF, Treasury is reflecting in the final rule a revised standard for determining a necessary water and sewer infrastructure investment for eligible water and sewer uses beyond those uses that are eligible under the DWSRF and CWSRF.

Interpretation of Necessary Investments and Water and Sewer Infrastructure

Necessary Investments: As discussed above, Treasury considers an investment in infrastructure to be necessary if it is (1) responsive to an identified need to achieve or maintain an adequate minimum level of service, which for some eligible project categories may include a reasonable projection of increased need, whether due to population growth or otherwise and (2) a cost-effective means for meeting that need, taking into account available alternatives. In addition, in the case of investments in drinking water service infrastructure to supply drinking water to satisfy a projected increase in population, the project must also be projected to be sustainable over its estimated useful life. As detailed further below, DWSRF and CWSRF eligible projects continue to be presumed to be necessary investments under the final

[301] Treasury received several comments related to its encouragement of certain wage and labor standards in the Supplementary Information to the interim final rule. Some commenters opposed this encouragement, arguing that even encouragement and reference to PLAs and prevailing wage laws could lead to confusion or make it more likely that recipients would apply labor standards in ways that would discourage competition and raise project costs. Conversely, some commenters supported the encouragement of the use of certain standards, including giving preference to employers that meet certain employment standards (*e.g.*, those that maintain high safety and training standards) because it would support the goal of completing water, sewer, and broadband projects efficiently and safely. As in the interim final rule, this encouragement does not impose a legally binding restriction on recipients.

[302] *See* U.S. Department of the Treasury, *Compliance and Reporting Guidance*, 21 (June 24, 2021), *https://home.treasury.gov/system/files/136/SLFRF-Compliance-ond-Reporting-Guidance.pdf.*

rule, with the exception of projects for the rehabilitation of dams and reservoirs, which the EPA has permitted in certain circumstances under the DWSRF and, as discussed below, are addressed separately in the final rule.

In evaluating whether a project would respond to a need to achieve or maintain an adequate minimum level of service, a recipient should consider whether it would meet the needs of the population to be served and would satisfy applicable standards. For example, a drinking water project must be sized such that it provides an adequate volume of water to households and other customers and must meet applicable standards for drinking water quality under the Safe Drinking Water Act (SDWA). Similarly, a centralized wastewater treatment project should be designed to manage updated estimated flow rates and comply with Clean Water Act requirements. These requirements are already reflected in the eligibility criteria of the DWSRF and CWSRF, respectively.

In evaluating whether a project is a cost-effective means of providing the water or sewer service, the recipient should consider the need for the project, the costs and benefits of the project compared to alternatives, and the effectiveness of the project in meeting the identified need. Recipients are not required to conduct a full cost-benefit analysis; however, they should consider and analyze relevant factors. For example, a recipient may not use funds to pursue a costly dam rehabilitation to provide drinking water to a community if it could provide the same service with a significantly smaller investment by drawing water from another available reservoir, assuming that doing so would meet the other requirements of the final rule. As detailed further below, recipients are only required to assess cost-effectiveness of projects for the creation of new drinking water systems, dam and reservoir rehabilitation projects, or projects for the extension of drinking water service to meet population growth needs.

Certain DWSRF eligibilities are already subject to a cost-effectiveness test. Specifically, projects that create new drinking water systems must be a cost-effective solution to addressing the identified problem.[303] The EPA also imposes a cost-effectiveness condition on dam and reservoir rehabilitation projects undertaken pursuant to its class deviation from the DWSRF rule. These projects are particularly expensive and, unlike in the case of other types of eligible projects, there are often available alternatives to conducting these projects. Projects for the extension of drinking water service to meet population growth needs are also often particularly expensive, and there are often different ways to meet the needs of expanding populations. Treasury will accordingly require that recipients engage in a cost-effectiveness analysis when engaging in projects for the creation of new drinking water systems, dam and reservoir rehabilitation projects, or projects for the extension of drinking water service to meet population growth needs. Other types of eligible water or sewer projects will not be subject to this cost-effectiveness test, including lead line replacement and lead remediation.[304]

In the case of projects that expand drinking water service infrastructure to satisfy a projected increase in population, the project must also be sustainable, meaning that the project can continue providing the adequate minimum level of service for its estimated useful life, taking into account projected impacts of changes to the climate and other expected demands on the source of water. For example, a reservoir rehabilitation project may not be pursued if the reservoir will no longer be able to provide an adequate source of drinking water before the end of the estimated useful life of the improvements to the reservoir. In areas currently impacted by drought or where drought conditions are expected to be more frequent or more severe in the future, sources of drinking water may be diminished more quickly than in prior periods. In considering how much of a source of water will be available in the future for the drinking water project, a recipient must consider that a source of water may be drawn upon or otherwise used for other current and expected uses, including use by fish and other wildlife.

The final rule applies this sustainability condition to projects that expand drinking water service infrastructure to satisfy a projected increase in population but not to other drinking water projects. When a new source of water is required to remedy an existing threat to public health, as in the case of source projects eligible under the DWSRF, sustainability should be a consideration, but in some cases, the need to replace a contaminated source may mean that a less sustainable choice may be made. When faced with such an issue, such as in the case of a contaminated well system, a project to replace the contaminated source can be said to be "necessary" even if the replaced source is not sustainable over the long term. Expediency may dictate that a shorter-term solution is pursued if it is cost-effective and will prevent health issues while a longer-term solution can be found. In contrast, an expansion to accommodate population growth cannot be said to be necessary if it is not sustainable over its estimated useful life.

Not included in the list of criteria above is the requirement in the interim final rule that the project be unlikely to be made using private sources of funds. Given that it may be difficult to assess in a particular case what the probability of private investment in a project would be, Treasury has eliminated this standard from the meaning of necessary but nevertheless encourages recipients to apply funds to projects that would provide the greatest public benefit.

Water and Sewer Infrastructure: As stated above, Congress provided that SLFRF funds are available for "necessary water, sewer, and broadband infrastructure." Treasury interprets the reference to water and sewer uses consistent with the inclusion of broadband uses. Water, sewer, and broadband infrastructure all involve the provision of essential services to residents, businesses, and other consumers. As the pandemic has made clear, access to broadband has itself become essential for individuals and businesses to participate in education, commerce, work, and civic matters and to receive health care and social services.

Water and sewer services provided broadly to the public as essential services include the provision of drinking water and the removal, management, and treatment of wastewater and stormwater.[305] Although governments are engaged in other infrastructure related to water, including irrigation projects, transportation projects, and recreation projects, such projects go beyond the scope of what is provided to all residents as an essential service. Provision of drinking water and removal, management, and treatment of

[303] *See* 40 CFR 35.3520(b)(2)(vi).

[304] In such cases, either the projects are presumptively cost-effective (*e.g.*, lead projects would always be considered cost-effective given the costs imposed by lead poisoning) or a cost-effectiveness test is less relevant given the lack of available alternatives or the relatively low cost of the project.

[305] In many jurisdictions, stormwater flows into the sewer system rather than into a separate stormwater system. The separate inclusion of "water" and "sewer" infrastructure also makes clear that "water" in this context cannot refer to all uses relevant to water. Given that sewer systems carry wastewater (and often stormwater), if water infrastructure were to refer to all water-related infrastructure in this context, it would make the inclusion of sewer infrastructure redundant.

wastewater and stormwater are the typical responsibilities of "water and sewer" authorities throughout the country, and there is a tremendous need for improvements to the ability of state, local, and Tribal governments to provide such services, including to address the consequences of deferred maintenance and additional resiliency needed to adapt to changes to the climate.[306]

Although the meaning of water and sewer infrastructure for purposes of sections 602(c)(1)(D) and 603(c)(1)(D) of the Social Security Act does not include all water-related uses, Treasury has made clear in this final rule that investments to infrastructure include a wide variety of projects. Treasury interprets the word "infrastructure" in this context broadly to mean the underlying framework or system for achieving the given public purpose, whether it be provision of drinking water or management of wastewater or stormwater.[307] As discussed below, this can include not just storm drains and culverts for the management of stormwater, for example, but also bioretention basins and rain barrels implemented across a watershed, including on both public and private property, that together reduce the amount of runoff that needs to be managed by traditional infrastructure.

Further, Treasury understands that investments in infrastructure include improvements that increase the capacity of existing infrastructure and extend the useful life of existing infrastructure. Accordingly, water and sewer infrastructure investment projects include those that conserve water, thereby reducing pressure on infrastructure for the provision of drinking water, and that recycle wastewater and stormwater, thereby reducing pressure on the infrastructure for treating and managing wastewater and stormwater.

As with other infrastructure projects and capital expenditure projects that are permitted as responses to the public health emergency and its negative economic impacts, costs for planning and design and associated pre-project costs are eligible uses of SLFRF funds. Costs for the acquisition of land are also eligible, but only if needed for the purposes of locating eligible project components. Recipients should ensure that they have the technical, financial, and managerial capability to ensure compliance with the requirements of the SDWA, or that the assistance will ensure compliance and the owners or operators of the systems will undertake feasible and appropriate changes in operations to ensure compliance over the long-term.

Drinking Water State Revolving Fund and Clean Water State Revolving Fund

Background: As stated above, in the interim final rule, Treasury included eligible uses of the DWSRF and the CWSRF as eligible uses of the SLFRF in the water and sewer infrastructure category. By providing that projects eligible under the DWSRF and the CWSRF are also eligible uses of SLFRF funds, the interim final rule permitted a broad range of projects that improve drinking water infrastructure, such as building or upgrading facilities and transmission, distribution, and storage systems, including replacement of lead service lines. With respect to clean water and wastewater infrastructure, the interim final rule provided that recipients may use SLFRF funds to construct publicly owned treatment infrastructure, manage and treat stormwater or subsurface drainage water, and facilitate water reuse, among other uses. Consistent with the DWSRF and the CWSRF, the interim final rule provided that SLFRF funds may be used for cybersecurity needs to protect water or sewer infrastructure, such as developing effective cybersecurity practices and measures at drinking water systems and publicly owned treatment works.

Use of DWSRF and CWSRF to Support Climate Change Adaptations. Many of the types of projects eligible under either the DWSRF or CWSRF also support efforts to address climate change. For example, by taking steps to manage potential sources of pollution and preventing these sources from reaching sources of drinking water, projects eligible under the DWSRF and CWSRF may reduce energy required to treat drinking water. Similarly, projects eligible under the DWSRF and CWSRF include measures to conserve and reuse water, for example through projects to reuse or recycle wastewater, stormwater, or subsurface drainage water. Treasury encourages recipients to consider green infrastructure investments and projects to improve resilience to the effects of climate change. For example, more frequent and extreme precipitation events combined with construction and development trends have led to increased instances of stormwater runoff, water pollution, and flooding. Green infrastructure projects that support stormwater system resiliency could include bioretention basins that provide water storage and filtration benefits, and green streets, where vegetation, soil, and engineered systems are combined to direct and filter rainwater from impervious surfaces. In cases of a natural disaster, recipients may also use SLFRF funds for water infrastructure to provide relief, such as interconnecting water systems or rehabilitating existing wells during an extended drought.

Public Comment: Many commenters expressed support for the interim final rule's alignment of the use of funds for water and sewer infrastructure under the SLFRF with the project categories provided through the EPA's DWSRF and CWSRF programs.

Many commenters also provided recommendations about the specific types of water infrastructure projects that should be eligible under the final rule. In many of these cases, commenters recommended that Treasury include project types that are already eligible under the DWSRF and CWSRF and thus eligible under the interim final rule and final rule. For example, several commenters requested that aquifer recharge projects, or other groundwater protection and restoration projects, be included as eligible uses of SLFRF when certain aquifer recharge projects that (1) implement a nonpoint source pollution management program [308] or (2) constitute reuse of

[306] In addition, Treasury interprets the eligible uses of SLFRF funds against the background of the Coronavirus Relief Fund (CRF), for which the SLFRF funds are, in part, a successor. CRF recipients expressed great interest in using the CRF to pursue water infrastructure projects, including provision of drinking water and internal plumbing on Tribal lands and in Alaskan villages, and broadband projects throughout the country; Treasury permitted these projects given the connection to the public health emergency (see Coronavirus Relief Fund for States, Tribal Governments, and Certain Eligible Local Governments, 86 FR 4182, 4190, 4192 (Jan. 15, 2021), but the short deadline for use of funds made it difficult to use CRF funds in this way. Congress' inclusion of the water, sewer, and broadband clause in the ARPA, along with the SLFRF funds' longer eligible use date, is responsive to this unmet need. As discussed below, Congress in the Infrastructure Investment and Jobs Act amended sections 602(c) and 603(c) of the Social Security Act to add a new paragraph as sections 602(c)(4) and 603(c)(5), respectively, providing that SLFRF funds may be used to meet non-federal matching requirements of any authorized Bureau of Reclamation project. This authority was added as a separately enumerated eligible use regardless of whether the underlying project would be an eligible use of SLFRF funds under the water and sewer infrastructure eligible use category.

[307] *See, e.g.*, section 502 of the Federal Water Pollution Control Act (33 U.S.C. 1362), defining "green infrastructure" as "the range of measures that use plant or soil systems, permeable pavement or other permeable surfaces or substrates, stormwater harvest and reuse, or landscaping to store, infiltrate, or evapotranspirate stormwater and reduce flows to sewer systems or to surface waters."

[308] Specifically, this would include desalination projects that decrease the burden on aquifers where there is causal relationship between aquifer withdrawals and saltwater intrusion if the projects implement a nonpoint source pollution

Continued

wastewater, stormwater, or subsurface drainage water are in fact eligible uses under the CWSRF. Furthermore, under the DWSRF, eligible projects include certain aquifer storage and recovery systems for water storage.

Treasury Response: Eligible projects articulated in the DWSRF and CWSRF continue to be eligible uses of SLFRF funds under the final rule. Recognizing that recipients have faced challenges interpreting eligible use categories under the interim final rule or cross-referencing EPA program materials to interpret eligible project types, Treasury is including in this Supplementary Information additional information on the types of projects eligible under the DWSRF and CWSRF. Treasury emphasizes that this further clarification does not represent a change in eligibility. Treasury encourages recipients to reference EPA handbooks for the DWSRF and CWSRF, which provide further information and detail about the types of projects eligible under those programs and thus under the final rule.

Eligible projects under the DWSRF. Eligibilities under the DWSRF, the interim final rule, and the final rule include projects that address present or prevent future violations of health-based drinking water standards. These include projects needed to maintain compliance with existing national primary drinking water regulations for contaminants with acute and chronic health effects. Projects to replace aging infrastructure are also eligible uses if they are needed to maintain compliance or further the public health protection objectives of section 1452 of the SDWA.[309] The following project categories are eligible under the DWSRF, were eligible under the interim final rule, and continue to be eligible under the final rule:

(i) *Treatment projects,* including installation or upgrade of facilities to improve the quality of drinking water to comply with primary or secondary standards and point of entry or central treatment under section 1401(4)(B)(i)(III) of the SDWA.

(ii) *Transmission and distribution projects,* including installation or replacement of transmission and distribution pipes to improve water pressure to safe levels or to prevent contamination caused by leaks or breaks in the pipes.

(iii) *Source projects,* including rehabilitation of wells or development of eligible sources to replace contaminated sources.

(iv) *Storage projects,* including installation or upgrade of eligible storage facilities, including finished water reservoirs, to prevent microbiological contaminants from entering a public water system.

(v) *Consolidation projects,* including projects needed to consolidate water supplies where, for example, a supply has become contaminated or a system is unable to maintain compliance for technical, financial, or managerial reasons.

(vi) *Creation of new systems,* including those that, upon completion, will create a community water system to address existing public health problems with serious risks caused by unsafe drinking water provided by individual wells or surface water sources. Eligible projects are also those that create a new regional community water system by consolidating existing systems that have technical, financial, or managerial difficulties. Projects to address existing public health problems associated with individual wells or surface water sources must be limited in scope to the specific geographic area affected by contamination. Projects that create new regional community water systems by consolidating existing systems must be limited in scope to the service area of the systems being consolidated.

Ineligible projects under the DWSRF. Federally-owned public water systems and for-profit noncommunity water systems are not eligible to receive DWSRF funds and therefore SLFRF funds.[310] The acquisition of water rights, laboratory fees for routine compliance monitoring, and operation and maintenance expenses are not costs associated with investments in infrastructure and thus would not be eligible under the final rule. [311] Projects needed primarily to serve future population growth are also ineligible under the DWSRF; the treatment of such projects under the final rule is discussed separately below under "Expansion of Drinking Water Service." Projects eligible under the DWSRF must be sized only to accommodate a reasonable amount of population growth expected to occur over the useful life of the project.

Eligible projects under the CWSRF. The final rule continues to allow the use of SLFRF funds for projects eligible under the CWSRF, consistent with the interim final rule. Under the CWSRF, a project must meet the criteria of one of the following CWSRF eligibilities to be eligible for assistance. Section 603(c) of the Clean Water Act (CWA) [312] provides that the CWSRF can provide assistance:

(i) to any municipality, intermunicipal, interstate, or state agency for construction of publicly owned treatment works (as defined in section 212 of the CWA); [313]

(ii) for the implementation of a management program established under section 319 of the CWA; [314]

(iii) for the development and implementation of a conservation and management plan under section 320 of the CWA; [315]

(iv) for the construction, repair, or replacement of decentralized wastewater treatment systems that treat municipal wastewater or domestic sewage. Eligible projects include, but are not limited to, the construction of new decentralized systems (*e.g.,* individual onsite systems and cluster systems), as well as the upgrade, repair, or replacement of existing systems.

(v) for measures to manage, reduce, treat, or recapture stormwater or subsurface drainage water. Publicly and privately owned, permitted and unpermitted projects that manage, reduce, treat, or recapture stormwater or subsurface drainage water are eligible. For example, projects that are specifically required by a Municipal Separate Storm Sewer System (MS4) permit are eligible, regardless of ownership. Projects may include, but are not limited to green roofs, bioretention basins, roadside plantings, porous pavement, and rainwater harvesting.

(vi) to any municipality, intermunicipal, interstate, or state agency for measures to reduce the demand for publicly owned treatment works capacity through water conservation, efficiency, or reuse. Eligible projects include, but are not limited to, the installation, replacement, or upgrade of water meters; plumbing fixture retrofits or replacement; and gray water recycling. Water audits and water conservation plans are also eligible.

management program under section 319 of the Clean Water Act. This could include projects in which desalinated seawater is injected into the aquifer to mitigate or prevent salt water intrusion, as well as projects in which brackish water is removed from an aquifer, desalinated, and returned to the aquifer.

[309] *See* 42 U.S.C. 300j–12(a)(2)(B) (limiting financial assistance used by a public water system to expenditures (including expenditures for planning, design, siting, and associated preconstruction activities, or for replacing or rehabilitating aging treatment, storage, or distribution facilities of public water systems, but not including monitoring, operation, and maintenance expenditures of a type or category which the Administrator of the EPA has determined, through guidance, will facilitate compliance with national primary drinking water regulations applicable to the system under 42 U.S.C. 300g–1 or otherwise significantly further the health protection objectives of the SWDA); *See also* 40 CFR 35.3520(b).

[310] *See* 40 CFR 35.3520(d)(1).

[311] *See id at* § 35.3520(e)(2)–(4).

[312] 33 U.S.C. 1383(c).

[313] 33 U.S.C. 1292.

[314] 33 U.S.C. 1329.

[315] 33 U.S.C. 1330.

Equipment to reuse effluent (*e.g.*, gray water, condensate, and wastewater effluent reuse systems) is eligible.

(vii) for the development and implementation of watershed projects meeting the criteria set forth in section 122 of the CWA.[316] Projects that develop or implement a watershed pilot project related to at least one of the six areas identified in section 122 of the CWA are eligible: Watershed management of wet weather discharges, stormwater best management practices, watershed partnerships, integrated water resource planning, municipality-wide stormwater management planning, or increased resilience of treatment works.

(viii) to any municipality, intermunicipal, interstate, or state agency for measures to reduce the energy consumption needs for publicly owned treatment works. Projects may include, but are not limited to, the installation of energy efficient lighting, HVAC, process equipment, and electronic equipment and systems at publicly owned treatment works. Planning activities, such as energy audits and optimization studies are also eligible.

(ix) for reusing or recycling wastewater, stormwater, or subsurface drainage water. Projects involving the reuse or recycling of wastewater, stormwater, or subsurface drainage water are eligible. This includes, as part of a reuse project, the purchase and installation of treatment equipment sufficient to meet reuse standards. Other eligible projects include, but are not limited to, distribution systems to support effluent reuse, including piping the effluent on the property of a private consumer, recharge transmission lines, injection wells, and equipment to reuse effluent (*e.g.*, gray water, condensate, and wastewater effluent reuse systems).

(x) for measures to increase the security of publicly owned treatment works. Security measures for publicly owned treatment works might include, but are not limited to, vulnerability assessments, contingency/emergency response plans, fencing, security cameras/lighting, motion detectors, redundancy (systems and power), secure chemical and fuel storage, laboratory equipment, securing large sanitary sewers, and tamper-proof manholes. The CWSRF cannot fund operations and maintenance activities. Therefore, maintaining a human presence (*i.e.*, security guards) and monitoring activities are not eligible.

[316] 33 U.S.C. 1274.

Other Clarifications of DSWRF and CWSRF Eligible Project Categories

Public Comment: Several commenters requested that Treasury provide clarification of the requirements associated with use of SLFRF funds for necessary investments in water and sewer infrastructure.

Treasury Response: After release of the interim final rule, Treasury clarified in further guidance that, while recipients must ensure that water and sewer infrastructure projects pursued are eligible under the final rule, recipients are not required to obtain project pre-approval from Treasury or any other federal agency when using SLFRF funds for necessary water and sewer infrastructure projects unless otherwise required by federal law. For projects that are being pursued under the eligibility categories provided through the DWSRF or CWSRF programs, project eligibilities are based on federal project categories and definitions for the programs and not on each state's eligibility or definitions. While reference in the final rule to the DWSRF, CWSRF, or other federal water programs is provided to assist recipients in understanding the types of water and sewer infrastructure projects eligible to be funded with SLFRF, recipients do not need to apply for funding from the applicable state programs or through any federal water program. Similarly, besides eligible project categories, the final rule does not incorporate other program requirements or guidance that attach to the DWSRF, CWSRF, or other federal water programs. However, as noted above, recipients should be aware of other federal or state laws or regulations that may apply to construction projects or water and sewer projects, independent of SLFRF funding conditions, and that may require pre-approval from another federal or state agency.

Expanded Eligible Uses for Water and Sewer Infrastructure

Summary

Public Comment: Many commenters requested broader flexibility in the use of SLFRF funds for water and sewer infrastructure projects that are not eligible under the DWSRF and CWSRF. These commenters argued that localities are best situated to identify the highest-need water and sewer projects in their communities. Several Tribal government commenters noted that Tribes have different water and sewer infrastructure needs than states and localities and that additional flexibility in the use of funds would lift current barriers to improving infrastructure on Tribal lands.

To achieve additional flexibility, commenters suggested a range of options for broadening the eligible use of SLFRF funds for necessary water and sewer infrastructure. For example, several commenters suggested Treasury broaden the eligibilities provided under the interim final rule to include project types eligible under other federal water and sewer programs.

Treasury Response: Treasury agrees that additional flexibility for use of SLFRF funds is warranted and is providing expanded eligibilities as described below, several of which address specific areas of need outlined by Tribal and rural communities.

As discussed below, Treasury has incorporated into the final rule projects that are eligible under certain programs established by the EPA under the Water Infrastructure Improvements for the Nation Act (WIIN Act). Other water-related grant programs cited by commenters include projects that are otherwise already covered by the final rule, for example because they are covered as eligible under the DWSRF or the CWSRF, or projects that are ineligible under the final rule because they are beyond the scope of the meaning of water and sewer projects for purposes of ARPA. To minimize the need for recipients of SLFRF funds to cross reference eligibilities across multiple federal programs, which may exacerbate current challenges to understanding eligibility under SLFRF, Treasury is providing detailed information related to expanded eligibilities within the text of this **SUPPLEMENTARY INFORMATION** for the final rule.

Stormwater Infrastructure

Public Comment: Several commenters requested that additional stormwater infrastructure projects be included as eligible uses of SLFRF funds under the final rule. Commenters suggested that culvert repair and resizing and replacement of storm sewers is necessary to address increased rainfall brought about by a changing climate. Other commenters noted that rural communities that do not manage their own sewer systems may rely on this type of water infrastructure.

Treasury Response: The CWSRF includes a broad range of stormwater infrastructure projects, and as such these projects were eligible under the interim final rule and continue to be eligible under the final rule. These projects include gray infrastructure projects, such as traditional pipe, storage, and treatment systems. Projects

that manage, reduce, treat, or recapture stormwater or subsurface drainage water are also eligible, including real-time control systems for combined sewer overflow management, and sediment control. Culvert infrastructure projects are eligible under the CWSRF if they (1) implement a nonpoint source management plan, (2) implement National Estuary Program Comprehensive Conservation and Management Plan, or (3) implement a stormwater management plan with the goal of providing a water quality benefit. Stormwater projects under the CWSRF also encompass a number of eligible green infrastructure categories, such as green roofs, green streets, and green walls, rainwater harvesting collection, storage, management, and distribution systems, real-time control systems for harvested rainwater, infiltration basins, constructed wetlands, including surface flow and subsurface flow (*e.g.*, gravel) wetlands, bioretention/bioswales (*e.g.*, bioretention basins, tree boxes), permeable pavement, wetland, riparian, or shoreline creation, protection, and restoration, establishment or restoration of urban tree canopy, and replacement of gray infrastructure with green infrastructure including purchase and demolition costs.

In addition to the eligible uses under the CWSRF, Treasury is expanding the eligible uses under the final rule to include stormwater system infrastructure projects regardless of whether there is an expected water quality benefit from the project. Treasury anticipates that this eligible use will allow recipients to manage increased volumes of stormwater as a result of changes to the climate. For example, the final rule now permits the use of SLFRF funds for the repair, replacement, or removal of culverts or other road-stream crossing infrastructure to the extent the purpose of the project is to manage stormwater. In addition, Treasury understands that the repair, replacement, or removal of culverts may necessitate the repair or upgrade of roads. As noted in guidance issued after the interim final rule, recipients may use SLFRF funds for road repairs and upgrades that interact directly with an eligible stormwater infrastructure project. All stormwater infrastructure projects undertaken should incorporate updated design features and current best practices.

Private Wells and Septic Systems

Public Comment: Several commenters requested that the scope of eligible projects be expanded to allow for the expenditure of SLFRF funds on private wells or septic systems. Commenters noted that wells may be contaminated with dangerous substances, including arsenic, lead, radon, and PFAS (per- and polyfluoroalkyl). Commenters also suggested that, because rural and underserved communities are often reliant on these infrastructure types for their drinking water or wastewater needs, lack of appropriate funding to maintain these systems could present health and safety issues that disproportionately affect certain communities.

Treasury Response: Consistent with the CWSRF, the installation, repair, or replacement of private septic units continues to be an eligible use of SLFRF funds under the final rule. For example, eligible projects include those that address groundwater contamination resulting from faulty septic units and those that would connect failing septic systems to centralized wastewater treatment. Consistent with the DWSRF, connecting homes served by a private well to a public water system is an eligible use of SLFRF funds.

In addition, Treasury has provided in the final rule that recipients may use SLFRF funds for an expanded set of infrastructure projects that improve access to and provision of safe drinking water for individuals served by residential wells. Eligible projects under this category include rehabilitation of private wells, testing initiatives to identify contaminants in wells, and treatment activities and remediation strategies that address contamination.

Remediating Lead in Water

Public Comment: Several commenters emphasized the need to fully remediate lead contamination, especially in structures that serve the public or populations like children that are particularly vulnerable to the effects of lead exposure, such as schools and daycares. Many American households and an estimated 400,000 schools and childcare centers currently lack safe drinking water.[317]

Treasury Response: The replacement of lead service lines, up to premise plumbing, is an eligible use under the DWSRF and continues to be an eligible use of SLFRF funds. Such projects are eligible regardless of the pipe material of the replacement lines and ownership of the property on which the service line is located. Lead service line replacement projects can serve households, schools, or any other entities. Given the lifelong impacts of lead exposure for children and the widespread prevalence of lead service lines, Treasury encourages recipients to consider projects to replace lead service lines.

In addition, Treasury is providing in the final rule that for lead service line replacement projects, recipients must replace the full length of the service line, and not just a partial portion of the service line. Some water utilities, when replacing service lines, will only replace the "public portion" of the service line and physically slice through the lead service line at the public/private line. This action can result in elevated drinking water lead levels for some period of time after replacement, suggesting the potential for harm, rather than benefit during that time period.[318] Requiring replacement of the full length of the service line is also consistent with the requirements of the EPA's Lead and Copper Rule Revisions for water systems that have an action level exceedance for lead [319] and certain other water systems.[320]

Treasury is expanding eligible uses of SLFRF funds to include infrastructure projects eligible under EPA grant programs authorized by the WIIN Act.[321] Eligible projects under these programs include the installation or re-optimization of corrosion control treatment, replacing lead service lines, replacing galvanized pipes downstream of a lead service line (other than lead pipes within a home as discussed below), and maintaining an inventory of the drinking water system's service lines. Water quality testing, compliance monitoring, and remediation activities in schools and other childcare facilities, as well as activities necessary to respond to a contaminant, are eligible uses of SLFRF funds.[322] Remediation

[318] *See* EPA Science Advisory Board, Evaluation of the Effectiveness of Partial Lead Service Line Replacements, (September 2011), *https://www.epa.gov/sdwa/science-advisory-board-evaluation-effectiveness-partial-lead-service-line-replacements* (advising against partial lead service line replacement).

[319] Environmental Protection Agency, *supra* note 188.

[320] Environmental Protection Agency, National Primary Drinking Water Regulations: Lead and Copper Rule Revisions, 86 FR 4198. 40 CFR 141.84, and preamble *at* 4215, January 15, 2021, *https://www.federalregister.gov/d/2020-28691;* scheduled to become effective December 16, 2021, Environmental Protection Agency, 86 FR 31939, *https://www.federalregister.gov/d/2021-12600.*

[321] Eligible uses of funds include those eligible under the Small, Underserved, and Disadvantaged Communities Grant (Section 2104), Reduction in Lead Exposure via Drinking Water Grant Program (Section 2105) and Lead Testing in School and Child Care Program Drinking Water Grant Program (Section 2107).

[322] Such testing and remediation programs would be an eligible use of SLFRF funds given that they

activities such as replacement of faucets, internal plumbing, and fixtures in schools and childcare facilities are also an eligible use of SLFRF funds.

Consistent with the EPA programs, replacement of lead pipes within a home is not eligible under the final rule because the vast majority of lead contamination cases can be solved by replacing lead service lines (including on public and private property) and faucets and fixtures themselves. As such, replacement of lead pipes within a home would not be considered a cost-effective means for achieving the desired level of service and thus would not be a "necessary" investment. The provision of bottled water is also not an eligible use of SLFRF funds under this eligible use category, as it is not an investment in infrastructure. However, bottled water in areas with an action level exceedance for lead in water may be an eligible use of SLFRF funds under a separate eligible use category for "remediation of lead paint and other lead hazards;" see Assistance to Households in Public Health and Negative Economic Impacts.

Water filtration systems are eligible under the EPA grant programs and the final rule as long as they are installed as a permanent part of a facility's system and not intended for temporary use. Conducting remediation, follow-up monitoring, and conducting public education and outreach about the availability of infrastructure programs, such as water testing and fixture replacement programs funded with SLFRF funds or otherwise, are also eligible projects. Finally, recipients should note that "remediation of lead paint and other lead hazards" is a separate eligible use category and a broader range of programs and services may be eligible under that section, including investments that are not infrastructure; see the eligible use for "remediation of lead paint and other lead hazards" in section Assistance to Households in Public Health and Negative Economic Impacts.

Dams and Reservoirs

Public Comment: Many commenters requested that Treasury broaden eligibilities to include dams and reservoirs, infrastructure that commenters noted may in its current state be unsafe and could put surrounding communities at risk. Some commenters argued that dams and reservoirs play an important role in providing municipal water supply and water to irrigate farmland, including in areas impacted by recent droughts. Other commenters noted that a large number of dams are currently classified as high-hazard structures, the failure of which would have severe consequences for public safety and the local environment. With respect to reservoirs, commenters articulated that changing climate conditions have necessitated upgrades to reservoir infrastructure to ensure existing facilities can meet the local water needs of a community. Commenters noted that communities facing drought may also need to adjust or enhance reservoirs to maintain adequate water supply.

In contrast, several commenters suggested that infrastructure projects related to dams and reservoirs should not be considered eligible uses of SLFRF funds. These commenters noted that alternate sources of funding exist for dam and reservoir projects and that dams and reservoir infrastructure could result in negative impacts to Tribal communities and negative environmental impacts, including harm to wildlife habitats.

Treasury Response: Treasury understands that many dams and reservoirs in need of rehabilitation are dams and reservoirs whose primary purpose is to provide drinking water. As discussed above, SLFRF funds are available for projects related to the provision of drinking water. Moreover, since issuance of the interim final rule, the EPA has adopted a class deviation from the DWSRF regulations that permits such dam and reservoir rehabilitation projects in certain circumstances.[323] In approving this class deviation, the EPA recognized that many dams used for drinking water are aging and deteriorating and pose a public health risk to communities; that current dam conditions do not meet state safety standards; and that reservoir capacity has diminished and requires dredging to meet drinking water needs of the existing population.

Treasury's final rule provides that funds may be used for rehabilitation of dams and reservoirs if the primary purpose of the dam or reservoir is for drinking water supply and the rehabilitation project is necessary for continued provision of drinking water supply. In considering whether a dam or reservoir project is necessary for the provision of drinking water supply, a recipient may take into consideration future population growth in certain circumstances, as discussed under "Expansion of Drinking Water Service Infrastructure" below, but the project must in any case be designed to support no more than a reasonable level of projected increased need. The recipient must also determine that the project is cost-effective, *i.e.*, that there are not significantly superior alternatives that are available, taking into consideration the relative costs and benefits of the project as compared to those alternatives.

This change to the final rule would permit a wide variety of projects.[324] The limitation in the final rule to rehabilitation of existing dams and reservoirs reflects the scope of the EPA class deviation referenced above and Treasury's understanding of the significant need for investments in rehabilitation to address deterioration of dams and the diminished capacity of reservoirs. Further, Treasury expects that in many cases it would be considerably more difficult to demonstrate that construction of a new dam or reservoir would be necessary for the purpose of the provision of drinking water than is the case for rehabilitation of dams and reservoirs already serving that purpose for a particular population, particularly given opportunities to meet drinking water needs through water reuse and conversation efforts. For these reasons, and given that the relatively short period of availability of the funds makes new dam and reservoir construction with these funds less likely, Treasury has limited the scope of the final rule to dam and reservoir rehabilitation projects.

As discussed above, Treasury has determined that ARPA does not authorize the use of SLFRF funds for uses other than the provision of drinking water and the management of wastewater and storm water. As such, the final rule does not include infrastructure projects related to dams and reservoirs as eligible uses of SLFRF funds unless they meet the conditions discussed above.

would help a recipient determine whether an infrastructure project, such as a lead line replacement, is necessary. In contrast, as mentioned above, the costs of continual testing that is part of a drinking water or wastewater facilities' operating costs would not be considered part of an infrastructure project.

[323] *See* EPA, Approval of Class Exception from the Regulatory Prohibitions on the Use of Drinking Water State Revolving Fund for Rehabilitation of Dams and Reservoirs (July 14, 2021), available at *https://www.epa.gov/system/files/documents/2021-07/dwsrf-class-deviation-dam-reservoir-rehab-2021_0.pdf.*

[324] As noted in the EPA's class deviation, examples of dam rehabilitation projects include spillway reconstruction or repair; dam resurfacing, patching, or other structural repairs, including minimal height increases if needed to maintain the structural integrity of the dam; grouting for seepage control or liquefaction remediation (*e.g.*, epoxy resin, asphalt, or rock); repair or replacement of drainage systems; and seismic stability efforts (*e.g.*, anchors). Examples of reservoir rehabilitation projects include sedimentation dredging and reservoir lining.

Public Comment: Several commenters requested that the removal of dams and associated habitat restoration should be eligible uses of SLFRF funds, noting that in some cases, dam removal will improve water quality while removing long-term operational expenses for the recipient.

Treasury Response: Dam removal projects and associated stream and habitat restoration projects are eligible uses of the CWSRF and continue to be eligible under the final rule when the removal implements either a nonpoint source management program plan or a National Estuary Program Comprehensive Conservation and Management Plan or when the removal will provide a water quality benefit. Habitat restoration projects more generally may also be eligible under the CWSRF and the final rule if they constitute a form of stormwater infrastructure.

Expansion of Drinking Water Service Infrastructure

Public Comment: Commenters asked for the ability to use funds for drinking water projects for the purpose of meeting needs arising from future growth, which, given the restrictions applicable to the DWSRF, was not permitted under the interim final rule.

Treasury Response: As provided for in the SDWA, the DWSRF is meant to serve the public health needs of the existing population. The EPA regulation implementing the DWSRF program provides that projects needed primarily to serve future population growth are not eligible uses of the DWSRF. A project that is intended primarily to address public health or regulatory compliance issues for the existing service population may be sized for a "reasonable" amount of population growth over the useful life of the project.[325]

ARPA does not include the same limitation as the SDWA. Accordingly, the final rule provides that recipients may use SLFRF funds for projects that are needed to support increased population in certain cases. ARPA limits projects to those investments that are "necessary." As discussed above, Treasury interprets this to mean that the investments must be (1) responsive to an identified need to achieve or maintain an adequate minimum level of service, which for some eligible project categories may include a reasonable projection of increased need, whether due to population growth or otherwise and (2) a cost-effective means for meeting that need, taking into account available alternatives. For this eligible use category, expansion of drinking water service infrastructure, the project must also be projected to be sustainable over its estimated useful life.

Investments must be determined to be necessary when they are initiated. Accordingly, Treasury is clarifying in the final rule that the need identified for a water or sewer project may include a need arising from reasonable expectations of future population growth, provided that it is necessary at the time the investment is initiated for the recipient to make the investment to meet this growth. For example, a recipient expecting increased population during the period of performance may install a drinking water treatment plant to meet that growth. In addition, a recipient expecting increased population growth outside the period of performance may install the treatment plant if the planning and construction timeline for the project would require work to begin during the performance period in order to meet the expected population growth. A recipient may install transmission lines as part of the development of new housing occurring during the period of performance. In this case, the housing development must be in progress; a recipient may not use the SLFRF funds to install a water main, for example, to an undeveloped tract in the expectation that in the future that tract will be developed with housing, because there would be no need for that investment to be made at the time it is initiated.

For the reasons discussed above, if a project is undertaken to address expected growth in population, the project must also be sustainable, meaning that the project can continue providing the adequate minimum level of service for its estimated useful life, taking into account projected impacts of changes to the climate and other expected demands on the source of water. In considering how much of a source of water will be available in the future for the drinking water project, a recipient must consider that a source of water may be drawn upon or otherwise used for other current and expected uses, including use by fish and other wildlife. A drinking water project that is designed to address a growing population cannot be considered a necessary investment if the source of drinking water will cease to be available to meet the population's needs before the end of the estimated useful life of the project. In such a case, a recipient should consider alternative sources for drinking water. See "Interpretation of Necessary Investments and Water and Sewer Infrastructure" above for more information.

Non-Federal Matching Requirements for Authorized Bureau of Reclamation Projects

The Infrastructure Investment and Jobs Act amends sections 602(c) and 603(c) of the Social Security Act to add an additional eligible use of SLFRF funds, providing that SLFRF funds "may be used for purposes of satisfying any non-Federal matching requirement required for [an authorized Bureau of Reclamation project]."[326]

This amendment permits the use of SLFRF funds to meet non-federal matching requirements of any authorized Bureau of Reclamation project, regardless of whether the underlying project would be an eligible use of SLFRF funds under the water and sewer infrastructure eligible use category. These amendments are effective as of March 11, 2021, as if included in the ARPA at the time of its enactment.[327] Treasury will provide further guidance to recipients on the scope of Bureau of Reclamation water projects and expenses covered by this provision.

Floodplain Management and Flood Mitigation Projects

Public Comment: Several commenters requested that projects to address floodwater, including floodplain management and flood mitigation projects, be included as an eligible use of SLFRF funds. Within this category of floodplain management and flood mitigation infrastructure, several commenters requested that the installation of levees, flood walls, sea walls, elevation projects, dredging, or nature-based flood mitigation projects be included as eligible projects.

Treasury Response: Treasury notes that some floodplain management and flood mitigation infrastructure projects, including green infrastructure designed to protect treatment works from flood waters and flood impact are currently eligible under the CWSRF and therefore continue to be eligible under the final rule.

Treasury has not included floodplain management and flood mitigation projects more generally as eligible under the final rule. Although floodplain management and flood mitigation are functions of many state and local governments, they are not the sort of generally-provided essential services included within the meaning of water

[325] *See* 40 CFR 35.3520(e)(5).

[326] *See* Public Law 117–58, 40909(a)–(b) (Nov. 15, 2021).

[327] *See* Public Law 117–58 § 40909(c).

and sewer projects under the ARPA, as discussed above.

Irrigation

Public Comment: Some commenters requested that irrigation projects be an eligible use because they consider such projects to be critical infrastructure. Several commenters supported this request by noting that irrigation systems may be used to replenish aquifers and recharge wells, in addition to delivering water for irrigation. One commenter also noted that the national irrigation system is antiquated and in need of repair.

Treasury Response: Some irrigation projects were eligible under the interim final rule and continue to be eligible under the final rule as a result of their inclusion as eligible projects under the CWSRF. For example, water efficient irrigation equipment that reduces the runoff of nutrients and implements a management program established under section 319 of the CWA and/or a conservation and management plan under section 320 of the CWA are eligible uses under the CWSRF and therefore continue to be an eligible use of SLFRF funds under the final rule. Likewise, projects to receive and distribute reclaimed water for irrigation systems or other agricultural use are eligible under the CWSRF and therefore continue to be an eligible use under the final rule. Unlike projects for the improvement of irrigation systems generally, these reclaimed water projects are related to wastewater treatment and stormwater management, which are within the scope of the meaning of water and sewer infrastructure for purposes of ARPA.

Treasury considered commenter requests for inclusion of additional irrigation infrastructure and determined that irrigation projects more generally are not permitted under the final rule. Although these types of projects may be water-related infrastructure, they are not the sort of generally-provided essential services included within the meaning of water and sewer projects under ARPA, as discussed above.

Consumer Incentive Programs

Public Comment: One commenter requested that consumer incentive programs in the areas of water use efficiency, conservation, green infrastructure, reuse, and other distributed solutions be an allowable use of SLFRF.

Treasury Response: The DWSRF and CWSRF eligibilities include the development and implementation of incentive and educational programs that address and promote water conservation, source water protection, and efficiency related to infrastructure improvements, *e.g.*, incentives such as rebates to install green infrastructure such as rain barrels or promote other water conservation activities. Treasury clarifies that such project types were eligible under the interim final rule and continue to be eligible under the final rule.

2. Broadband Infrastructure

Under the ARPA, recipient governments may use SLFRF funds to make "necessary investments in . . . broadband infrastructure." In the Supplementary Information to the interim final rule, Treasury interpreted necessary investments in infrastructure as investments "designed to provide an adequate minimum level of service and [that] are unlikely to be made using private sources of funds." Treasury explained that, with respect to broadband specifically, such necessary investments include projects that "establish [ ] or improve [ ] broadband service to underserved populations to reach an adequate level to permit a household to work or attend school, and that are unlikely to be met with private sources of funds."

Summary of Interim Final Rule, Public Comments, and Treasury Response

Summary of Interim Final Rule: In implementing the ARPA, the interim final rule provided that eligible broadband infrastructure investments are limited to those that are designed to provide service to unserved or underserved households or businesses, defined as those that lack access to a wireline connection capable of reliably delivering at least minimum speeds of 25 Mbps download and 3 Mbps upload. The interim final rule also provided that eligible projects under the SLFRF are limited to those that are designed to deliver, upon project completion, service that reliably meets or exceeds symmetrical upload and download speeds of 100 Mbps. In instances where it would not be practicable for a project to deliver such service speeds because of the geography, topography, or excessive costs associated with such a project, the interim final rule provided that the project would be required to be designed to deliver, upon project completion, service that reliably meets or exceeds 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speeds and be scalable to a minimum of 100 Mbps symmetrical for download and upload speeds.

In addition, Treasury, in the Supplementary Information to the interim final rule, encouraged recipients to pursue a number of other objectives. First, Treasury encouraged recipients to prioritize investments in fiber-optic infrastructure wherever feasible and focus on projects that deliver a physical broadband connection by prioritizing projects that achieve last-mile connections. Second, Treasury encouraged recipients to integrate affordability options into their program design. Third, Treasury encouraged recipients to prioritize support for local networks owned, operated, or affiliated with local governments, nonprofits, and cooperatives. Fourth, Treasury encouraged recipients to avoid investing in locations with existing agreements to build reliable wireline service with minimum speeds of 100 Mbps download and 20 Mbps upload by December 31, 2024, in order to avoid duplication of efforts and resources. Finally, following release of the interim final rule, Treasury provided further guidance clarifying some aspects of broadband infrastructure eligibility, specifically on flexibility for recipients to determine eligible areas to be served,[328] middle-mile projects,[329] pre-project development costs,[330] broadband connections to schools or libraries,[331] and the applicability of the National Environmental Policy Act (NEPA) and the Davis-Bacon Act.[332]

Summary of Public Comments: Treasury received several comments on the interim final rule's requirements regarding eligible areas for investment and build-to speed standards, as well as Treasury's encouragements in the Supplementary Information of the interim final rule. Many commenters found the interim final rule's requirement to limit projects to those designed to provide service to unserved or underserved households or businesses to be appropriately focused on hard-to-reach areas. In contrast, other commenters argued that this requirement was too restrictive and that it would limit the ability for some recipients, particularly local governments, to invest in broadband infrastructure.

Separately, some commenters supported the interim final rule's requirement that eligible projects be built to reliable speeds of 100 Mbps symmetrical, with an exception for areas where it was impracticable, and encouragement that projects be built with fiber-optic infrastructure, while a

[328] *See FAQ 6.8, 6.9, 6.11.* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

[329] *See FAQ 6.10. Id.*

[330] *See FAQ 6.12. Id.*

[331] *See FAQ 6.16. Id.*

[332] *See FAQ 6.4, 6.17. Id.*

few others argued that the interim final rule should remain technology-neutral and that lower speed standards would be more appropriate for today's usage needs.

Summary of Treasury Response: In response to the comments, the final rule expands eligible areas for investment by requiring recipients to invest in projects designed to provide service to households and businesses with an identified need for additional broadband infrastructure investment, which would include but not be limited to a lack of broadband service reliably delivering certain speeds. In addition, as discussed further below, the final rule further supports the expansion of affordable access to broadband service for households by requiring that recipients use a provider that participates in a qualifying affordability plan. Treasury encourages recipients to prioritize projects that are designed to provide service to locations not currently served by a wireline connection that reliably delivers at least 100 Mbps of download speed and 20 Mbps of upload speed.

The final rule maintains the interim final rule's requirement that eligible projects be designed to, upon completion, reliably meet or exceed symmetrical 100 Mbps download and upload speeds. As was the case under the interim final rule, in cases where it is not practicable, because of the excessive cost of the project or geography or topography of the area to be served by the project, eligible projects may be designed to reliably meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed and be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed. Treasury continues to encourage recipients to prioritize investments in fiber-optic infrastructure wherever feasible and to focus on projects that will achieve last-mile connections, whether by focusing directly on funding last-mile projects or by ensuring that funded middle-mile projects have commitments in place to support new and/or improved last-mile service.

The final rule requires recipients to address the affordability needs of low-income consumers in accessing broadband networks funded by SLFRF, given that such a project cannot be considered a necessary investment in broadband infrastructure if it is not affordable to the population the project would serve. Recipients must require the service provider for a completed broadband infrastructure investment project that provides service to households to either participate in the Federal Communications Commission's (FCC) Affordable Connectivity Program (ACP), or otherwise provide access to a broad-based affordability program to low-income consumers in the proposed service area of the broadband infrastructure that provides benefits to households commensurate with those provided under the ACP.

Treasury also recognizes the importance of affordable broadband access for all consumers beyond those that are low-income. As part of their project selection process, recipients are encouraged to consult with the community on the general affordability needs of the target markets in the proposed service area. Additionally, recipients are encouraged to require that services provided by a broadband infrastructure project include at least one low-cost option offered without data usage caps and at speeds that are sufficient for a household with multiple users to simultaneously telework and engage in remote learning. Recipients will be required to report speed, pricing, and any data allowance information as part of mandatory reporting to Treasury.

The final rule also clarifies that subsidies to households and communities impacted by the pandemic to access the internet, broadband adoption programs, digital literacy programs, and device programs are eligible programs to respond to the public health and negative economic impacts of the pandemic under sections 602(c)(1)(A) and 603(c)(1)(A). See section Assistance to Households in Negative Economic Impacts.

Treasury continues to encourage recipients to prioritize support for broadband networks owned, operated by, or affiliated with local governments, nonprofits, and cooperatives. In addition, to the extent recipients are considering deploying broadband to locations where there are existing enforceable federal or state funding commitments for reliable service at speeds of at least 100 Mbps download speed and 20 Mbps upload speed, recipients must ensure that SLFRF funds are designed to address an identified need for additional broadband investment that is not met by existing federal or state funding commitments. Recipients must also ensure that SLFRF funds will not be used for costs that will be reimbursed by the other federal or state funding streams. Further, Treasury highlights that recipients are subject to the prohibition on use of grant funds to procure or obtain certain telecommunications and video surveillance services or equipment as outlined in 2 CFR 200.216 and 2 CFR 200.471 and clarifies that modernization of cybersecurity for existing and new broadband networks are eligible uses of funds under sections 602(c)(1)(D) and 603(c)(1)(D).

Finally, this Supplementary Information to the final rule incorporates and confirms guidance issued by Treasury following the interim final rule regarding middle-mile projects,[333] pre-project development costs,[334] broadband connections to schools or libraries,[335] and applicability of the National Environmental Policy Act (NEPA) and Davis-Bacon Act.[336]

The remainder of this section provides additional details on the final rule. Specifically, these sections address: (1) Eligible areas for investment; (2) build-to speed standards; (3) affordability; (4) public networks; (5) duplication of efforts and resources; (6) cybersecurity; and (7) use of funds to meet non-federal match under the Infrastructure Investment and Jobs Act.

Eligible Areas for Investment

The interim final rule limited eligible broadband investments to projects focused on delivering service to unserved or underserved locations, defined as households or businesses that lack access to a wireline connection capable of reliably delivering at least minimum speeds of 25 Mbps download and 3 Mbps upload. This targeted approach was generally consistent with certain speed thresholds used in other federal programs to identify eligible areas for federal investment in broadband infrastructure, such as the FCC's Rural Digital Opportunity Fund (RDOF) program and the National Telecommunication and Information Administration's (NTIA's) Broadband Infrastructure Program, and generally aligns with the FCC's benchmark for an "advanced telecommunications capability" for wireline broadband services.

Public Comment: Many commenters discussed the disadvantages of such an approach. Some commenters, including several local government recipients, argued that limiting investments to locations without access to reliable wireline 25/3 Mbps [337] was too

[333] *See FAQ 6.10.* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

[334] *See FAQ 6.12. Id.*

[335] *See FAQ 6.16. Id.*

[336] *See FAQ 6.4, 6.17. Id.*

[337] In the remainder of this Supplementary Information, "25/3 Mbps" refers to broadband infrastructure that is designed to reliably meet or exceed at least 25 Mbps download speeds and 3

restrictive because some urban jurisdictions are already mostly or entirely covered by a network with at least 25/3 Mbps speeds yet lack widespread broadband adoption for various reasons. Commenters suggested that recipients would benefit from greater flexibility to provide necessary investments in broadband access in areas that are nominally covered by speeds of at least 25/3 Mbps, such as to provide affordable broadband access in low-income areas or to address service quality and reliability issues. Further, commenters argued that Treasury's requirement that new projects meet minimum reliable speeds of 100 Mbps symmetrical was inconsistent with the requirement that broadband infrastructure projects focus on those with access to significantly lower speeds, and further noted that several states have already expanded the focus of their broadband programs beyond those without reliable access to speeds of 25/3 Mbps. Commenters argued that if the limitation to unserved and underserved households and businesses were maintained, the definition of unserved and underserved households and businesses should be revised to include households and businesses currently served by higher standards. Commenters proposed a number of alternative cutoff speeds, including 25/25 Mbps, 50/10 Mbps, and 100 Mbps symmetrical. Others expressed support for providing flexibility for recipients to make their own determination on eligible areas for investment. These commenters referenced studies indicating that 25/3 Mbps is inadequate for today's modern household or business needs.

Some commenters advocated for unserved and underserved areas to be prioritized while providing flexibility for recipients to serve areas beyond those designated as unserved or underserved. Reflecting the perceived restrictiveness of the interim final rule approach, some commenters asked for assurance that projects conducted under other categories of SLFRF eligible uses, specifically to respond to the public health and negative economic impacts of the pandemic under sections 602(c)(1)(A)–(C) and 603(c)(1)(A)–(C), were not barred by the presence of 25/3 Mbps service, including "gap networks," which are networks designed to offer low-cost or no-cost internet access for lower-income households with low broadband adoption rates.

Commenters suggested additional factors to be incorporated in the consideration of locations that are eligible to be served. Many commenters suggested that affordability should be considered a key factor when determining whether a community has access to broadband, as the presence of 25/3 Mbps service does not necessarily mean the service is financially accessible to the area's residents. Commenters noted that surveys indicate that affordability, not lack of coverage, is the most significant barrier for most Americans who do not have robust broadband service in their households. Some advocated that the final rule allow for investments in areas with existing reliable wireline access at or above 25/3 Mbps as long as existing broadband service has been unaffordable for a certain segment of the population; others advocated that Treasury presume eligibility when investments are made in certain areas, such as Qualified Census Tracts or neighborhoods with persistent poverty, or are made by Tribal governments. Separately, some commenters noted that Treasury should provide more clarification on what constitutes a "reliabl[e]" connection, including providing details as to latency, jitter, and other technical specifications that would meet that standard, and what it means for certain technologies, such as copper and other outdated technologies, to be deemed presumptively unreliable.

Other commenters supported the interim final rule's approach on eligible areas for investment or suggested tightening eligibility even further. They argued that higher speed thresholds beyond 25/3 Mbps would likely lead to investments in or building of new broadband infrastructure in areas already served by broadband at speeds these commenters considered sufficient; these areas, commenters suggested, are less in need of federal assistance and permitting investments here could divert funding away from rural areas to more densely populated areas.

Treasury Response: The final rule expands eligible areas for investment by requiring recipients to invest in projects designed to provide service to households and businesses with an identified need for additional broadband infrastructure investment. Recipients have flexibility to identify a need for additional broadband infrastructure investment: Examples of need include lack of access to a connection that reliably meets or exceeds symmetrical 100 Mbps download and upload speeds, lack of affordable access to broadband service, or lack of reliable broadband service. Recipients are encouraged to prioritize projects that are designed to provide service to locations not currently served by a wireline connection that reliably delivers at least 100 Mbps of download speed and 20 Mbps of upload speed, as many commenters indicated that those without such service constitute hard-to-reach areas in need of subsidized broadband deployment.

Households and businesses with an identified need for additional broadband infrastructure investment do not have to be the only ones in the service area served by an eligible broadband infrastructure project. Indeed, serving these households and businesses may require a holistic approach that provides service to a wider area, for example, in order to make ongoing service of certain households or businesses within the service area economical.

Consistent with further guidance issued by Treasury,[338] in determining areas for investment, recipients may choose to consider any available data, including but not limited to documentation of existing broadband internet service performance, federal and/or state collected broadband data, user speed test results, interviews with community members and business owners, reports from community organizations, and any other information they deem relevant.

In evaluating such data, recipients may take into account a variety of factors, including whether users actually receive internet service at or above the speed thresholds at all hours of the day, whether factors other than speed such as latency, jitter, or deterioration of the existing connections make their user experience unreliable, and whether the existing service is being delivered by legacy technologies, such as copper telephone lines (typically using Digital Subscriber Line technology) or early versions of cable system technology (DOCSIS 2.0 or earlier),[339] and other factors related to

Mbps upload speeds. "100 Mbps" symmetrical refers to broadband infrastructure that is designed to reliably meet or exceed at least 100 Mbps download speeds and 100 Mbps upload speeds.

[338] *See FAQ 6.11.* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

[339] Legacy technologies such as copper telephone lines (typically using Digital Subscriber Line technology) and early versions of cable system technology (DOCSIS 2.0 or earlier) typically lag on speeds, latency, and other factors, as compared to more modern technologies like fiber-optic. *See, e.g., https://www.fcc.gov/sites/default/files/tech_transitions_network_upgrades_that_may_affect_your_service.pdf* (comparing copper to fiber and noting that copper wire networks have "limited speeds," are "susceptible to signal interference/loss," and have a "relatively short life"); *https://*

Continued

the services to be provided by the project. In addition, recipients may consider the actual experience of current broadband customers when making their determinations; whether there is a provider serving the area that advertises or otherwise claims to offer broadband at a given speed is not dispositive.

Build-To Speed Standards

The interim final rule provided that a recipient may use funds to make investments in broadband infrastructure that is designed to, upon completion, reliably meet or exceed symmetrical 100 Mbps download and upload speeds. In cases where it is not practicable, because of the excessive cost of the project or the geography or topography of the area to be served by the project, eligible projects may be designed to reliably meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed, so long as it is scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed. Relatedly, Treasury in the **SUPPLEMENTARY INFORMATION** to the interim final rule encouraged recipients to prioritize investments in fiber-optic infrastructure wherever feasible and to prioritize projects that achieve last-mile connections.

Public Comment: Many commenters discussed the advantages of setting minimum symmetrical download and upload speeds of reliable 100 Mbps as the speed threshold for new projects. Some commenters indicated support for the interim final rule's standard as it takes into account growing demands on internet use resulting from pandemic broadband usage and suggested that such a standard will help to ensure that networks built with SLFRF funds remain valuable for years to come, even as demands continue to accelerate, particularly on upload speeds. Some also indicated that the interim final rule standard has the effect of prioritizing the use of fiber-optic infrastructure to deliver such speeds, which some noted was a "gold standard" future-proof technology, although some commenters noted that other technologies like fixed wireless have been shown to deliver such speeds in certain circumstances.

Other commenters suggested that 100 Mbps symmetrical speeds were unnecessary given current broadband usage needs and that such high standards may have the potential to slow down expansion to unserved or underserved rural areas. Some argued that setting this symmetrical threshold may limit the type of technologies that can be used, thereby decreasing competition and limiting flexibility to recipients whose communities might be better served by technologies such as wireless solutions or inexpensive gap networks. Commenters suggested alternate minimum speeds, ranging from 25/3 Mbps (which some argued best balances reaching all communities and maximizing the impact of federal funds) to 100/20 Mbps (which some argued best serves the typical broadband usage patterns of households and businesses, including new pandemic-driven needs). A few commenters suggested a higher minimum speed, such as gigabit speeds, advocating that such speeds were necessary for a network to last at least a decade.

Many commenters supported the interim final rule's lower speed standards for projects where it is impracticable to meet minimum reliable speeds of 100 Mbps symmetrical, as it provides flexibility for recipients to invest in hard-to-reach areas, such as those in mountainous regions. A few commenters indicated that Treasury should more clearly define the characteristics of a location eligible for this exception. Some indicated that the minimum standard for all new projects should be 100 Mbps symmetrical. In contrast, others argued that scalability to 100 Mbps symmetrical should not be a requirement to meet today's demands, particularly in hard-to-reach areas.

Some commenters requested that Treasury clarify eligibility for middle-mile projects as these projects potentially provide connectivity to far-reaching areas, while other commenters suggested that last-mile projects generally require more capital investment and are therefore most in need of government support.

Treasury Response: The final rule maintains the interim final rule's requirement that eligible projects be designed to, upon completion, reliably meet or exceed symmetrical 100 Mbps download and upload speeds, with the interim final rule's exception for projects where it is impracticable to build to such speeds due to excessive cost, geography, or topography of the area to be served by the project. Given the build time associated with broadband infrastructure projects, these standards will enable SLFRF funds to fund lasting infrastructure that will be able to accommodate increased network demand once the network is complete,[340] while providing flexibility for certain locations to meet lower speed standards where 100 Mbps symmetrical speeds are impracticable.

To illustrate the accelerating need for higher upload speeds, by one measure, mean upload speeds as of October 2021 increased to 75.21 Mbps as compared to 62.11 Mbps a year earlier.[341] Jurisdictions are increasingly responding to the growing demands of their communities for high speeds; for example, Illinois requires 100 Mbps symmetrical service as the construction standard for their state broadband grant programs. The 100 Mbps symmetrical standard accounts for increased pandemic internet usage and provides adequate upload speeds for individuals and businesses to accommodate interactive applications such as virtual learning and videoconferencing, while also helping ensure that funding is responsibly used to provide a true and lasting benefit for years to come. Treasury continues to encourage recipients to prioritize investments in fiber-optic infrastructure wherever feasible, as such advanced technology enables the next generation of application solutions for all communities and is capable of delivering superior, reliable performance and is generally most efficiently scalable to meet future needs.[342] In designing these projects, recipients should ensure that the broadband infrastructure provides "reliable" service at required speeds and are not required to rely on providers' advertised speeds in their assessments.

Consistent with further guidance issued by Treasury,[343] while recipients are permitted to make investments in "middle-mile" connections that otherwise satisfy the requirements of the final rule, Treasury continues to encourage recipients to focus on

data.fcc.gov/download/measuring-broadband-america/2020/2020-Fixed-Measuring-Broadband-America-Report.pdf (comparing fiber with DSL and cable technologies on a number of dimensions); *https://www.eff.org/wp/case-fiber-home-today-why-fiber-superior-medium-21st-century-broadband* (providing a technical background comparing fiber technology to other legacy technologies).

[340] Using the Federal Communications Commission (FCC) Broadband Speed Guide, a household with two telecommuters and two to three remote learners today is estimated to need 100 Mbps download to work simultaneously. *See* Federal Communications Commission, Broadband Speed Guide, available at *https://www.fcc.gov/consumers/guides/broadband-speed-guide* (last visited October 28, 2021).

[343] *See FAQ 6.10*, Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf*.

projects that will achieve last-mile connections—whether by focusing directly on funding last-mile projects or by ensuring that funded middle-mile projects have commitments in place to support new and/or improved last-mile service.

Affordability

The interim final rule encouraged recipients to consider ways to integrate affordability options into their program design but did not require recipients to take particular actions. The interim final rule also provided that assisting households with internet access and digital literacy is an eligible use of SLFRF funds under sections 602(c)(1)(A) and 603(c)(1)(A) to respond to the negative economic impacts of COVID–19.

Public Comment: Many commenters suggested that Treasury provide recipients with a broader set of tools to tackle what the commenters characterized as an affordability crisis in the broadband sector. As noted above, some commenters proposed that Treasury consider affordability when determining whether an area is unserved or underserved by broadband. Some commenters indicated that the final rule should allow for the construction of broadband networks in low-income neighborhoods including low-cost or no-cost gap networks, even in areas with existing service at the speeds required under the interim final rule. Other commenters voiced support for direct subsidies to low-income communities to afford broadband service, which would provide additional incentives for providers to serve these communities.

Treasury Response: In response to many commenters that highlighted the importance of affordability in providing meaningful access to necessary broadband infrastructure, the final rule provides additional requirements to address the affordability needs of low-income consumers in accessing broadband networks funded by SLFRF. Recipients must require the service provider for a completed broadband infrastructure investment project that provides service to households to:

- Participate in the Federal Communications Commission's (FCC) Affordable Connectivity Program (ACP); or
- Otherwise provide access to a broad-based affordability program to low-income consumers in the proposed service area of the broadband infrastructure that provides benefits to households commensurate with those provided under the ACP.

Recipients must require providers to participate in or provide access to these programs through the life of the ACP. This requirement will no longer apply once the SLFRF-funded broadband infrastructure is no longer in use.

Furthermore, Treasury also recognizes the importance of affordable broadband access for all consumers beyond those that are low income. As part of their project selection process, recipients are encouraged to consult with the community on the general affordability needs of the target markets in the proposed service area. Additionally, recipients are encouraged to require that services provided by a broadband infrastructure project include at least one low-cost option offered without data usage caps at speeds that are sufficient for a household with multiple users to simultaneously telework and engage in remote learning. Treasury will require recipients to report speed, pricing, and any data allowance information as part of their mandatory reporting to Treasury.

Further, Treasury is clarifying that, as a response to the public health and negative economic impacts of the pandemic, recipients may provide households and communities impacted by the pandemic with subsidies to help pay for internet service, digital literacy programs, broadband adoption programs, and device programs that provide discounted or no-cost devices for low-income households to access the internet. For further discussion of this eligible use category, see the section internet Assistance in Assistance to Households in Public Health and Negative Economic Impacts.

Public Networks

The interim final rule encouraged recipients to prioritize support for local networks owned, operated, or affiliated with local governments, nonprofits, and cooperatives.

Public Comment: Many commenters voiced their support for Treasury's encouragement that recipients work with governmental or community entities to establish local networks, arguing that they have been shown to effectively provide broadband access to areas that would otherwise be left with unaffordable or insufficient service. These commenters suggested that, since these entities are less driven by financial returns to investment than private providers, in some circumstances they may be able to provide robust service at a lower price as compared to private providers, along with potentially increasing local competition in a service area.

Other commenters argued against Treasury's encouragement, remarking that private businesses have a robust track record of serving hard-to-reach customers. These commenters argued that commercial providers have greater technical and operational expertise in deploying and operating broadband networks and may be able to construct broadband networks with greater efficiency. Additionally, some commenters argued that providing what they considered an unfair competitive advantage for government- or community-owned or operated networks may hurt consumers over time.

Treasury Response: The final rule maintains the interim final rule's encouragement for recipients to prioritize support for broadband networks owned, operated by, or affiliated with local governments, nonprofits, and cooperatives, given that these networks have less pressure to generate profits and a commitment to serve entire communities.[344] This encouragement provides flexibility for recipients to select providers that best fit their needs, while noting the critical role that networks owned, operated, or affiliated with local governments and community organizations can play in providing sufficient coverage, affordable access, or increased competition in the broadband sector.

Duplication of Efforts and Resources

Public Comment: Some commenters raised concerns that Treasury's encouragement in the interim final rule that recipients avoid funding projects in locations with an existing agreement to provide service that reliably delivers 100/20 Mbps by December 31, 2024 was too restrictive. Commenters noted that many plans do not always lead to a successful and complete deployment, as issues may arise that prevent such infrastructure from deploying on time or at all, and that several existing federal grants were designed and awarded before the onset of the COVID–19 pandemic and do not meet the critical broadband needs highlighted by the pandemic. Other commenters argued that Treasury's encouragement to avoid duplication of resources should be strengthened, as investing in areas with existing agreements would be an inefficient duplication of efforts.

Treasury Response: Given the final rule's revised requirements on eligible areas for investment, this

[344] The Executive Office of the President, Community-Based Broadband Solutions (January 2015), *https://obamawhitehouse.archives.gov/sites/default/files/docs/community-based_broadband_report_by_executive_office_of_the_president.pdf.*

Supplementary Information to the final rule also modifies the interim final rule's requirements around duplication of resources. Since recipients must ensure that the objective of the broadband projects is to serve locations with an identified need for additional broadband investment, the final rule provides that, to the extent recipients are considering deploying broadband to locations where there are existing enforceable federal or state funding commitments for reliable service at speeds of at least 100 Mbps download speed and 20 Mbps upload speed, recipients must ensure that SLFRF funds are designed to address an identified need for additional broadband investment that is not met by existing federal or state funding commitments. Recipients must also ensure that SLFRF funds will not be used for costs that will be reimbursed by the other federal or state funding streams.

Cybersecurity

Public Comment: Several commenters expressed concern about the cybersecurity of new broadband projects funded with SLFRF funds and urged Treasury to prohibit recipients from utilizing SLFRF funds to procure equipment from certain providers from the People's Republic of China that may pose a national security risk. These commenters pointed out that the 2019 National Defense Authorization Act (NDAA) and the FCC's Universal Service Fund have similar prohibitions. Further, several commenters requested that Treasury explicitly include cybersecurity costs as an eligible use for broadband infrastructure investment given the growing threat of cyber-attacks and cyber-intrusions into the nation's infrastructure.

Treasury Response: Treasury highlights that investments in broadband infrastructure must be carried out in ways that comply with applicable federal laws, including the 2019 NDAA. Among other requirements contained in 2 CFR part 200, 2 CFR 200.216 implements certain provisions of the NDAA and contains prohibitions on the use of federal financial assistance to procure or obtain certain telecommunications and video surveillance services or equipment provided or produced by designated entities, including certain entities owned or controlled by the People's Republic of China. In addition, 2 CFR 200.471 provides that certain telecommunications and video surveillance costs associated with 2 CFR 200.216 are unallowable.

Further, the final rule allows for modernization of cybersecurity for existing and new broadband infrastructure as an eligible use under sections 602(c)(1)(D) and 603(c)(1)(D) as such investments are necessary for the reliability and resiliency of broadband infrastructure.[345] Recipients may provide necessary investments in cybersecurity, including modernization of hardware and software, for existing and new broadband infrastructure regardless of their speed delivery standards. The final rule maintains the interim final rule's provision that allows for broader modernization of cybersecurity, including hardware, software, and protection of critical infrastructure as an eligible provision of government services, to the extent of revenue loss due to the pandemic, under sections 602(c)(1)(C) and 603(c)(1)(C).

Use of Funds To Meet Non-Federal Match Under the Infrastructure Investment and Jobs Act

The Infrastructure Investment and Jobs Act specifies that, except as otherwise provided, an entity using funding under section 60102 of the law for broadband deployment "shall provide, or require a subgrantee to provide, a contribution, derived from non-Federal funds (or funds from a Federal regional commission or authority) . . . of not less than 25 percent of project costs." [346] It further states that the matching contribution may include funds provided to an eligible entity or subgrantee under the American Rescue Plan Act for the purpose of deployment of broadband service, which includes funds provided under the SLFRF program.

SLFRF and the program established under section 60102 of the Infrastructure Investment and Jobs Act are separate programs with separate requirements. While section 60102 allows states and other eligible entities to use SLFRF funds as the source of matching funds for broadband deployment, the requirements of the SLFRF program still apply. As such, recipients that use SLFRF funds to meet the section 60102 matching requirement will continue to be subject to the requirements of the SLFRF program.

[345] For more on the importance of cybersecurity to the reliability and resiliency of broadband networks, see: Federal Communications Commission, *https://docs.fcc.gov/public/attachments/FCC-10-63A1.doc;* Brookings Institute, Protecting the Cybersecurity of America's Networks (February 11, 2021), *https://www.brookings.edu/blog/techtank/2021/02/11/protecting-the-cybersecurity-of-americas-networks/.*

[346] *See* Infrastructure Investment and Jobs Act, Public Law 117–58 (2021).

III. Restrictions on Use

While recipients have considerable flexibility to use funds to address the diverse needs of their communities, some restrictions on use of funds apply. The ARPA includes two statutory provisions that further define the boundaries of the statute's eligible uses. First, section 602(c)(2)(A) of the Social Security Act provides that states and territories may not "use the funds . . . to either directly or indirectly offset a reduction in . . . net tax revenue . . . resulting from a change in law, regulation, or administrative interpretation during the covered period that reduces any tax . . . or delays the imposition of any tax or tax increase." Second, sections 602(c)(2)(B) and 603(c)(2) prohibit all recipients, except Tribal governments, from using funds for deposit into any pension fund. These restrictions support use of funds only for the congressionally permitted purposes described in the Eligible Uses section by providing a backstop against the use of funds for purposes outside of the eligible use categories provided for in the statute.

In addition to the restrictions on use of funds provided for in the ARPA statute, the interim final rule noted that several uses of funds would be ineligible under any eligible use category, including as a response to the public health and negative economic impacts of the pandemic or as a "government service" under the revenue loss eligible use category. Specifically, use of funds for debt service, to replenish financial reserves, or to satisfy an obligation arising from a judicial settlement or judgment were ineligible uses of funds under the eligible use categories for public health and negative economic impacts and revenue loss. These restrictions apply to all recipients.

Recipients should note that restrictions on use of funds for debt service, to replenish financial reserves, or to satisfy an obligation arising from a judicial settlement or judgment apply to all eligible use categories, not just the eligible use categories in which they were discussed in the interim final rule.

Recipients are also subject to other restrictions on use of funds in the ARPA, the Award Terms and Conditions, and other federal laws. As discussed further below, uses of funds may not conflict with the overall statutory purpose of the ARPA to reduce the spread of COVID–19. Per the Award Terms and Conditions, recipients must adopt and abide by policies to prevent conflicts of interest. Finally, recipients are reminded that other federal laws

also apply to uses of funds, including environmental and civil rights laws.

To enhance clarity, this **SUPPLEMENTARY INFORMATION** for the final rule consolidates these restrictions on use of funds into one section and makes clear that they apply to all eligible use categories and any use of funds under the program by recipients to whom each specific restriction applies.

This section discusses the aforementioned restrictions, public comments received, and Treasury's response to these comments. For clarity, Treasury has divided the following discussion into (A) statutory restrictions under the ARPA, which include (1) offsetting a reduction in net tax revenue, and (2) deposits into pension funds, and (B) other restrictions on use, which include (1) debt service and replenishing reserves, (2) settlements and judgments, and (3) general restrictions.

A. Ineligible Uses of Funds Under the ARPA Statute

1. Offset a Reduction in Net Tax Revenue

For states and territories (recipient governments [347]), section 602(c)(2)(A)—the offset provision—prohibits the use of SLFRF funds to directly or indirectly offset a reduction in net tax revenue resulting from a change in law, regulation, or administrative interpretation [348] during the covered period. If a state or territory uses SLFRF funds to offset a reduction in net tax revenue resulting from a change in law, regulation, or interpretation, the ARPA provides that the state or territory must repay to Treasury an amount equal to the lesser of (i) the amount of the applicable reduction attributable to the impermissible offset and (ii) the amount of SLFRF funds received by the state or territory. A state or territory that uses SLFRF funds to offset a reduction in net tax revenue does not forfeit its entire allocation of SLFRF funds (unless it misused the full allocation to offset a reduction in net tax revenue) or any non-SLFRF funding.

The interim final rule implements these conditions by establishing a framework for states and territories to determine the cost of changes in law, regulation, or interpretation that reduce tax revenue and to identify and value the sources of funds that will offset—*i.e.*, cover the cost of—any reduction in net tax revenue resulting from such changes. The interim final rule recognizes three sources of funds that may offset a reduction in net tax revenue other than SLFRF funds: Organic revenue growth, increases in revenue due to policy changes (*e.g.*, an increase in a tax rate), and certain cuts in spending.

Specifically, the interim final rule establishes a step-by-step process for determining whether, and the extent to which, SLFRF funds have been used to offset a reduction in net tax revenue, based on information reported by the recipient government:

- First, each year, each recipient government will identify and value the changes in law, regulation, or interpretation that would result in a reduction in net tax revenue, as it would in the ordinary course of its budgeting process. The sum of these values in the year for which the government is reporting is the amount it needs to "pay for" with sources other than SLFRF funds (total value of revenue reducing changes).
- Second, the interim final rule recognizes that it may be difficult to predict how a change would affect net tax revenue in future years and, accordingly, provides that if the total value of the changes in the year for which the recipient government is reporting is below a de minimis level, as discussed below, the recipient government need not identify any sources of funding to pay for revenue reducing changes and will not be subject to recoupment.
- Third, a recipient government will consider the amount of actual tax revenue recorded in the year for which it is reporting. If the recipient government's actual tax revenue is greater than the amount of tax revenue received by the recipient for the fiscal year ending 2019, adjusted annually for inflation, the recipient government will not be considered to have violated the offset provision because there will not have been a reduction in net tax revenue.
- Fourth, if the recipient government's actual tax revenue is less than the amount of tax revenue received by the recipient government for the fiscal year ending 2019, adjusted annually for inflation, in the reporting year the recipient government will identify any sources of funds that have been used to permissibly offset the total value of covered tax changes other than SLFRF funds. These are:
  - State or territory tax changes that would increase any source of general fund revenue, such as a change that would increase a tax rate; and
  - Spending cuts in areas not being replaced by SLFRF funds.

The recipient government will calculate the value of revenue reduction remaining after applying these sources of offsetting funding to the total value of revenue reducing changes—that is, how much of the tax change has not been paid for. The recipient government will then compare that value to the difference between the baseline and actual tax revenue. A recipient government will not be required to repay to Treasury an amount that is greater than the recipient government's actual tax revenue shortfall relative to the baseline (*i.e.*, fiscal year 2019 tax revenue adjusted for inflation). This "revenue reduction cap," together with Step 3, ensures that recipient governments can use organic revenue growth to offset the cost of revenue reductions.

- Finally, if there are any amounts that could be subject to recoupment, Treasury will provide notice to the recipient government of such amounts along with an explanation of such amounts. This process is discussed in greater detail in section Remediation and Recoupment of this Supplementary Information.

Together, these steps allow Treasury to identify the amount of reduction in net tax revenue that both is attributable to covered changes and has been directly or indirectly offset with SLFRF funds.

Overview of Comments: Many commenters supported the framework established under the interim final rule. These commenters argued that the offset provision, and the interim final rule's implementation of the offset provision, was essential to ensuring SLFRF funds are used in a manner consistent with the statute's defined eligible uses and, in particular, to support the use of SLFRF funds to build public sector capacity. Several commenters argued that the framework should be made more restrictive; for example, some comments advocated that the offset provision be applied to local governments.

Other commenters argued that the offset provision and the interim final rule's implementation of the offset provision is too restrictive, with some asserting that the offset provision prohibits states from making changes to reduce taxes. Many of these commenters argued that the offset provision presents constitutional concerns. These commenters asserted that the offset provision is ambiguous and the restriction is unrelated to the purpose of the ARPA. These commenters also

[347] In this sub-section, "recipient governments" refers only to states and territories. In other sections, "recipient governments" refers more broadly to eligible governments receiving funding from the SLFRF.

[348] For brevity, this phrase is referred to as "changes in law, regulation, or interpretation" for the remainder of this **SUPPLEMENTARY INFORMATION.**

argued that the generous amount of SLFRF funds provided to those governments gave recipient governments little choice as to whether to accept the SLFRF funds and, as a result, the offset provision is coercive. In describing these concerns and arguments, several of these commenters referenced litigation regarding the offset provision.[349] Many of these commenters also expressed concern regarding the interim final rule's implementation of the offset provision. Some of these commenters argued that Treasury lacked the authority to implement the provision, asserting that the significance of the provision required Congress to make an explicit delegation of rulemaking authority and provide clearer principles by which Treasury should implement the provision. Finally, one commenter argued that the offset provision should only apply if the recipient expressly and intentionally uses SLFRF funds to offset a reduction in revenue, arguing that the term "offset" implies a deliberate use SLFRF funds to "pay for" a tax cut.

As discussed in the interim final rule, the offset provision does not prevent a recipient government from enacting a broad variety of tax changes. Rather, the offset provision prevents a recipient government from using SLFRF funds to offset a revenue reduction resulting from a tax cut. A recipient government would only be considered to have used SLFRF funds to offset a reduction in net tax revenue resulting from changes in law, regulation, or interpretation if, and to the extent that, the recipient government could not identify sufficient funds from sources other than SLFRF funds to offset the reduction in net tax revenue. Only if sufficient funds from other sources cannot be identified to cover the full cost of the reduction in net tax revenue resulting from changes in law, regulation, or interpretation, will the remaining amount not covered by these sources be considered to have been offset by SLFRF funds, in contravention of the offset provision. Consistent with the statutory text, the approach taken in the interim final rule recognizes that, because money is fungible, even if SLFRF funds are not explicitly or directly used to cover the costs of changes that reduce net tax revenue, those funds may be used in a manner inconsistent with the statute by indirectly being used to substitute for the state's or territory's funds that would otherwise have been needed to cover the costs of the reduction. As discussed below, the scope of changes in law, regulation, or interpretation is further limited to those that the recipient government voluntarily enacted during the covered period.

Congress has the authority under the Spending Clause in Article I, section 8 of the Constitution to specify the permissible and impermissible uses of federal grants. The Supreme Court has repeatedly "upheld Congress's authority to condition the receipt of funds on the States' complying with restrictions on the use of those funds, because that is the means by which Congress ensures that the funds are spent according to its view of the 'general Welfare.'"[350] "The power to keep a watchful eye on expenditures . . . is bound up with congressional authority to spend in the first place."[351] Assertions that the amount of SLFRF funds are sufficiently large to be coercive are inconsistent with the Supreme Court's reasoning in *NFIB*, which distinguished between conditions placed on new federal funds and conditions placed on existing federal funds and not based on the size of funds.[352] Further, the conditions placed on the use of SLFRF funds under the ARPA—both the eligible uses and additional limitations on deposits into pension funds and the offset provision—were well known to recipient governments prior to recipient governments requesting to receive SLFRF funds. Finally, the ARPA provides Treasury with the express authority "to issue such regulations as may be necessary or appropriate to carry out" section 602, which includes the offset provision.

A number of commenters expressed concern regarding the burden associated with complying with the offset provision and the interim final rule. Similarly, other commenters argued that the framework provided in the interim final rule complicated implementation of the offset provision. Treasury took several steps to minimize burden for recipient governments in the interim final rule. For example, the interim final rule incorporates the types of information and modeling already used by states and territories in their own fiscal and budgeting processes. By incorporating existing budgeting processes and capabilities, states and territories will be able to assess and evaluate the relationship of tax and budget decisions to uses of SLFRF funds based on information they likely have or can readily obtain. This approach ensures that recipient governments have the information they need to understand the implications of their decisions regarding the use of SLFRF funds—and, in particular, whether they are using the funds to directly or indirectly offset a reduction in net tax revenue resulting from a change in law, regulation, or interpretation, making the funds potentially subject to recoupment. To further reduce burden, Treasury is considering whether the scope of reporting requirements can be further tailored.

As described in greater detail below, Treasury is finalizing its implementation of the offset provision largely without change. This approach is consistent with the text of the ARPA. The remainder of this section discusses and responds to comments on specific aspects of the framework.

1. Definitions

Covered change. The offset provision is triggered by a reduction in net tax revenue resulting from "a change in law, regulation, or administrative interpretation." Consistent with this language, the interim final rule defines a "covered change" to include any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute or rule where the phase-in or taking effect was not prescribed prior to the start of the covered period. Thus, the offset provision applies only to actions for which the change in policy occurs during the covered period; it excludes regulations or other actions that implement a change or law substantively enacted prior to March 3, 2021. For example, covered changes do not include a change in rate that is triggered automatically and based on statutory or regulatory criteria in effect prior to the covered period.[353] Changed

[349] *See, e.g., State of West Virginia* v. *U.S. Department of the Treasury*, No. 7:21–cv–00465–LSC, 2021 WL 2952863 (N.D. Ala. Jul. 14, 2021); *State of Ohio* v. *Yellen*, No. 1:21–cv–181, 2021 WL 2712220 (S.D. Ohio Jul. 1, 2021).

[350] *National Fed'n of Indep. Bus.* v. *Sebelius (NFIB)*, 567 U.S. 519, 580 (2012) (plurality opinion); see, *e.g., South Dakota* v. *Dole*, 483 U.S. 203, 206–208 (1987); *Gruver* v. *Louisiana Bd. of Supervisors for Louisiana State Univ. Agric. & Mech. Coll.*, 959 F.3d 178, 183 (5th Cir.), cert. denied, 141 S. Ct. 901 (2020). For additional discussion of these issues, *see, e.g., Brief Reply for Appellants, Ohio* v. *Yellen*, No. 21–3787 (6th Cir. Oct. 26, 2021).

[351] *Sabri* v. *United States*, 541 U.S. 600, 608 (2004).

[352] The new federal funds offered by the Affordable Care Act totaled $100 billion per year. Even the dissenting Justices agreed that "Congress could have made just the new funding provided under the ACA contingent on acceptance of the terms of the Medicaid Expansion," although they disagreed with the majority about whether that funding condition was severable. NFIB at 687–688 (joint dissent).

[353] For example, a state law that sets its earned income tax credit (EITC) at a fixed percentage of the federal EITC will see its EITC payments automatically increase—and thus its tax revenue reduced—because of the federal government's expansion of the EITC in the ARPA *See, e.g.*, Tax

administrative interpretations would not include corrections to replace prior inaccurate interpretations; such corrections would instead be treated as changes implementing legislation enacted or regulations issued prior to the covered period. The operative change in those circumstances is the underlying legislation or regulation that occurred prior to the covered period. Moreover, only changes within the control of the state or territory are considered covered changes. Finally, covered changes do not include changes that simply conform with recent changes in federal law (including those to conform to recent changes in federal taxation of unemployment insurance benefits and taxation of loan forgiveness under the Paycheck Protection Program).

Scope of Covered Changes

Public Comment: Several commenters argued that the definition of covered change, and thus the limitations of the offset provision, should apply to subsidies for businesses. Similarly, other commenters requested that Treasury clarify that the offset provision applies to tax abatements and reductions in corporate taxes, even if administered by a sub-unit of the recipient government. Citing to empirical research and other evidence, these commenters argued that these types of economic development policies were poorly administered, reduced public sector capacity, and were ineffective at achieving stated objectives of creating jobs, increasing income, and increasing economic growth. On the other hand, some commenters argued that, because subsidies were economically similar to some tax cuts, neither action should be considered a covered change and subject to the offset provision. Finally, other commenters requested that Treasury clarify whether covered changes must be broad-based policies or whether administrative decisions applicable to individuals would be considered covered changes.

Treasury Response: Section 602(c)(2)(A) applies to any change that "reduces any tax (by providing for a reduction in a rate, a rebate, a deduction, a credit, or otherwise or delays the imposition of any tax or tax increase." Accordingly, and consistent with this statutory text, the final rule applies to covered changes that reduce any tax, which can include tax abatements, but does not apply to loans, grants, or other types of interventions that do not reduce tax revenue.[354] In addition, by including changes in regulation or administrative interpretation, in addition to changes in law, within the scope of the offset provision, the ARPA recognizes that a recipient government may make a covered change through its legislature or may delegate the authority to make a covered change including, but not limited to, to a sub-unit of government. Treasury has revised the definition of "covered change" in the final rule using the statutory language above to make clear that the offset provision only applies to such changes in law, regulation, or administrative interpretation. With respect to the question of whether covered changes could include administrative decisions applicable to individuals, as discussed above, a covered change includes a change in law, regulation, or administrative interpretation that reduces any tax. Such changes may apply to one or more individuals or entities, provided that—consistent with the statutory text—they result from a change in law, regulation, or administrative interpretation.

Prior Enactment and Phase-In

Public Comment: A number of commenters expressed concern, or requested clarification, regarding changes that were enacted prior to the covered period but take effect or phase-in during the covered period. Several commenters argued that the definition of covered change should include changes that were made prior to the covered period but that phase-in during the covered period.

Treasury Response: As discussed above, the offset provision is triggered by a reduction in net tax revenue resulting from "a change in law, regulation, or administrative interpretation" made during the covered period. Consistent with the statutory text, "covered change" is defined to include any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute or rule where the phase-in or taking effect was not prescribed prior to the start of the covered period.

Conformity

Public Comment: A number of commenters requested clarification on the scope of covered changes. Specifically, several commenters requested clarification on the scope of changes that would be considered as conforming to recent changes in federal law. These commenters requested that Treasury clarify whether actions to selectively conform with federal law would be considered covered changes and requested clarification regarding the extent to which changes would be considered "recent." For example, these commenters requested clarification regarding conformance with the Global Intangible Low-Taxed Income provision of the 2017 Tax Cuts and Jobs Act. Some commenters further argued that changes that selectively conform or decouple from the Internal Revenue Code should be included within scope of covered changes and thus subject to the offset provision.

Treasury Response: The final rule maintains the treatment of changes that simply conform with recent changes in federal law, such as those to conform to recent changes in federal taxation of unemployment insurance benefits and taxation of loan forgiveness under the Paycheck Protection Program[355] and including other changes over the past several years. Regardless of the particular method of conformity and the effect on net tax revenue, Treasury views such changes as permissible under the offset provision.

Accordingly, and for the reasons discussed above, Treasury is maintaining the definition of covered change without change.

Tax revenue. The interim final rule's definition of "tax revenue" is based on the Census Bureau's definition of taxes, used for its Annual Survey of State Government Finances.[356] It provides a consistent, well-established definition with which states and territories will be familiar and is consistent with the approach taken in section Revenue Loss of this **SUPPLEMENTARY INFORMATION** describing the implementation of sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act regarding revenue loss. A number of commenters expressed concern and requested clarification regarding the definition of "tax revenue." These comments and responses are discussed in section Revenue Loss of this Supplemental Information and, for the reasons discussed above, Treasury is finalizing the definition of tax revenue without

change and maintaining a consistent definition of "tax revenue." [357]

Baseline. For purposes of measuring a reduction in net tax revenue, the interim final rule measures actual changes in tax revenue relative to a revenue baseline (baseline). The baseline is calculated as fiscal year 2019 (FY 2019) tax revenue indexed for inflation in each year of the covered period, with inflation calculated using the Bureau of Economic Analysis's Implicit Price Deflator.[358]

Public Comment: Some commenters expressed concern regarding the choice of FY 2019 as the baseline, arguing that the choice lacked justification and would make the offset provision more restrictive as applied to recipient governments that experienced a decline in revenue independent of making any covered changes.

Treasury Response: Measuring a "reduction" in net tax revenue requires identification of a baseline. In other words, a "reduction" can be assessed only by comparing two amounts. The Act defines "covered period" to begin on March 3, 2021, and thus the baseline year must end prior to March 3, 2021. As discussed in the interim final rule, FY 2019 is the last full fiscal year prior to the COVID–19 public health emergency, and thus is consistent with the statutory definition and does not include the extraordinary effects of the pandemic that began in 2020. Further, as discussed above, the interim final rule recognizes three potential ways that a recipient government may offset or "pay for" a reduction in net tax revenue due to a covered change: Increases in taxes, decreases in spending, and organic revenue growth. U.S. gross domestic product rebounded to exceed its pre-pandemic level in 2021,[359] suggesting that an FY 2019 pre-pandemic baseline is a reasonable comparator for future revenue levels and provides recipients with flexibility to identify organic growth as a permissible offset. Finally, this baseline year is consistent with the approach directed by sections 602(c)(1)(C) and 603(c)(1)(C), which identify the "most recent full fiscal year of the [state, territory, or Tribal government] prior to the emergency" as the comparator for measuring revenue loss. For these reasons, Treasury is finalizing the definition of "baseline" without change.

The interim final rule includes several other definitions that are applicable to the implementation of the offset provision, such as the term "reporting year." [360] Commenters did not express concern regarding other definitions in the interim final rule.

2. Framework

The interim final rule provides a step-by-step framework, to be used in each reporting year, to determine whether a state or territory used SLFRF funds to offset a reduction in net tax revenue. Consistent with section 602(c)(2) and the interim final rule, the final rule applies to states and territories:

(1) *Covered changes that reduce tax revenue.* Under the interim final rule, a recipient government identifies and values covered changes that the recipient government predicts will have the effect of reducing tax revenue in a given reporting year, similar to the way it would in the ordinary course of its budgeting process. The interim final rule states that the value of these covered changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, that aligns with the recipient government's existing approach for measuring the effects of fiscal policies, and that measures these effects relative to a current law baseline. If the recipient would prefer, the covered changes may also be reported based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the covered change(s), relative to the current law baseline prior to the change(s).[361] Further, estimation approaches may not use dynamic methodologies that incorporate the projected effects of macroeconomic growth because macroeconomic growth is accounted for separately in the framework.

Estimation

Public Comment: A number of commenters expressed concern that estimating the value of covered changes required a number of assumptions and that the actual effects of covered changes on tax revenue would be difficult to predict. Several commenters expressed support for the interim final rule's approach to dynamic scoring methodologies, and one commenter argued that the final rule should prohibit the use of prior cash balances in calculations of permissible tax cuts.

Treasury Response: Treasury recognizes that estimating the effects of covered changes requires assumptions and that many other factors influence the amount of tax revenue received. The interim final rule addresses these concerns in several ways. First, in general and where possible, reporting should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. This approach offers recipient governments the flexibility to determine their reporting methodology based on their existing budget scoring practices and capabilities. In addition, by relying on scoring methodologies that do not incorporate projected effects of macroeconomic growth, the estimation of the value of covered changes relies on fewer assumptions and thus provide greater consistency among states and territories. Finally, as discussed below, the interim final rule includes a de minimis threshold, below which the sum of covered changes will be deemed not to have any revenue-reducing effects.

Timing of the Impact of Covered Changes

Public Comment: Several commenters expressed concern that recipient governments, to evade the offset provision, may backload the costs of certain covered changes outside of the covered period, and advocated that covered changes be instead evaluated as the net present value in the year that the covered change is enacted. These commenters argued that some tax cuts could have effects on tax revenue for many decades or could be structured to take effect after the end of the covered period.

Treasury Response: As discussed in section Timeline for Use of SLFRF Funds, SLFRF funds must be used to cover costs incurred prior to December 31, 2024. Accordingly, SLFRF funds

[357] As discussed in section Revenue Loss of this Supplementary Information, for purposes of measuring revenue lost due to the pandemic under sections 602(c)(1)(C) and 603(c)(1)(C), recipients must adjust the amount of revenue lost to reflect changes that resulted from a tax increase or decrease. These adjustments do not apply to or affect the definition of tax revenue.

[358] U.S. Department of Commerce, Bureau of Economic Analysis, GDP Price Deflator, *https://www.bea.gov/data/prices-inflation/gdp-price-deflator* (last visited Apr. 30, 2021). The FY 2019 baseline revenue is adjusted annually for inflation to allow for direct comparison of actual tax revenue in each year (reported in nominal terms) to baseline revenue in common units of measurement; without inflation adjustment, each dollar of reported actual tax revenue would be worth less than each dollar of baseline revenue expressed in 2019 terms.

[359] Economy Statement by Catherine Wolfram, Acting Assistant Secretary for Economy Policy, for the Treasury Borrowing Advisory Committee November 1, 2021 (Nov. 1, 2021), *available at https://home.treasury.gov/news/press-releases/jy0453.*

[360] One commenter requested clarification that references to fiscal year refer to the fiscal year of the recipient. "Reporting year" is defined in the interim final rule and final rule to mean "a single year or partial year within the covered period, aligned to the current fiscal year of the State or Territory during the covered period."

[361] By permitting recipient governments to use actual or estimated values, the interim final rule and final rule provide flexibility to recipients and thus minimizes burden.

generally would not be able to offset a reduction in net tax revenue occurring after December 31, 2024.

For these reasons, Treasury is maintaining this element of the interim final rule without change.

(2) *In excess of the de minimis.* Under the framework established in the interim final rule, after establishing that a covered change occurred, the recipient government next calculates the total value of all covered changes in the reporting year resulting in revenue reductions, identified in Step 1. If the total value of the revenue reductions resulting from these changes is below the de minimis level, the recipient government is deemed not to have any revenue-reducing changes for the purpose of determining the recognized net reduction. If the total is above the de minimis level, the recipient government must identify sources of in-year revenue to cover the full costs of changes that reduce tax revenue. Under the interim final rule, the de minimis level is calculated as 1 percent of the reporting year's baseline.

Public Comment: Many commenters supported the inclusion of the de minimis, noting that the de minimis protects recipients from penalty resulting from minor or incidental changes, minimizes administrative burden, and enhances predictability of the application of the offset provision. Some commenters expressed concern that the fixed threshold could result in cliff effects.

Treasury Response: A clear de minimis threshold supports recipient governments' compliance with the offset provision. A de minimis level recognizes the inherent challenges and uncertainties that recipient governments face, and thus allows relatively small reductions in tax revenue without consequence. In other words, states and territories may make many small changes to alter the composition of their tax revenues or implement other policies with marginal effects on tax revenues. They may also make changes based on projected revenue effects that turn out to differ from actual effects, unintentionally resulting in minor revenue changes that are not fairly described as "resulting from" tax law changes. However, a de minimis does not automatically result in consequences under the offset provision, since a recipient government could demonstrate that other, non-SLFRF funds to offset a net reduction in tax revenue. Accordingly, any cliff effects associated with a clear de minimis threshold are mitigated by other aspects of the framework.

Public Comment: Commenters expressed a range of views regarding the amount of the de minimis. Some commenters argued that the de minimis was too generous, noting that the choice of 1 percent could, in some cases, permit reductions in net tax revenue of hundreds of millions of dollars. These commenters advocated that the de minimis be lowered (*e.g.*, to 25 basis points) or be tied to a fixed amount. Other commenters argued that the choice of de minimis was not well supported by the statute, advocated for a larger de minimis and suggested that the amount be tied to the recipient government's total expenditures in the prior fiscal year.

Treasury Response: Treasury adopted a de minimis threshold as an administrative accommodation for the reasons discussed above. As discussed in the interim final rule, Treasury determined that the 1 percent de minimis level reflects the historical reductions in revenue due to minor changes in state fiscal policies and was determined by assessing the historical effects of state-level tax policy changes in state EITCs implemented to effect policy goals other than reducing net tax revenues.[362]

For these reasons, Treasury is adopting the 1 percent de minimis without change.

(3) *Safe harbor.* Next, under the interim final rule, if the revenue reduction caused by the covered changes exceeds the 1 percent de minimis threshold, the recipient government compares the reporting year's actual tax revenue to the baseline. If actual tax revenue is greater than the baseline, Treasury will deem the recipient government not to have any recognized net reduction for the reporting year, and therefore to be in a safe harbor and outside the ambit of the offset provision. This approach is consistent with the ARPA, which contemplates recoupment of SLFRF funds only in the event that such funds are used to offset a reduction in net tax revenue. If net tax revenue has not been reduced, the offset provision does not apply. In the event that actual tax revenue is above the baseline, the organic revenue growth that has occurred, plus any other revenue-raising changes, by definition must have been enough to offset the in-year costs of any covered changes. One commenter argued that the offset for organic growth be adjusted to reflect population growth. To minimize administrative burden, and for the reasons discussed above, Treasury is maintaining the measurement of actual tax revenue without adjustment for population growth.

(4) *Consideration of other sources of funding.* The recipient government will then identify and calculate the total value of changes that could pay for revenue reduction due to covered changes and sum these items. This amount can be used to pay for up to the total value of revenue-reducing changes in the reporting year. These changes consist of two categories:

(a) *Tax and other increases in revenue.* The recipient government must identify and consider covered changes in policy that the recipient government predicts will have the effect of increasing general revenue in a given reporting year. Recipient governments should use the same approach to identify and value covered changes that increase tax revenue as applied to covered changes that reduce tax revenue. For the reasons discussed above, Treasury is adopting these aspects of identifying and valuing covered changes without change.

(b) *Covered spending cuts.* A recipient government also may cut spending in certain areas to pay for covered changes that reduce tax revenue, up to the amount of the recipient government's net reduction in total spending as described below. These changes must be reductions in government outlays in an area where the recipient government has not spent SLFRF funds. To better align with existing reporting and accounting, the interim final rule considers the department, agency, or authority from which spending has been cut and whether the recipient government has spent SLFRF funds on that same department, agency, or authority. If the recipient government has not spent SLFRF funds in a department, agency, or authority, the full amount of the reduction in spending counts as a covered spending cut, up to the recipient government's net reduction in total spending. If they have spent SLFRF funds in such department, agency, or authority, the SLFRF funds generally would be deemed to have replaced the amount of spending cut and only reductions in spending above the amount of SLFRF funds spent on the department, agency, or authority would count. This approach—allowing only spending reductions in areas where the recipient government has not spent SLFRF funds to be used as an offset for a reduction in net tax revenue—aims to prevent recipient governments from using SLFRF funds to supplant state or territory funding in the eligible use

[362] Data provided by the Urban-Brookings Tax Policy Center for state-level EITC changes for 2004–2017.

areas, and then using those state or territory funds to offset tax cuts. Such an approach helps ensure that SLFRF funds are not used to "indirectly" offset revenue reductions due to covered changes.

Department, Agency, or Authority

Public Comment: Several commenters supported the interim final rule's approach to considering spending cuts at the department, agency, or authority level, on the basis that this approach is supported by the statutory language prohibiting SLFRF funds from being used to "directly or indirectly" offset a reduction in net tax revenue. On the other hand, some commenters argued that the methodology for identifying offsetting spending cuts was too restrictive; specifically, that measurement at the agency or department-level may not adequately account for the size and various programs that could occur in one agency or department. One commenter argued that recipient governments should instead be permitted to consider spending cuts on a more granular sub-unit of a department but noted that this additional flexibility would come at the cost of transparency and clarity.

Treasury Comment: Treasury recognizes that some recipients may vary in their budgeting processes, with some budgeting on a department level and others budgeting at more or less granular sub-units of government. Relying on spending at a department, agency, or authority level allows recipient governments to report how SLFRF funds have been spent using reporting units already incorporated into their budgeting process.

Spending Cuts Baseline

Under the interim final rule, to calculate the amount of spending cuts that are available to offset a reduction in tax revenue, the recipient government must first consider whether there has been a reduction in total net spending, excluding SLFRF funds (net reduction in total spending). This approach ensures that reported spending cuts actually create fiscal space, rather than simply offset other spending increases. A net reduction in total spending is measured as the difference between total spending in each reporting year, excluding SLFRF funds spent, relative to total spending for the recipient's fiscal year ending in 2019, adjusted for inflation. Measuring reductions in spending relative to 2019 reflects the fact that the fiscal space created by a spending cut persists so long as spending remains below its original level, even if it does not decline further, relative to the same amount of revenue.

Public Comment: Several commenters expressed concern regarding the measurement of spending cuts relative to the recipient's FY 2019, for example arguing that the choice did not take into account increases in spending in 2020. As one commenter noted, the fiscal year 2020 required extraordinary intervention by recipient governments and the ongoing public health emergency continues to require extraordinary intervention.

Treasury Response: FY 2019 provides a reasonable and relatively generous baseline for considering spending because it is the last full fiscal year prior to the COVID–19 public health emergency and governments' extraordinary efforts to address the impact of the pandemic. This approach also aligns with the FY 2019 baseline for measuring revenue loss. Measuring spending cuts from year to year would, by contrast, not recognize any available funds to offset revenue reductions unless spending continued to decline, failing to reflect the actual availability of funds created by a persistent change and limiting the discretion of states and territories.

For the reasons discussed above, Treasury is adopting the approach taken in the interim final rule without change.

(5) *Identification of amounts subject to recoupment.* If a recipient government (i) reports covered changes that reduce tax revenue (Step 1); (ii) to a degree greater than the de minimis (Step 2); (iii) has experienced a reduction in net tax revenue (Step 3); and (iv) lacks sufficient revenue from other, permissible sources to pay for the entirety of the reduction (Step 4), then the recipient government will be considered to have used SLFRF funds to offset a reduction in net tax revenue, up to the amount that revenue has actually declined. That is, the maximum value of the reduction revenue due to covered changes that a recipient government must cover is capped at the difference between the baseline and actual tax revenue.[363] In the event that the baseline is above actual tax revenue but the difference between them is less than the sum of revenue reducing changes that are not paid for with other, permissible sources, organic revenue growth has implicitly offset a portion of the reduction. The revenue reduction cap implements this approach for permitting organic revenue growth to cover the cost of tax cuts.

Finally, a recipient government may request reconsideration of any amounts identified in a notice from Treasury as subject to recoupment under this framework. Comments and responses to the recoupment process are discussed in section Remediation and Recoupment of this Supplemental Information.

3. Reporting

To facilitate the implementation of the framework above, and in addition to reporting required on eligible uses, recipient governments are required to report certain information. The interim final rule indicated that Treasury would provide additional guidance at a later date and that, on an annual basis, it expected each recipient government would be required to provide the following information:

- Actual net tax revenue for the reporting year;
- Each revenue-reducing change made to date during the covered period and the in-year value of each change;
- Each revenue-raising change made to date during the covered period and the in-year value of each change; and
- Each covered spending cut made to date during the covered period, the in-year value of each cut, and documentation demonstrating that each spending cut is covered as prescribed under the interim final rule.

Since the adoption of the interim final rule, Treasury has provided guidance on reporting regarding eligible uses and has required recipient governments to indicate whether they have made covered changes and the value of such changes.[364]

Reporting Burden

Public Comment: Some commenters argued that the framework for identifying and reporting impermissible offsets was burdensome and that the burdens should be accounted for under Executive Order 13132 (Federalism, August 4, 1999).

Treasury Response: Taking into consideration comments received regarding burden, Treasury is considering a tiered approach to reporting on the offset provision. Specifically, under this approach, a recipient would only be required to report information to the extent needed to determine whether SLFRF funds had been used to offset a reduction in net tax revenue. For example, a recipient government would be required to report

[363] This cap is applied in section 35.8(c) of the final rule, calculating the amount of funds used in violation of the tax offset provision.

[364] *See* Reporting Guidance, Section C.11, available at *https://home.treasury.gov/system/files/136/SLFRF-Compliance-and-Reporting-Guidance.pdf.*

information regarding permissible offsets only if it had also reported covered changes that were in excess of the de minimis and had reported a net reduction in tax revenue. Treasury will provide additional guidance and instructions on the reporting requirements at a later date.

As discussed in section Regulatory Analyses of this Supplemental Information, Treasury maintains that the final rule does not have federalism implications within the meaning of Executive Order 13132 (Federalism, August 4, 1999). In the ARPA, Congress requires states and territories to repay the Secretary for amounts used in violation of the prohibition on using SLFRF funds to offset reductions in net tax revenue, and it authorizes the Secretary to issue regulations to carry out this limitation and other requirements of the statute. Section 6(b) of Executive Order 13132 contemplates that certain regulations will be required by statute, as is the case with the interim final rule and the final rule, in which case section 6(b)(2)(B)'s requirement to include a federalism summary impact statement in the Supplementary Information to the regulation does not apply. Notwithstanding the above, Treasury has engaged in efforts to consult and work cooperatively with affected state, local, and Tribal government officials and associations in the process of developing the interim final rule.

Reporting Transparency

Public Comment: Several commenters argued that information supporting the net tax offset calculation should be publicly available. Some of these commenters requested that reporting be made available in a machine-readable format, and others advocated that recipient governments disclose this information on their local budget agency's website. These commenters argued that making information regarding tax changes publicly available would increase transparency and accountability. Further, several commenters suggested that Treasury provide a mechanism for citizens to register their concerns about particular tax actions.

Treasury Response: As discussed in other sections, reporting requirements promote transparency and accountability for the general public and constituents of recipient governments to understand how state, local, and Tribal governments have used SLFRF funds. Since the publication of the interim final rule, Treasury issued supplementary reporting guidance in the Compliance and Reporting Guidance and in the User Guide: Treasury's Portal for Recipient Reporting (User Guide), which addresses the particular content and form of required reporting. Treasury will continue to issue updated guidance prior to each reporting period clarifying any modifications to requested report content and will continue to consider how reporting can best support transparency and accountability while minimizing recipient administrative burden. Further, as discussed in the section Remediation and Recoupment, Treasury may address potential violations of this final rule based on both information submitted from recipients, either through quarterly reports or self-reporting, and from other sources of information (*e.g.*, information submitted from the public).

2. Deposit Into Pension Funds

Background: Subsection 602(c)(2)(B) of the Social Security Act provides that "[n]o State or territory may use funds made available under this section for deposit into any pension fund." Similarly, subsection 603(c)(2) of the Social Security Act provides that "[n]o metropolitan city, nonentitlement unit of local government, or county may use funds made available under this section for deposit into any pension fund."

For purposes of this restriction on pension deposits, the interim final rule defined deposit to mean "an extraordinary payment of an accrued, unfunded liability." The interim final rule also specified that a deposit does not include routine contributions made as part of a payroll obligation, such as the normal cost component of a pension contribution or the component that consists of amortization of unfunded liabilities calculated by reference to the employer's payroll costs. The interim final rule applied the restriction on pension deposits to all recipients.

Public Comment: Several commenters observed that the statutory restriction on deposits into pension funds does not apply to Tribal governments.

Treasury Response: In response, Treasury is clarifying in the final rule that the pension restriction does not apply to Tribal governments.

Public Comment: Treasury also received a comment expressing concern that the interim final rule permitted recipients to make a larger than usual pension contribution, so long as the timing of that contribution aligns with the historical timing of contributions.

Treasury Response: The interim final rule prohibited the use of SLFRF funds from the ARPA to make extraordinary payments, and the **SUPPLEMENTARY INFORMATION** to the interim final rule said that a payment would be an extraordinary payment if it reduces a liability incurred prior to the start of the COVID–19 public health emergency and occurs outside the recipient's regular timing for making the payment. At the same time, however, as suggested by the comment Treasury received, a payment made at the regular time for pension contributions may very well be an extraordinary payment, for example, if it is larger than a regular payment would have been. Such a payment would be a restricted use.

Public Comment: Other commenters asked which pension contributions are permitted.

Treasury Response: To be an eligible use of SLFRF funds, a use must (1) be eligible under one of the eligible use categories and (2) not contravene any of the applicable restrictions on uses of funds. Some pension contributions may be eligible because they both fit within an eligible use category and do not contravene the restriction on deposits into pension funds (*i.e.*, they are not an extraordinary payment of an accrued, unfunded liability). For example, payroll and covered benefits for public health and safety staff responding to COVID–19 are an eligible use of funds to respond to the public health and negative economic impacts of the pandemic; routine pension contributions as part of an employee's regular covered benefits are permissible under that eligible use category.

B. Other Restrictions on Use of Funds

1. Debt Service and Replenishing Financial Reserves

The **SUPPLEMENTARY INFORMATION** to the interim final rule provided that debt service is not an eligible use of funds either to respond to the public health emergency or its negative economic impacts or as a provision of government services to the extent of revenue loss.[365] The interim final rule also provided that replenishing financial reserves (*e.g.*, rainy day funds) is not an eligible use of funds either to respond to the public health emergency or its negative economic impacts or as a provision of

[365] "[G]overnment services would not include interest or principal on any outstanding debt instrument, including, for example, short-term revenue or tax anticipation notes, or fees or issuance costs associated with the issuance of new debt. For the same reasons, government services would not include satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring in a judicial, administrative, or regulatory proceeding, except if the judgment or settlement required the provision of government services." 86 FR 26796–97 (May 17, 2021).

government services to the extent of revenue loss.[366]

As explained in greater detail below, Treasury, in the final rule, has retained these restrictions and is clarifying that these restrictions on the use of SLFRF funds apply to all eligible use categories.

Public Comments

Several commenters suggested that debt service and reserve replenishment should qualify as the provision of a government service and be an eligible use of funds, up to the amount of revenue loss due to the pandemic. Many commenters indicated that they had been forced to borrow money or dip into reserve funds to continue providing government services during the public health emergency and that using SLFRF funds for resulting debt service or reserve replenishment costs should therefore be considered a government service.

Many comments from Tribal governments noted that their governments depend on revenue from Tribal enterprises to pay government debts and provide services. The comments suggest that it should be an eligible use of SLFRF to replace lost revenue from these enterprises that would typically be used to pay debt service costs. Other commenters argued that paying the interest or principal on debt should in some cases be considered provision of government services and an eligible use of funds as such expenditures facilitate the provision of government services.

Some commenters argued that debt costs or reserve drawdowns during the public health emergency constitute a negative economic impact to recipient governments, and thus debt service or reserve replenishment should be an eligible use to respond to that negative economic impact. For example, several commenters suggested that there should be a specific carve-out allowing the use of SLFRF funds for debt service on debt incurred for government services after January 27, 2020, the start of the public health emergency, or short-term debt incurred for this purpose. Others suggested that recipient governments should be able to service debt, up to the amount of debt incurred in direct response to the pandemic. These commenters generally reasoned that the cost of responding to the public health emergency and its negative economic impacts prior to APRA's passage constitutes a negative economic impact of the pandemic.

Some commenters argued that the specific impacts of the pandemic on the travel, tourism, and hospitality sector had affected their ability to meet debt service costs. For example, some commenters explained that specific tax streams (*e.g.*, hotel room taxes) or revenue sources (*e.g.*, hospitality generally) are tied to specific debt instruments and that these revenue sources had declined during the public health emergency; commenters argued that this constitutes a negative economic impact that SLFRF funds should be permitted to address.

Finally, some commenters questioned why servicing debt incurred after March 3, 2021 for an otherwise eligible project (*e.g.*, a broadband infrastructure project) would not be an eligible use of funds.

On the other hand, many commenters expressed support for the interim final rule's prohibition on use of funds for debt service and reserve replenishment. These commenters largely argued that SLFRF funds should be used to provide current services to communities in response to the public health emergency and that use of funds for debt service or reserve replenishment represented, respectively, payment for past costs or savings for potential future costs. In addition to the prohibition on debt service and reserve replenishment, some commentors suggested that the final rule should also prevent funds from being used for state UI trust fund replenishment or for paying off debt owed through UI trust funds. One commenter argued that Treasury should further restrict recipient governments, for example by preventing recipients from making cuts to an allowable budget item, filling the budget gap with SLFRF funds, and then using the savings from the initial cut for debt service or reserve replenishment.

Treasury Response

The final rule maintains the restriction on the use of funds for debt service or reserve replenishment for the reasons described below and clarifies that this restriction applies to all eligible use categories.

First, debt service and reserve replenishment costs do not constitute the provision of services to constituents. As noted in the interim final rule, financing expenses—such as issuance of debt or payment of debt service—do not provide services or aid to citizens. Similarly, contributions to rainy day funds and similar financial reserves constitute savings for future spending needs. As such, these expenses do not respond to the current and ongoing public health and negative economic impacts of the pandemic, nor do they provide a government service.

Second, payments from the SLFRF are intended to be used prospectively (see section Timeline for Use of SLFRF Funds). The interim final rule provided that funds may be used for costs incurred beginning on March 3, 2021, which Treasury has maintained in the final rule. Use of funds for debt service on indebtedness issued prior to March 3, 2021 necessarily entails using funds for costs incurred during prior time periods, rather than the present response to the public health emergency and its negative economic impacts or to provide government services.

Third, SLFRF funds provide recipients with substantial latitude to use funds to support the diverse needs in their communities. With SLFRF resources available, recipients have less need to incur debt for otherwise-eligible SLFRF uses.

Finally, given the strong performance of overall revenues and low municipal bond yields, state and local governments generally do not face high levels of fiscal stress. Limits on debt service or replenishment of reserves would not have a substantial impact on recipients' ability to provide services. The ratio of state and local debt-to-GDP, which spiked briefly during the pandemic, has recovered to its pre-pandemic level and remains well below levels seen during the Great Recession.[367]

2. Settlements and Judgments

The interim final rule also provided that satisfaction of any obligation arising under or pursuant to a settlement agreement, judgment, consent decree, or judicially confirmed debt restructuring in a judicial, administrative, or regulatory proceeding would not be an eligible use of funds to respond to the public health and negative economic impacts of the pandemic or as a government service provided under the revenue loss eligible use category. However, if the judgment or settlement requires the recipient to provide services that are otherwise eligible under an SLFRF eligible use category, specifically if the settlement or judgment requires the recipient to provide services to respond to the COVID–19 public health emergency or its negative economic impacts or to provide government services, then those costs are eligible uses of SLFRF funds.

[366] "In addition, replenishing financial reserves (*e.g.*, rainy day or other reserve funds) would not be considered provision of a government service, since such expenses do not directly relate to the provision of government services."

[367] Table Z.1 of the Financial Accounts of the United States, Board of Governors of the Federal Reserve System, and Table 1.1.5 of National Income and Product Accounts, Bureau of Economic Analysis.

In other words, satisfaction of a settlement or judgment itself is not itself an eligible use of funds, unless the settlement requires the recipient to provide services or incur other costs that are eligible uses of SLFRF funds.

In the final rule, Treasury is maintaining the interim final rule approach and clarifying that it applies to all eligible use categories and any use of funds under the SLFRF program.

3. General Restrictions

In addition to the above restrictions, there are three general restrictions that apply to SLFRF funds. These restrictions, which reflect existing laws and regulations, the Award Terms and Conditions, and application of the ARPA statute, applied under the interim final rule, and they continue to apply under the final rule.

A primary purpose of the SLFRF in the ARPA is to support efforts to stop the spread of COVID–19.[368] As discussed above, recipients of SLFRF funds are required to comply with the Award Terms and Conditions established for the use of such funds. The interim final rule and final rule implement this objective by, in part, providing that recipients may use SLFRF funds for COVID–19 mitigation and prevention.[369] See section Public Health in Public Health and Negative Economic Impacts.

The CDC has provided recommendations and guidelines to help mitigate and prevent COVID–19 and has identified vaccines and masks as two of the best tools to prevent the spread of COVID–19. The interim final rule and final rule help support recipients in stopping the spread of COVID–19 through these recommendations and guidelines. Consistent with the purpose of the ARPA and as implemented through the interim final rule and final rule, a recipient may not use SLFRF funds for a program, service, or capital expenditure that includes a term or condition that undermines efforts to stop the spread of COVID–19. A program or service that imposes conditions on participation or acceptance of the service that would undermine efforts to stop the spread of COVID–19 or discourage compliance with recommendations and guidelines in CDC guidance for stopping the spread of COVID–19 is not a permissible use of SLFRF funds.

In other words, recipients may not use funds for a program that undermines practices included in the CDC's guidelines and recommendations for stopping the spread of COVID–19. This includes programs that impose a condition to discourage compliance with practices in line with CDC guidance (*e.g.*, paying off fines to businesses incurred for violation of COVID–19 vaccination or safety requirements), as well as programs that require households, businesses, nonprofits, or other entities not to use practices in line with CDC guidance as a condition of receiving funds (*e.g.*, requiring that businesses abstain from requiring mask use or employee vaccination as a condition of receiving SLFRF funds).

Second, a recipient may not use SLFRF funds in violation of the conflict of interest requirements contained in the Award Terms and Conditions or the Office of Management and Budget's Uniform Guidance, including any self-dealing or violation of ethics rules. Recipients are required to establish policies and procedures to manage potential conflicts of interest.[370] Treasury may provide further guidance on the types of activities or conflicts that the recipient's policies and procedures must cover.

Lastly, recipients should also be cognizant that federal, state, and local laws and regulations, outside of SLFRF program requirements, may apply. Recipients may not use revenue loss funds, for instance, to violate other background laws that limit the scope of activities that may be conducted as "government services," including other state and federal laws. State and local procurement, contracting, and conflicts-of-interest laws and regulations may include applicable requirements, including, for example, required procurement processes for contractor selection or competitive price setting. Furthermore, recipients are also required to comply with other federal, state, and local background laws, including environmental laws[371] and federal civil rights and nondiscrimination requirements, which include prohibitions on discrimination on the basis of race, color, national origin, sex, (including sexual orientation and gender identity), religion, disability, or age, or familial status (having children under the age of 18).

IV. Program Administration Provisions

The interim final rule included several sections that described the processes and requirements for administering the program on an ongoing basis, specifically: Distribution of funds, transfer of funds, use of funds for program administration, reporting on the use of funds, and remediation and recoupment of funds used for ineligible purposes.

To enhance clarity, this **SUPPLEMENTARY INFORMATION** for the final rule organizes these issues into one section on Program Administration Provisions. Recipients should also consult Treasury's Compliance and Reporting Guidance for additional information on program administration processes and requirements, including the applicability of the Uniform Guidance.

A. Payments in Tranches to Local Governments and Certain States

Section 602(b)(6)(A)(ii) of the Social Security Act authorizes the Secretary to withhold payment of up to 50 percent of the amount allocated to each state and territory for a period of up to 12 months from the date on which the state or territory provides its statutorily-required certification to the Secretary. The Social Security Act requires any such withholding be based on the unemployment rate in the state or territory as of the date of the certification.

Under the interim final rule, Treasury provided that it would withhold 50 percent of the amount allocated from any state that had an unemployment rate less than two percentage points above its unemployment rate in February 2020 as of the date the state submitted its initial certification for payment of funds pursuant to section 602(d)(1) of the Social Security Act. Based on data available at the time of the issuance of the interim final rule, this threshold was expected to result in a majority of states being paid in two tranches. Treasury did not split the payments of any territories.

Public Comment: One commenter asked Treasury to allow a state to request release of the portion of the state's second tranche payment after the state could demonstrate that it had allocated the entirety of the first tranche, a need to continue ongoing programs, and a desire to avoid borrowing costs. Another commenter asked Treasury to clarify whether states that received half their funding in the

[368] *See* Sec. 602(a)(1); 603(a)(1); 602(c)(1); 603(c)(1).

[369] *See* 35.6(b); Coronavirus State and Local Fiscal Recovery Funds, 86 FR at 26786.

[370] Specifically, the Award Terms and Conditions provide that "[r]ecipient understands and agrees it must maintain a conflict of interest policy consistent with 2 CFR 200.318(c), and that such conflict-of-interest policy is applicable to each activity funded nnder this award. Recipients and subrecipients must disclose in writing to Treasury or the pass-through agency, as appropriate, any potential conflict of interest affecting the awarded funds in accordance with 2 CFR 200.112."

[371] An exception is statutes that do not apply unless explicitly stated, including, *e.g.*, the National Environmental Policy Act and the Davis-Bacon Act.

first payment would receive their second half payment within 12 months. Similarly, some recipients requested clarification on whether they could obligate second tranche funds before receipt or use second tranche funds for costs incurred prior to receipt.

Treasury Response: The final rule maintains the approach in the interim final rule with two modifications. As described in the interim final rule, splitting payments for most states provides consistency with payments to local governments and encourages states to adapt their use of funds to developments that arise in the course of the economic recovery. Moreover, SLFRF funds may be used for costs incurred during the period of performance. Recipients may use their jurisdiction's budgeting and procurement practices and laws to determine how and when second tranche funds may be obligated.

The final rule makes two adjustments for operational purposes. First, the final rule provides that Treasury expects to make all second tranche payments to states available beginning 12 months from the date that funding was first made available by Treasury (May 10, 2021) regardless of when each individual state submitted its initial certification. This should increase clarity and consistency on the timing of second tranche payments for both states and Treasury. Second, also to ease recipient states' administrative burden, the final rule strikes a requirement from the interim final rule that states must certify for their second tranche payments and file all required reports at least 30 days prior to the date on which their second payment is made available. The final rule simply requires that states certify for their second tranche payment and file all required reports before receiving their second tranche payment, with no 30 day wait period required.

B. Payments to Nonentitlement Units of Local Government (NEUs) and Units of Local Government (UGLGs) Within Non-UGLG Counties

The interim final rule established requirements related to distributions of SLFRF funds by states and territories to NEUs and UGLGs within non-UGLG counties. Specifically, the interim final rule provided that the total distribution to an NEU cannot exceed 75 percent of the most recent budget for the NEU (the 75 percent budget cap); a requirement set forth in section 603(b)(2)(C)(iii) of the Social Security Act. The interim final rule **SUPPLEMENTARY INFORMATION** defined the NEU's budget for purposes of calculating the 75 percent budget cap as the NEU's "most recent annual total operating budget, including its general fund and other funds, as of January 27, 2020." The interim final rule further provided that states and territories must permit NEUs without formal budgets as of January 27, 2020 to self-certify their most recent annual expenditures as of January 27, 2020 for the purpose of calculating the 75 percent budget cap. Further, the interim final rule prohibited states and territories from placing additional conditions or requirements on distributions to NEUs beyond those required by the statute, the interim final rule, or Treasury's guidance and from offsetting any debt owed by such NEUs against such distributions.

Commenters predominantly focused on the definition of an NEU's budget for purposes of calculating the 75 percent budget cap, NEU allocations and eligibility, and the prohibition on states and territories imposing additional conditions or requirements in the NEU distribution process.

Definition of NEU Budget

Public Comment: Commenters suggested that Treasury provide greater clarification on the definition of an NEU's "most recent budget" for purposes of the 75 percent budget cap calculation. Treasury provided updated guidance on its interpretation of the 75 percent budget cap on June 30, 2021, and a commenter suggested that Treasury incorporate such updated interpretation into the **SUPPLEMENTARY INFORMATION** of the final rule.

Treasury Response: Consistent with the Update on Interpretation for the 75 Percent Budget Cap Calculation published on June 30, 2021,[372] the **SUPPLEMENTARY INFORMATION** of the final rule defines an NEU's budget for purposes of calculating the 75 percent budget cap as its total annual budget, including both operating and capital expenditure budgets, in effect as of January 27, 2020. The guidance also gives states and territories flexibility to provide further guidance to their NEUs to operationalize the 75 percent budget cap. Given the variance in local financial accounting, this updated definition will better facilitate states' and territories' distribution of SLFRF funds to NEUs.

Allocations and Eligibility

Public Comment: Many commenters provided feedback on specific allocation calculations and eligibility of local governments for NEU funding. Commenters addressed how a locality was classified as an NEU or metropolitan city, deviations between Treasury's allocation calculations and earlier estimates from other sources, treatment of unincorporated areas, sources for population data, and Treasury's allocation of NEU funding to states and territories based on the population of a state and territory outside of its metropolitan cities. Two commenters proposed that Treasury provide an appeal process for localities that were not identified on the List of Local Governments used by states and territories as part of the process in which a state or territory determines the eligibility of an NEU in accordance with Treasury guidance, or for Minor Civil Divisions (MCDs) that were denied funding as part of a facts-and-circumstances test undertaken by a weak-MCD state.

Treasury Response: Neither the interim final rule nor the final rule addresses eligibility or allocations issues, and comments on these topics are outside the scope of this rulemaking. These questions are addressed in other Treasury guidance, including the Guidance on Distribution of Funds to Non-entitlement Units of Local Government and Non-entitlement Unit of Local Government Definitional and Data Methodology guidance documents available on Treasury's website.[373] Because Treasury interpreted the definition of an NEU[374] in accordance with the statute and established an NEU distribution process in May 2021, the final rule does not incorporate an appeals process regarding the definitions or the facts-and-circumstances test used for eligibility determinations.

Prohibition on Additional Conditions or Requirements in the NEU Distribution Process

Public Comment: One commenter expressed support for Treasury's prohibition on states and territories

[372] Treasury's Update on Interpretation for the 75 Percent Budget Cap Calculation can be found at: *https://home.treasury.gov/system/files/136/NEU-Update-75-Percent-Budget-Cap.pdf.*

[373] The Guidance on Distribution of Funds to Nonentitlement Units of Local Government can be found at this link: *https://home.treasury.gov/system/files/136/NEU_Guidance.pdf.* The Nonentitlement Unit of Local Government Definitional and Data Methodology can be found at this link: *https://home.treasury.gov/system/files/136/NEU_Methodology.pdf.*

[374] Treasury has interpreted NEU to generally include both incorporated places and MCDs with active functioning governments, subject to the state determining, in the case of weak-MCD States, that a weak MCD has the legal and operational capacity to accept SLFRF funds and provides a broad range of services that would constitute eligible uses under ARPA. More details can be found in the Nonentitlement Unit of Local Government Definitional and Data Methodology, available at *https://home.treasury.gov/system/files/136/NEU_Methodology.pdf.*

placing additional conditions or requirements on distributions to NEUs. This prohibition restricts states and territories from imposing limitations on NEUs' use of SLFRF funds based on an NEU's proposed spending plan or other policies, offsetting any debt owed by an NEU against the NEU's distribution, or providing funding on a reimbursement model. In particular, the commenter noted that a reimbursement model would lead to inequities in accessing SLFRF funds.

Treasury Response: The final rule maintains and finalizes the prohibition on states and territories placing additional conditions or requirements on distributions to NEUs as well as to any UGLGs within counties that are non-UGLGs. Such conditions or requirements may contravene the statutory requirement that states and territories make distributions based on population and within the statutorily defined timeframe.

Other Provisions

Treasury did not receive substantive comments on the requirement that states and territories permit NEUs without formal budgets as of January 27, 2020 to self-certify their most recent annual expenditures as of January 27, 2020 for the purpose of calculating the 75 percent budget cap, or Treasury's interpretation of the 75 percent budget cap applying only to a consolidated government's NEU allocation under section 603(b)(2) but not to a consolidated government's county allocation under section 603(b)(3). Further, Treasury did not receive substantive comments on the interim final rule's allowance that states and territories be able to use SLFRF funds under section 602(c)(1)(A) to fund expenses related to administering payments to NEUs and units of general local government. As such, the final rule maintains these provisions as written in the interim final rule without modification.

Treasury received some comments that are not addressed because they are beyond the scope of the NEU provision of the interim final rule or not authorized by the statute, including comments related to state accounting practices, re-allocations of NEU allocations that exceed the 75 percent budget cap, and concerns around eligible uses under SLFRF that small local governments may find particularly salient.

C. Timeline for Use of SLFRF Funds

The interim final rule provided that "[a] recipient may only use funds to cover costs incurred during the period beginning March 3, 2021 and ending December 31, 2024." The interim final rule also provides that the period of performance will run until December 31, 2026, which will provide recipients an additional two years during which they may expend funds for costs incurred (*i.e.*, obligated).

As explained in more detail below, in the final rule Treasury is maintaining these time periods. Treasury will retain March 3, 2021 as the first date when costs may be incurred, to provide for forward-looking or prospective use of funds and to align with the start date of the "covered period" as such term is used in section 602(c)(2)(A). The deadline for costs to be incurred—which the final rule clarifies means obligated—December 31, 2024, is specified in the ARPA statute, and Treasury will retain December 31, 2026 as the end of the period of performance to provide a reasonable amount of time for recipients to liquidate obligations incurred by the statutory deadline.

Public Comments. Some commenters expressed concerns about costs incurred before March 3, 2021 not being covered and recommended the "start date" be changed to January 2020 to coincide with the declaration of the public health emergency. These commenters argued that recipient governments began incurring costs to respond to COVID–19 and its economic impacts in January 2020 and that prior federal fiscal relief, such as relief provided in the Coronavirus Aid, Relief, and Economic Security Act, did not fully compensate recipient governments for these costs. These commenters recommended that costs incurred before March 3, 2021 that otherwise fit within eligible use categories for SLFRF should be permissible uses of funds.

Some commenters asked Treasury to clarify whether local governments are subject to the same covered period as states and territories beginning March 3, 2021. Commenters noted that section 603(g) of the Social Security Act does not contain the same definition of "covered period" as section 602(g)(1) of the Social Security Act, which references a statutory provision that only applies to states and territories.

Many commenters requested that the deadline for costs to be incurred and the period of performance be extended due to the longer timeline for completing water and sewer projects. One commenter requested that recipients be able to split projects into different phases so that funds could be expended on larger, longer term projects (*e.g.*, by obligating funds on one portion of the project by the statutory deadline). One commenter recommended that the period of performance be extended for at least two additional years beyond the expenditure deadline set forth in the interim final rule, *i.e.*, until December 31, 2028. One commenter wrote that the final rule should allow for extended projects (*e.g.*, over a time horizon of more than ten years) for recipients working to develop long-term water supplies to prepare for extreme drought.

Treasury Response. In the final rule, Treasury is maintaining March 3, 2021 as the date when recipients may begin to incur costs using SLFRF funds. As described in the interim final rule, use of SLFRF funds is forward looking and the eligible use categories provided by statute are all prospective in nature. While recipients may identify and respond to negative economic impacts that occurred during 2020, the costs incurred to respond to these impacts remain prospective. Further, Treasury considers the beginning of the covered period for purposes of determining compliance with section 602(c)(2)(A) to be a relevant reference point for this purpose that provides some flexibility for recipients that began incurring costs in the anticipation of enactment of the ARPA or in advance of the issuance of the interim final rule and receipt of payment.

Finally, establishing an earlier start date would permit governments to use funds received in 2021 to satisfy obligations incurred in 2020. This use raises a substantial risk of SLFRF funds being used to supplant other recipient funds previously used to pay for such 2020 obligations, freeing funds for recipients to use for any purpose rather than eligible uses of SLFRF funds under the ARPA. Permitting such usage would undermine the provisions setting forth permissible and impermissible uses in the statute. Therefore, a reading of the statute permitting use of funds prior to March 3, 2021 would be inconsistent with the statutory structure.

In the final rule, Treasury is also maintaining the deadlines by which funds must be obligated (*i.e.*, December 31, 2024) and by which such obligations must be liquidated (*i.e.*, December 31, 2026). The December 31, 2024 deadline by which eligible costs must be incurred is established by statute. Treasury is finalizing its interpretation of "incurred" to be equivalent to the definition of "obligation," based on the definition used for purposes of the Uniform Guidance. Treasury is also maintaining the period of performance, which will run through December 31, 2026, and provides the deadline by which recipients must expend obligated funds. Most recipients received SLFRF funds in the spring and summer of 2021,

meaning that they have over three years to obligate and over five years to expend funds. This provides a sufficient amount of time for recipients to plan and execute projects.

D. Transfers of Funds

Under section 602(c)(3) of the Social Security Act, a state, territory, or Tribal government may transfer SLFRF funds to a "private nonprofit organization . . . a Tribal organization . . . a public benefit corporation involved in the transportation of passengers or cargo, or a special-purpose unit of state or local government." Similarly, section 603(c)(3) authorizes a local government to transfer SLFRF funds to the same entities (other than Tribal organizations). Separately, section 603(c)(4) authorizes a local government to transfer SLFRF funds to the state in which it is located.

Entities Eligible for a Transfer Under Sections 602(c)(3) and 603(c)(3)

Regarding transfers permitted under sections 602(c)(3) and 603(c)(3) of the Act, the interim final rule Supplementary Information clarified that the lists of transferees in these sections are not exclusive and that state, local, territorial, and Tribal governments may transfer funds to other constituent units of government or private entities beyond those specified in the statute.

Public Comment: Several commenters supported Treasury's interpretation of eligible transferees in sections 602(c)(3) and 603(c)(3) as nonexclusive. However, many commenters asked for greater clarity as to whether specific entities not listed in Treasury's examples of eligible subrecipients, such as nonprofits and Tribal governments, were eligible transferees. One commenter also asked whether a recipient may transfer SLFRF funds to a higher level of government, such as a locality to the county in which it is located.

Treasury Response: The final rule clarifies that, in addition to the entities enumerated in sections 602(c)(3) and 603(c)(3), recipients may transfer SLFRF funds to any entity to carry out as a subrecipient an eligible use of funds by the transferor, as long as they comply with the Award Terms and Conditions and other applicable requirements, including the Uniform Guidance at 2 CFR 200.331–200.333. Eligible subrecipients include, but are not limited to, other units of government (including Tribal governments), nonprofits and other civil society organizations, and private entities. Further, the final rule clarifies that transfers may be made to both constituent or non-constituent units of government. For example, county A may transfer SLFRF funds to county B as long as county B abides by the use restrictions applicable to county A and the transfer would constitute an eligible use of the funds by county A. County A must receive a benefit proportionate to the amount transferred.

As detailed in the interim final rule Supplementary Information, once transfers are received, the transferee must abide by the restrictions on use applicable to the transferor under the ARPA and other applicable law, regulations, and program guidance. Further, the transferor remains responsible for monitoring and overseeing the subrecipient's use of SLFRF funds and other activities related to the award to ensure that the subrecipient complies with the statutory and regulatory requirements and the Award Terms and Conditions. Recipients also remain responsible for reporting to Treasury on their subrecipients' use of payments from the SLFRF for the duration of the award.

Pooling Funds

Public Comment: Several commenters asked for clarification about whether they may pool SLFRF funds for a project with other recipients, including when doing so involves a transfer to another entity, such as a regional organization or government that undertakes projects on behalf of a number of local governments. Commenters also asked for clarification on the oversight and reporting obligations that would result from such transfers.

Treasury Response: Consistent with guidance issued following the interim final rule,[375] the final rule clarifies that recipients may pool SLFRF funds for projects, provided that the project is itself an eligible use of SLFRF funds for each recipient that is contributing to the pool of funds and that recipients are able to track the use of funds in line with the reporting and compliance requirements of the SLFRF. In general, when pooling funds for regional projects, recipients may expend funds directly on the project or transfer funds to another government or other entity that is undertaking the project on behalf of multiple recipients. To the extent recipients undertake regional projects via transfer to another organization or government, recipients would need to comply with the rules on transfers specified in the final rule

SUPPLEMENTARY INFORMATION. A recipient may transfer funds to a government outside its boundaries (*e.g.*, county transfers to a neighboring county), provided that the transferor can document that the transfer constitutes an eligible expense of the transferor government and that its jurisdiction receives a benefit proportionate to the amount transferred.

Blending and Braiding of Funds

Treasury is clarifying in the final rule that, consistent with further guidance issued by Treasury following the interim final rule,[376] recipients may fund a project with both SLFRF funds and other sources of funding, provided that the costs are eligible costs under each source program and are compliant with all other related statutory and regulatory requirements and policies. The recipient must comply with applicable reporting requirements for all sources of funds supporting the SLFRF projects and with any requirements and restrictions on the use of funds from the supplemental funding sources and the SLFRF program. Specifically,

- All funds provided under the SLFRF program must be used for projects, investments, or services that are eligible under the SLFRF program. SLFRF funds may not be used to fund an activity that is not, in its entirety, an eligible use under the SLFRF program. For example:
  - SLFRF funds may be used in conjunction with other sources of funds to make an investment in water infrastructure that is eligible under section 602 or 603 of the Social Security Act and the final rule.
  - SLFRF funds could *not* be used to fund the entirety of a water infrastructure project that was partially, although not entirely, an eligible use under Treasury's final rule. However, the recipient could use SLFRF funds only for a smaller component project that does constitute an eligible use, while using other funds for the remaining portions of the larger planned water infrastructure project that do not constitute an eligible use. In this case, the "project" for SLFRF purposes under this program would be only the eligible use component of the larger project.
- In addition, because SLFRF funds must be obligated by December 31, 2024, and recipients must expend all funds under the award no later than December 31, 2026, recipients must be able to, at a minimum, determine and report to Treasury on the amount of SLFRF funds obligated and expended and when such funds were obligated and expended.

[376] *See FAQ 4.10. Id.*

Scope of a 603(c)(4) Transfer

Unlike in the case of a transfer under sections 602(c)(3) or 603(c)(3), the interim final rule **SUPPLEMENTARY INFORMATION** specified that transfers from a local government to the state under section 603(c)(4) will result in a cancellation or termination of the award on the part of the transferor local government and a modification of the award to the transferee state.

Public Comment: Two commenters suggested that Treasury expand section 603(c)(4) beyond transfers from localities to the state to include transfers from counties to their constituent local governments, which would incentivize counties to augment funds to address the needs of local governments. These commenters noted that counties are disincentivized to make transfers under section 603(c)(3), as is currently allowed, as such transfers would require that counties provide oversight and monitoring over its subrecipients.

Treasury Response: Section 603(c)(4), by its terms, applies only to transfers from local governments to states. Accordingly, the final rule must maintain the interim final rule's limitation of section 603(c)(4) transfers as applicable only to transfers from local governments to states. Expansions of section 603(c)(4) transfer authority beyond transfers from local governments to states were not explicitly authorized by Congress. As such, transfers under section 603(c)(4) may only be made by local governments to the state in which they are located.

Congress enumerated two separate transfer provisions for local governments—section 603(c)(3) and section 603(c)(4)—that use different language and were intended to operate differently. Section 603(c)(4) contains prefatory language ("Notwithstanding paragraph (1)"—a reference to the eligible SLFRF uses) that section 603(c)(3) does not. In other words, section 603(c)(4) transfers are not required to constitute an eligible use of the funds from the perspective of the transferor local government, but section 603(c)(3) transfers are required to constitute an eligible use. A transfer to accomplish an eligible use fits within the recipient-subrecipient framework.

Further, treating section 603(c)(3) transfers as leading to a cancellation of the award for the transferor local government would result in scenarios that are inconsistent with the statutory language. An award cancellation pursuant to a section 603(c)(3) transfer would result in either (1) non-governmental entities becoming award recipients under the program, which would contravene the purpose of SLFRF or (2) transfers to governmental and non-governmental entities being treated in a distinct and inconsistent manner. That is, section 603(c)(3) transfers to governmental entities would lead to award cancellation but section 603(c)(3) transfers to non-governmental entities would lead to a recipient-subrecipient relationship. Therefore, in the final rule, Treasury maintains its distinct treatment of a section 603(c)(3) transfer and section 603(c)(4) transfer.

The final rule clarifies that a transfer under section 603(c)(4) will result in a modification, termination, or cancellation of the award on the part of the transferor local government and a modification of the award to the transferee state or territory. As detailed in the **SUPPLEMENTARY INFORMATION** to the interim final rule, the transferor must provide notice of the transfer to Treasury in a format specified by Treasury. Until the local government provides such notice and Treasury provides confirmation of its acceptance of the notice, the local government will remain responsible for ensuring that the SLFRF award is being used in accordance with the Award Terms and Conditions, section 602 or 603 of the Social Security Act, the final rule, and program guidance including reporting on such uses of the award funds to Treasury.

A state that receives a transfer from a local government under section 603(c)(4) will be bound, by statute, by all of the use restrictions set forth in section 602(c) with respect to the use of those SLFRF funds, including the prohibitions on use of such SLFRF funds to offset certain reductions in taxes or to make deposits into pension funds. The state will be responsible as the prime recipient for the use and reporting on any funds transferred under section 603(c)(4) by the local government. Such transferred funds will be subject to the Award Terms and Conditions previously accepted by the state in connection with its SLFRF award.

Subrecipient Transfers

Public Comment: Commenters sought clarification as to how funds may be transferred from a recipient to another entity. For instance, one commenter requested that recipients be able to advance funds to subrecipients as opposed to reimbursing subrecipients for expenses incurred.

Treasury Response: Treasury did not specify in the interim final rule whether recipients may advance funds to subrecipients. This omission was not intended to prevent recipients from advancing funds to subrecipients, consistent with the various methods permitted under the Uniform Guidance. Given the broad flexibility that recipients have in selecting eligible uses and the broad variety of potential subrecipients, Treasury believes that specifying a single method of advancement or reimbursement would add unnecessary administrative difficulty to program administration. Recipients may determine the optimal payment structure for the transfer of funds (*e.g.*, advance payments, reimbursement basis, etc.) from recipients to subrecipients. Ultimately, recipients must comply with the eligible use requirements and any other applicable laws or requirements and are responsible for the actions of their subrecipients.

E. Administrative Expenses

The interim final rule permitted, under the heading "[e]xpenses to improve efficacy of public health or economic relief programs," use of funds for "[a]dministrative costs associated with the recipient's COVID–19 public health emergency assistance programs, including services responding to the COVID–19 public health emergency or its negative economic impacts, that are not federally funded."

Following release of the interim final rule, Treasury issued Compliance and Reporting Guidance that provided that "recipients may use funds for administering the SLFRF program, including costs of consultants to support effective management and oversight, including consultation for ensuring compliance with legal, regulatory, and other requirements. Further, costs must be reasonable and allocable as outlined in 2 CFR 200.404 and 2 CFR 200.405. Pursuant to the SLFRF Award Terms and Conditions, recipients are permitted to charge both direct and indirect costs to their SLFRF award as administrative costs. Direct costs are those that are identified specifically as costs of implementing the SLFRF program objectives, such as contract support, materials, and supplies for a project. Indirect costs are general overhead costs of an organization where a portion of such costs are [sic] allocable to the SLFRF award such as the cost of facilities or administrative functions like a director's office." [377] Several commenters

[377] U.S. Department of the Treasury, Recipient Compliance and Reporting Responsibilities, as of November 5, 2021; *https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-*

Continued

requested clarity on which administrative expenses are permissible uses of funds and how recipients should structure administrative costs.

In the final rule, Treasury is clarifying that direct and indirect administrative expenses are permissible uses of SLFRF funds and are a separate eligible use category from "[e]xpenses to improve efficacy of public health or economic relief programs," which refers to efforts to improve the effectiveness of public health and economic programs through use of data, evidence, and targeted consumer outreach. For details on permissible direct and indirect administrative costs, recipients should refer to Treasury's Compliance and Reporting Guidance.[378] Costs incurred for the same purpose in like circumstances must be treated consistently as either direct or indirect costs.

F. Treatment of Loans

The interim final rule allowed recipients to use SLFRF funds to make loans for uses that are otherwise eligible (for example, for small business assistance). Subsequent guidance clarified how recipients must track and dispose of program income from loans, consistent with the statutory requirements for the timing of SLFRF expenditures.

SLFRF funds must be used to cover "costs incurred" by the recipient between March 3, 2021 and December 31, 2024. The interim final rule provided that SLFRF funds must be obligated by December 31, 2024 and expended by December 31, 2026. In using SLFRF funds to make loans, recipients must be able to determine the amount of funds used to make a loan and must comply with restrictions on the timing of the use of funds and with restrictions in the Uniform Guidance.

When SLFRF funds are used as the principal for loans, there is an expectation that a significant share of the loaned funds will be repaid. Thus, recipients may not simply consider the full amount of loaned funds to be permanently expended and must appropriately account for the return of loaned funds.

For loans that mature or are forgiven on or before December 31, 2026, the recipient must account for the use of funds on a cash flow basis, consistent with Treasury's guidance regarding loans made by recipients using payments from the Coronavirus Relief Fund.[379] Recipients may use SLFRF funds to fund the principal of the loan and in that case must track repayment of principal and interest (*i.e.*, "program income," as defined under 2 CFR 200). When the loan is made, recipients must report the principal of the loan as an expense.

Repayment of principal may be re-used only for eligible uses and is subject to restrictions on the timing of the use of funds. Interest payments received prior to the end of the period of performance will be considered an addition to the total award and may be used for any purpose that is an eligible use of funds under the statute and final rule. Recipients are not subject to restrictions under 2 CFR 200.307(e)(1) with respect to such payments.

For loans with maturities longer than December 31, 2026, the recipient must estimate the cost to the recipient of extending the loan over the life of the loan. In other words, at origination, the recipient must measure the projected cost of the loan and may use SLFRF funds for the projected cost of the loan. Recipients have two options for estimating this amount: They may estimate the subsidy cost (*i.e.*, net present value of estimated cash flows) or the discounted cash flow under current expected credit losses (*i.e.*, CECL method). See further guidance issued by Treasury for further explanation.[380]

Public Comment: Many commenters asked for further clarification on the treatment of loans and the calculation of "costs incurred." Some commenters requested that grants made for eligible activities prior to December 31, 2024 to a revolving loan fund, an economic development corporation, a land bank, or a similar facility should be considered obligated and expended at the time of the grant. This would allow funds to be expended by the grantee beyond the covered period and for funds returned to the grantee to be re-invested in further uses outside of the covered period.

Treasury Response: The final rule maintains the treatment of loans from the interim final rule and subsequent guidance, as discussed above. This approach is consistent with the statutory requirement that funds be used for costs incurred for eligible purposes by December 31, 2024 and is consistent with standard accounting practices and the Uniform Guidance.

G. Use of Funds for Match or Cost-Share Requirements

As a general matter and as referenced in the **SUPPLEMENTARY INFORMATION** to the interim final rule, funds provided under one federal program may not be used by a recipient to meet the non-federal match or cost-share requirements of another federal program.

However, Treasury has since determined that, consistent with this general principle and the requirements of the Uniform Guidance at 2 CFR 200.306(b)(5), the funds available under sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act for the provision of government services, up to the amount of the recipient's reduction in revenue due to the public health emergency, generally may be used to meet the non-federal cost-share or matching requirements of other federal programs. Federal funds that constitute revenue sharing to state and local governments may generally be used to meet non-federal match requirements.[381] The broad eligible uses of the SLFRF funds available under sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act, combined with the purpose of these provisions (which is to provide general fiscal assistance to governments facing revenue losses due to the public health emergency), demonstrate that these funds are revenue sharing. They thus should generally be permitted to be used to meet the non-federal match and cost-share requirements of other federal programs. As such, the SLFRF funds available for the provision of government services, up to the amount of the recipient's reduction in revenue due to the public health emergency, may be used to meet the non-federal match requirements of the Drinking Water State Revolving Fund and Clean Water State Revolving Fund programs administered by the EPA, for example.

Pursuant to 2 CFR 200.306(b) of the Uniform Guidance, if funds are legally available to meet the match or cost-share requirements of an agency's federal program, such awarding agency is required to accept such funds for the purpose of that program's match or cost-share requirements except in the circumstances enumerated in that section. The Office of Management and Budget has authority under 2 CFR

recovery-funds/recipient-compliance-and-reporting-responsibilities.

200.102 of the Uniform Guidance to issue waivers of this requirement on request of the relevant awarding agency. Analogous requirements and waiver authorities may be present in other regulations. If a recipient seeks to use SLFRF funds to satisfy match or cost-share requirements for a federal grant program, it should first confirm with the relevant awarding agency that no waiver has been granted for that program, that no other circumstances enumerated under 2 CFR 200.306(b) would limit the use of SLFRF funds to meet the match or cost-share requirement, and that there is no other statutory or regulatory impediment to using the SLFRF funds for the match or cost-share requirement. Note that SLFRF funds may not be used as the non-federal share for purposes of a state's Medicaid and CHIP programs because the Office of Management and Budget has approved a waiver as requested by the Centers for Medicare & Medicaid Services pursuant to 2 CFR 200.102 of the Uniform Guidance and related regulations.

SLFRF funds beyond those that are available under sections 602(c)(1)(C) or 603(c)(1)(C) of the Social Security Act for the provision of government services may not be used to meet the non-federal match or cost-share requirements of other federal programs other than as specifically provided for by statute. For example, as discussed in other sections of this final rule, section 40909 of the Infrastructure Investment and Jobs Act provides that SLFRF funds may be used to meet the non-federal match requirements of any authorized Bureau of Reclamation project, and section 60102 of the Infrastructure Investment and Jobs Act provides that the SLFRF may be used to meet the non-federal match requirements of the broadband infrastructure program authorized under that section (see sections Water and Sewer Infrastructure and Broadband Infrastructure).

H. Reporting

The interim final rule established Treasury's authority to collect information from recipients through requested reports and any additional requests for information. The interim final rule also provided Treasury flexibility to extend or accelerate reporting deadlines and to modify requested content for the Interim Report, Project and Expenditure reports, and Recovery Plan Performance reports.

The **SUPPLEMENTARY INFORMATION** of the interim final rule provided initial guidance on the reporting requirements for the SLFRF funds. States (defined to include the District of Columbia), territories, metropolitan cities, counties, and Tribal governments were required to submit one interim report and quarterly Project and Expenditure reports thereafter. Non-entitlement units of local government were not required to submit an interim report. States, territories, and metropolitan cities and counties with a population greater than 250,000 residents were also required to submit an annual Recovery Plan Performance report to Treasury. The Supplementary Information of the interim final rule provided guidance on the deadlines and content required for each type of report.

Public Comment: Treasury received many comments on the content and specific data elements required of program reporting. Some commenters expressed enthusiasm for including particular details in reporting to promote transparency. Other commenters requested that Treasury streamline reporting requirements to avoid imposing undue administrative burdens and compliance costs. Many commenters requested further clarification on or amendments to particular elements of reporting content. Some commenters requested that reports and specific reporting elements be public, including a request for a public website with a number of programmatic data metrics about the use of SLFRF funds. Some commenters sought clarification and guidance for using the reporting portal, which allows recipients to upload the required information, or requested user modifications to the portal. Finally, some commenters requested that Treasury provide example materials and reporting metrics to aid recipient understanding.

Treasury Response: Since the publication of the interim final rule, Treasury issued supplementary reporting guidance in the Compliance and Reporting Guidance and in the User Guide: Treasury's Portal for Recipient Reporting (User Guide).[382] Treasury has addressed many of these comments in the Compliance and Reporting Guidance and User Guide and will continue to issue updated guidance prior to each reporting period clarifying any modifications to requested report content. Treasury notes that the interim final rule did not address the specific content and data elements required in reporting, the reporting portal or submission process, and the specific form of reporting (*e.g.*, example templates, machine readability); comments on these topics are outside the scope of the final rule and, as noted, are addressed instead in Compliance and Reporting Guidance.

Reporting Deadlines

Public Comment: Treasury received comments requesting various changes to reporting deadlines to ease compliance burdens. For example, Treasury received several comments requesting that Treasury delay early reporting deadlines for various reasons, including to align with the timeline for issuing a final rule and to allow for more time for recipients to determine SLFRF allocations. Commenters also requested changes to the immediacy of reporting, for example requesting that Treasury allow expenses to be reported with a lag instead of the quarter in which they were accrued or that reports be due 90 days after period close instead of 30 days after the close of a reporting period. Some commenters requested changes to the reporting frequency, for example to report biannually rather than quarterly.

Treasury Response: Treasury has clarified reporting deadlines in the Compliance and Reporting guidance.[383] Treasury is retaining the reporting deadline of 30 days after the close of the reporting period to ensure timely accounting of the use of SLFRF funds; this timeline also aligns with practices in many other federal programs. The final rule maintains Treasury's discretion to extend or delay reporting deadlines.

Administrative Costs for Reporting and Compliance

Public Comment: Many commenters sought clarification about whether various administrative costs related to reporting and compliance were eligible uses of funds and asked for clarification on the limits of such use.

Treasury Response: Treasury notes that administrative costs are generally allowable uses of SLFRF funds, including for reporting. For additional information on administrative expenses, please see section Administrative Expenses under Program Administration Provisions.

Uniform Guidance

Public Comment: The **SUPPLEMENTARY INFORMATION** of the interim final rule clarified that SLFRF funds were generally subject to the provisions of the Uniform Administrative Requirements, Cost Principles, and Audit

[382] U.S. Department of the Treasury, Recipient Compliance and Reporting Responsibilities, as of November 5, 2021; *https://home.treasury.gov/policy-issues/coronavirus/assistance-for-state-local-and-tribal-governments/state-and-local-fiscal-recovery-funds/recipient-compliance-and-reporting-responsibilities.*

[383] *Id.*

Requirements for Federal Awards (2 CFR part 200) (the Uniform Guidance), including the cost principles and restrictions on general provisions for selected items of cost. Treasury received many comments requesting clarification about or modifications to the applicability of the Uniform Guidance on various issues.

For example, one commenter requested that Treasury remove requirements that expenditures of funds be made in conformance with the Uniform Guidance, particularly in case of expenditures made during period from March 3, 2021 to the release of the interim final rule, while other comments requested that Treasury raise the single-audit threshold from $750,000 to $5 million. Commenters sought clarification on items such as: The applicability of the Uniform Guidance for funds that are used for the provision of government services, the applicability of particular sections of the cost principles provided in subpart E of the Uniform Guidance, the applicability of the procurement provisions of the Uniform Guidance, and requirements for subrecipient reporting.

Treasury Response: Recipients of SLFRF funds are subject to the provisions of the Uniform Guidance (2 CFR part 200) from the date of award to the end of the period of performance on December 31, 2026 unless otherwise specified in this rule or program-specific guidance. Costs must follow the requirements in 2 CFR 200 Subpart E, Cost Principles, including procurement standards. Recipients that receive an aggregate amount of federal financial assistance in a given fiscal year that exceeds the Single Audit threshold are subject to the requirements in 2 CFR 200 Subpart F, Audit Requirements, unless otherwise specified in program-specific guidance.

SLFRF funds transferred to subrecipients are also subject to reporting and Uniform Guidance requirements. Additional information about the definition of subrecipients is available in the section Distinguishing Subrecipients versus Beneficiaries.

Recipients should refer to the Assistance Listing for details on the specific provisions of the Uniform Guidance that do not apply to this program. The Assistance Listing is available on SAM.gov. Additional changes to compliance and reporting guidelines, including any clarifications on Uniform Guidance requirements, will be addressed in Compliance and Reporting Guidance and the User Guide.[384]

[384] *Id.*

I. Remediation and Recoupment

Sections 602(e) and 603(e) of the Social Security Act provide the Secretary with the power to recoup "funds used in violation" of the Social Security Act. The interim final rule implemented these provisions by establishing a process for recoupment. Treasury may identify funds used in violation of the Social Security Act based on information submitted by recipients, including as part of reporting requirements, as well as information from other sources.[385] If a potential violation is identified, Treasury will provide the recipient an initial written notice of the amount subject to recoupment along with an explanation of such amounts. A recipient then has 60 calendar days following receipt of a recoupment notice to submit a request for reconsideration containing any information it believes supports its use of funds. Within 60 calendar days of receipt of the request for reconsideration, the interim final rule provided that a recipient will receive a final notice of the Secretary's decision to affirm, withdraw, or modify the recoupment notice. If the recipient did not submit a request for reconsideration, the initial notice of recoupment would be deemed a final notice. A recipient would then be required to repay any amounts subject to recoupment within 120 calendar days of either the initial recoupment notice, if the recipient does not request reconsideration, or the final recoupment notice, if the recipient does request reconsideration.

Public Comments

Treasury received several comments on the process for recoupment. For instance, some commenters, including many Tribal governments, requested additional time to file a request for reconsideration and submit repayment to ensure that small entities have the time necessary to carry out any logistical steps and consult with counsel. Treasury was also asked to align its recoupment process with that of the Office of the Inspector General and other departmental administrative processes to resolve findings, agency decisions, and related timelines. One commenter asked if the 120-calendar-day time limit for repayment was based on the initial notice, rather than a final decision issued by the Secretary. Several commenters expressed concern regarding the recoupment process, arguing that consideration of "all relevant facts and circumstances" provided Treasury with too much authority and created ambiguity. Other commenters urged Treasury to establish a robust enforcement and compliance program and process and advocated for the creation of a whistleblower mechanism or public complaint process to allow public and private entities to report suspected misuses of funds. Finally, some commenters requested clarification regarding the process after a violation is identified and becomes final. One commenter also asked to allow recipients to amend reports deemed to contain ineligible expenses and inform recipients how the agency intends to resolve instances where a use was later deemed unacceptable. Another commenter asked if recouped funds could be released back to the recipient.

Commenters also expressed concern about Treasury's authority to recoup funds used in violation of the tax offset provision. Some commenters requested additional clarity around when tax cuts would trigger Treasury's recoupment authority and the duration of Treasury's authority to seek recoupment of such funds.

Treasury Response

The final rule largely preserves the process established in the interim final rule but includes several adjustments to clarify certain elements.

Like the interim final rule, the final rule provides that, after an initial determination is made that a recipient has used SLFRF funds in violation of the law, a recipient may submit a request for reconsideration concerning any amounts identified in a notice provided by Treasury. If a recipient chooses to seek reconsideration of the initial notice, the recipient must submit a request for reconsideration as provided under the final rule. If a recipient does not request reconsideration, the initial notice that the recipient received will be deemed the final notice.[386] Treasury has clarified that a recipient must invoke and exhaust the procedures available under section 35.10 of the final rule prior to seeking judicial review of a recoupment decision. Consistent with Section 602(b)(6)(A)(ii)(III) of the Social Security Act, if a state or territory is required to repay funds pursuant to the Secretary's recoupment authority, the Secretary may reduce the amount payable to the state or territory in a second tranche payment by the amount that the state or territory would be required to repay as recoupment.

In the final rule, Treasury has clarified that, if it identifies a potential

[385] Treasury will also consider the tax offset provision on an annual basis.

[386] Funds subject to recoupment cannot later be returned.

violation,[387] it may request additional information from a recipient before initiating the recoupment process and, where necessary, provide written notice to the recipient along with an explanation of such amounts potentially subject to recoupment. Furthermore, Treasury has also made clear that it retains the ability to expedite or extend timelines in any adjudication or pre-adjudication process pursuant to section 35.4(b) of the final rule, although the general timelines set forth in the interim final rule are maintained in the final rule.

This process is intended to provide the recipient with an adequate opportunity to present additional information regarding its uses of funds and provides flexibility for recipients to determine the information relevant to the particular facts and circumstances. It is also flexible enough to align with other adjudication procedures in other ARPA recovery programs administered by the Office of Recovery Programs at Treasury. As discussed above, the initial notice will provide recipients with an explanation of the identified potential violation in order to provide recipients with a meaningful opportunity to respond. Such initial notice will generally include information regarding the specific use of SLFRF funds and the source of such information.[388] This process also will allow the Secretary to take into consideration the information provided by recipients, along with other relevant information, to ensure SLFRF funds are used in a manner consistent with the Social Security Act.

Finally, Treasury expects to work with recipients to support the use of SLFRF funds consistent with the law. For example, Treasury may request additional information from a recipient before initiating the recoupment process. In addition, Treasury may pursue other forms of remediation and monitoring in conjunction with, or as an alternative to, recoupment.[389] These efforts may include working with recipients to identify and substitute permissible uses of SLFRF funds or amending uses of SLFRF funds to comply with applicable restrictions.

In response to comments regarding the amount of time provided to respond to an initial notice, the final rule clarifies that Treasury retains the ability to expedite or extend timelines in any adjudication or pre-adjudication process pursuant to section 35.4(b) of the final rule, although the general timelines set forth in the interim final rule are maintained in the final rule.

V. Regulatory Analyses

Executive Orders 12866 and 13563

Regulatory Impact Assessment

This final rule is a "significant regulatory action" under section 3(f) of Executive Order 12866 for the purposes of Executive Orders 12866 and 13563 because it is likely to have an annual effect on the economy of $100 million or more.

As explained below, this regulation meets a substantial need: ensuring that recipients—states, territories, Tribal governments, and local governments—of SLFRF funds fully understand the requirements and parameters of the program as set forth in the statute and deploy funds in a manner that best reflects Congress' intent to provide necessary relief to recipient governments adversely impacted by the COVID–19 public health emergency. Furthermore, as required by Executive Orders 12866 and 13563, Treasury has weighed the costs and benefits of this final rule and varying alternatives and has reasonably determined that the benefits of the final rule to recipients and their communities far outweigh any costs.

The rule has been reviewed by the Office of Management and Budget (OMB) in accordance with Executive Order 12866.

Executive Orders 12866 and 13563

Under Executive Order 12866, OMB must determine whether this regulatory action is "significant," and therefore, subject to the requirements of the Executive Order and subject to review by OMB. Section 3(f) of Executive Order 12866 defines a significant regulatory action as an action likely to result in a rule that may, among other things, have an annual effect on the economy of $100 million or more. This rule is likely to have an annual effect on the economy of $100 million or more, and therefore, it is subject to review by OMB under section 3(f) of Executive Order 12866.

Treasury has also reviewed these regulations under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, section 1(b) of Executive Order 13563 requires that an agency: (1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity); (4) to the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or providing information that enables the public to make choices. Executive Order 13563 also requires an agency "to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible." OMB's Office of Information and Regulatory Affairs (OIRA) has emphasized that these techniques may include "identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes."

Based on the analysis that follows and the reasons stated elsewhere in this document, Treasury believes that this final rule is consistent with the principles set forth in Executive Orders 12866 and 13563. This Regulatory Impact Analysis discusses the need for regulatory action, the potential benefits, and the potential costs. Treasury has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action, and is issuing this final rule only on a reasoned determination that the benefits exceed the costs. In choosing among alternative regulatory approaches, Treasury selected those approaches that would maximize net benefits.

Need for Regulatory Action

This final rule implements the $350 billion SLFRF program of the ARPA, which Congress passed to help states, territories, Tribal governments, and localities respond to the ongoing COVID–19 public health emergency and its economic impacts. As the agency charged with execution of these programs, Treasury has concluded that this final rule is needed to ensure that recipients of SLFRF funds fully

[388] Treasury may address potential violations based on information submitted from recipients, either through quarterly reports or self-reported information, and from other sources of information as Treasury deems necessary and appropriate (*e.g.*, press, information submitted from the public).

[389] Treasury intends to work with recipients to support the use of SLFRF funds consistent with the law.

understand the requirements and parameters of the program as set forth in the statute and deploy funds in a manner that best reflects Congress' mandate for targeted fiscal relief. This final rule governs the use of $350 billion in grant funds from the federal government to states, territories, Tribal governments, and localities, generating a significant macroeconomic effect on the U.S. economy. Treasury has sought to implement the program in ways that maximize its potential benefits while minimizing its costs. It has done so by: aiming to target relief in key areas according to the congressional mandate; offering clarity to states, territories, Tribal governments, and localities while maintaining their flexibility to respond to local needs; and limiting administrative burdens.

Analysis of Benefits

Relative to a pre-statutory baseline, the SLFRF funds provide a combined $350 billion to state, local, and Tribal governments for fiscal relief and support for costs incurred responding to the COVID–19 pandemic. Treasury believes that this transfer will generate substantial additional economic activity, although given the flexibility accorded to recipients in the use of funds, it is not possible to precisely estimate the extent to which this will occur and the timing with which it will occur. Economic research has demonstrated that state fiscal relief is an efficient and effective way to mitigate declines in jobs and output during an economic downturn.[390] Absent such fiscal relief, fiscal austerity among state, local, and Tribal governments could exert a prolonged drag on the overall economic recovery, as occurred following the 2007–2009 recession.[391]

This final rule provides benefits across several areas by implementing the four eligible use categories, as defined in statute: strengthening the response to the COVID–19 public health emergency and its negative economic impacts; replacing lost revenue to ease fiscal pressure on state, local, and Tribal governments that might otherwise lead to harmful cutbacks in employment or government services; providing premium pay to essential workers; and making necessary investments in water, sewer, and broadband infrastructure.

These benefits are achieved in the final rule through a broadly flexible approach that sets clear guidelines on eligible uses of SLFRF funds and provides state, local, and Tribal government officials discretion within those eligible uses to direct SLFRF funds to areas of greatest need within their jurisdiction. While preserving recipients' overall flexibility, the final rule includes several provisions that implement statutory requirements and will help support use of SLFRF funds to achieve the intended benefits. Preserving flexibility for recipients not only serves an important public policy goal by allowing them to meet particularized and diverse needs of their local communities but also enhances the economic benefits of the final rule by allowing recipients to choose eligible uses of funds that provide the highest utility in their jurisdictions.

In implementing the ARPA, Treasury has also prioritized supporting underserved communities that have been disproportionately impacted by the pandemic. The SLFRF program as implemented by the final rule provides even greater flexibility to recipients for uses of funds in underserved communities, recognizing that pre-existing health and economic disparities in these communities amplified the impact of the pandemic there. In general, investments in improving health outcomes and economic opportunities provide high economic returns, so this approach is likely to achieve substantial near-term economic and public health benefits, in addition to the longer-term benefits arising from the allowable investments in water, sewer, and broadband infrastructure.

The remainder of this section clarifies how Treasury's approach to key provisions in the final rule will contribute to greater realization of benefits from the program.

Public Health and Negative Economic Impacts

The eligible use category for responding to the public health and negative economic impacts of the pandemic covers a wide range of eligible uses of funds. Treasury addresses several key uses of funds in this analysis, as well as ways that Treasury has structured this eligible use to minimize recipient administrative burden while also maintaining targeting of the funding to entities that experienced negative impacts from the pandemic.

Government Employment: In order to bolster the government's ability to effectively administer services, the final rule allows for a broader set of eligible uses to restore and support public sector employment relative to the interim final rule. In particular, eligible uses include hiring up to a pre-pandemic baseline that is adjusted for historic underinvestment in the public sector by allowing funds to be used to pay for payroll and covered benefits associated with the recipient increasing its number of employees up to 7.5 percent above its pre-pandemic baseline. Eligible uses also include providing additional funds for employees who experienced pay cuts or were furloughed, avoiding layoffs, providing worker retention incentives, and paying for ancillary administrative costs related to hiring.

Treasury believes this expanded approach, relative to the interim final rule, provides useful flexibility to recipients, which may increase a state or local government's ability to effectively deliver services to its residents. While the interim final rule already explicitly permitted using funds to restore recipients' workforces up to pre-pandemic levels, the final rule's inclusion of an upward adjustment factor recognizes that, as the population or economy of a jurisdiction grows over time, more workers are generally needed to effectively meet responsibilities. It also provides recipients greater room to employ funds toward building back the public sector workforce after years of chronic underinvestment since the Great Recession. Treasury arrived at the 7.5 percent adjustment factor through an analysis of data from the Bureau of Labor Statistics on state and local government employment and data from the Census Bureau on population to estimate the extent of underinvestment in the public sector since the onset of the Great Recession. While Treasury considered a range of methodologies and point estimates to set the adjustment factor, a 7.5 percent factor errs on the side of recipient flexibility. Treasury believes this adjustment enhances recipients' ability to identify and meet the particularized needs of their communities. Treasury also believes that the additional enumerated eligible uses for supporting the workforce provide recipients several means to help retain current workers, decreasing turnover costs.

Identifying Eligible Populations

Treasury has provided several methods for recipients to identify households, populations, and communities eligible for services that respond to the public health and negative economic impacts of the pandemic. In general, these methods seek to provide recipients options to identify eligible populations with minimal administrative burden, while also maintaining targeting of the funds

[390] *See, e.g.*, Gabriel Chodorow-Reich et al., *Does state Fiscal Relief During Recessions Increase Employment? Evidence from the American Recovery and Reinvestment Act*, 4 American Economic Journal 118–145 (2012) *http://dx.doi.org/10.1257/pol.4.3.118*.

[391] See, *e.g.*, Fitzpatrick, *supra* note 278.

to entities impacted by the pandemic. Recipients also retain flexibility to identify and serve other populations and entities that experienced pandemic impacts, ensuring that recipients can meet the particularized needs of their local communities.

Defining Low and Moderate Income: To streamline the provision of funds relating to negative economic impacts resulting from the pandemic, Treasury has created an eligibility standard making it easier for recipients to provide assistance to low- and moderate-income populations without needing to identify and document a specific negative economic impact. Populations falling under the definition of low income are presumed to have been disproportionately impacted by the pandemic, while those falling under the definition of moderate income are presumed to have been impacted by the pandemic. In addition, the final rule recognizes categorical eligibility for certain enumerated programs and populations if a recipient chooses to implement categorical eligibility when identifying impacted and disproportionately impacted populations. Treasury considered several options for eligibility standards that would reduce administrative burdens for recipients when determining who qualifies as low and moderate income.

One option involved defining a household as low income or moderate income based only on FPG thresholds and could use levels lower than those selected. This option involved setting uniform thresholds throughout the country.

A second option took a broader approach, defining a household as low income if it has (i) income at or below 185 percent of the FPG for the size of its household or (ii) income at or below 40 percent of the AMI for its county and size of household. The option defined a household as moderate income if it has (i) income at or below 300 percent of the FPG for the size of its household or (ii) income at or below 65 percent of the AMI for its county and size of household. The combination of an FPG floor with AMI allows for a regional adjustment in areas with substantially higher costs and incomes. Finally, Treasury also considered a range of FPG and AMI thresholds above and below these levels.

Treasury chose the second option. Treasury believes that the higher FPG floor will ease administrative burdens by making more households presumptively eligible for funds meant to address negative economic impacts in a targeted manner. With respect to the low-income cutoff, 185 percent of the FPG for a family of four is $49,025, which is approximately the wage earnings for a two-earner household where both earners receive the median wage in occupations, such as waiters and waitresses and hotel clerks, that were heavily impacted by COVID–19. As such, this cutoff is likely to include more workers in industries heavily impacted by COVID–19, who may be most likely to face disproportionate impacts of the pandemic, than a lower threshold.[392] With respect to the moderate-income cutoff, many households with incomes between 200 percent and 300 percent of the FPG struggle with a lack of economic security, suggesting that 300 percent of the FPG was an appropriate cutoff for moderate income.

Treasury also considered relatively higher thresholds for both an FPG and AMI approach; however, increasing income thresholds for presumed eligibility increases the likelihood that higher-income workers, who generally experienced fewer economic impacts from the pandemic, would become presumed eligible for responsive services. Providing services to households that did not experience a negative economic impact, or experienced a relatively minimal impact, would provide much less benefit than serving households that experienced more severe impacts, diluting the benefits of the SLFRF funds.

In all, Treasury anticipates that these selected thresholds, combined with the regional adjustment, will allow resources to be targeted toward individuals and households with the greatest need while also reducing administrative burdens on recipients.

Disproportionately Impacted Populations: In the interim final rule, Treasury enumerated a broader set of eligible uses for disproportionately impacted communities, in recognition of the pre-existing health, economic, and social disparities that contributed to disproportionate pandemic impacts in certain communities and that addressing root causes of those disparities constitutes responding to the public health and negative economic impacts of the pandemic. To identify these communities and reduce administrative burden, Treasury allowed recipients to presume that certain populations—those in QCTs and those being served by Tribal governments—were disproportionately impacted. In the final rule, to further decrease administrative burden and enhance recipient flexibility, Treasury is allowing recipients to also presume that low-income households were disproportionately impacted. Treasury anticipates that adding low-income households as a presumed eligible population will maintain targeting of funds to populations and communities most likely to have experienced severe pandemic impacts, while providing a more flexible approach for recipients.

Identifying Impacted Classes: In the final rule, Treasury reiterated its stance in the interim final rule allowing recipients to designate a class of households or other entities as impacted or disproportionately impacted and provide responsive services. After designating a class, recipients can serve a household or entity by simply identifying that the household or entity is a member of the class. Relative to restricting services to only presumed eligible populations identified by Treasury, this decision provides vital administrative flexibility for recipients that may identify particular impacted classes in the context of their jurisdiction. Treasury anticipates that SLFRF funds will be targeted to impacted or disproportionately impacted communities, as recipients must demonstrate that the designated class experienced negative economic impacts or meaningfully more severe negative economic impacts. This approach maintains the requirement that entities served have to have experienced a negative economic impact, while simultaneously minimizing any administrative costs associated with meeting this requirement.

Additional Enumerated Uses

The interim final rule enumerated eligible uses of SLFRF funds to serve both impacted and disproportionately impacted communities. For example, enumerated eligible uses to serve impacted communities included food assistance; rent, mortgage, or utility assistance; and counselling and legal aid to prevent eviction or homelessness. Examples of enumerated eligible uses to serve disproportionately impacted communities included remediation of lead paint or other lead hazards and housing vouchers and assistance relocating to neighborhoods with higher levels of economic opportunity. In the final rule, Treasury had the option to retain, expand, or reduce enumerated eligible uses, or shift use eligibility between disproportionately impacted and impacted communities. Many

[392] *See* U.S. Bureau of Labor Statistics, Occupational Employment and Wage Estimates, *https://www.bls.gov/oes/current/oes_nat.htm* (last visited November 9, 2021).

public comments suggested potential expansions of uses, including shifting enumerated eligible uses for disproportionately impacted communities to serve a broader population of impacted communities. Taking these comments into account, Treasury generally took this approach, in anticipation that the benefits of the program will increase while recipient administrative costs in identifying and justifying non-enumerated uses of funds will decrease.

Specifically, Treasury added enumerated eligible uses for impacted populations including paid sick, medical, or family leave; health insurance subsidies; and services for the unbanked and underbanked, on the basis that impacts of the pandemic that were broadly experienced by many communities would be addressed by these uses. Treasury also shifted some eligible uses, formerly restricted only to disproportionately impacted communities, to impacted communities. These uses included community violence intervention, assistance accessing or applying to public benefits and services, affordable housing development, and services to promote healthy childhood environments like childcare and early learning. These uses were shifted on the basis that the associated impacts of the pandemic were experienced by a broader population, and responses are, accordingly, eligible to benefit a broader population.

Additionally, the final rule clarified that investments in parks and other public outdoor recreation spaces are enumerated eligible uses for disproportionately impacted communities. In including these uses, Treasury took into account evidence on the social determinants of health, or the ways that social context, like the neighborhood built environment, impacts health outcomes. By taking a more holistic approach to public health, the final rule allows recipients to respond more broadly to factors that contributed to the pandemic's health impacts and more fully mitigate those health impacts.

To balance administrative flexibility with a maintenance of focus on impacts of the pandemic, Treasury considered, but did not include, other proposed enumerated uses that did not respond to the impacts of the pandemic or responded to impacts that were not experienced generally across the country by many jurisdictions and populations. For example, Treasury did not include pollution remediation broadly, a proposed enumerated eligible use for disproportionately impacted communities, on the basis that associated projects would only respond to disproportionate impacts of the pandemic depending on the specific issue addressed. In sum, Treasury expanded enumerated eligible uses while retaining a focus on broadly experienced impacts of the pandemic. Treasury anticipates that this will give recipients further flexibility to presume eligibility and respond to pandemic impacts without increasing administrative burden.

Capital Expenditures: In the interim final rule, Treasury permitted funds to be used for a limited number of capital expenditures mostly related to the COVID–19 public health response. This decision granted recipients some discretion to use SLFRF funds to address COVID–19 prevention and mitigation through certain investments in equipment, real property, and facilities, which Treasury recognized as critical components of the public health response. In the final rule, Treasury considered maintaining the provisions in the interim final rule or expanding allowable capital expenditures to provide recipients greater flexibility to pursue other capital investments that are responsive to the public health emergency and its negative economic impacts. While expanding allowable capital expenditures may increase the risk that recipients will undertake large expenditures that do not sufficiently address intended harms, or address harms in a less cost-efficient manner than an alternative investment (*e.g.*, a program or service), expanding allowable capital expenditures would likely help fill critical gaps in recipients' response to the pandemic and provide equipment and facilities that generate benefits beyond SLFRF's period of performance. To preserve flexibility while mitigating risks, the final rule allows recipients to undertake an expanded set of capital expenditures while requiring additional written justifications for projects with an expected total cost at or over $1 million. Treasury believes this approach balances the implementation of appropriate risk-based compliance requirements and the provision of administrative convenience for smaller capital expenditures, while generally allowing recipients the flexibility to undertake a greater variety of responsive capital expenditures.

Revenue Loss

Revenue Loss Formula: In this final rule, Treasury's approach to revenue loss allows recipients to compute the extent of reduction in revenue by comparing actual revenue to a counterfactual trend representing what could have plausibly been expected to occur in the absence of the pandemic. The counterfactual trend begins with the last full fiscal year prior to the public health emergency (as required by statute) and projects forward with an annualized growth adjustment. Treasury has made several adjustments in the final rule to decrease administrative burden, reducing costs for recipients, while still accurately capturing reductions in revenue due to the pandemic.

Under the interim final rule, Treasury specified that recipients calculate revenue loss on a calendar year basis. In this final rule, Treasury is providing recipients the option to calculate revenue loss on a calendar year or fiscal year basis, which will allow recipients the administrative flexibility to minimize administrative burdens based on the data available to them.

Treasury's decision to incorporate a growth adjustment into the calculation of revenue loss ensures that the formula more fully captures revenue shortfalls relative to recipients' pre-pandemic expectations. Recipients will have the opportunity to calculate revenue loss at several points throughout the program, recognizing that some recipients may experience revenue effects with a lag. This option to re-calculate revenue loss on an ongoing basis is intended to result in more support for recipients to avoid harmful cutbacks in future years. In calculating revenue loss, recipients will look at general revenue in the aggregate, rather than on a source-by-source basis, given that recipients may have experienced offsetting changes in revenues across sources. The final rule also provides for removing the impact of tax increasing or decreasing changes, which affect the amount of revenue collected but are not "due to" the pandemic, from the calculation of revenue loss due to the public health emergency. Both of these components of Treasury's approach provide a more accurate representation of the effect of the pandemic on overall revenues.

Revenue Loss Standard Allowance: In addition to largely preserving the formula to calculate revenue loss from the interim final rule, Treasury also added an alternative "standard allowance" option for the revenue loss calculation to this final rule. Treasury's decision to elect to allow a fixed amount of loss that can be used to fund "government services" allows recipients the flexibility to use minimal administrative capacity on the calculation if desired. The decision also benefits recipients by allowing them to avoid expending administrative

resources to determine how unique variations in revenue interact with the revenue loss formula.

Premium Pay

Per the ARPA statute, recipients have broad latitude to designate critical infrastructure sectors and make grants to third-party employers for the purpose of providing premium pay. While the final rule provides significant flexibility to implement the statutory requirement that premium pay respond to essential workers, it requires recipients give written justification in the case that premium pay would increase a worker's annual pay above a certain threshold or is awarded to an individual whose annual pay is already above that threshold. To set this threshold, Treasury analyzed data from the Bureau of Labor Statistics to determine a level that would not require further justification for premium pay to the vast majority of essential workers, while requiring higher scrutiny for provision of premium pay to higher earners who, even without premium pay, would likely have greater personal financial resources to cope with the effects of the pandemic. Alternatively, a recipient need not submit written justification to Treasury if the worker receiving premium pay is eligible for overtime under the FLSA. Treasury believes this alternative, which is an addition to the final rule, will give recipients more flexibility and will simplify application of the final rule as employers, public and private, are already legally required to determine whether an employee is eligible for overtime pay under the FLSA. Treasury believes the threshold and overtime eligibility provision in the final rule strike the appropriate balance between preserving flexibility and helping encourage use of these resources to help those in greatest need. The final rule also requires that workers eligible for premium pay have regular in-person interactions or regular physical handling of items that were also handled by others. This requirement will help encourage use of financial resources for those who have endured the heightened risk of performing essential work.

Water and Sewer Infrastructure

In the interim final rule, Treasury aligned eligible uses of funds for water and sewer infrastructure to those projects eligible to receive financial assistance through the DWSRF and CWSRF administered by the EPA.

The benefits of this approach included giving recipients an existing list that would provide them clarity as well as flexibility in identifying eligible projects, particularly given the broad range of projects eligible under the CWSRF and DWSRF. The approach also ensured that projects would conform to vetted project types from a widely used program. Treasury received comments from recipients requesting additional project categories to be considered eligible, indicating a potential cost to maintaining alignment with the CWSRF and DWSRF.

For the final rule, Treasury has expanded eligibility to include several additional project types beyond those covered by the CWSRF and DWSRF.

Treasury believes that expanded eligibility will benefit recipients by allowing them additional flexibility to pursue beneficial projects, including project categories that support the provision of drinking water and the removal, management, and treatment of wastewater and stormwater: Additional stormwater management projects, private well infrastructure, additional projects that address lead in water, and certain dam and reservoir rehabilitation projects undertaken to address the provision of drinking water. A potential cost of this approach is that uses beyond the CSWRF and DWSRF may have less public guidance available to understand project eligibilities. However, Treasury anticipates that this eligibility expansion will provide a net benefit to recipients by allowing them to pursue projects relevant to their goals that were ineligible under the interim final rule.

The expansion to allow private well infrastructure may also affect the distributional impact of SLFRF. Private wells disproportionately serve rural Americans, including low-income households, and expanding eligibility to include this use may allow SLFRF funds to benefit such households. While distributional impacts are uncertain, Treasury believes that the potential for benefits to accrue to rural and low-income households makes it important to clarify that these types of projects are eligible.

Broadband Infrastructure

In the final rule, Treasury expands eligible areas for broadband investment by requiring that recipients invest in projects designed to provide service to households and businesses with an identified need for additional broadband investment, including increasing access to high-speed broadband, increasing the affordability of broadband services, and improving the reliability of broadband service.[393]

Treasury considered multiple alternatives when selecting this standard. The threshold for the interim final rule allowed benefits to accrue in a more targeted manner to the approximately 9 percent of the country with access to speeds under the 25/3 Mbps threshold.[394] However, since SLFRF funds are distributed to tens of thousands of governments across the country with a variety of broadband needs, Treasury believes that allowing recipients greater flexibility to determine locations to serve in their jurisdictions—including considering affordability and competition barriers—will lead to greater long-term public benefit. Further, given that many federal broadband grant programs are focused solely on unserved and underserved areas, Treasury believes that the final rule's flexibility enables these funds to fill an important role in the overall federal broadband landscape.

In the final rule, Treasury also requires that broadband projects must meet a standard of reliably delivering at least 100 Mbps download speeds and upload speeds, or in cases where it is not practicable to do so, reliably delivering at least 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed while being scalable to 100 Mbps upload and download speeds. Treasury expects that this threshold will yield long-term benefits and allow networks to meet both pandemic-related and future needs. The Federal Communications Commission (FCC) estimates that currently a household with two to three remote learners using the internet simultaneously needs a connection supporting 100 Mbps download speeds.[395] While a lower threshold may have resulted in lower near-term costs to build, it would have potentially constrained future utility from the infrastructure by producing infrastructure that would more quickly—potentially in the near-term—become obsolete and no longer meet household needs, potentially requiring sooner replacement and generally decreasing the return on investment. As

[393] Further, the final rule encourages, but does not require, that recipients pursue broadband infrastructure projects in locations not currently served by a wireline connection that reliably delivers at least 100 Mbps of download speed and 20 Mbps of upload speed.

[394] Data from the Federal Communications Commission shows that as of June 2020, 9.07 percent of the U.S. population had no available cable or fiber broadband providers providing greater than 25 Mbps download speeds and 3 Mbps upload speeds. Federal Communications Commission, Fixed Broadband Deployment, *https://broadbandmap.fcc.gov/#/* (last visited May 9, 2021).

[395] *See* Federal Communications Commission, Broadband Speed Guide, available at *https://www.fcc.gov/consumers/guides/broadband-speed-guide* (last visited October 28, 2021).

such, projects meeting a lower threshold could not be considered "necessary" investments in broadband infrastructure, so Treasury has retained the threshold from the interim final rule.

Further, the final rule adds a requirement that recipients address the affordability needs of low-income consumers in accessing broadband networks funded by SLFRF, either by requiring service providers that provide service to households to either participate in the FCC's Affordable Connectivity Program (ACP), or a broad-based affordability program with commensurate benefits. Treasury believes that this requirement will increase the number of customers that are able to take advantage of broadband infrastructure funded by SLFRF, increasing the effectiveness of funds in connecting households and businesses to high-speed internet that is critical to work, health, and education. There is a potential that this requirement may marginally increase project costs for recipients and providers, but this impact is uncertain, given the varying business models and pricing structures of broadband projects and providers.

Labor Standards

In this Supplementary Information for the final rule, Treasury encourages recipients to ensure that capital expenditures to respond to the public health and negative economic impacts of the pandemic and water, sewer, and broadband projects use strong labor standards, including, for example, project labor agreements and community benefits agreements that offer wages at or above the prevailing rate and include local hire provisions. Treasury believes that its encouragement of labor standards carries benefits because it will ensure that workers have access to strong employment opportunities associated with infrastructure projects, which will in turn aid the economic recovery. Treasury believes that infrastructure projects may also benefit from stronger labor standards due to the potential of these standards to ensure a stronger skilled labor supply and minimize labor disputes and workplace injuries, which can result in costly disruptions to projects. Treasury assesses that these benefits will increase the economy and efficiency of infrastructure projects undertaken through SLFRF and will outweigh the potential for a marginal increase in labor costs.

Splitting Payments to Recipients

Treasury is required by statute to deliver funds to local governments in two payments separated by at least twelve months, and the interim final rule provided for split payments to a majority of states as well. As discussed above, splitting payments ensures that recipients can adapt spending plans to evolving economic conditions and that at least some of the economic benefits will be realized in 2022 or later. However, consistent with authorities granted to Treasury in the statute, Treasury recognizes that a subset of states with significant remaining elevation in the unemployment rate could face heightened additional near term needs to aid unemployed workers and stimulate the recovery. Therefore, for a subset of state governments, Treasury has provided funds in one payment. Treasury believes that this approach strikes an appropriate balance between the general reasons to provide funds in two payments and the heightened additional near-term needs in specific states. As discussed above, Treasury set a threshold based on historical analysis of unemployment rates in recessions.

Reaching Underserved Communities

Finally, the final rule aims to promote and streamline the provision of assistance to individuals and communities in greatest need, particularly communities that have been historically underserved and have experienced disproportionate impacts of the COVID–19 crisis. Targeting relief is in line with Executive Order 13985, "Advancing Racial Equity and Support for Underserved Communities Through the Federal Government," which laid out an Administration-wide priority to support "equity for all, including people of color and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality." To this end, the final rule enumerates a list of services that may be provided using SLFRF funds in disproportionately impacted communities, including low-income areas, to address the more severe impacts of the pandemic in these communities; establishes the characteristics of essential workers eligible for premium pay and encouragement to serve workers based on financial need; provides that recipients may use SLFRF funds to restore state and local workforces, where women and people of color are disproportionately represented; and requires that broadband infrastructure projects participate in programs to support affordability of broadband service. Collectively, these provisions will promote use of resources to facilitate the provision of assistance to individuals and communities with the greatest need.

Analysis of Costs

This regulatory action will generate administrative costs relative to a pre-statutory baseline. This includes, chiefly, costs required to administer SLFRF funds, oversee subrecipients and beneficiaries, and file periodic reports with Treasury. It also requires states to allocate SLFRF funds to nonentitlement units, which are smaller units of local government that are statutorily required to receive their funds through states. Treasury expects that the administrative burden associated with this program will be moderate for a grant program of its size. Treasury expects that many recipients receive direct or indirect funding from federal government programs and that many have familiarity with how to administer and report on federal funds or grant funding provided by other entities. In particular, states, territories, and large localities will have received funds from the Coronavirus Relief Fund (CRF) and Treasury expects them to rely heavily on established processes developed through that program or other prior grant funding, mitigating burden on these governments. Treasury has enhanced the level of recipient reporting as compared to the CRF, incorporating feedback from the Government Accountability Office and others that additions would improve the oversight of recipients' use of funds. To balance the oversight benefits with the costs of added reporting burdens, Treasury has incorporated other mechanisms to mitigate burden. For example, Treasury is "tiering" reporting requirements so that recipients that receive relatively lesser amounts of SLFRF funds are required to submit less frequent reports than recipients receiving greater amounts of funds. Treasury is noting administrative costs as a generally allowable use of SLFRF funds, which defrays administrative expenses to recipients that may be needed to comply with reporting requirements. Treasury has also provided options for recipients to use eligibility thresholds they are already familiar with during administration of SLFRF funds, which will enable recipients to avoid the costs of setting up new programs and reporting mechanisms to meet reporting and compliance requirements. For example, Treasury has permitted recipients to use "categorical eligibility" when delivering assistance to particular groups, such as impacted or disproportionately impacted households.

In making implementation choices, Treasury has hosted numerous consultations with a diverse range of direct recipients—states, cities, counties, and Tribal governments—along with various communities across the United States, including those that are underserved. Furthermore, Treasury has made clear in guidance that SLFRF funds may be used to cover certain expenses related to administering programs established using SLFRF funds.[396]

Executive Order 13132

Executive Order 13132 (entitled Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on state, local, and Tribal governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This final rule does not have federalism implications within the meaning of the Executive Order and does not impose substantial, direct compliance costs on state, local, and Tribal governments or preempt state law within the meaning of the Executive Order. The compliance costs are imposed on state, local, and Tribal governments by sections 602 and 603 of the Social Security Act, as enacted by the ARPA. Notwithstanding the above, Treasury has engaged in efforts to consult and work cooperatively with affected state, local, and Tribal government officials and associations in the process of developing the interim final rule and this final rule. Pursuant to the requirements set forth in section 8(a) of Executive Order 13132, Treasury certifies that it has complied with the requirements of Executive Order 13132.

Administrative Procedure Act

The Administrative Procedure Act (APA), 5 U.S.C. 551 *et seq.*, generally requires public notice and an opportunity for comment before a rule becomes effective. However, the APA provides that the requirements of 5 U.S.C. 553 do not apply "to the extent that there is involved . . . a matter relating to agency . . . grants." The APA also provides an exception to ordinary notice-and-comment procedures "when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b)(B). The interim final rule was issued without prior notice and comment procedures because it implemented statutory conditions on the eligible uses of SLFRF funds, and addressed the payment of those funds, the reporting on uses of funds, and potential consequences of ineligible uses to help address the economic and public health emergency. See the **SUPPLEMENTARY INFORMATION** section of the May 17, 2021 interim final rule for the applicability of the requirements of 5 U.S.C. 553. In addition, under the exception discussed in that section for matters relating to agency grants, the requirements of 5 U.S.C. 553 also do not apply to this final rule. After careful consideration of the comments received, this final rule adopts the May 17, 2021 interim final rule with the revisions discussed in this **SUPPLEMENTARY INFORMATION.**

Congressional Review Act

The Administrator of OIRA has determined that this is a major rule for purposes of Subtitle E of the Small Business Regulatory Enforcement and Fairness Act of 1996 (also known as the Congressional Review Act or CRA) (5 U.S.C. 804(2) *et seq.*). Under the CRA, a major rule generally may take effect no earlier than 60 days after the rule is published in the **Federal Register**. 5 U.S.C. 801(a)(3).

Paperwork Reduction Act

The information collections associated with the SLFRF program have been reviewed and approved by OMB pursuant to the Paperwork Reduction Act (44 U.S.C. Chapter 35) (PRA) and assigned control number 1505–0271. Under the PRA, an agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a valid OMB control number.

Estimates of hourly burden under this program are set forth in the table below.

Reporting	Number respondents	Number responses per respondent	Total responses	Hours per response	Total burden in hours	Cost to respondents ($48.80 per hour*)
Recipient Payment Form	5,050	1	5,050	.25 (15 minutes)	1,262.5	$61,610
Acceptance of Award Terms	5,050	1	5,050	.25 (15 minutes)	1,262.5	61,610
Title VI Assurances	5,050	1	5,050	.50 (30 minutes)	2,525	123,220
Tribal Employment Information Form	584	1	584	.75 (45 minutes)	438	21,374
Request for Extension Form	96	1	96	1	96	4,685
Annual Recovery Plan Performance Report	430	1	430	100	43,000	2,098,400
NEU Distribution Template	55	2	110	10	1,100	53,680
Non-UGLG Distribution Template	55	2	110	5	550	26,840
Transfer Forms	1,500	1	1,500	1	1,500	73,200
Project and Expenditure Report	37,000	1	37,000	5	185,000	9,028,000
Total	54,870		54,980		236,735	11,552,619

*Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, Accountants and Auditors, on the internet at *https://www.bls.gov/ooh/business-and-financial/accountants-and-auditors.htm* (visited March 28, 2020). Base wage of $33.89/hour increased by 44 percent to account for fully loaded employer cost of employee compensation (benefits, etc.) for a fully loaded wage rate of $48.80.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (RFA) generally requires that when an agency issues a proposed rule, or a final rule pursuant to section 553(b) of the Administrative Procedure Act or another law, the agency must prepare a regulatory flexibility analysis that meets the requirements of the RFA and publish such analysis in the **Federal Register**. 5 U.S.C. 603, 604.

Rules that are exempt from notice and comment under the APA or any other law are also exempt from the RFA

[396] *See* Coronavirus State and Local Fiscal Recovery Funds, Frequently Asked Questions, 10.2, as of July 19, 2021; *https://home.treasury.gov/system/files/136/SLFRPFAQ.pdf.*

requirements, including the requirement to conduct a regulatory flexibility analysis, when among other things the agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest. Because this rule is exempt from the notice and comment requirements of the APA, Treasury is not required to conduct a regulatory flexibility analysis.

Rule Text

List of Subjects in 31 CFR Part 35

Executive compensation, State and Local Governments, Tribal Governments, Public health emergency.

For the reasons stated in the preamble, the United States Department of the Treasury amends 31 CFR part 35 as follows:

PART 35—PANDEMIC RELIEF PROGRAMS

■ 1. Revise Subpart A to read as follows:

Subpart A—Coronavirus State and Local Fiscal Recovery Funds

Sec.

35.1 Purpose.
35.2 Applicability.
35.3 Definitions.
35.4 Reservation of authority, reporting.
35.5 Use of funds.
35.6 Eligible uses.
35.7 Pensions.
35.8 Tax.
35.9. Compliance with applicable laws.
35.10. Recoupment.
35.11 Payments to States.
35.12. Distributions to nonentitlement units of local government and units of general local government.

Authority: 42 U.S.C. 802(f); 42 U.S.C. 803(f).

§ 35.1 Purpose.

This part implements section 9901 of the American Rescue Plan Act (Subtitle M of Title IX of Pub. L. 117–2), which amends Title VI of the Social Security Act (42 U.S.C. 801 *et seq.*) by adding sections 602 and 603 to establish the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund.

§ 35.2 Applicability.

This part applies to states, territories, Tribal governments, metropolitan cities, nonentitlement units of local government, counties, and units of general local government that accept a payment or transfer of funds made under section 602 or 603 of the Social Security Act.

§ 35.3 Definitions.

Baseline means tax revenue of the recipient for its fiscal year ending in 2019, adjusted for inflation in each reporting year using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States.

Capital expenditures has the same meaning given in 2 CFR 200.1.

County means a county, parish, or other equivalent county division (as defined by the Census Bureau).

Covered benefits include, but are not limited to, the costs of all types of leave (vacation, family-related, sick, military, bereavement, sabbatical, jury duty), employee insurance (health, life, dental, vision), retirement (pensions, 401(k)), unemployment benefit plans (Federal and State), workers' compensation insurance, and Federal Insurance Contributions Act taxes (which includes Social Security and Medicare taxes).

Covered change means a change in law, regulation, or administrative interpretation that reduces any tax (by providing for a reduction in a rate, a rebate, a deduction, a credit, or otherwise) or delays the imposition of any tax or tax increase. A change in law includes any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute or rule if the phase-in or taking effect was not prescribed prior to the start of the covered period.

Covered period means, with respect to a state or territory, the period that:

(1) Begins on March 3, 2021; and

(2) Ends on the last day of the fiscal year of such State or territory in which all funds received by the State or territory from a payment made under section 602 or 603 of the Social Security Act have been expended or returned to, or recovered by, the Secretary.

COVID–19 means the Coronavirus Disease 2019.

COVID–19 public health emergency means the period beginning on January 27, 2020 and lasting until the termination of the national emergency concerning the COVID–19 outbreak declared pursuant to the National Emergencies Act (50 U.S.C. 1601 *et seq.*).

Deposit means an extraordinary payment of an accrued, unfunded liability. The term deposit does not refer to routine contributions made by an employer to pension funds as part of the employer's obligations related to payroll, such as either a pension contribution consisting of a normal cost component related to current employees or a component addressing the amortization of unfunded liabilities calculated by reference to the employer's payroll costs.

Eligible employer means an employer of an eligible worker who performs essential work.

Eligible workers means workers needed to maintain continuity of operations of essential critical infrastructure sectors, including health care; emergency response; sanitation, disinfection, and cleaning work; maintenance work; grocery stores, restaurants, food production, and food delivery; pharmacy; biomedical research; behavioral health work; medical testing and diagnostics; home- and community-based health care or assistance with activities of daily living; family or childcare; social services work; public health work; vital services to Tribes; any work performed by an employee of a State, local, or Tribal government; educational work, school nutrition work, and other work required to operate a school facility; laundry work; elections work; solid waste or hazardous materials management, response, and cleanup work; work requiring physical interaction with patients; dental care work; transportation and warehousing; work at hotel and commercial lodging facilities that are used for COVID–19 mitigation and containment; work in a mortuary; and work in critical clinical research, development, and testing necessary for COVID–19 response.

(1) With respect to a recipient that is a metropolitan city, nonentitlement unit of local government, or county, workers in any additional non-public sectors as each chief executive officer of such recipient may designate as critical to protect the health and well-being of the residents of their metropolitan city, nonentitlement unit of local government, or county; or

(2) With respect to a State, territory, or Tribal government, workers in any additional non-public sectors as each Governor of a State or territory, or each Tribal government, may designate as critical to protect the health and well-being of the residents of their State, territory, or Tribal government.

Essential work means work that:

(1) Is not performed while teleworking from a residence; and

(2) Involves:

(i) Regular in-person interactions with patients, the public, or coworkers of the individual that is performing the work; or

(ii) Regular physical handling of items that were handled by, or are to be handled by patients, the public, or coworkers of the individual that is performing the work.

Funds means, with respect to a recipient, amounts provided to the recipient pursuant to a payment made under section 602(b) or 603(b) of the Social Security Act or transferred to the recipient pursuant to section 603(c)(4) of the Social Security Act.

General revenue means money that is received from tax revenue, current charges, and miscellaneous general revenue, excluding refunds and other correcting transactions and proceeds from issuance of debt or the sale of investments, agency or private trust transactions, and intergovernmental transfers from the Federal Government, including transfers made pursuant to section 9901 of the American Rescue Plan Act. General revenue also includes revenue from liquor stores that are owned and operated by state and local governments. General revenue does not include revenues from utilities, except recipients may choose to include revenue from utilities that are part of their own government as general revenue provided the recipient does so consistently over the remainder of the period of performance. Revenue from Tribal business enterprises must be included in general revenue.

Intergovernmental transfers means money received from other governments, including grants and shared taxes.

Low-income household means a household with:

(1) Income at or below 185 percent of the Federal Poverty Guidelines for the size of its household based on the poverty guidelines published most recently by the Department of Health and Human Services; or

(2) Income at or below 40 percent of the Area Median Income for its county and size of household based on data published most recently by the Department of Housing and Urban Development.

Micro-business means a small business that has five or fewer employees, one or more of whom owns the small business.

Moderate-income household means a household with:

(1) Income at or below 300 percent of the Federal Poverty Guidelines for the size of its household based on poverty guidelines published most recently by the Department of Health and Human Services; or

(2) Income at or below 65 percent of the Area Median Income for its county and size of household based on data published most recently by the Department of Housing and Urban Development.

Metropolitan city has the meaning given that term in section 102(a)(4) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(4)) and includes cities that relinquish or defer their status as a metropolitan city for purposes of receiving allocations under section 106 of such Act (42 U.S.C. 5306) for fiscal year 2021.

Net reduction in total spending is measured as the State or territory's total spending for a given reporting year excluding its spending of funds, subtracted from its total spending for its fiscal year ending in 2019, adjusted for inflation using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States for that reporting year.

Nonentitlement unit of local government means a "city," as that term is defined in section 102(a)(5) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(5)), that is not a metropolitan city.

Nonprofit means a nonprofit organization that is exempt from Federal income taxation and that is described in section 501(c)(3) or 501(c)(19) of the Internal Revenue Code.

Obligation means an order placed for property and services and entering into contracts, subawards, and similar transactions that require payment.

Pension fund means a defined benefit plan and does not include a defined contribution plan.

Period of performance means the time period described in § 35.5 during which a recipient may obligate and expend funds in accordance with sections 602(c)(1) and 603(c)(1) of the Social Security Act and this subpart.

Premium pay means an amount of up to $13 per hour that is paid to an eligible worker, in addition to wages or remuneration the eligible worker otherwise receives, for all work performed by the eligible worker during the COVID–19 public health emergency. Such amount may not exceed $25,000 in total over the period of performance with respect to any single eligible worker. Premium pay may be awarded to non-hourly and part-time eligible workers performing essential work. Premium pay will be considered to be in addition to wages or remuneration the eligible worker otherwise receives if, as measured on an hourly rate, the premium pay is:

(1) With regard to work that the eligible worker previously performed, pay and remuneration equal to the sum of all wages and remuneration previously received plus up to $13 per hour with no reduction, substitution, offset, or other diminishment of the eligible worker's previous, current, or prospective wages or remuneration; or

(2) With regard to work that the eligible worker continues to perform, pay of up to $13 per hour that is in addition to the eligible worker's regular rate of wages or remuneration, with no reduction, substitution, offset, or other diminishment of the worker's current and prospective wages or remuneration.

Qualified census tract has the same meaning given in 26 U.S.C. 42(d)(5)(B)(ii)(I).

Recipient means a State, territory, Tribal government, metropolitan city, nonentitlement unit of local government, county, or unit of general local government that receives a payment made under section 602(b) or 603(b) of the Social Security Act or transfer pursuant to section 603(c)(4) of the Social Security Act.

Reporting year means a single year or partial year within the covered period, aligned to the current fiscal year of the State or territory during the covered period.

Secretary means the Secretary of the Treasury.

State means each of the 50 States and the District of Columbia.

Small business means a business concern or other organization that:

(1) Has no more than 500 employees or, if applicable, the size standard in number of employees established by the Administrator of the Small Business Administration for the industry in which the business concern or organization operates, and

(2) Is a small business concern as defined in section 3 of the Small Business Act (15 U.S.C. 632).

Tax revenue means revenue received from a compulsory contribution that is exacted by a government for public purposes excluding refunds and corrections and, for purposes of § 35.8, intergovernmental transfers. Tax revenue does not include payments for a special privilege granted or service rendered, employee or employer assessments and contributions to finance retirement and social insurance trust systems, or special assessments to pay for capital improvements.

Territory means the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, or American Samoa.

Title I eligible schools means schools eligible to receive services under section 1113 of Title I, Part A of the Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 6313), including schools served under section 1113(b)(1)(C) of that Act.

Tribal enterprise means a business concern:

(1) That is wholly owned by one or more Tribal governments, or by a corporation that is wholly owned by one or more Tribal governments; or

(2) That is owned in part by one or more Tribal governments, or by a corporation that is wholly owned by one or more Tribal governments, if all other owners are either United States citizens or small business concerns, as these terms are used and consistent with the definitions in 15 U.S.C. 657a(b)(2)(D).

Tribal government means the recognized governing body of any Indian or Alaska Native Tribe, band, nation, pueblo, village, community, component band, or component reservation, individually identified (including parenthetically) in the list published on January 29, 2021, pursuant to section 104 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5131).

Unemployment rate means the U–3 unemployment rate provided by the Bureau of Labor Statistics as part of the Local Area Unemployment Statistics program, measured as total unemployment as a percentage of the civilian labor force.

Unemployment trust fund means an unemployment trust fund established under section 904 of the Social Security Act (42 U.S.C. 1104).

Unit of general local government has the meaning given to that term in section 102(a)(1) of the Housing and Community Development Act of 1974 (42 U.S.C. 5302(a)(1)).

§ 35.4 Reservation of authority, reporting.

(a) *Reservation of authority.* Nothing in this part shall limit the authority of the Secretary to take action to enforce conditions or violations of law, including actions necessary to prevent evasions of this subpart.

(b) *Extensions or accelerations of timing.* The Secretary may extend or accelerate any deadline or compliance date of this part, including reporting requirements that implement this subpart, if the Secretary determines that such extension or acceleration is appropriate. In determining whether an extension or acceleration is appropriate, the Secretary will consider the period of time that would be extended or accelerated and how the modified timeline would facilitate compliance with this subpart.

(c) *Reporting and requests for other information.* During the period of performance, recipients shall provide to the Secretary periodic reports providing detailed accounting of the uses of funds, modifications to a State or Territory's tax revenue sources, and such other information as the Secretary may require for the administration of this section. In addition to regular reporting requirements, the Secretary may request other additional information as may be necessary or appropriate, including as may be necessary to prevent evasions of the requirements of this subpart. False statements or claims made to the Secretary may result in criminal, civil, or administrative sanctions, including fines, imprisonment, civil damages and penalties, debarment from participating in Federal awards or contracts, and/or any other remedy available by law.

§ 35.5 Use of funds.

(a) *In general.* A recipient may only use funds to cover costs incurred during the period beginning March 3, 2021, and ending December 31, 2024, for one or more of the purposes enumerated in sections 602(c)(1) and 603(c)(1) of the Social Security Act, as applicable, including those enumerated in § 35.6, subject to the restrictions set forth in sections 602(c)(2) and 603(c)(2) of the Social Security Act, as applicable.

(b) *Costs incurred.* A cost shall be considered to have been incurred for purposes of paragraph (a) of this section if the recipient has incurred an obligation with respect to such cost by December 31, 2024.

(c) *Return of funds.* A recipient must return any funds not obligated by December 31, 2024. A recipient must also return funds obligated by December 31, 2024 but not expended by December 31, 2026.

§ 35.6 Eligible uses.

(a) *In general.* Subject to §§ 35.7 and 35.8, a recipient may use funds for one or more of the purposes described in paragraphs (b) through (f) of this section.

(b) *Responding to the public health emergency or its negative economic impacts.* A recipient may use funds to respond to the public health emergency or its negative economic impacts if the use meets the criteria provided in paragraph (b)(1) of this section or is enumerated in paragraph (b)(3) of this section; provided that, in the case of a use of funds for a capital expenditure under paragraphs (b)(1) or (b)(3) of this section, the use of funds must also meet the criteria provided in paragraph (b)(4) of this section. Treasury may also articulate additional eligible programs, services, or capital expenditures from time to time that satisfy the eligibility criteria of this paragraph (b), which shall be eligible under this paragraph (b).

(1) *Identifying eligible responses to the public health emergency or its negative economic impacts.* (i) A program, service, or capital expenditure is eligible under this paragraph (b)(1) if a recipient identifies a harm or impact to a beneficiary or class of beneficiaries caused or exacerbated by the public health emergency or its negative economic impacts and the program, service, or capital expenditure responds to such harm.

(ii) A program, service, or capital expenditure responds to a harm or impact experienced by an identified beneficiary or class of beneficiaries if it is reasonably designed to benefit the beneficiary or class of beneficiaries that experienced the harm or impact and is related and reasonably proportional to the extent and type of harm or impact experienced.

(2) *Identified harms: Presumptions of impacted and disproportionately impacted beneficiaries.* A recipient may rely on the following presumptions to identify beneficiaries presumptively impacted or disproportionately impacted by the public health emergency or its negative economic impacts for the purpose of providing a response under paragraph (b)(1) or (b)(3) of this section:

(i) Households or populations that experienced unemployment; experienced increased food or housing insecurity; qualify for the Children's Health Insurance Program (42 U.S.C. 1397aa *et seq.*), Childcare Subsidies through the Child Care and Development Fund Program (42 U.S.C. 9857 *et seq.* and 42 U.S.C. 618), or Medicaid (42 U.S.C. 1396 *et seq.*); if funds are to be used for affordable housing programs, qualify for the National Housing Trust Fund (12 U.S.C. 4568) or the Home Investment Partnerships Program (42 U.S.C. 12721 *et seq.*); if funds are to be used to address impacts of lost instructional time for students in kindergarten through twelfth grade, any student who did not have access to in-person instruction for a significant period of time; and low- and moderate-income households and populations are presumed to be impacted by the public health emergency or its negative economic impacts;

(ii) The general public is presumed to be impacted by the public health emergency for the purposes of providing the uses set forth in subparagraphs (b)(3)(i)(A) and (b)(3)(i)(C); and

(iii) The following households, communities, small businesses, and nonprofit organizations are presumed to be disproportionately impacted by the public health emergency or its negative economic impacts:

(A) Households and populations residing in a qualified census tract;

households and populations receiving services provided by Tribal governments; households and populations residing in the territories; households and populations receiving services provided by territorial governments; low-income households and populations; households that qualify for Temporary Assistance for Needy Families (42 U.S.C. 601 *et seq.*), the Supplemental Nutrition Assistance Program (7 U.S.C. 2011 *et seq.*), Free and Reduced Price School Lunch and/or Breakfast programs (42 U.S.C. 1751 *et seq.* and 42 U.S.C. 1773), Medicare Part D Low-income Subsidies (42 U.S.C. 1395w–114), Supplemental Security Income (42 U.S.C. 1381 *et seq.*), Head Start (42 U.S.C. 9831 *et seq.*), Early Head Start (42 U.S.C. 9831 *et seq.*), the Special Supplemental Nutrition Program for Women, Infants, and Children (42 U.S.C. 1786), Section 8 Vouchers (42 U.S.C. 1437f), the Low-Income Home Energy Assistance Program (42 U.S.C. 8621 *et seq.*), Pell Grants (20 U.S.C. 1070a), and, if SLFRF funds are to be used for services to address educational disparities, Title I eligible schools;

(B) Small businesses operating in a qualified census tract, operated by Tribal governments or on Tribal lands, or operating in the territories; and

(C) Nonprofit organizations operating in a qualified census tract, operated by Tribal governments or on Tribal lands, or operating in the territories.

(3) *Enumerated eligible uses: Responses presumed reasonably proportional.* A recipient may use funds to respond to the public health emergency or its negative economic impacts on a beneficiary or class of beneficiaries for one or more of the following purposes unless such use is grossly disproportionate to the harm caused or exacerbated by the public health emergency or its negative economic impacts:

(i) Responding to the public health impacts of the public health emergency for purposes including:

(A) COVID–19 mitigation and prevention in a manner that is consistent with recommendations and guidance from the Centers for Disease Control and Prevention, including vaccination programs and incentives; testing programs; contact tracing; isolation and quarantine; mitigation and prevention practices in congregate settings; acquisition and distribution of medical equipment for prevention and treatment of COVID–19, including personal protective equipment; COVID–19 prevention and treatment expenses for public hospitals or health care facilities, including temporary medical facilities; establishing or enhancing public health data systems; installation and improvement of ventilation systems in congregate settings, health facilities, or other public facilities; and assistance to small businesses, nonprofits, or impacted industries to implement mitigation measures;

(B) Medical expenses related to testing and treating COVID–19 that are provided in a manner consistent with recommendations and guidance from the Centers for Disease Control and Prevention, including emergency medical response expenses, treatment of long-term symptoms or effects of COVID–19, and costs to medical providers or to individuals for testing or treating COVID–19;

(C) Behavioral health care, including prevention, treatment, emergency or first-responder programs, harm reduction, supports for long-term recovery, and behavioral health facilities and equipment; and

(D) Preventing and responding to increased violence resulting from the public health emergency, including community violence intervention programs, or responding to increased gun violence resulting from the public health emergency, including payroll and covered benefits associated with community policing strategies; enforcement efforts to reduce gun violence; and investing in technology and equipment;

(ii) Responding to the negative economic impacts of the public health emergency for purposes including:

(A) Assistance to households and individuals, including:

(1) Assistance for food; emergency housing needs; burials, home repairs, or weatherization; internet access or digital literacy; cash assistance; and assistance accessing public benefits;

(2) Paid sick, medical, or family leave programs, or assistance to expand access to health insurance;

(3) Childcare, early learning services, home visiting, or assistance for child welfare-involved families or foster youth;

(4) Programs to address the impacts of lost instructional time for students in kindergarten through twelfth grade;

(5) Development, repair, and operation of affordable housing and services or programs to increase long-term housing security;

(6) Financial services that facilitate the delivery of Federal, State, or local benefits for unbanked and underbanked individuals;

(7) Benefits for the surviving family members of individuals who have died from COVID–19, including cash assistance to surviving spouses or dependents of individuals who died of COVID–19;

(8) Assistance for individuals who want and are available for work, including those who are unemployed, have looked for work sometime in the past 12 months, who are employed part time but who want and are available for full-time work, or who are employed but seeking a position with greater opportunities for economic advancement;

(9) Facilities and equipment related to the provision of services to households provided in subparagraphs (b)(3)(ii)(A)(1)–(8);

(10) The following expenses related to Unemployment Trust Funds:

(i) Contributions to a recipient Unemployment Trust Fund and repayment of principal amounts due on advances received under Title XII of the Social Security Act (42 U.S.C. 1321) up to an amount equal to the difference between the balance in the recipient's Unemployment Trust Fund as of January 27, 2020 and the balance of such account as of May 17, 2021 plus the principal amount outstanding as of May 17, 2021 on any advances received under Title XII of the Social Security Act between January 27, 2020 and May 17, 2021; provided that if a recipient repays principal on Title XII advances or makes a contribution to an Unemployment Trust Fund after April 1, 2022, such recipient shall not reduce average weekly benefit amounts or maximum benefit entitlements prior to December 31, 2024; and

(ii) Any interest due on such advances received under Title XII of the Social Security Act (42 U.S.C. 1321); and

(11) A program, service, capital expenditure, or other assistance that is provided to a disproportionately impacted household, population, or community, including:

(i) Services to address health disparities of the disproportionately impacted household, population, or community;

(ii) Housing vouchers and relocation assistance;

(iii) Investments in communities to promote improved health outcomes and public safety such as parks, recreation facilities, and programs that increase access to healthy foods;

(iv) Capital expenditures and other services to address vacant or abandoned properties;

(v) Services to address educational disparities; and

(vi) Facilities and equipment related to the provision of these services to the disproportionately impacted household, population, or community.

(B) Assistance to small businesses, including:

(1) Programs, services, or capital expenditures that respond to the negative economic impacts of the COVID–19 public health emergency, including loans or grants to mitigate financial hardship such as declines in revenues or impacts of periods of business closure, or providing technical assistance; and

(2) A program, service, capital expenditure, or other assistance that responds to disproportionately impacted small businesses, including rehabilitation of commercial properties; storefront and façade improvements; technical assistance, business incubators, and grants for start-ups or expansion costs for small businesses; and programs or services to support micro-businesses;

(C) Assistance to nonprofit organizations including programs, services, or capital expenditures, including loans or grants to mitigate financial hardship such as declines in revenues or increased costs, or technical assistance;

(D) Assistance to tourism, travel, hospitality, and other impacted industries for programs, services, or capital expenditures, including support for payroll costs and covered benefits for employees, compensating returning employees, support for operations and maintenance of existing equipment and facilities, and technical assistance; and

(E) Expenses to support public sector capacity and workforce, including:

(1) Payroll and covered benefit expenses for public safety, public health, health care, human services, and similar employees to the extent that the employee's time is spent mitigating or responding to the COVID–19 public health emergency;

(2) Payroll, covered benefit, and other costs associated with programs or services to support the public sector workforce and with the recipient:

(i) Hiring or rehiring staff to fill budgeted full-time equivalent positions that existed on January 27, 2020 but that were unfilled or eliminated as of March 3, 2021; or

(ii) Increasing the number of its budgeted full-time equivalent employees by up to the difference between the number of its budgeted full-time equivalent employees on January 27, 2020, multiplied by 1.075, and the number of its budgeted full-time equivalent employees on March 3, 2021, provided that funds shall only be used for additional budgeted full-time equivalent employees above the recipient's number of budgeted full-time equivalent employees as of March 3, 2021;

(3) Costs to improve the design and execution of programs responding to the COVID–19 pandemic and to administer or improve the efficacy of programs addressing the public health emergency or its negative economic impacts; and

(4) Costs associated with addressing administrative needs of recipient governments that were caused or exacerbated by the pandemic.

(4) *Capital expenditures.* A recipient, other than a Tribal government, must prepare a written justification for certain capital expenditures according to Table 1 to paragraph (b)(4) of this section. Such written justification must include the following elements:

(i) Describe the harm or need to be addressed;

(ii) Explain why a capital expenditure is appropriate; and

(iii) Compare the proposed capital expenditure to at least two alternative capital expenditures and demonstrate why the proposed capital expenditure is superior.

TABLE 1 TO PARAGRAPH (b)(4)

If a project has total expected capital expenditures of	and the use is enumerated in (b)(3), then	and the use is not enumerated in (b)(3), then
Less than $1 million	No Written Justification required	No Written Justification required.
Greater than or equal to $1 million, but less than $10 million.	Written Justification required but recipients are not required to submit as part of regular reporting to Treasury.	Written Justification required and recipients must submit as part of regular reporting to Treasury.
$10 million or more	Written Justification required and recipients must submit as part of regular reporting to Treasury.	

(c) *Providing premium pay to eligible workers.* A recipient may use funds to provide premium pay to eligible workers of the recipient who perform essential work or to provide grants to eligible employers that have eligible workers who perform essential work, provided that any premium pay or grants provided under this paragraph (c) must respond to eligible workers performing essential work during the COVID–19 public health emergency. A recipient uses premium pay or grants provided under this paragraph (c) to respond to eligible workers performing essential work during the COVID–19 public health emergency if:

(1) The eligible worker's total wages and remuneration, including the premium pay, is less than or equal to 150 percent of the greater of such eligible worker's residing State's or county's average annual wage for all occupations as defined by the Bureau of Labor Statistics' Occupational Employment and Wage Statistics;

(2) The eligible worker is not exempt from the Fair Labor Standards Act overtime provisions (29 U.S.C. 207); or

(3) The recipient has submitted to the Secretary a written justification that explains how providing premium pay to the eligible worker is responsive to the eligible worker performing essential work during the COVID–19 public health emergency (such as a description of the eligible workers' duties, health, or financial risks faced due to COVID–19, and why the recipient determined that the premium pay was responsive despite the worker's higher income).

(d) *Providing government services.* A recipient may use funds for the provision of government services to the extent of the reduction in the recipient's general revenue due to the public health emergency, calculated according to this paragraph (d). A recipient must make a one-time election to calculate the amount of the reduction in the recipient's general revenue due to the public health emergency according to either paragraph (d)(1) or (d)(2) of this section:

(1) *Standard allowance.* The reduction in the recipient's general revenue due to the public health emergency over the period of performance will be deemed to be ten million dollars; or

(2) *Formula.* The reduction in the recipient's general revenue due to the public health emergency over the period of performance equals the sum of the reduction in revenue, calculated as of each date identified in paragraph (d)(2)(i) of this section and according to the formula in paragraph (d)(2)(ii) of this section:

(i) A recipient must make a one-time election to calculate the reduction in its general revenue using information as of either:

(A) December 31, 2020, December 31, 2021, December 31, 2022, and December 31, 2023; or

(B) The last day of each of the recipient's fiscal years ending in 2020, 2021, 2022, and 2023.

(ii) A reduction in a recipient's general revenue for each date identified in paragraph (d)(2)(i) of this section equals:

*Max {[Base Year Revenue * (1 + Growth Adjustment)^(n_t/12)] − Actual General Revenue; 0}*

Where:

(A) Base Year Revenue is the recipient's general revenue for the most recent full fiscal year prior to the COVID–19 public health emergency;

(B) Growth Adjustment is equal to the greater of 5.2 percent (or 0.052) and the recipient's average annual revenue growth over the three full fiscal years prior to the COVID–19 public health emergency;

(C) n equals the number of months elapsed from the end of the base year to the calculation date;

(D) Subscript t denotes the specific calculation date; and

(E) Actual General Revenue is a recipient's actual general revenue collected during the 12-month period ending on each calculation date identified in paragraph (d)(2)(i) of this section, except:

(1) For purposes of all calculation dates on or after April 1, 2022, in the case of any change made after January 6, 2022 to any law, regulation, or administrative interpretation that reduces any tax (by providing for a reduction in a rate, a rebate, a deduction, a credit, or otherwise) or delays the imposition of any tax or tax increase and that the recipient assesses has had the effect of decreasing the amount of tax revenue collected during the 12-month period ending on the calculation date relative to the amount of tax revenue that would have been collected in the absence of such change, the recipient must add to actual general revenue the amount of such decrease in tax revenue;

(2) For purposes of any calculation date on or after April 1, 2022, in the case of any change made after January 6, 2022 to any law, regulation, or administrative interpretation that increases any tax (by providing for an increase in a rate, the reduction of a rebate, a deduction, or a credit, or otherwise) or accelerates the imposition of any tax or tax increase and that the recipient assesses has had the effect of increasing the amount of tax revenue collected during the 12-month period ending on the calculation date relative to the amount of tax revenue that would have been collected in the absence of such change, the recipient must subtract from actual general revenue the amount of such increase in tax revenue;

(3) If the recipient makes a one-time election to adjust general revenue to reflect tax changes made during the period beginning on January 27, 2020 and ending on January 6, 2022, for purposes of each calculation date identified in paragraph (d)(2)(i) of this section:

(i) In the case of any change made during such prior period to any law, regulation, or administrative interpretation that reduces any tax (by providing for a reduction in a rate, a rebate, a deduction, a credit, or otherwise) or delays the imposition of any tax or tax increase and that the recipient assesses has had the effect of decreasing the amount of tax revenue collected during the 12-month period ending on the calculation date relative to the amount of tax revenue that would have been collected in the absence of such change, the recipient must add to actual general revenue the amount of such decrease in tax revenue; and

(ii) In the case of any change made during such prior period to any law, regulation, or administrative interpretation that increases any tax (by providing for an increase in a rate, the reduction of a rebate, a deduction, or a credit, or otherwise) or accelerates the imposition of any tax or tax increase and that the recipient assesses has had the effect of increasing the amount of tax revenue collected during the 12-month period ending on the calculation date relative to the amount of tax revenue that would have been collected in the absence of such change, the recipient must subtract from actual general revenue the amount of such increase in tax revenue; and

(4) With respect to any calculation date during the period beginning on January 6, 2022 and ending on March 31, 2022, if the recipient makes the election in paragraph (d)(3) of this section, the recipient must also make the adjustments referenced in paragraph (d)(3) of this section with respect to any such changes in law, regulation, or administrative interpretation during the period beginning on January 6, 2022 and ending on such calculation date.

(e) *Making necessary investments in water, sewer, and broadband infrastructure.* A recipient may use funds to make the following investments in water, sewer, and broadband infrastructure.

(1) *Water and sewer investments*—(i) *Clean Water State Revolving Fund projects.* Projects or activities of the type that meet the eligibility requirements of section 603(c) of the Federal Water Pollution Control Act (33 U.S.C. 1383(c));

(ii) *Additional stormwater projects.* Projects to manage, reduce, treat, or recapture stormwater or subsurface drainage water regardless of whether such projects would improve water quality if such projects would otherwise meet the eligibility requirements of section 603(c)(5) of the Federal Water Pollution Control Act (33 U.S.C. 1383(c)(5));

(iii) *Drinking Water State Revolving Fund projects.* Projects or activities of the type that meet the eligibility requirements of section 1452 of the Safe Drinking Water Act (42 U.S.C. 300j–12) as implemented by the regulations adopted by the Environmental Protection Agency (EPA) under 40 CFR 35.3520, provided that:

(A) The recipient is not required to comply with the limitation under 40 CFR 35.3520(c)(2) to acquisitions of land from willing sellers or the prohibition under 40 CFR 35.3520(e)(6) on uses of funds for certain Tribal projects; and

(B) In the case of lead service line replacement projects, the recipient must replace the full length of the service line and may not replace only a partial portion of the service line.

(iv) *Additional lead remediation and household water quality testing.* Projects or activities to address lead in drinking water or provide household water quality testing that are within the scope of the programs the EPA is authorized to establish under sections 1459A(b)(2), 1459B(b)(1), 1464(d)(2), and 1465 of the Safe Drinking Water Act (42 U.S.C. 300j–19a(b)(2), 300j–19b(b)(1), 300j–24(d)(2), and 300j–25), provided that:

(A) In the case of lead service line replacement projects, the recipient must replace the full length of the service line and may not replace only a partial portion of the service line; and

(B) In the case of projects within the scope of the program the EPA is authorized to establish under section 1459B(b)(1) of the Safe Drinking Water Act, the recipient may determine the income eligibility of homeowners served by lead service line replacement projects in its discretion.

(v) *Drinking water projects to support increased population.* Projects of the type that meet the eligibility requirements of 40 CFR 35.3520 other than the requirement of subparagraph

(b)(1) of such regulation to address present or prevent future violations of health-based drinking water standards, if the following conditions are met:

(A) The project is needed to support increased population, with need assessed as of the time the project is undertaken;

(B) The project is designed to support no more than a reasonable level of projected increased need, whether due to population growth or otherwise;

(C) The project is a cost-effective means for achieving the desired level of service; and

(D) The project is projected to continue to provide an adequate level of drinking water over its estimated useful life.

(vi) *Dams and reservoirs.* Rehabilitation of dams and reservoirs if the following conditions are met:

(A) The project meets the requirements of 40 CFR 35.3520 other than the following requirements:

(1) The prohibition on the rehabilitation of dams and reservoirs in 40 CFR 35.3520(e)(1) and (3); and

(2) The requirement in 40 CFR 35.3520(b)(1) that the project is needed to address present or prevent future violations of health-based drinking water standards, provided that if the dam or reservoir project does not meet this requirement, the project must be needed to support increased population, with need assessed as of the time the project is undertaken, and the project must be projected to continue to provide an adequate level of drinking water over its estimated useful life;

(B) The primary purpose of the dam or reservoir is for drinking water supply;

(C) The project is needed for the provision of drinking water supply, with need assessed as of the time the project is initiated;

(D) The project is designed to support no more than a reasonable level of projected increased need, whether due to population growth or otherwise; and

(E) The project is a cost-effective means for achieving the desired level of service.

(vii) *Private wells.* Rehabilitation of private wells, testing initiatives to identify contaminants in private wells, and treatment activities and remediation projects that address contamination in private wells, if the project meets the requirements of 40 CFR 35.3520 other than the limitation to certain eligible systems under 40 CFR 35.3520(a).

(2) *Broadband investments*—(i) *General.* Broadband infrastructure if the following conditions are met:

(A) The broadband infrastructure is designed to provide service to households and businesses with an identified need, as determined by the recipient, for such infrastructure;

(B) The broadband infrastructure is designed to, upon completion:

(1) Reliably meet or exceed symmetrical 100 Mbps download speed and upload speeds; or

(2) In cases where it is not practicable, because of the excessive cost of the project or geography or topography of the area to be served by the project, to provide service reliably meeting or exceeding symmetrical 100 Mbps download speed and upload speeds:

(i) Reliably meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed; and

(ii) Be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed; and

(C) The service provider for a completed broadband infrastructure investment project that provides service to households is required, for as long as the SLFRF-funded broadband infrastructure is in use, by the recipient to:

(*1*) Participate in the Federal Communications Commission's Affordable Connectivity Program (ACP) through the lifetime of the ACP; or

(*2*) Otherwise provide access to a broad-based affordability program to low-income consumers in the proposed service area of the broadband infrastructure that provides benefits to households commensurate with those provided under the ACP through the lifetime of the ACP.

(ii) *Cybersecurity infrastructure investments.* Cybersecurity infrastructure investments that are designed to improve the reliability and resiliency of new and existing broadband infrastructure. Such investments may include the addition or modernization of network security hardware and software tools designed to strengthen cybersecurity for the end-users of these networks.

(f) *Meeting the non-federal matching requirements for Bureau of Reclamation projects.* A recipient may use funds to meet the non-federal matching requirements of any authorized Bureau of Reclamation project.

§35.7 Pensions.

A recipient (other than a Tribal government) may not use funds for deposit into any pension fund.

§35.8 Tax.

(a) *Restriction.* A State or Territory shall not use funds to either directly or indirectly offset a reduction in the net tax revenue of the State or Territory resulting from a covered change during the covered period.

(b) *Violation.* Treasury will consider a State or Territory to have used funds to offset a reduction in net tax revenue if, during a reporting year:

(1) *Covered change.* The State or Territory has made a covered change that, either based on a reasonable statistical methodology to isolate the impact of the covered change in actual revenue or based on projections that use reasonable assumptions and do not incorporate the effects of macroeconomic growth to reduce or increase the projected impact of the covered change, the State or Territory assesses has had or predicts to have the effect of reducing tax revenue relative to current law;

(2) *Exceeds the de minimis threshold.* The aggregate amount of the measured or predicted reductions in tax revenue caused by covered changes identified under paragraph (b)(1) of this section, in the aggregate, exceeds 1 percent of the State's or Territory's baseline;

(3) *Reduction in net tax revenue.* The State or Territory reports a reduction in net tax revenue, measured as the difference between actual tax revenue and the State's or Territory's baseline, each measured as of the end of the reporting year; and

(4) *Consideration of other changes.* The aggregate amount of measured or predicted reductions in tax revenue caused by covered changes is greater than the sum of the following, in each case, as calculated for the reporting year:

(i) The aggregate amount of the expected increases in tax revenue caused by one or more covered changes that, either based on a reasonable statistical methodology to isolate the impact of the covered change in actual revenue or based on projections that use reasonable assumptions and do not incorporate the effects of macroeconomic growth to reduce or increase the projected impact of the covered change, the State or Territory assesses has had or predicts to have the effect of increasing tax revenue; and

(ii) Reductions in spending, up to the amount of the State's or Territory's net reduction in total spending, that are in:

(A) Departments, agencies, or authorities in which the State or Territory is not using funds; and

(B) Departments, agencies, or authorities in which the State or Territory is using funds, in an amount equal to the value of the spending cuts in those departments, agencies, or authorities, minus funds used.

(c) *Amount and revenue reduction cap.* If a State or Territory is considered to be in violation pursuant to paragraph (b) of this section, the amount used in

violation of paragraph (a) of this section is equal to the lesser of:

(1) The reduction in net tax revenue of the State or Territory for the reporting year, measured as the difference between the State's or Territory's baseline and its actual tax revenue, each measured as of the end of the reporting year; and,

(2) The aggregate amount of the reductions in tax revenues caused by covered changes identified in paragraph (b)(1) of this section, minus the sum of the amounts in identified in paragraphs (b)(4)(i) and (ii) of this section.

§ 35.9 Compliance with applicable laws.

A recipient must comply with all other applicable Federal statutes, regulations, and executive orders, and a recipient shall provide for compliance with the American Rescue Plan Act, this subpart, and any interpretive guidance by other parties in any agreements it enters into with other parties relating to these funds.

§ 35.10 Recoupment.

(a) *Identification of violations*—(1) *In general.* Any amount used in violation of § 35.5, 35.6, or 35.7 may be identified at any time prior to December 31, 2026.

(2) *Annual reporting of amounts of violations.* On an annual basis, a recipient that is a State or territory must calculate and report any amounts used in violation of § 35.8.

(b) *Calculation of amounts subject to recoupment*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, the Secretary will calculate any amounts subject to recoupment resulting from a violation of § 35.5, 35.6 or 35.7 as the amounts used in violation of such restrictions.

(2) *Violations of § 35.8.* The Secretary will calculate any amounts subject to recoupment resulting from a violation of § 35.8, equal to the lesser of:

(i) The amount set forth in § 35.8(c); and,

(ii) The amount of funds received by such recipient.

(c) *Initial notice.* If the Secretary calculates an amount subject to recoupment under paragraph (b) of this section, Treasury will provide the recipient an initial written notice of the amount subject to recoupment along with an explanation of such amounts.

(d) *Request for reconsideration.* Unless the Secretary extends or accelerates the time period, within 60 calendar days of receipt of an initial notice of recoupment provided under paragraph (c) of this section, a recipient may submit a written request to the Secretary requesting reconsideration of any amounts subject to recoupment under paragraph (b) of this section. To request reconsideration of any amounts subject to recoupment, a recipient must submit to the Secretary a written request that includes:

(1) An explanation of why the recipient believes all or some of the amount should not be subject to recoupment; and

(2) A discussion of supporting reasons, along with any additional information.

(e) *Final amount subject to recoupment.* Unless the Secretary extends or accelerates the time period, within 60 calendar days of receipt of the recipient's request for reconsideration provided pursuant to paragraph (d) of this section or the expiration of the period for requesting reconsideration provided under paragraph (d), the recipient will be notified of the Secretary's decision to affirm, withdraw, or modify the notice of recoupment. Such notification will include an explanation of the decision, including responses to the recipient's supporting reasons and consideration of additional information provided. A recipient must invoke and exhaust the procedures available under this subpart prior to seeking judicial review of a decision under § 35.10.

(f) *Repayment of funds.* Unless the Secretary extends or accelerates the time period, a recipient shall repay to the Secretary any amounts subject to recoupment in accordance with instructions provided by the Secretary:

(1) Within 120 calendar days of receipt of the notice of recoupment provided under paragraph (c) of this section, in the case of a recipient that does not submit a request for reconsideration in accordance with the requirements of paragraph (d) of this section; or

(2) Within 120 calendar days of receipt of the Secretary's decision under paragraph (e) of this section, in the case of a recipient that submits a request for reconsideration in accordance with the requirements of paragraph (d) of this section.

(g) *Other remedial actions.* Prior to seeking recoupment or taking other appropriate action pursuant to paragraph (c), (d), (e), or (f) of this section, the Secretary may notify the recipient of potential violations and provide the recipient an opportunity for informal consultation and remediation.

§ 35.11 Payments to States.

(a) *In general.* With respect to any State or Territory that has an unemployment rate as of the date that it submits an initial certification for payment of funds pursuant to section 602(d)(1) of the Social Security Act that is less than two percentage points above its unemployment rate in February 2020, the Secretary will withhold 50 percent of the amount of funds allocated under section 602(b) of the Social Security Act to such State or territory until at least May 10, 2022 and not more than twelve months from the date such initial certification is provided to the Secretary.

(b) *Payment of withheld amount.* In order to receive the amount withheld under paragraph (a) of this section, the State or Territory must submit to the Secretary the following information:

(1) A certification, in the form provided by the Secretary, that such State or Territory requires the payment to carry out the activities specified in section 602(c) of the Social Security Act and will use the payment in compliance with section 602(c) of the Social Security Act; and

(2) Any reports required to be filed by that date pursuant to this part that have not yet been filed.

§ 35.12 Distributions to nonentitlement units of local government and units of general local government.

(a) *Nonentitlement units of local government.* Each State or Territory that receives a payment from the Secretary pursuant to section 603(b)(2)(B) of the Social Security Act shall distribute the amount of the payment to nonentitlement units of local government in such State or Territory in accordance with the requirements set forth in section 603(b)(2)(C) of the Social Security Act and without offsetting any debt owed by such nonentitlement units of local governments against such payments.

(b) *Budget cap.* A State or Territory may not make a payment to a nonentitlement unit of local government pursuant to section 603(b)(2)(C) of the Social Security Act and paragraph (a) of this section in excess of the amount equal to 75 percent of the most recent budget for the nonentitlement unit of local government as of January 27, 2020. For purposes of this section 35.12, a nonentitlement unit of local government's most recent budget shall mean the nonentitlement unit of local government's total annual budget, including both operating and capital expenditure budgets, in effect as of January 27, 2020. A State or Territory shall permit a nonentitlement unit of local government without a formal budget as of January 27, 2020, to provide a certification from an authorized officer of the nonentitlement unit of local government of its most recent annual expenditures as of

January 27, 2020, and a State or Territory may rely on such certification for purposes of complying with this section 35.12.

(c) *Units of general local government.* Each State or Territory that receives a payment from the Secretary pursuant to section 603(b)(3)(B)(ii) of the Social Security Act, in the case of an amount to be paid to a county that is not a unit of general local government, shall distribute the amount of the payment to units of general local government within such county in accordance with the requirements set forth in section 603(b)(3)(B)(ii) of the Social Security Act and without offsetting any debt owed by such units of general local government against such payments.

(d) *Additional conditions.* A State or Territory may not place additional conditions or requirements on distributions to nonentitlement units of local government or units of general local government beyond those required by section 603 of the Social Security Act or this subpart.

Jacob Leibenluft,

Chief Recovery Officer.

BILLING CODE P

Appendix C: Compliance and Reporting Guidance, State and Local Fiscal Recovery Funds

Compliance and Reporting Guidance

State and Local Fiscal Recovery Funds

September 20, 2022
Version: 5.0

Coronavirus State and Local Fiscal Recovery Funds Guidance on Recipient Compliance and Reporting Responsibilities

On March 11, 2021, the American Rescue Plan Act was signed into law, and established the Coronavirus State Fiscal Recovery Fund and Coronavirus Local Fiscal Recovery Fund, which together make up the Coronavirus State and Local Fiscal Recovery Funds ("SLFRF") program. This program is intended to provide support to State, territorial, local, and Tribal governments in responding to the economic and public health impacts of COVID-19 and in their efforts to contain impacts on their communities, residents, and businesses.

In May 2021, Treasury published the interim final rule ("IFR") describing eligible and ineligible uses of SLFRF, as well as other program requirements. The initial versions of this Compliance and Reporting guidance reflected the IFR and its eligible use categories. On January 6, 2022, the U.S. Department of the Treasury ("Treasury") adopted the final rule implementing the SLFRF program. The final rule became effective on April 1, 2022. Prior to the final rule effective date, the IFR remained in effect; funds used consistently with the IFR while it was in effect were in compliance with the SLFRF program. However, recipients could choose to take advantage of the final rule's flexibilities and simplifications ahead of the effective date. Recipients may consult the *Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule* for more information on compliance with the IFR and the final rule.

To support recipients in complying with the final rule, this reporting guidance reflects the final rule and provides additional detail and clarification for each recipient's compliance and reporting responsibilities under the SLFRF program, and should be read in concert with the Award Terms and Conditions, the authorizing statute, the final rule, other program guidance including the Final Rule FAQs, and other regulatory and statutory requirements, including regulatory requirements under the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards ("Uniform Guidance" or 2 CRF Part 200), and 2021 SLFRF Compliance Supplement – Technical Update and 2022 SLFRF Compliance Supplement. Please see the Assistance Listing in SAM.gov under assistance listing number (formerly known as CFDA number) 21.027 for more information.

Please Note: This guidance document applies to the SLFRF program only and does not change or impact reporting and compliance requirements for the Coronavirus Relief Fund ("CRF") established by the CARES Act.

This guidance includes two parts:

Part 1: General Guidance

This section provides an orientation to recipients' compliance responsibilities and Treasury's expectations and recommends best practices where appropriate under the SLFRF program.

A. Key Principles..... P. 4
B. Statutory Eligible Uses..... P. 4
C. Treasury's Final Rule..... P. 5
D. Uniform Guidance (2 CFR Part 200)..... P. 7
E. Award Terms and Conditions..... P. 11

Part 2: Reporting Requirements

This section provides information on the reporting requirements for the SLFRF program.

A. Interim Report..... P. 16
B. Project and Expenditure Report..... P. 17
C. Recovery Plan Performance Report..... P. 34

Appendix 1: Expenditure Categories..... P. 42
Appendix 2: Evidenced-Based Intervention Additional Information..... P. 47
Appendix 3: Expenditure Categories under the Interim Final Rule..... P. 48

OMB Control Number: 1505-0271

OMB Expiration Date: 04/30/2025

PAPERWORK REDUCTION ACT NOTICE

The information collected will be used for the U.S. Government to process requests for support. The estimated burden for the collections of information included in this guidance is as follows: 30 minutes for Title VI Assurances, 2 hours per response for the Interim Report, 6 hours per response for the Project and Expenditure Report and 100 hours per response for the Recovery Plan Performance Report (if applicable). Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Office of Privacy, Transparency and Records, Department of the Treasury, 1500 Pennsylvania Ave., N.W., Washington, D.C. 20220. DO NOT send the form to this address. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by OMB.

Part 1: General Guidance

This section provides an orientation on recipients' compliance responsibilities and Treasury's expectations and recommended best practices where appropriate under the SLFRF program.

Recipients under the SLFRF program are the eligible entities identified in sections 602 and 603 of the Social Security Act as added by section 9901 of the American Rescue Plan Act of 2021 (the "SLFRF statute") that receive an SLFRF award. Subrecipients under the SLFRF program are entities that receive a subaward from a recipient to carry out the purposes (program or project) of the SLFRF award on behalf of the recipient.

Recipients are accountable to Treasury for oversight of their subrecipients in accordance with 2 CFR 200.332, including ensuring their subrecipients comply with the SLFRF statute, SLFRF Award Terms and Conditions, Treasury's interim final rule and final rule, applicable federal statutes, regulations, and reporting requirements.

A. Key Principles

There are several guiding principles for developing your own effective compliance regimes:

- Recipients and subrecipients are the first line of defense and responsible for ensuring the SLFRF award funds are not used for ineligible purposes, and there is no fraud, waste, or abuse associated with their SLFRF award;
- Many SLFRF-funded projects respond to the COVID-19 public health emergency and meet urgent community needs. Swift and effective implementation is vital, and recipients must balance facilitating simple and rapid program access widely across the community and maintaining a robust documentation and compliance regime;
- Treasury encourages recipients to use SLFRF-funded projects to advance shared interests and promote equitable delivery of government benefits and opportunities to underserved communities, as outlined in Executive Order 13985, On Advancing Racial Equity and Support for Underserved Communities Through the Federal Government; and
- Transparency and public accountability for SLFRF award funds and use of such funds are critical to upholding program integrity and trust in all levels of government, and SLFRF award funds should be managed consistent with Administration guidance per Memorandum M-21-20 and Memorandum M-20-21.

B. Statutory Eligible Uses

As a recipient of an SLFRF award, your organization has substantial discretion to use the award funds in the ways that best suit the needs of your constituents – as long as such use fits into one of the following four statutory categories:

1. To respond to the COVID-19 public health emergency or its negative economic impacts;
2. To respond to workers performing essential work during the COVID-19 public health emergency by providing premium pay to eligible workers of the recipient that are performing such essential work, or by providing grants to eligible employers that have eligible workers who perform essential work;
3. For the provision of government services, to the extent of the reduction in revenue of such recipient due to the COVID–19 public health emergency, relative to revenues collected in the most recent full fiscal year of the recipient prior to the emergency; or
4. To make necessary investments in water, sewer, or broadband infrastructure.

Treasury adopted an interim final rule in May 2021 and the final rule on January 6, 2022 to implement these eligible use categories and other restrictions on the use of funds under the SLFRF

program. The final rule took effect on April 1, 2022, and the interim final rule remained in effect until that time, although recipients could choose to take advantage of the final rule's flexibilities and simplifications prior to April 1, 2022. Recipients may consult the Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule for more information on compliance with the interim final rule and the final rule.

It is the recipient's responsibility to ensure all SLFRF award funds are used in compliance with the program's requirements. In addition, recipients should be mindful of any additional compliance obligations that may apply – for example, additional restrictions imposed upon other sources of funds used in conjunction with SLFRF award funds, or statutes and regulations that may independently apply to water, broadband, and sewer infrastructure projects. Recipients should ensure they maintain proper documentation supporting determinations of costs and applicable compliance requirements, and how they have been satisfied as part of their award management, internal controls, and subrecipient oversight and management.

C. Treasury's Final Rule

Treasury's final rule details recipients' compliance responsibilities and provides additional information on eligible and restricted uses of SLFRF award funds and reporting requirements.

1. **Eligible and Restricted Uses of SLFRF Funds.** As described in the SLFRF statute and summarized above, there are four enumerated eligible uses of SLFRF award funds. As a recipient of an award under the SLFRF program, your organization is responsible for complying with requirements for the use of funds. In addition to determining a given project's eligibility, recipients are also responsible for determining subrecipient's or beneficiaries' eligibility, and must monitor subrecipients' use of SLFRF award funds.

   To help recipients build a greater understanding of eligible uses, Treasury's final rule establishes a framework for determining whether a specific project would be eligible under the SLFRF program, including some helpful definitions. For example, Treasury's final rule establishes:

   - A framework for determining whether a project responds to the COVID-19 public health emergency or its negative economic impacts;
   - Definitions of "eligible employers," "essential work," "eligible workers," and "premium pay" for cases where premium pay is an eligible use;
   - The option to select between a standard amount of revenue loss or complete a full revenue loss calculation of revenue lost due to the COVID-19 public health emergency;
   - A framework for necessary water and sewer infrastructure projects that aligns eligible uses with projects that are eligible under the Environmental Protection Agency's Drinking Water and Clean Water State Revolving Funds along with certain additional projects, including a wider set of lead remediation and stormwater infrastructure projects and aid for residential wells; and
   - A framework for necessary broadband projects that allows for projects that are designed to provide service of sufficient speeds to eligible areas, as well as an affordability requirement for providers that provide service to households.

   Treasury's final rule also provides more information on important restrictions on use of SLFRF award funds, including that recipients other than Tribal governments may not deposit SLFRF funds into a pension fund; and recipients that are States or territories may not use SLFRF funds to offset a reduction in net tax revenue resulting from the recipient's change in law, regulation, or administrative interpretation. In addition, recipients may not use SLFRF funds directly to service debt, satisfy a judgment or settlement, or contribute to a "rainy day" fund. Recipients should refer to Treasury's final rule for more information on these restrictions.

Treasury's final rule outlines that funds available under the "revenue loss" eligible use category (sections 602(c)(1)(C) and 603(c)(1)(C) of the Social Security Act) generally may be used to meet the non-federal cost-share or matching requirements of other federal programs. However, the final rule notes that SLFRF funds may not be used as the non-federal share for purposes of a state's Medicaid and CHIP programs because the Office of Management and Budget ("OMB") has approved a waiver as requested by the Centers for Medicare & Medicaid Services pursuant to 2 CFR 200.102 of the Uniform Guidance and related regulations. If a recipient seeks to use SLFRF funds to satisfy match or cost-share requirements for a federal grant program, it should first confirm with the relevant awarding agency that no waiver has been granted for that program, that no other circumstances enumerated under 2 CFR 200.306(b) would limit the use of SLFRF funds to meet the match or cost-share requirement, and that there is no other statutory or regulatory impediment to using the SLFRF funds for the match or cost-share requirement. SLFRF funds beyond those that are available under the revenue loss eligible use category may not be used to meet the non-federal match or cost-share requirements of other federal programs, other than as specifically provided for by statute. For example, the Infrastructure Investment and Jobs Act provides that SLFRF funds may be used to meet the non-federal match requirements of authorized Bureau of Reclamation projects and certain broadband deployment projects.

2. **Eligible Costs Timeframe.** Your organization, as a recipient of an SLFRF award, may use SLFRF funds to cover eligible costs that your organization incurred during the period that begins on March 3, 2021 and ends on December 31, 2024, as long as the award funds for the obligations incurred by December 31, 2024 are expended by December 31, 2026. Costs for projects incurred by the recipient State, territorial, local, or Tribal government prior to March 3, 2021 are not eligible, as provided for in Treasury's final rule.

   Recipients may, in certain circumstances, use SLFRF award funds for the eligible use categories described in Treasury's final rule for costs incurred prior to March 3, 2021. Specifically,

   a. Public Health/Negative Economic Impacts: Recipients may use SLFRF award funds to provide assistance to households, small businesses, and nonprofits to respond to the public health emergency or negative economic impacts of the pandemic – such as rent, mortgage, or utility assistance – for costs incurred by the beneficiary (e.g., a household) prior to March 3, 2021, provided that the recipient State, territorial, local or Tribal government did not incur the cost of providing such assistance prior to March 3, 2021.
   b. Premium Pay: Recipients may provide premium pay retrospectively for work performed at any time since the start of the COVID-19 public health emergency. Such premium pay must be "in addition to" wages and remuneration already received and the obligation to provide such premium pay must not have been incurred by the recipient prior to March 3, 2021.
   c. Revenue Loss: Recipients have broad discretion to use funds for the provision of government services to the extent of reduction in revenue. While calculation of lost revenue is based on the recipient's revenue in the last full fiscal year prior to the COVID-19 public health emergency, use of funds for government services must be forward looking for costs incurred by the recipient after March 3, 2021.
   d. Investments in Water, Sewer, and Broadband: Recipients may use SLFRF award funds to make necessary investments in water, sewer, and broadband infrastructure. Recipients may use SLFRF award funds to cover costs incurred for eligible projects planned or started prior to March 3, 2021, provided that the project costs covered by the SLFRF award funds were incurred by the recipient after March 3, 2021.

   Any funds not obligated or expended for eligible uses by the timelines above must be returned to Treasury, including any unobligated or unexpended funds that have been provided to subrecipients and contractors as part of the award closeout process pursuant to 2 C.F.R. 200.344(d). For the purposes of determining expenditure eligibility, Treasury's final rule provides

that "incurred" means the recipient has incurred an obligation, which has the same meaning given to "financial obligation" in 2 CFR 200.1.

3. **Reporting.** Generally, recipients must submit one initial Interim Report, quarterly or annual Project and Expenditure reports which include subaward reporting, and in some cases annual Recovery Plan reports. Treasury's final rule and Part 2 of this guidance provide more detail around SLFRF reporting requirements.

4. **Expenditure Categories**. Treasury's final rule provides greater flexibility and simplicity for recipients to fight the pandemic and support families and businesses struggling with its impacts, maintain vital services amid revenue shortfalls, and build a strong, resilient, and equitable recovery. As such, recipients report on a broader set of eligible uses and associated Expenditure Categories ("EC"), which began with the April 2022 Project and Expenditure Report. Appendix 1 includes the new ECs, as well as a reference to previous ECs used for reporting under the interim final rule.

Assistance Listing

The Assistance Listing for the Coronavirus State and Local Fiscal Recovery Funds (SLFRF) was published May 28, 2021 on SAM.gov under Assistance Listing Number ("ALN"), formerly known as CFDA Number, **21.027**.

The assistance listing includes helpful information including program purpose, statutory authority, eligibility requirements, and compliance requirements for recipients. The ALN is the unique 5-digit number assigned to identify a federal assistance listing, and can be used to search for federal assistance program information, including funding opportunities, spending on USASpending.gov, or audit results through the Federal Audit Clearinghouse.

To expedite payments and meet statutory timelines Treasury issued initial payments under an existing ALN, 21.019, assigned to the CRF. If you have already received funds or captured the initial number in your records, please update your systems and reporting to reflect the new ALN 21.027 for the SLFRF program. **Recipients must use ALN 21.027 for all financial accounting, subawards, and associated program reporting requirements for the SLFRF awards.**

D. Uniform Administrative Requirements

The SLFRF awards are generally subject to the requirements set forth in the Uniform Guidance. In all instances, your organization should review the Uniform Guidance requirements applicable to your organization's use of SLFRF funds, and SLFRF-funded projects. Additional details about applicability of certain provisions of the Uniform Guidance may be found in:

- SLFRF final rule;
- SLFRF Assistance Listing; and
- SLFRF Final Rule FAQs, including FAQ 4.9, 10.1, and Section 13.

The following sections provide a general summary of your organization's compliance responsibilities under applicable statutes and regulations, including the Uniform Guidance, as described in the most recent compliance supplement issued by OMB. Note that the descriptions below are only general summaries and all recipients and subrecipients are advised to carefully review the Uniform Guidance requirements and any additional regulatory and statutory requirements applicable to the program.

1. **Allowable Activities.** Each recipient should review program requirements, including Treasury's final rule and the recipient's Award Terms and Conditions, to determine and record eligible uses

of SLFRF funds. Per 2 CFR Part 200.303, your organization must develop and implement effective internal controls to ensure that funding decisions under the SLFRF award constitute eligible uses of funds, and document determinations.

2. **Allowable Costs/Cost Principles.** As outlined in the Uniform Guidance at 2 CFR Part 200, Subpart E regarding Cost Principles, allowable costs are based on the premise that a recipient is responsible for the effective administration of Federal awards, application of sound management practices, and administration of Federal funds in a manner consistent with the program objectives and terms and conditions of the award. Recipients must implement robust internal controls and effective monitoring to ensure compliance with the Cost Principles, which are important for building trust and accountability. Please note that as outlined in Final Rule FAQ 13.15, only a subset of the Uniform Guidance requirements at 2 CFR Part 200 Subpart E (Cost Principles) applies to recipients' use of funds in the revenue loss eligible use category.

   SLFRF funds may be, but are not required to be, used along with other funding sources for a given project. Recipients should note that SLFRF funds available under the "revenue loss" eligible use category generally may be used to meet the non-federal cost-share or matching requirements of other federal programs. If a recipient seeks to use SLFRF funds to satisfy match or cost-share requirements for a federal grant program, the recipient should first confirm with the relevant awarding agency that no waiver has been granted for that program, that no other circumstances enumerated under 2 CFR 200.306(b) would limit the use of SLFRF funds to meet the match or cost-share requirement, and that there is no other statutory or regulatory impediment to using the SLFRF funds for the match or cost-share requirement. For instance, recipients should note that SLFRF funds may not be used as the non-federal share for purposes of a state's Medicaid and CHIP programs because the OMB has approved a waiver from this provision as requested by the Centers for Medicare & Medicaid Services pursuant to 2 CFR 200.102 of the Uniform Guidance and related regulations.

   SLFRF funds beyond those that are available under the revenue loss eligible use category may not be used to meet the non-federal match or cost-share requirements of other federal programs, other than as specifically provided for by statute. As an example, the Infrastructure Investment and Jobs Act provides that SLFRF funds may be used to meet the non-federal match requirements of authorized Bureau of Reclamation projects and certain broadband deployment projects. Recipients should consult the final rule for further details if they seek to utilize SLFRF funds as a match for these projects.

   Treasury's final rule, program guidance, and the Uniform Guidance outline the types of costs that are allowable, including certain audit costs. For example, per 2 CFR 200.425, a reasonably proportionate share of the costs of audits required by the Single Audit Act Amendments of 1996 are allowable; however, costs for audits that were not performed in accordance with 2 CFR Part 200, Subpart F and the Compliance Supplement are not allowable. Please see 2 CFR Part 200, Subpart E regarding the Cost Principles for more information.

   a. Administrative costs: Recipients may use funds for administering the SLFRF program, including costs of consultants to support effective management and oversight, including consultation for ensuring compliance with legal, regulatory, and other requirements.[1] Further, costs must be reasonable and allocable as outlined in 2 CFR 200.404 and 2 CFR 200.405. Pursuant to the SLFRF Award Terms and Conditions, recipients are permitted to charge both direct and indirect costs to their SLFRF award as administrative costs as long as they are accorded consistent treatment per 2 CFR 200.403. Direct costs are those that are identified specifically as costs of implementing the SLFRF program objectives, such as

[1] Recipients also may use SLFRF funds directly for administrative costs to improve the design and execution of programs responding to the COVID-19 pandemic and to administer or improve the efficacy of programs addressing the public health emergency or its negative economic impacts. 31 CFR 35.6(b)(3)(ii)(E)(3).

contract support, materials, and supplies for a project. Indirect costs are general overhead costs of an organization where a portion of such costs are allocable to the SLFRF award such as the cost of facilities or administrative functions like a director's office.[23] Each category of cost should be treated consistently in like circumstances as direct or indirect, and recipients may not charge the same administrative costs to both direct and indirect cost categories, or to other programs. If a recipient has a current Negotiated Indirect Costs Rate Agreement ("NICRA") established with a Federal cognizant agency responsible for reviewing, negotiating, and approving cost allocation plans or indirect cost proposals, then the recipient may use its current NICRA. Alternatively, if the recipient does not have a NICRA, the recipient may elect to use the de minimis rate of 10 percent of the modified total direct costs pursuant to 2 CFR 200.414(f).

b. Salaries and Expenses: In general, certain employees' wages, salaries, and covered benefits are an eligible use of SLFRF award funds. Please see Treasury's final rule for details.

3. **Cash Management.** SLFRF payments made to recipients are not subject to the requirements of the Cash Management Improvement Act and Treasury's implementing regulations at 31 CFR Part 205 or 2 CFR 200.305(b)(8)-(9).

   As such, recipients can place funds in interest-bearing accounts, do not need to remit interest to Treasury, and are not limited to using that interest for eligible uses under the SLFRF award.

4. **Eligibility.** Under this program, recipients are responsible for ensuring funds are used for eligible purposes. Generally, recipients must develop and implement policies and procedures, and retain records, to determine and monitor implementation of criteria for determining the eligibility of beneficiaries and/or subrecipients. Your organization, and if applicable, the subrecipient(s) administering a program on behalf of your organization, will need to maintain procedures for obtaining information evidencing a given beneficiary, subrecipient, or contractor's eligibility, including a valid SAM.gov registration (except with respect to individuals or households for which a SAM.gov registration is not required). Implementing risk-based due diligence for eligibility determinations is a best practice to augment your organization's existing controls.

5. **Property Management.** Any purchase of real or personal property with SLFRF funds must be consistent with the Uniform Guidance at 2 CFR Part 200, Subpart D, unless stated otherwise by Treasury. For example, as outlined in Final Rule FAQ 13.15, only a subset of the Uniform Guidance requirements at 2 CFR Part 200 Subpart D (Post Federal Award Requirements) applies to recipients' use of funds in the revenue loss eligible use category. Furthermore, as outlined in Final Rule FAQ 13.16, Treasury has clarified the use and disposition requirements for real and personal property, supplies, and equipment purchased with SLFRF funds.

6. **Matching, Level of Effort, Earmarking.** There are no matching, level of effort, or earmarking compliance responsibilities associated with the SLFRF award. See Section C.1 (Eligible and Restricted Uses of SLFRF Funds) for a discussion of restrictions on use of SLFRF funds. Please see 2. Allowable Costs/Cost Principles above for information on the use of SLFRF funds for non-Federal match or cost-sharing requirements in other Federal programs.

7. **Period of Performance.** Your organization should also develop and implement internal controls related to activities occurring outside the period of performance. All funds remain subject to statutory and regulatory requirements that they must be used for costs incurred by the recipient during the period that begins on March 3, 2021, and ends on December 31, 2024, and that award funds for the financial obligations incurred by December 31, 2024 must be expended by December

[2] 2 CFR 200.413 Direct Costs.
[3] 2 CFR 200.414 Indirect Costs.

31, 2026. Any funds not used must be returned to Treasury as part of the award closeout process pursuant to 2 C.F.R. 200.344(d).

8. **Procurement, Suspension & Debarment.** Recipients are responsible for ensuring that any procurement using SLFRF funds, or payments under procurement contracts using such funds, are consistent with the procurement standards set forth in the Uniform Guidance at 2 CFR 200.317 through 2 CFR 200.327, unless stated otherwise by Treasury. As outlined in Final Rule FAQ 13.15, only a subset of the Uniform Guidance requirements at 2 CFR Part 200 Subpart D (Post Federal Award Requirements) applies to recipients' use of funds in the revenue loss eligible use category. The procurement standards set forth in the Uniform Guidance at 2 CRF 200.317 through 2 CRF 200.327 are not included in Final Rule FAQ 13.15's list of applicable Subpart D requirements that apply to recipients' use of funds in the revenue loss eligible use category.

   The Uniform Guidance establishes in 2 CFR 200.319 that all procurement transactions for property or services must be conducted in a manner providing full and open competition, consistent with standards outlined in 2 CFR 200.320, which allows for non-competitive procurements only in certain circumstances. Recipients must have and use documented procurement procedures that are consistent with the standards outlined in 2 CFR 200.317 through 2 CFR 200.320. The Uniform Guidance, pursuant to 2 CFR 180, requires an infrastructure for competitive bidding and contractor oversight, including maintaining written standards of conduct and prohibitions on dealing with suspended or debarred parties. Your organization must ensure adherence to all applicable local, State, and federal procurement laws and regulations.

9. **Program Income.** Generally, program income includes, but is not limited to, income from fees for services performed, the use or rental of real or personal property acquired under Federal awards, and principal and interest on loans made with Federal award funds. Program income does not include interest earned on advances of Federal funds, rebates, credits, discounts, or interest on rebates, credits, or discounts. Recipients of SLFRF funds should calculate, document, and record the organization's program income. Additional controls that your organization should implement include written policies that explicitly identify appropriate allocation methods, accounting standards and principles, compliance monitoring checks for program income calculations, and records.

   The Uniform Guidance outlines the requirements that pertain to program income at 2 CFR 200.307. Treasury has clarified in its Final Rule FAQs that recipients may add program income to the Federal award. Any program income generated from SLFRF funds must be used for the purposes and under the conditions of the Federal award. Further, Final Rule FAQ 4.9 provides additional information about program income requirements applicable to certain eligible uses, and Final Rule FAQ 13.15 clarifies that only a subset of the Uniform Guidance requirements at 2 CFR 200 Subpart D (Post Federal Award Requirements) applies to recipients' use of funds in the revenue loss eligible use category. The list of applicable Subpart D requirements in Final Rule FAQ 13.15 does not include the program income requirements in 2 CFR 200.307.

10. **Reporting.** All recipients of federal funds must complete financial, performance, and compliance reporting as required and outlined in Part 2 of this guidance. Expenditures may be reported on a cash or accrual basis, as long as the methodology is disclosed and consistently applied. Reporting must be consistent with the definition of expenditures pursuant to 2 CFR 200.1. Your organization should appropriately maintain accounting records for compiling and reporting accurate, compliant financial data, in accordance with appropriate accounting standards and principles.

    In addition, where appropriate, your organization needs to establish controls to ensure completion and timely submission of all mandatory performance and/or compliance reporting. See Part 2 of this guidance for a full overview of recipient reporting responsibilities.

    Consolidated jurisdictions or other types of jurisdictions that received multiple SLFRF allocations

(e.g., a county and city with a consolidated government) are only required to file once per reporting period, and such reports will cover the total SLFRF allocations received by the jurisdiction. This includes Non-entitlement units of local government ("NEUs") and/or Units of general local government located within counties that are not units of general local government. In addition, the total SLFRF allocations across all sources for a given jurisdiction will be used to identify that jurisdiction's Reporting Tier.

11. **Subrecipient Monitoring.** SLFRF recipients that are pass-through entities as described under 2 CFR 200.1 are required to manage and monitor their subrecipients to ensure compliance with requirements of the SLFRF award pursuant to 2 CFR 200.332 regarding requirements for pass-through entities.

    First, your organization must clearly identify to the subrecipient: (1) that the award is a subaward of SLFRF funds; (2) any and all compliance requirements for use of SLFRF funds; and (3) any and all reporting requirements for expenditures of SLFRF funds.

    Next, your organization will need to evaluate each subrecipient's risk of noncompliance based on a set of common factors. These risk assessments may include factors such as prior experience in managing Federal funds, previous audits, personnel, and policies or procedures for award execution and oversight. Ongoing monitoring of any given subrecipient should reflect its assessed risk and include monitoring, identification of deficiencies, and follow-up to ensure appropriate remediation.

    Accordingly, your organization should develop written policies and procedures for subrecipient monitoring and risk assessment and maintain records of all award agreements identifying or otherwise documenting subrecipients' compliance obligations.

    Recipients should note that NEUs are not subrecipients under the SLFRF program. They are SLFRF recipients that report directly to Treasury.

    Recipients should also note that subrecipients do not include individuals and organizations that received SLFRF funds as end users. Such individuals and organizations are beneficiaries and not subject to audit pursuant to the Single Audit Act and 2 C.F.R. Part 200, Subpart F.

    Many recipients may choose to provide a subaward or contract to other entities to provide services to other end users. For example, a recipient may provide a subaward to a nonprofit to provide homeless services to individuals experiencing homelessness. In this case, the subaward to a nonprofit is based on the services that the recipient intends to provide (assistance to households experiencing homelessness), and the nonprofit is serving as the subrecipient, providing services on behalf of the recipient. Subrecipients are subject to an audit pursuant to the Single Audit Act and 2 CFR part 200, subpart F regarding audit requirements, whereas contractors are not subject to an audit pursuant to the Single Audit Act and 2 CFR part 200, subpart F regarding audit requirements.

    Please note that as outlined in Final Rule FAQ 13.14, recipients' use of funds in the revenue loss eligible use category does not give rise to subrecipient relationships. As a result, subaward reporting is not required for projects in the revenue loss eligible use category.

12. **Special Tests and Provisions.** From time-to-time, Treasury may issue subregulatory guidance as well as frequently asked questions.

    Across each of the compliance requirements above, Treasury has described some best practices for development of internal controls in **Table 1** below, with an example of each best practice.

Table 1: Internal controls best practices

Best Practice	Description	Example
Written policies and procedures	Formal documentation of recipient policies and procedures	Documented procedure for determining worker eligibility for premium pay
Written standards of conduct	Formal statement of mission, values, principles, and professional standards	Documented code of conduct / ethics for subcontractors
Risk-based due diligence	Pre-payment validations conducted according to an assessed level of risk	Enhanced eligibility review of subrecipient with imperfect performance history
Risk-based compliance monitoring	Ongoing validations conducted according to an assessed level of risk	Higher degree of monitoring for projects that have a higher risk of fraud, given program characteristics
Record maintenance and retention	Creation and storage of financial and non-financial records.	Storage of all subrecipient payment information.

E. Award Terms and Conditions

The Award Terms and Conditions of the SLFRF financial assistance agreement sets forth the compliance obligations for recipients pursuant to the SLFRF statute, the Uniform Guidance, Treasury's final rule, and applicable federal laws and regulations. Recipients should ensure they remain in compliance with all Award Terms and Conditions. These obligations include the following items in addition to those described above:

1. **SAM.gov Requirements.** All eligible recipients are required to have an active registration with the System for Award Management ("SAM") (https://www.sam.gov) pursuant to 2 CFR Part 25. To ensure timely receipt of funding, Treasury has stated that NEUs who have not previously registered with SAM.gov may do so after receipt of the award, but before the submission of mandatory reporting.[4]

2. **Recordkeeping Requirements.** Generally, your organization must maintain records and financial documents for five years after all funds have been expended or returned to Treasury, as outlined in paragraph 4.c. of the Award Terms and Conditions. Treasury may request transfer of records of long-term value at the end of such period. Wherever practicable, such records should be collected, transmitted, and stored in open and machine-readable formats.

   Your organization must agree to provide or make available such records to Treasury upon request, and to the Government Accountability Office ("GAO"), Treasury's Office of Inspector General ("OIG"), and their authorized representative in order to conduct audits or other investigations.

3. **Single Audit Requirements.** Recipients and subrecipients that expend more than $750,000 in Federal awards during their fiscal year will be subject to an audit under the Single Audit Act and its implementing regulation at 2 CFR Part 200, Subpart F regarding audit requirements.[5] Note that the Compliance Supplement provides information on the existing, important compliance requirements that the federal government expects to be considered as a part of such audit. For example, the SLFRF Compliance Supplement describes an alternative to the Single Audit for

[4] See flexibility provided in https://www.whitehouse.gov/wp-content/uploads/2021/03/M_21_20.pdf.
[5] For-profit entities that receive SLFRF subawards are not subject to Single Audit requirements. However, they are subject to other audits as deemed necessary by authorized governmental entities, including Treasury and Treasury's OIG.

eligible recipients. Recipients should consult the Compliance Supplement for more information about the alternative compliance examination engagement. The Compliance Supplement is routinely updated, and is made available in the Federal Register and on OMB's website: https://www.whitehouse.gov/omb/office-federal-financial-management/ Recipients and subrecipients should consult the Federal Audit Clearinghouse to see examples of Single Audit submissions.

4. **Civil Rights Compliance**. Recipients of Federal financial assistance from the Treasury are required to meet legal requirements relating to nondiscrimination and nondiscriminatory use of Federal funds. Those requirements include ensuring that entities receiving Federal financial assistance from the Treasury do not deny benefits or services, or otherwise discriminate on the basis of race, color, national origin (including limited English proficiency), disability, age, or sex (including sexual orientation and gender identity), in accordance with the following authorities: Title VI of the Civil Rights Act of 1964 (Title VI) Public Law 88-352, 42 U.S.C. 2000d-1 et seq., and the Department's implementing regulations, 31 CFR part 22; Section 504 of the Rehabilitation Act of 1973 (Section 504), Public Law 93-112, as amended by Public Law 93-516, 29 U.S.C. 794; Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. 1681 et seq., and the Department's implementing regulations, 31 CFR part 28; Age Discrimination Act of 1975, Public Law 94-135, 42 U.S.C. 6101 et seq., and the Department implementing regulations at 31 CFR part 23.

   In order to carry out its enforcement responsibilities under Title VI of the Civil Rights Act, Treasury will collect and review information from recipients to ascertain their compliance with the applicable requirements before and after providing financial assistance. Treasury's implementing regulations, 31 CFR part 22, and the Department of Justice (DOJ) regulations, Coordination of Non-discrimination in Federally Assisted Programs, 28 CFR part 42, provide for the collection of data and information from recipients (see 28 CFR 42.406). Treasury may request that non-tribal recipients submit data for post-award compliance reviews, including information such as a narrative describing their Title VI compliance status. As explained in Treasury FAQ 12.1, the award terms and conditions for Treasury's pandemic recovery programs, including the SLFRF program, do not impose antidiscrimination requirements on Tribal governments beyond what would otherwise apply under federal law.

Part 2: Reporting Guidance

There are three types of reporting requirements for the SLFRF program. The report requirements are approved and documented under OMB PRA number - OMB # 1505-0271.

- **Interim Report:** Provide initial overview of status and uses of funding. This is a one-time report. **See Section A, page 16.**

- **Project and Expenditure Report:** Report on projects funded, expenditures, and contracts and subawards equal to or greater than $50,000, and other information. **See Section B, page 17.**

- **Recovery Plan Performance Report:** The Recovery Plan Performance Report (the "Recovery Plan") will provide information on the projects that large recipients are undertaking with program funding and how they plan to ensure program outcomes are achieved in an effective, efficient, and equitable manner. It will include key performance indicators identified by the recipient and some mandatory indicators identified by Treasury. The Recovery Plan will be posted on the website of the recipient as well as provided to Treasury. **See Section C, page 28.**

The reporting threshold is based on the total award amount allocated by Treasury under the SLFRF program, not the funds received by the recipient as of the time of reporting.

States and territories are also required to submit information on their distributions to NEUs. Please refer to Section D for additional details.

Table 2: Reporting requirements by recipient type

Tier	Recipient	Interim Report	Project and Expenditure Report	Recovery Plan Performance Report
1	States, U.S. territories, metropolitan cities and counties with a population that exceeds 250,000 residents	By August 31, 2021 or 60 days after receiving funding if funding was received by October 15, with expenditures by category. *Note: NEUs were not required to submit an Interim Report*	By January 31, 2022, and then the last day of the month after the end of each quarter thereafter *Note: NEUs were not required to submit a Project and Expenditure Report on January 31, 2022. The first reporting date for NEUs was April 30, 2022.*	By August 31, 2021 or 60 days after receiving funding, and annually thereafter by July 31
2	Metropolitan cities and counties with a population below 250,000 residents that are allocated more than $10 million in SLFRF funding, and NEUs that are allocated more than $10 million in SLFRF funding			
3	Tribal Governments that are allocated more than $30 million in SLFRF funding			
4	Tribal Governments that are allocated less than $30 million in SLFRF funding		By April 30, 2022, and then annually thereafter	
5	Metropolitan cities and counties with a population below 250,000 residents that are allocated less than $10 million in SLFRF funding, and NEUs that are allocated less than $10 million in SLFRF funding			

Note: Based on the period of performance, reports will be collected through April 30, 2027. See the specific due dates listed in Sections B and C.

As mentioned above, the total SLFRF allocations across all sources for a given jurisdiction will be used to identify that jurisdiction's Reporting Tier, beginning in April of 2022. Treasury may reach out to jurisdictions to update Reporting Tiers.

The remainder of this document describes these reporting requirements. User guides describing how and where to submit required reports are posted at www.treasury.gov/SLFRPReporting and updated on a regular basis.

Comparison to reporting for the CRF

This guidance does not change the reporting or compliance requirements pertaining to the CRF. Reporting and compliance requirements for the SLFRF are separate from CRF reporting requirements. Differences between CRF and SLFRF include:

- **Project, Expenditure, and Subaward Reporting**: The SLFRF reporting requirements leverage the existing reporting regime used for CRF to foster continuity and provide many recipients with a familiar reporting mechanism. The data elements for the Project and Expenditure Report will largely mirror those used for CRF, with some minor exceptions noted in this guidance. The users' guide will describe how reporting for CRF funds will relate to reporting for the SLFRF.
- **Timing of Reports**: CRF reports were due within 10 days of each calendar quarter end. For quarterly reporters, SLFRF reporting will be due the last day of the month following the end of the period covered. For annual reporters, SLFRF reporting will be due on an annual schedule (see table in Section B below).
- **Program and Performance Reporting**: The CRF reporting did not include any program or performance reporting. To build public awareness and accountability and allow Treasury to monitor compliance with eligible uses, some program and performance reporting is required for SLFRF.

A. Interim Report

Note: The Interim Reports were submitted under the interim final rule.

States, U.S. territories, metropolitan cities, counties, and Tribal governments were required to submit a one-time interim report with expenditures[6] by Expenditure Category covering the period from March 3rd to July 31, 2021, by August 31, 2021 or sixty (60) days after first receiving funding if the recipient's date of award was between July 15, 2021 and October 15, 2021. The recipient was required to enter obligations[7] and expenditures and, for each, select the specific expenditure category from the available options. See Appendix 3 for Expenditure Categories applicable for the Interim Report.

1. Required Programmatic Data

Recipients were also required to provide the following information if they had or planned to have expenditures in the following Expenditure Categories.

a. Revenue replacement (EC 6.1[8]): Key inputs into the revenue replacement formula in the Interim Final Rule and estimated revenue loss due to the Covid-19 public health emergency calculated using the formula in the Interim Final Rule as of December 31, 2020.
- Base year general revenue (e.g., revenue in the last full fiscal year prior to the public health emergency)
- Fiscal year end date
- Growth adjustment used (either 4.1 percent or average annual general revenue growth over 3 years prior to pandemic)
- Actual general revenue as of the twelve months ended December 31, 2020

[6] For purposes of reporting in the SLFRF portal, an expenditure is the amount that has been incurred as a liability of the entity (the service has been rendered or the good has been delivered to the entity).
[7] For purposes of reporting in the SLFRF portal, an obligation is an order placed for property and services, contracts and subawards made, and similar transactions that require payment.
[8] See Appendix 3 for the full Expenditure Category (EC) list. Please note that Appendix 3 includes the expenditure categories under the interim final rule, applicable to the Interim Report.

- Estimated revenue loss due to the Covid-19 public health emergency as of December 31, 2020
- An explanation of how revenue replacement funds were allocated to government services (Note: additional instructions was provided in the user guide)

In calculating general revenue and the other items discussed above, recipients should have used audited data if it was available. When audited data was not available, recipients were not required to obtain audited data if substantially accurate figures could be produced on an unaudited basis. Recipients should have used their own data sources to calculate general revenue and did not need to rely on revenue data published by the Census Bureau. Treasury acknowledges that due to differences in timing, data sources, and definitions, recipients' self-reported general revenue figures may differ from those published by the Census Bureau. Recipients were permitted to provide data on a cash, accrual, or modified accrual basis, provided that recipients are consistent in their choice of methodology throughout the covered period and until reporting is no longer required. Recipients' reporting should align with their own financial reporting.

In calculating general revenue, recipients should have excluded all intergovernmental transfers from the federal government. This includes, but is not limited to, federal transfers made via a State to a locality pursuant to the CRF or SLFRF. To the extent federal funds are passed through States or other entities or intermingled with other funds, recipients should have attempted to identify and exclude the federal portion of those funds from the calculation of general revenue on a best-efforts basis.

Consistent with the broad latitude provided to recipients to use funds for government services to the extent of reduction in revenue, recipients were required to submit a description of services provided. This description may be in narrative or in another form, and recipients were encouraged to report based on their existing budget processes and to minimize administrative burden. For example, a recipient with $100 in revenue replacement funds available could indicate that $50 were used for law enforcement operating expenses and $50 were used for pay-go building of sidewalk infrastructure. As discussed in the interim final rule, these services can include a broad range of services but may not be used directly for pension deposits or debt service.

Reporting requirements did not require tracking the indirect effects of Fiscal Recovery Funds, apart from the restrictions on use of Fiscal Recovery Funds to offset a reduction in net tax revenue. In addition, recipients were required to indicate that Fiscal Recovery Funds were not used to make a deposit in a pension fund.

B. Project and Expenditure Report

All recipients are required to submit Project and Expenditure Reports.

Note on NEUs: To facilitate reporting, each NEU will need an NEU Recipient Number. This is a unique identification code for each NEU assigned by the State or territory to the NEU as part of its request for funding.

1. Quarterly Reporting

The following recipients are required to submit quarterly Project and Expenditure Reports:

- States and U.S. territories
- Tribal governments that are allocated more than $30 million in SLFRF funding
- Metropolitan cities and counties with a population that exceeds 250,000 residents

- Metropolitan cities and counties with a population below 250,000 residents that are allocated more than $10 million in SLFRF funding and NEUs that are allocated more than $10 million in SLFRF funding.

For these recipients, the initial quarterly Project and Expenditure Report covers three calendar quarters from March 3, 2021 to December 31, 2021 and was required to be submitted to Treasury by January 31, 2022. The subsequent quarterly reports will cover one calendar quarter and must be submitted to Treasury by the last day of the month following the end of the period covered. Quarterly reports are not due concurrently with applicable annual reports. **Table 3** summarizes the quarterly report timelines:

Table 3: Quarterly Project and Expenditure Report Timeline

Report	Year	Quarter	Period Covered	Due Date
1	2021	2 – 4	March 3 – December 31	January 31, 2022
2	2022	1	January 1 – March 31	April 30, 2022
3	2022	2	April 1 – June 30	July 31, 2022
4	2022	3	July 1 – September 30	October 31, 2022
5	2022	4	October 1 – December 31	January 31, 2023
6	2023	1	January 1 – March 31	April 30, 2023
7	2023	2	April 1 – June 30	July 31, 2023
8	2023	3	July 1 – September 30	October 31, 2023
9	2023	4	October 1 – December 31	January 31, 2024
10	2024	1	January 1 – March 31	April 30, 2024
11	2024	2	April 1 – June 30	July 31, 2024
12	2024	3	July 1 – September 30	October 31, 2024
13	2024	4	October 1 – December 31	January 31, 2025
14	2025	1	January 1 – March 31	April 30, 2025
15	2025	2	April 1 – June 30	July 31, 2025
16	2025	3	July 1 – September 30	October 31, 2025
17	2025	4	October 1 – December 31	January 31, 2026
18	2026	1	January 1 – March 31	April 30, 2026
19	2026	2	April 1 – June 30	July 31, 2026
20	2026	3	July 1 – September 30	October 31, 2026
21	2026	4	October 1 – December 31	April 30, 2027

2. Annual Reporting

The following recipients are required to submit annual Project and Expenditure Reports:

- Tribal governments that are allocated less than $30 million in SLFRF funding
- Metropolitan cities and counties with a population below 250,000 residents that are allocated less than $10 million in SLFRF funding and NEUs that are allocated less than $10 million in SLFRF funding.

For these recipients, the initial Project and Expenditure Report covered from March 3, 2021 to March 31, 2022 and was required to be submitted to Treasury by April 30, 2022. The subsequent annual reports will cover one calendar year and must be submitted to Treasury by April 30. **Table 4** summarizes the annual report timelines:

Table 4: Annual Project and Expenditure Report timeline

Report	Period Covered	Due Date
1	March 3, 2021 – March 31, 2022	April 30, 2022
2	April 1, 2022 – March 31, 2023	April 30, 2023
3	April 1, 2023 – March 31, 2024	April 30, 2024
4	April 1, 2024 – March 31, 2025	April 30, 2025
5	April 1, 2025 – March 31, 2026	April 30, 2026
6	April 1, 2026 – December 31, 2026	April 30, 2027

3. Required Information

The following information is required in Project and Expenditure Reports for both quarterly and annual reporting:

a. Projects: Provide information on all SLFRF funded projects. Projects are defined as a grouping of closely related activities that together are intended to achieve a specific goal or are directed toward a common purpose. These activities can include new or existing eligible government services or investments funded in whole or in part by SLFRF funding. For each project, the recipient is required to enter the project name, identification number (created by the recipient), project expenditure category (see Appendix 1), description, and status of completion. Project descriptions must describe the project in sufficient detail to provide an understanding of the major activities that will occur, and must be between 50 and 250 words. Projects should be defined to include only closely related activities directed toward a common purpose. Recipients should review the Required Programmatic Data described in 3.g. below and define their projects at a sufficient level of granularity.

   Note: For each project, the recipient is asked to select the appropriate Expenditure Category based on the scope of the project (see Appendix 1). Projects should be scoped to align to a single Expenditure Category. For select Expenditure Categories, the recipient also is asked to provide additional programmatic data (described further below).

b. Obligations and Expenditures: Once a project is entered the recipient will be able to report on the project's obligations and expenditures. Recipients will be asked to report:
   - Current period obligation
   - Cumulative obligation
   - Current period expenditure
   - Cumulative expenditure

c. Project Status: Once a project is entered the recipient will be asked to report on project status each reporting period, in four categories:
   - Not Started
   - Completed less than 50 percent
   - Completed 50 percent or more
   - Completed

d. Program Income: Recipients should report the program income earned and expended to cover eligible project costs, if applicable.

e. Adopted Budget *(States, U.S. territories, metropolitan cities and counties with a population that exceeds 250,000 residents only)*: Each state, territory and metropolitan city and county with a population that exceeds 250,000 residents will provide the budget adopted for each project by its jurisdiction associated with SLFRF funds. Treasury will use this information to better understand the intended impact, identify opportunities for outreach, and understand the recipient's progress in program implementation. Treasury is not approving or pre-approving projects or budgets.

- Recipients will enter the Adopted Budget based on information that exists currently in the recipient's financial systems and the recipient's established budget process. Treasury understands that recipients may use different budget processes. For example, a recipient may consider a project budgeted once a legislature has appropriated funds; whereas another recipient may consider a project budgeted at the moment when the funds have been obligated.
- Additional information is provided on the differences between Adopted Budget, Obligations, and Expenditures as part of the user guide posted at www.treasury.gov/SLFRPReporting.

f. Project Demographic Distribution (applicable to Public Health and Negative Economic Impact ECs: EC 1.1-2.37)– *Collection began April 2022*

Recognizing the disproportionate public health and negative economic impacts of the pandemic on many households, communities, and other entities, recipients must report whether certain types of projects are targeted to impacted and disproportionately impacted communities. Recipients will be asked to respond to the following:

a. What Impacted and/or Disproportionally Impacted population does this project primarily serve? Please select the population primarily served.
b. If this project primarily serves more than one Impacted and/or Disproportionately Impacted population, please select up to two additional populations served.

Recipients will select from the following options:

	Impacted	Disproportionately Impacted
Public Health	• General Public	
Assistance to Households	• Low- or-moderate income households or populations[9] • Households that experienced unemployment • Households that experienced increased food or housing insecurity • Households that qualify for certain federal programs[10] • For services to address lost instructional time in K-12 schools: any students that lost access to in-person instruction for a significant period of time	• Low-income households and populations[11] • Households and populations residing in Qualified Census Tracts • Households that qualify for certain federal programs[12] • Households receiving services provided by Tribal governments • Households residing in the U.S. territories or receiving services from these governments

[9] Low or moderate-income households and communities are those with (i) income at or below 300 percent of the Federal Poverty Guidelines for the size of the household based on the most recently published poverty guidelines by the Department of Health and Human Services (HHS) or (ii) income at or below 65 percent of the Area Median Income for the county and size of household based on the most recently published data by the Department of Housing and Urban Development (HUD).

[10] For Impacted households, these programs are Children's Health Insurance Program ("CHIP"); Childcare Subsidies through the Child Care and Development Fund ("CCDF") Program; Medicaid; National Housing Trust Fund ("HTF"), for affordable housing programs only; Home Investment Partnerships Program ("HOME"), for affordable housing programs only.

[11] Low-income households and communities are those with (i) income at or below 185 percent of the Federal Poverty Guidelines for the size of the household based on the most recently published poverty guidelines by HHS or (ii) income at or below 40 percent of Area Median Income for its county and size of household based on the most recently published data by HUD.

[12] For Disproportionately Impacted households, these programs are Temporary Assistance for Needy Families ("TANF"), Supplemental Nutrition Assistance Program ("SNAP"), Free- and Reduced-Price Lunch ("NSLP") and/or School Breakfast ("SBP") programs, Medicare Part D Low-Income Subsidies, Supplemental Security Income ("SSI"), Head Start, Special Supplemental Nutrition Program for Women, Infants, and Children ("WIC"), Section 8 Vouchers, Low-Income Home Energy Assistance Program ("LIHEAP"), and Pell Grants.

	Impacted	Disproportionately Impacted
	• Other households or populations that experienced a negative economic impact of the pandemic other than those listed above (please specify)	• For services to address educational disparities, Title I eligible schools[13] • Other households or populations that experienced a disproportionate negative economic impact of the pandemic other than those listed above (please specify)
Assistance to Small Businesses	• Small businesses that experienced a negative economic impact of the pandemic • Classes of small businesses designated as negatively economically impacted by the pandemic (please specify)	• Small businesses operating in Qualified Census Tracts • Small businesses operated by Tribal governments or on Tribal lands • Small businesses operating in the U.S. territories • Other small businesses disproportionately impacted by the pandemic (please specify)
Assistance to Non-Profits	• Non-profits that experienced a negative economic impact of the pandemic (please specify) • Classes of non-profits designated as negatively economically impacted by the pandemic (please specify)	• Non-profits operating in Qualified Census Tracts • Non-profits operated by Tribal governments or on Tribal lands • Non-profits operating in the U.S. territories • Other non-profits disproportionately impacted by the pandemic (please specify)
Aid to Impacted Industries	• Travel, tourism, or hospitality sectors (including Tribal development districts) • Industry outside the travel, tourism, or hospitality sectors that experienced a negative economic impact of the pandemic (please specify)	N/A

g. Subawards, Contracts, Grants, Loans, Transfers, and Direct Payments: Each recipient shall also provide detailed obligation and expenditure information for any contracts and grants awarded, loans issued, transfers made to other government entities, and direct payments made by the recipient that are equal to or greater than $50,000. As noted in Treasury's Project & Expenditure User Guides, subaward reporting for funds spent under the revenue loss eligible use category has not been required in past reporting periods. Please note that as outlined in Final Rule FAQ 13.14, Treasury is not collecting subaward data for projects categorized under the revenue loss eligible use category.

Recipients do not need to submit separate monthly subaward reports to FSRS.gov as required pursuant to the 2 CFR Part 170, Appendix A award term regarding reporting subaward and executive compensation, which is included in the SLFRF Award Terms and Conditions. Treasury

[13] For educational services and other efforts to address educational disparities, Treasury will recognize Title I eligible schools as disproportionately impacted and responsive services that support the school generally or support the whole school service as eligible. "Title I eligible schools" means schools eligible to receive services under section 1113 of Title I, Part A of the Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 6313), including schools served under section 1113(b)(1)(C) of that Act.

will submit this reporting on behalf of recipients using the $50,000 reporting threshold, timing, and data elements discussed in this guidance. If recipients choose to continue reporting to FSRS.gov in addition to reporting directly to Treasury on these funds, they may do so and will be asked to notify Treasury as part of their quarterly submission.

In general, recipients will be asked to provide the following information for each Contract, Grant, Loan, Transfer, or Direct Payment equal to or greater than $50,000:

- Subrecipient identifying and demographic information (e.g., UEI/TIN number and location)
- Award number (e.g., Award number, Contract number, Loan number)
- Award date, type, amount, and description
- Award payment method (reimbursable or lump sum payment(s))
- For loans, expiration date (date when loan expected to be paid in full)
- Primary place of performance
- Related project name(s)
- Related project identification number(s) (created by the recipient)
- Period of performance start date
- Period of performance end date
- Quarterly obligation amount
- Quarterly expenditure amount
- Project(s)
- Additional programmatic performance indicators for select Expenditure Categories (see below)

Aggregate reporting is required for contracts, grants, transfers made to other government entities, loans, and direct payments that are below $50,000. This information will be accounted for by Expenditure Category at the project level. Note that all obligations and expenditures made directly to individuals, regardless of dollar amount, should be included in aggregate reporting.

As required by the 2 CFR Part 170, Appendix A award term regarding reporting subaward and executive compensation, recipients must also report the names and total compensation of their five most highly compensated executives and their subrecipients' executives for the preceding completed fiscal year if (1) the recipient received 80 percent or more of its annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act, as provided by 2 CFR 170.320 (and subawards), and received $25,000,000 or more in annual gross revenues from Federal procurement contracts (and subcontracts) and Federal financial assistance subject to the Transparency Act (and subawards), and (2) if the information is not otherwise public. In general, most SLFRF recipients are governmental entities with executive salaries that are already disclosed, so no additional information would be required to be reported for them. The recipient is responsible for the subrecipients' compliance with registering and maintaining an updated profile on SAM.gov.

h. Civil Rights Compliance: Treasury will request information on recipients' compliance with Title VI of the Civil Rights Act of 1964, as applicable, on an annual basis. This information may include a narrative describing the recipient's compliance with Title VI, along with other questions and assurances. This collection does not apply to Tribal governments[14]

i. Ineligible Activities: Tax Offset Provision (States and territories only): Section 602(c)(2)(A) of the Social Security Act prohibits a State or territory from using SLFRF funds to directly or indirectly offset a reduction in the net tax revenue of the State or territory resulting from a change in law, regulation, or administrative interpretation during the covered period (the "Tax Offset Provision"). The Final Rule implements the Tax Offset Provision at 31 CFR § 35.8. Violations of the Tax

[14] Please note, as explained in Treasury FAQ 12.1, that the award terms and conditions for Treasury's pandemic recovery programs, including the SLFRF, do not impose antidiscrimination requirements on Tribal governments beyond what would otherwise apply under federal law.

Offset Provision may be subject to recoupment. The following information is required for Treasury to ensure SLFRF funding is not used for ineligible activities related to the Tax Offset Provision.

For each reporting year, in the quarterly reporting cycle occurring 90 days after the end of the recipient's fiscal year, States and territories will report certain items related to the Tax Offset Provision, as detailed below. For example, if a recipient's fiscal year ends June 30, 2022, reporting on the Tax Offset Provision for fiscal year 2022 will be due in October 2022. All States and territories reported on the Tax Offset Provision for fiscal year 2021 in July 2022.

As indicated in the final rule, Treasury is implementing a tiered approach to reporting on the Tax Offset Provision, which is described below. Although Treasury is implementing a tiered approach to reporting, recipients should maintain records to support their compliance with the Tax Offset Provision.

The terms "reporting year," "baseline," "covered change," "covered period," "net reduction in total spending," and "tax revenue" are defined in the Final Rule, 31 CFR § 35.3. For purposes of calculating a net reduction in total spending, total spending for the fiscal year ending 2019 should be reported on an inflation-adjusted basis, consistent with the Final Rule. Similarly, for purposes of calculating baseline tax revenue, tax revenue for the fiscal year 2019 should be reported on an inflation-adjusted basis, consistent with the Final Rule.

For purposes of reporting actual tax revenue for the requested fiscal year and baseline tax revenue for the fiscal year ending 2019,[15] (a) if available, recipients should report information using audited financials and (b) recipients may provide data on a cash, accrual, or modified accrual basis, but must be consistent in their approach across all reporting periods. Similarly, for purposes of calculating a net reduction in total spending, recipients should report data using audited financials where available.

Recipients will first answer a series of summary questions to determine the tiering of their tax offset reporting:

Summary Questions

- Do you have revenue-reducing covered change(s) to report for the requested fiscal year and for future fiscal years? Yes/No
    - If no, recipients have no further reporting requirements in the tax offset section. (Remaining summary questions will be greyed out).
    - If yes, recipients will complete part 1 and additional fields.
- Is the aggregate value of your revenue-reducing covered change(s) for the requested fiscal year less than the de minimis? Yes/No.
    - If yes, recipients will complete parts 1 and 2, and no further reporting is required in the tax offset section. (Remaining summary questions will be greyed out).
    - If no, recipients will complete parts 1, 2 and additional fields.
- Do you have a reduction in net tax revenue for the requested fiscal year, meaning that actual tax revenue for the requested fiscal year is less than baseline tax revenue? Yes/No.
    - If yes, recipients will complete parts 1, 2, and 3 and additional fields.
    - If no, recipients will complete parts 1, 2, and 3, and no further reporting is required in the tax offset section. (Remaining summary questions will be greyed out).
- Do you have revenue-increasing covered change(s) and/or covered spending cuts to report for the requested fiscal year? Yes/No
    - If yes, recipients will complete parts 1, 2, 3, and 4.
    - If no, recipients will complete the revenue reduction cap.

Reporting Part 1: Revenue-reducing Covered Changes

[15] Tax revenue for fiscal year ending 2019 is relevant for calculating the recipient's baseline.

- Do you have revenue-reducing covered change(s) to report for the requested fiscal year and for future fiscal years? Yes/No
    - If yes, complete grid or upload spreadsheet with the name of each revenue-reducing covered change and the value of the revenue-reducing covered change for the requested fiscal year and for future fiscal years.
    - If no, a recipient has no revenue-reducing covered changes to report, no additional reporting is required.
- Enter in the aggregate value of all revenue-reducing covered change(s) for the requested fiscal year.[16]

Revenue-reducing Covered Changes: Guidance
For each reporting year, a recipient must report the value of covered changes that the recipient predicts will have the effect of reducing tax revenue in a given reporting year (revenue-reducing covered changes), similar to the way it would in the ordinary course of its budgeting process. The value of these revenue-reducing covered changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, that aligns with the recipient government's existing approach for measuring the effects of fiscal policies, and that measures relative to a current law baseline. The revenue-reducing covered changes may also be reported based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the covered change(s), relative to the current law baseline prior to the change(s). Estimation approaches should not use dynamic methodologies that incorporate the projected effects of the policies on macroeconomic growth. In general and where possible, reported values should be produced by the agency of the recipient government responsible for estimating the costs and effects of fiscal policy changes. Recipients must maintain records regarding the identification and predicted effects of revenue-reducing covered changes.

Reporting Part 2: Baseline Revenue and De Minimis Threshold

- Enter Baseline Revenue:
- Enter in the aggregate value of the revenue-reducing covered change(s) for the requested fiscal year as a percentage of baseline revenue:
- Is the aggregate value of the revenue-reducing covered change(s) for the requested fiscal year less than one percent of baseline revenue? Y/N
    - If yes, a recipient's aggregate value of the revenue-reducing covered changes in the reporting year is less than the *de minimis threshold*, and no additional reporting is required.

Baseline Revenue: Guidance
Baseline has the meaning defined in the Final Rule, 31 CFR 35.3.

Recipients must determine whether the aggregate value of the revenue-reducing covered changes in the reporting year is less than one percent of baseline revenue (the de minimis threshold).

Reporting Part 3: Actual Tax Revenue and Reduction in Net Tax Revenue

- Enter Actual Tax Revenue for the requested fiscal year:
- Enter Reduction in Net Tax Revenue: baseline revenue minus actual tax revenue

[16] The final rule defines covered change. "Covered change means a change in law, regulation, or administrative interpretation that reduces any tax (by providing for a reduction in a rate, a rebate, a deduction, a credit, or otherwise) or delays the imposition of any tax or tax increase. A change in law includes any final legislative or regulatory action, a new or changed administrative interpretation, and the phase-in or taking effect of any statute or rule if the phase-in or taking effect was not prescribed prior to the start of the covered period."

- If the value of the reduction in net tax revenue is zero or negative (meaning that actual tax revenue is equal to or greater than baseline revenue), no additional reporting is required.

Actual Tax Revenue: Guidance
Actual tax revenue means the tax revenue received by the recipient government in the reporting year. Tax revenue has the meaning defined in the Final Rule, 31 CFR 35.3.

Reduction in Net Tax Revenue: Guidance
The reduction in net tax revenue is equal to baseline revenue minus actual tax revenue in each reporting year. If this value is zero or negative, there is no reduction in net tax revenue.

Reporting Part 4: Revenue-increasing Covered Changes and Covered Spending Cuts

- Do you have revenue-increasing covered change(s) and/or covered spending cuts to report for the requested fiscal year? Yes/No.
- If yes, complete grid or upload spreadsheet with the name of each revenue-increasing covered change and the value.
- Enter in the aggregate value of revenue-increasing covered change(s):

- Enter net reduction in total spending for the requested fiscal year:
- Complete grid or upload spreadsheet of specific spending cuts and the corresponding "reporting unit", including the name of the reporting unit, description of the spending cut, the amount of the reduction in spending in the reporting unit for the reporting year relative to its inflation-adjusted FY 2019 level, the amount of any Fiscal Recovery Funds spent in the reporting unit in the reporting year, and the amount by which the reduction in spending in the reporting unit in the reporting year exceeds the Fiscal Recovery Funds spent in the reporting unit in the reporting year, if at all.
- Enter the aggregate value of covered spending cuts.

- Enter the aggregate value of revenue-increasing covered changes + the aggregate value of covered spending cuts.
- Enter the total value of revenue-reducing covered changes minus the total of (aggregate value of revenue-increasing covered changes + aggregate value of covered spending cuts).
- Is the aggregate value of revenue-reducing covered changes minus the total of (aggregate value of revenue-increasing changes + aggregate value of covered spending cuts) negative or equal to zero? (Yes/No)
    - If yes, recipients have no further reporting requirements related to the Tax Offset Provision.
    - If no, recipients must move on to the calculation of the revenue reduction cap.

Revenue-increasing covered changes: Guidance
If a recipient has revenue-reducing covered changes, the aggregate value of which exceed the de minimis threshold, and its actual tax revenue does not exceed baseline tax revenue, a recipient must report the value of covered changes that have had or that the recipient predicts will have the effect of increasing tax revenue in a given reporting year (revenue-increasing covered changes), similar to the way it would in the ordinary course of its budgeting process. The value of these revenue-increasing covered changes may be reported based on estimated values produced by a budget model, incorporating reasonable assumptions, that aligns with the recipient's existing approach for measuring the effects of fiscal policies, and that measures relative to a current law baseline. The revenue-increasing covered changes may also be reported based on actual values using a statistical methodology to isolate the change in year-over-year revenue attributable to the revenue-increasing covered change(s), relative to the current law baseline prior to the change(s). Estimation approaches should not use dynamic methodologies that incorporate the projected effects of the policies on macroeconomic growth.

In general and where possible, reporting should be produced by the agency of the recipient responsible for estimating the costs and effects of fiscal policy changes. Recipients should maintain records regarding revenue-increasing covered changes and estimates of such changes.

Net reduction in total spending, and tables of specific spending cuts: Guidance
Recipients may cut spending in certain areas to pay for revenue-reducing covered changes, up to the amount of the recipient's net reduction in total spending. To calculate the amount of spending cuts that are available to offset a reduction in tax revenue, the recipient must first consider whether there has been a reduction in total net spending, excluding Fiscal Recovery Funds (net reduction in total spending). As defined in the Final Rule, 35 CFR 35.3, net reduction in total spending is measured as the recipient government's total spending for a given reporting year excluding Fiscal Recovery Funds, subtracted from its total spending for its fiscal year ending in 2019, adjusted for inflation using the Bureau of Economic Analysis's Implicit Price Deflator for the gross domestic product of the United States for that reporting year. If that calculation yields a positive value, there has been a net reduction in total spending; if it yields zero or a negative value, there has not been a net reduction in total spending. If there has been no net reduction in total spending, a recipient will have no spending cuts to offset a reduction in net tax revenue.

Next, a recipient must determine and aggregate the value of spending cuts in each "reporting unit." "Reporting units" are departments, agencies, or authorities of the recipient's government. For each reporting unit, the recipient must report (1) the amount of the reduction in spending in the reporting unit for the reporting year relative to its inflation-adjusted FY 2019 level, (2) the amount of any Fiscal Recovery Funds spent in the reporting unit in the reporting year, and (3) the amount by which the reduction in spending in the reporting year exceeds the Fiscal Recovery funds spent in the reporting unit in the reporting year. If a recipient has not spent amounts received from the Fiscal Recovery Funds in a reporting unit, the full amount of the reduction in spending counts as a covered spending cut and may be included in the aggregate value of spending cuts. If the recipient has spent amounts received from the Fiscal Recovery Funds, such amounts generally would be deemed to have replaced the amount of spending cut, and only reductions in spending above the amount of Fiscal Recovery Funds spent on the reporting unit would be eligible to offset a reduction in net tax revenue. Only such amounts above the amount of Fiscal Recovery Funds spent on the reporting unit should be included in the aggregate value of spending cuts.

To align with existing reporting and accounting, the Final Rule considers the department, agency, or authority from which spending has been cut and whether the recipient government has spent amounts received from the Fiscal Recovery Funds on that same department, agency, or authority. Some commenters on the interim final rule argued that the methodology for identifying offsetting spending cuts at the department, agency, or authority level was too restrictive, but as discussed in the final rule, Treasury maintained the approach of requiring this reporting at the department, agency, or authority level. Recipients are encouraged to define reporting units in a manner consistent with their existing budget process and should, to the extent possible, report using the same reporting unit in each reporting year. Spending cuts must be reported relative to FY 2019 spending levels, adjusted for inflation, and excluding Fiscal Recovery Funds from reporting year spending levels.

Recipients should maintain records regarding spending cuts.

Reporting Part 5: Revenue Reduction Cap
The "revenue reduction cap," together with Part 3, ensures that recipient governments can use organic revenue growth to offset the cost of revenue-reducing covered changes. If, based on the calculations completed so far, a recipient has not yet demonstrated how its revenue-reducing

covered changes were offset by non-SLFRF sources, the reporting portal will auto-calculate the revenue reduction cap, which will be the lesser of the following two amounts:

- Reduction in Net Tax Revenue (baseline tax revenue minus actual tax revenue) [pre-populated from Part 3] and
- Aggregate Value of revenue-reducing covered changes minus (total of (aggregate value of revenue-increasing changes + aggregate value of covered spending cuts) [pre-populated from Part 4].

j. Required Programmatic Data (other than infrastructure projects): For all projects listed under the following Expenditure Categories (see Appendix 1), the information listed must be provided in each report.

1. Public Health and Negative Economic Impact (EC 1.1-3.5) - *Collection began in April 2022*
   - Brief description of structure and objectives of assistance program(s), including public health or negative economic impact experienced
   - Brief description of how a recipient's response is related and reasonably proportional to a public health or negative economic impact of COVID-19.[17]

     Note: The final rule presumes that all enumerated eligible uses for programs and services, including COVID-19 mitigation and prevention programs and services, are reasonably proportional responses to the harm identified unless a response is grossly disproportionate to the type or extent of harm experienced. Many of the Eligibility Categories encompass multiple specific enumerated eligible uses and may be provided to a variety of populations. For example, EC 2.13 *Healthy Childhood Environments: Services to Foster Youth or Families Involved in Child Welfare System* includes a wide array of financial, educational, child development, or health supports, or other supports necessary, including supports for kinship care, and may be provided to foster youth and/or families involved in the child welfare system. Between these two fields above, recipients should provide enough information to identify the type of enumerated eligible use being provided within the EC (e.g., kinship care support services), the public health or economic impact experienced, who the program and/or service is being provided to, and what services are being provided (e.g., respite resources). For enumerated eligible uses, recipients are not required to provide substantive documentation that the response is related and reasonably proportional in the Project and Expenditure Report.

2. Capital Expenditures (EC 1.1-3.5) - *Collection began in January 2022, with additional fields required starting in July 2022*
   - Does this project include a capital expenditure? *(Collection began in January 2022)*
   - Total expected capital expenditure, including pre-development costs, if applicable *(Collection began in January 2022)*
   - Type of capital expenditure, based on the following enumerated uses (*Collection began in July 2022*):
     - COVID-19 testing sites and laboratories, and acquisition of related equipment
     - COVID-19 vaccination sites
     - Medical facilities generally dedicated to COVID-19 treatment and mitigation (e.g., emergency rooms, intensive care units, telemedicine capabilities for COVID-19 related treatment)
     - Temporary medical facilities and other measures to increase COVID-19 treatment capacity, including related construction costs
     - Acquisition of equipment for COVID-19 prevention and treatment, including ventilators, ambulances, and other medical or emergency services equipment

[17] Please note that capital expenditures are not considered "programs and services" and are not presumed to be reasonably proportional responses to an identified harm except as provided in the final rule.

- Emergency operations centers and acquisition of emergency response equipment (e.g., emergency response radio systems)
- Installation and improvement of ventilation systems in congregate settings, health facilities, or other public facilities
- Public health data systems, including technology infrastructure
- Adaptations to congregate living facilities, including skilled nursing facilities, other long-term care facilities, incarceration settings, homeless shelters, residential foster care facilities, residential behavioral health treatment, and other group living facilities, as well as public facilities and schools (excluding construction of new facilities for the purpose of mitigating spread of COVID-19 in the facility)
- Mitigation measures in small businesses, nonprofits, and impacted industries (e.g., developing outdoor spaces)
- Behavioral health facilities and equipment (e.g., inpatient or outpatient mental health or substance use treatment facilities, crisis centers, diversion centers)
- Technology and equipment to allow law enforcement to efficiently and effectively respond to the rise in gun violence resulting from the pandemic
- Affordable housing, supportive housing, or recovery housing development
- Food banks and other facilities primarily dedicated to addressing food insecurity
- Transitional shelters (e.g., temporary residences for people experiencing homelessness)
- Devices and equipment that assist households in accessing the internet (e.g., tablets, computers, or routers)
- Childcare, daycare, and early learning facilities
- Job and workforce training centers
- Improvements to existing facilities to remediate lead contaminants (e.g., removal of lead paint)
- Medical equipment and facilities designed to address disparities in public health outcomes (includes primary care clinics, hospitals, or integrations of health services into other settings)
- Parks, green spaces, recreational facilities, sidewalks, pedestrian safety features like crosswalks, streetlights, neighborhood cleanup, and other projects to revitalize public spaces
- Rehabilitations, renovation, remediation, cleanup, or conversions of vacant or abandoned properties
- Schools and other educational facilities or equipment to address educational disparities
- Technology and tools to effectively develop, execute, and evaluate government programs
- Technology infrastructure to adapt government operations to the pandemic (e.g., video-conferencing software, improvements to case management systems or data sharing resources), reduce government backlogs, or meet increased maintenance needs
- Other (please specify)

- For recipients (other than Tribal governments) investing in projects with total expected capital expenditures for an enumerated eligible use of $10 million or more, as well as projects with total expected capital expenditures for an "other" use of $1 million or more, provide a written justification (*Collection began in July 2022)*
- For projects with total expected capital expenditures of over $10 million, provide labor reporting as outlined for infrastructure projects on pages 26 and 27 (*Collection began July 2022*)

3. Household Assistance (EC 2.1-2.8) – *Collection began January 2022*:
   - Number of households served (by program if recipient establishes multiple separate household assistance programs)

4. Small Business Economic Assistance (EC 1.8, 2.29-2.33) – *Collection began April 2022*
   - Number of small businesses served (by program if recipient establishes multiple separate small business assistance programs)

5. Assistance to Non-Profits (EC 1.9, 2.34)- *Collection began April 2022*
   - Number of Non-Profits served (by program if recipient establishes multiple separate non-profit assistance programs)

6. Aid to Travel, Tourism, and Hospitality or Other Impacted Industries (EC 1.10, 2.35-2.36) – *Collection began April 2022*:
   - If aid is provided to industries other than travel, tourism, and hospitality (EC 2.36), describe if the industry experienced at least 8 percent employment loss from pre-pandemic levels, or the industry is experiencing comparable or worse economic impacts as the national tourism, travel, and hospitality industries as of the date of the final rule, and rationale for providing aid to the industry
   - For each subaward:
     - Sector of employer (Note: additional detail, including list of sectors, to be provided in the user guide posted to www.treasury.gov/SLFRP)
     - Purpose of funds (e.g., payroll support, safety measure implementation)

7. Education Assistance (EC 2.14, 2.24-.2.27) – *Collection began in January 2022*:
   - The National Center for Education Statistics ("NCES") School ID or NCES District ID. List the School District if all schools within the school district received some funds. If not all schools within the school district received funds, list the School ID of the schools that received funds. These can allow evaluators to link data from the NCES to look at school-level demographics and, eventually, student performance.[18]

8. Payroll for Public Health and Safety Employees (EC 3.1) – *Collection began in January 2022*:
   - Number of government FTEs responding to COVID-19 supported under this authority

9. Rehiring Public Sector Staff (EC 3.2) – *Collection began in January 2022*:
   - Number of FTEs rehired by governments under this authority

10. Premium Pay (both Public Sector EC 4.1 and Private Sector EC 4.2) – *Collection began in January 2022; additional field began in April 2022*
    - List of sectors designated as critical to protecting the health and well-being of residents by the chief executive of the jurisdiction, if beyond those included in the final rule *(Collection began January 2022)*
    - Number of workers to be served (*Collection began January 2022)*
    - Employer sector for all subawards to third-party employers (i.e., employers other than the State, local, or Tribal government) (*Collection began January 2022)*
    - For groups of workers (e.g., an operating unit, a classification of worker, etc.) or, to the extent applicable, individual workers, other than those where the eligible worker receiving premium pay is earning (with the premium pay included) below 150 percent of their residing state or county's average annual wage for all occupations, as defined by the Bureau of Labor Statistics Occupational Employment and Wage Statistics, whichever is

[18] For more information on NCES identification numbers see https://nces.ed.gov/ccd/districtsearch/ (districts) and https://nces.ed.gov/ccd/schoolsearch/ (schools).

higher, on an annual basis; OR the eligible worker receiving premium pay is not exempt from the Fair Labor Standards Act overtime provisions:
    - A brief written narrative justification of how the premium pay or grant is responsive to workers performing essential work during the public health emergency. This could include a description of the essential workers' duties, health or financial risks faced due to COVID-19, and why the recipient government determined that the premium pay was responsive to workers performing essential work during the pandemic. This description should not include personally identifiable information; when addressing individual workers, recipients should be careful not to include this information. Recipients may consider describing the workers' occupations and duties in a general manner as necessary to protect privacy (*Collection began January 2022)*
- Number of workers to be served with premium pay in K-12 schools (*Collection began April 2022)*

11. Revenue replacement (EC 6.1) – *Collection began in August 2021*:
As outlined in the final rule, recipients have the option to make a one-time decision to calculate revenue loss according to the formula outlined in the final rule or elect a "Standard Allowance" of up to $10 million, not to exceed the award allocation, to spend on government services throughout the period of performance. The option to make this one-time decision was provided during the April 30, 2022 reporting deadline.

    For recipients electing the "Standard Allowance," Treasury will presume that up to $10 million, not to exceed the award allocation, in revenue has been lost due to the public health emergency. Recipients are permitted to use that amount to fund "government services." Please note that electing the standard allowance does not change a recipient's total allocation. Recipients that elect to use this standard allowance will make this election instead of calculating lost revenue using the formula.

    For recipients calculating revenue loss according to the formula, the final rule permits recipients to choose whether to use calendar or fiscal year calculation dates. Recipients must use the same calculation time frame (calendar or fiscal year) throughout the award period.

    Recipients calculating lost revenue using the formula should report the following:

    - Choice of fiscal or calendar year revenue loss (choice must remain consistent throughout award period)
    - General revenue collected over the past 12 months as of the most recent calculation date, as outlined in the final rule.
    - Calculated revenue loss due to the Covid-19 public health emergency; and
    - An explanation of how the revenue replacement funds were allocated to government services (note: additional instructions and/or template provided in the user guide posted at www.treasury.gov/SLFRPReporting).

    For information on treatment of future tax changes, please see the *Statement Regarding Compliance with the Coronavirus State and Local Fiscal Recovery Funds Interim Final Rule and Final Rule*.

k. Required Programmatic Data for Infrastructure Projects (EC 5): For all projects listed under the Water, Sewer, and Broadband Expenditure Categories (see Appendix 1), more detailed project-level information is required. Each project will be required to report expenditure data as described above, but will also report the following information:

    1. All infrastructure projects (EC 5) – *Collection began in January 2022:*

- Projected/actual construction start date (month/year)
- Projected/actual initiation of operations date (month/year)
- Location
- For projects over $10 million (based on expected total cost):
  a. A recipient may provide a certification that, for the relevant project, all laborers and mechanics employed by contractors and subcontractors in the performance of such project are paid wages at rates not less than those prevailing, as determined by the U.S. Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code (commonly known as the "Davis-Bacon Act"), for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the State (or the District of Columbia) in which the work is to be performed, or by the appropriate State entity pursuant to a corollary State prevailing-wage-in-construction law (commonly known as "baby Davis-Bacon Acts"). If such certification is not provided, a recipient must provide a project employment and local impact report detailing:
     - The number of employees of contractors and sub-contractors working on the project;
     - The number of employees on the project hired directly and hired through a third party;
     - The wages and benefits of workers on the project by classification; and
     - Whether those wages are at rates less than those prevailing.[19]

     Recipients must maintain sufficient records to substantiate this information upon request.
  b. A recipient may provide a certification that a project includes a project labor agreement, meaning a pre-hire collective bargaining agreement consistent with section 8(f) of the National Labor Relations Act (29 U.S.C. 158(f)). If the recipient does not provide such certification, the recipient must provide a project workforce continuity plan, detailing:
     - How the recipient will ensure the project has ready access to a sufficient supply of appropriately skilled and unskilled labor to ensure high-quality construction throughout the life of the project, including a description of any required professional certifications and/or in-house training;
     - How the recipient will minimize risks of labor disputes and disruptions that would jeopardize timeliness and cost-effectiveness of the project;
     - How the recipient will provide a safe and healthy workplace that avoids delays and costs associated with workplace illnesses, injuries, and fatalities, including descriptions of safety training, certification, and/or licensure requirements for all relevant workers (e.g., OSHA 10, OSHA 30);
     - Whether workers on the project will receive wages and benefits that will secure an appropriately skilled workforce in the context of the local or regional labor market; and
     - Whether the project has completed a project labor agreement.
  c. Whether the project prioritizes local hires.
  d. Whether the project has a Community Benefit Agreement, with a description of any such agreement.

2. Water and sewer projects (EC 5.1-5.18) *Required once the project starts:*
   - National Pollutant Discharge Elimination System (NPDES) Permit Number (if applicable; for projects aligned with the Clean Water State Revolving Fund) (*Collection began in January 2022)*

[19] As determined by the U.S. Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code (commonly known as the "Davis-Bacon Act"), for the corresponding classes of laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the State (or the District of Columbia) in which the work is to be performed.

- Public Water System (PWS) ID number (if applicable; for projects aligned with the Drinking Water State Revolving Fund) *(Collection began January 2022)*
- Median Household Income of service area *(Collection began in April 2022)*
- Lowest Quintile Income of the service area *(Collection began in April 2022)*

3. Broadband projects (EC 5.19-5.21) *Collection includes new fields that began in July 2022. Additional fields will be phased in through future reporting periods, as noted below.*

Overall Project Information

- Confirm that the project is designed to, upon completion, reliably meet or exceed symmetrical 100 Mbps download and upload speeds.
  - If the project is not designed to reliably meet or exceed symmetrical 100 Mbps download and upload speeds, explain why not, and
  - Confirm that the project is designed to, upon completion, meet or exceed 100 Mbps download speed and between at least 20 Mbps and 100 Mbps upload speed, and be scalable to a minimum of 100 Mbps download speed and 100 Mbps upload speed.
- Confirm that the service provider for the project has, or will upon completion of the project, either participated in the Federal Communications Commission (FCC)'s Affordable Connectivity Program (ACP) or otherwise provided access to a broad-based affordability program that provides benefits to households commensurate with those provided under the ACP to low-income consumers in the proposed service area of the broadband infrastructure *(applicable only to projects that provide service to households).*

Detailed Project Information

- Project technology type(s) (Planned/Actual)
  - Fiber
  - Coaxial Cable
  - Terrestrial Fixed Wireless
  - Other (specify)
- Total miles of fiber deployed (Planned/Actual)
- Total number of funded locations served (Planned/Actual)
  - Total number of funded locations served, broken out by speeds:
    - Pre-SLFRF Investment:
      - Number receiving 25/3 Mbps or below
      - Number receiving between 25/3 Mbps and 100/20 Mbps
    - Post-SLFRF Investment (Planned/Actual):
      - Number receiving minimum 100/100 Mbps
      - Number receiving minimum 100/20 Mbps and scalable to minimum 100/100 Mbps
  - Total number of funded locations served, broken out by type (Planned/Actual):
    - Residential
      - Total Housing Units
    - Business
    - Community anchor institution
- Speed tiers offered, corresponding non-promotional prices, including associated fees, and data allowance for each speed tier of broadband service (*collection to be phased in a future reporting period)*

Location-by-Location Project Information

For each location served by a Project, the recipient must collect from the subrecipient or contractor and submit the following information to Treasury using a predetermined file format that will be provided by Treasury (*collection of certain fields will begin in October 2022, as specified below*):

- Latitude/longitude at the structure where service will be installed (*required starting October 2022)*
- Technology used to offer service at the location (*required starting October 2022)*
- Location type (*required starting October 2022)*
  - Residential
    - If Residential, Number of Housing Units
  - Business
  - Community anchor institution
- Speed tier at the location pre-SLFRF investment (*collection to be phased in)*
  - 25/3 Mbps or below
  - Between 25/3 Mbps and 100/20 Mbps
- Speed and latency at the location post-SLFRF investment (*collection to be phased in)*
  - Maximum download speed offered
  - Maximum download speed delivered
  - Maximum upload speed offered
  - Maximum upload speed delivered
  - Latency

I. Additional Required Programmatic Data for States, U.S. territories, and metropolitan cities and counties with a population that exceeds 250,000 residents only: As noted in the Recovery Plan section of this guidance, states, U.S. territories, and metropolitan cities and counties with a population over 250,000 are required to provide additional data in the Project and Expenditure report for projects in the following expenditure categories:

1. Use of Evidence (for relevant ECs noted in Appendix 1)—*Collection began April 2022*
   - The dollar amount of the total project spending that is allocated towards evidence-based interventions
   - Whether a program evaluation of the project is being conducted

2. Household Assistance (EC 2.2, Long-Term Housing Security (EC 2.15-2.16) and Housing Support (EC 2.17-2.18):
   - Number of households receiving eviction prevention services (including legal representation)
   - Number of affordable housing units preserved or developed

3. Assistance to Unemployed or Underemployed Workers (EC 2.10) and Community Violence Interventions (EC 1.11):
   - Number of workers enrolled in sectoral job training programs
   - Number of workers completing sectoral job training programs
   - Number of people participating in summer youth employment programs

4. Addressing Educational Disparities (EC 2.24-2.26) and Addressing Impacts of Lost Instructional Time (EC 2.27):
   - Number of students participating in evidence-based tutoring programs[20]

5. Healthy Childhood Environments (EC 2.11-2.14):
   - Number of children served by childcare and early learning services (pre-school/pre-K/ages 3-5)
   - Number of families served by home visiting

[20] For more information on evidence-based tutoring programs, refer to the U.S. Department of Education's 2021 ED COVID-19 Handbook (Volume 2), which summarizes research on evidence-based tutoring programs (see the bottom of page 20.

m. NEU Documentation (NEUs only): Each NEU is also required to provide the following information once its accounts are established in Treasury's Reporting Portal and prior to the due date for their first Project and Expenditure Report (due April 30, 2022):
   - Copy of the signed award terms and conditions agreement (which was signed and submitted to the State as part of the request for funding)
   - Copy of the signed assurances of compliance with Title VI of the Civil Rights Act of 1964 (which was signed and submitted to the State as part of the request for funding)
   - Copy of actual budget documents validating the top-line budget total provided to the State as part of the request for funding

   NEU accounts are established in Treasury's Portal based on information provided by the States or territories, as further described in Section Part 2 D below.

C. Recovery Plan Performance Report

States, territories, and metropolitan cities and counties with a population that exceeds 250,000 residents (i.e., Tier 1 recipients) will also be required to publish and submit to Treasury a Recovery Plan performance report ("Recovery Plan"). Each Recovery Plan must be posted on an easily discoverable webpage on the public-facing website of the recipient by the same date the recipient submits the report to Treasury. Treasury recommends that Recovery Plans be accessible within three clicks or fewer from the homepage of the recipient's website. Within Treasury's reporting portal, recipients must upload a link to the publicly available Recovery Plan and provide required data.

The Recovery Plan provides the public and Treasury both retrospective and prospective information on the projects recipients are undertaking or planning to undertake with program funding and how they are planning to ensure program outcomes are achieved in an effective, efficient, and equitable manner. While this guidance outlines some minimum requirements for the Recovery Plan, each recipient is encouraged to add information to the plan that they feel is appropriate to provide information to their constituents on efforts they are taking to respond to the pandemic and promote economic recovery. Each jurisdiction may determine the general form and content of the Recovery Plan, as long as it includes the minimum information required by Treasury. Treasury provided a template (located at www.treasury.gov/SLFRP) but recipients may modify this template as appropriate for their jurisdiction, provided the modified template meets Treasury's requirements, outlined below. Through the Recovery Plan, recipients may link to public documents, including, but not limited to, legislation, dashboards, survey results, community engagement reports, and equity frameworks to support the Recovery Plan narrative. The Recovery Plan should include key performance indicators identified by the recipient and some mandatory indicators identified by Treasury, as noted below.

The initial Recovery Plan covered the period from the date of award to July 31, 2021 and was required to be submitted to Treasury by August 31, 2021, or 60 days after receiving funding. Thereafter, the Recovery Plan will cover a 12-month period and recipients are required to submit the report to Treasury after the end of the 12-month period by July 31. The Recovery Plan should include both retrospective information covering the time period of the Recovery Plan along with prospective information on future work to be undertaken with SLFRF funds or on the planning that has been undertaken during the covered period. **Table 5** summarizes the report timelines:

Table 5 Recovery Plan Timeline

Annual Report	Period Covered	Due Date
1	Award Date – July 31, 2021	August 31, 2021 or 60 days after receiving funding
2	July 1, 2021 – June 30, 2022	July 31, 2022

Annual Report	Period Covered	Due Date
3	July 1, 2022 – June 30, 2023	July 31, 2023
4	July 1, 2023 – June 30, 2024	July 31, 2024
5	July 1, 2024 – June 30, 2025	July 31, 2025
6	July 1, 2025 – June 30, 2026	July 31, 2026
7	July 1, 2026 – December 31, 2026	April 30, 2027

Recovery Plans submitted as part of reporting are used by Treasury, third party organizations, the public, and other stakeholders to obtain a comprehensive understanding of SLFRF's largest recipients' planned and actual usage of SLFRF funding, including the jurisdiction's policy goals, its strategy for achieving them, and specific projects or initiatives underway. Alignment of data reported in Project and Expenditure reports and Recovery Plans is expected by both Treasury and SLFRF's many stakeholders. Finally, Recovery Plans will be posted publicly by Treasury to provide transparency about how program funds are being used by recipient governments.

The Recovery Plan must include, at a minimum, the following information:

1. Executive Summary

In this section, recipients should provide a high-level overview of the jurisdiction's intended and actual uses of funding including, but not limited to: the jurisdiction's strategy, goals, and plan for using Fiscal Recovery Funds to respond to the pandemic and promote economic recovery, key outcome goals, progress to date on those outcomes, and any noteworthy challenges or opportunities identified during the reporting period.

2. Uses of Funds

In this section, recipients should describe in further detail the strategy and goals of their jurisdiction's SLFRF program, such as how their jurisdiction's approach would help support a strong and equitable recovery from the COVID-19 pandemic and economic downturn. Recipients should describe how their intended and actual uses of funds will achieve their goals. Given the broad eligible uses of funds established by the final rule and the specific needs of different jurisdictions, recipients should also explain how the funds would support the communities, populations, or individuals in their jurisdiction. Recipients should describe how their use of funds supports their overall strategy and goals in the following areas:

a. Public Health (EC 1): As relevant, describe how funds are being used to respond to COVID-19, the broader health impacts of COVID-19, and the COVID-19 public health emergency, including community violence interventions and behavioral health.
b. Negative Economic Impacts (EC 2): As relevant, describe how funds are being used to respond to negative economic impacts of the COVID-19 public health emergency, including services to households (such as affordable housing, job training, and childcare), small businesses, non-profits, and impacted industries.
c. Public Health-Negative Economic Impact: Public Sector Capacity (EC 3): As relevant, describe how funds are being used to support public sector workforce and capacity, including public sector payroll, rehiring of public sector workers, and building of public sector capacity.
d. Premium Pay (EC 4): As relevant, describe the approach, goals, and sectors or occupations served in any premium pay program. Describe how the approach prioritizes low-income workers and/or any particular group of eligible workers.
e. Water, sewer, and broadband infrastructure (EC 5): As relevant, describe the approach, goals, and types of projects being pursued. Where relevant, recipients should note how projects contribute to addressing climate change and/or how projects benefit disadvantaged communities in line with the Justice40 Initiative.[21]

[21] See Executive Order 14008, On Tackling the Climate Crisis at Home and Abroad and the Interim Implementation Guidance for the Justice40 Initiative, OMB M-21-28.

f. Revenue Replacement (EC 6): Describe the loss in revenue, including if electing the standard allowance, due to the COVID-19 public health emergency, and how funds have been used to provide government services, including any funds used under revenue loss for non-federal cost-share or matching requirements of other federal programs.

If appropriate, recipients may also include information on their jurisdiction's use (or planned use) of other federal recovery funds, including other programs under the American Rescue Plan such as Emergency Rental Assistance, the Homeowner Assistance Fund, the Capital Projects Fund, the State Small Business Credit Initiative, and so forth, to provide broader context on the overall approach for pandemic recovery. Jurisdictions may also address use of SLFRF funds in coordination with, or in preparation for, funding available through the Infrastructure Investment and Jobs Act.

3. Promoting equitable outcomes

Treasury encourages uses of funds that advance strong, equitable growth, including economic and racial equity. For the purposes of the SLFRF, equity is described in the Executive Order 13985 On Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, as issued on January 20, 2021.

In this section, recipients should describe, as applicable, their efforts to promote equitable outcomes, including economic and racial equity, and their efforts to design, implement, and measure their SLFRF program and projects with equity in mind.

In describing their efforts to **design** their SLFRF program and projects with equity in mind, recipients may consider the following:

a. Goals: Are there particular historically underserved, marginalized, or adversely affected groups that recipients intend to serve within their jurisdiction?
b. Awareness: How equitable and practical is the ability for residents or businesses to become aware of the services funded by SLFRF?
c. Access and Distribution: Are there differences in levels of access to benefits and services across groups? Are there administrative requirements that result in disparities in ability to complete applications or meet eligibility criteria?
d. Outcomes: How are intended outcomes focused on closing gaps and/or reaching universal levels of service? How is the considering disaggregating outcomes by race, ethnicity, and other equity dimensions where relevant for the policy objective?

In describing their efforts to **implement** their SLFRF program and projects with equity in mind, recipients may consider the following:

a. Goals and Targets: Please describe how planned or current uses of funds prioritize economic and racial equity as a goal, name specific targets intended to produce meaningful equity results at scale, and include initiatives to achieve those targets.
b. Project Implementation: In addition, please explain how the jurisdiction's overall equity strategy translates into focus areas for SLFRF projects and the specific services or programs offered by the jurisdiction in the following Expenditure Category, as indicated in the final rule.

    Negative Economic Impacts (EC 2): assistance to households, small businesses, and non-profits to address impacts of the pandemic, which have been most severe among low-income populations. This includes assistance with food, housing, and other needs; employment programs for people with barriers to employment who faced negative economic impacts from the pandemic (such as residents of low-income neighborhoods, minorities, disconnected youth, the unemployed, formerly incarcerated people, veterans, and people with disabilities); services to provide long-term housing security and housing supports, address educational disparities, or provide child care and early learning services; and other strategies that provide

impacted and disproportionately impacted communities with services to address the negative economic impacts of the pandemic

The first annual Recovery Plan, due in 2021, was required to describe initial efforts and intended outcomes to promote equity, as applicable. Beginning in 2022, each annual Recovery Plan must provide an update, using qualitative and quantitative data, on how the recipients' approach achieved or promoted equitable outcomes or progressed against equity goals during the performance period, as applicable. Each jurisdiction should describe any constraints or challenges that impacted project success in terms of increasing equity. In particular, this section should describe the geographic and demographic distribution of funding, including whether it is targeted toward traditionally marginalized communities (recipients may reference the demographic data information in their Project and Expenditure Reports as relevant).

4. Community Engagement

In this section, recipients should describe how their jurisdiction's planned or current use of funds incorporates community engagement strategies including written feedback through surveys, project proposals, and related documents; oral feedback through community meetings, issue-specific listening sessions, stakeholder interviews, focus groups, and additional public engagement; as well as other forms of input, such as steering committees, taskforces, and digital campaigns that capture diverse feedback from the community. Recipients may describe completed or planned community engagement strategies specifically focused on their SLFRF program and projects or community engagement strategies that included SLFRF among other government programs. Recipients should also describe how community engagement strategies support their equity goals, including engagement with communities that have historically faced significant barriers to services, such as people of color, people with low incomes, limited English proficient populations, and other traditionally underserved groups.

5. Labor Practices

In this section, recipients should describe workforce practices on any infrastructure projects or capital expenditures being pursued. How are projects using strong labor standards to promote effective and efficient delivery of high-quality infrastructure projects while also supporting the economic recovery through strong employment opportunities for workers? For example, report whether any of the following practices are being utilized: project labor agreements, community benefits agreements, prevailing wage requirements, and local hiring.

6. **Use of Evidence**

In this section of the Recovery Plan, recipients should describe whether and how evidence-based interventions and/or program evaluation are incorporated into their SLFRF program. Recipients may include links to evidence standards, evidence dashboards, evaluation policies, and other public facing tools that are used to track and communicate the use of evidence and evaluation for Fiscal Recovery Funds. Recipients are encouraged to consider how a learning agenda, either narrowly focused on SLFRF or broadly focused on the recipient's broader policy agenda, could support their overarching evaluation efforts in order to create an evidence-building strategy for their jurisdiction.[22]

In the Project Inventory section of the Recovery Plan (see Section 8 below), recipients should identify whether SLFRF funds are being used for evidence-based interventions[23] and/or if projects are being evaluated through rigorous program evaluations that are designed to build evidence. In the Project Inventory, recipients must briefly describe the goals of the project and the evidence base for the interventions funded by the project. As part of the Project Inventory section, recipients must also specifically identify the dollar amount of the total project spending that is allocated towards evidence-based interventions for each project in the Expenditure Categories noted with an asterisk in Appendix 1. Please note that to increase consistency, the Project and Expenditure report now also includes

[22] For more information on learning agendas, please see OMB M-19-23

[23] As noted in Appendix 2, evidence-based refers to interventions with strong or moderate levels of evidence.

fields for recipients to identify the dollar amount of the total project spending that is allocated to evidence-based interventions and to indicate if a program evaluation of the project is being conducted.

Recipients are encouraged to reference relevant evidence clearinghouses, among other sources, to assess the level of evidence for their interventions and identify evidence-based models that could be applied in their jurisdiction; such evidence clearinghouses include the U.S. Department of Education's What Works Clearinghouse, the U.S. Department of Labor's CLEAR, and the Childcare & Early Education Research Connections and the Home Visiting Evidence of Effectiveness clearinghouses from Administration for Children and Families, as well as other clearinghouses relevant to particular projects conducted by the recipient.

Recipients are exempt from reporting on evidence-based interventions in cases where a program evaluation is being conducted. In such cases where a recipient is conducting a program evaluation, recipients must describe the evaluation design, including whether it is a randomized or quasi-experimental design; the key research questions being evaluated; whether the study has sufficient statistical power to disaggregate outcomes by demographics; and the timeframe for the completion of the evaluation (including a link to the completed evaluation if relevant).[24] Once the evaluation has been completed, recipients must post the evaluation publicly and link to the completed evaluation in the Recovery Plan. Once an evaluation has been completed (or has sufficient interim findings to determine the efficacy of the intervention), recipients should determine whether the spending for the evaluated interventions should be counted towards the dollar amount categorized as evidence-based for the relevant project.

For all projects, recipients may be selected to participate in a national evaluation, which might, for example, study their project along with similar projects in other jurisdictions that are focused on the same set of outcomes. In such cases, recipients may be asked to share information and data that is needed for the national evaluation.

Appendix 2 contains additional information on evidence-based interventions for the purposes of the Recovery Plan.

7. Performance Report

In this section, recipients should describe how performance management is incorporated into their SLFRF program, including how they are tracking their overarching jurisdictional goals for these funds as well as measuring results for individual projects. The recipient has flexibility in terms of how this information is presented in the Recovery Plan, and may report key performance indicators for each project, or may group projects with substantially similar goals and the same outcome measures. In some cases, the recipient may choose to include some indicators for each individual project as well as crosscutting indicators. Recipients may include links to performance management dashboards, performance management policies, and other public facing tools that are used to track and communicate the performance of Fiscal Recovery Funds. In addition to outlining in this section their high-level approach to performance management, recipients must also include key performance indicators for each SLFRF project in the Project Inventory section (described below in #8).

Performance indicators should include both output and outcome measures. Output measures, such as the number of students enrolled in an early learning program, provide valuable information about the early implementation stages of a project. Outcome measures, such as the percent of students reading on grade level, provide information about whether a project is achieving its overall goals. Recipients are encouraged to use logic models[25] to identify their output and outcome measures.

[24] For more information on the required standards for program evaluation, see OMB M-20-12.

[25] A logic model is a tool that depicts the intended links between program investments and outcomes, specifically the relationships among the resources, activities, outputs, outcomes, and impact of a program.

While the initial Recovery Plan focused heavily on early output goals, recipients should include the related outcome goal for each project and provide updated information on achieving these outcome goals in subsequent annual reports. In cases where recipients are conducting a program evaluation for a project (as described above), the outcome measures in the performance report should be aligned with those being evaluated in the program. As described in the final rule, to support their performance measurement and program improvement efforts, recipients are permitted to use funds to make improvements to data or technology infrastructure and data analytics, as well as perform program evaluations.

While recipients have discretion on the full suite of performance indicators to include, a number of mandatory performance indicators and programmatic data must be included. These are necessary to allow Treasury to conduct oversight as well as understand and aggregate program outcomes across recipients. This section provides an overview of the mandatory performance indicators and programmatic data. This information should be included in the Project Inventory, but this data will also need to be entered directly into the Treasury reporting portal as part of the Project and Expenditure report, as Treasury has added these fields (for Tier 1 recipients only) to the Project and Expenditure report. Below is a list of required data for each Expenditure Category, where relevant.

a. Household Assistance (EC 2.2), Long-Term Housing Security (EC 2.15-2.16) and Housing Support (EC 2.17-2.18):
   - Number of households receiving eviction prevention services (including legal representation)
   - Number of affordable housing units preserved or developed

b. Assistance to Unemployed or Underemployed Workers (EC 2.10) and Community Violence Interventions (EC 1.11):
   - Number of workers enrolled in sectoral job training programs
   - Number of workers completing sectoral job training programs
   - Number of people participating in summer youth employment programs

c. Addressing Educational Disparities (EC 2.24-2.26) and Addressing Impacts of Lost Instructional Time (EC 2.27):
   - Number of students participating in evidence-based tutoring programs[26]

d. Healthy Childhood Environments (EC 2.11-2.14):
   - Number of children served by childcare and early learning services (pre-school/pre-K/ages 3-5)
   - Number of families served by home visiting

The initial report should have included the key indicators above. Each annual report thereafter should include updated data for the performance period as well as prior period data, and a brief narrative adding any additional context to help the reader interpret the results and understand any changes in performance indicators over time. To the extent possible, Treasury also encourages recipients to provide data disaggregated by race, ethnicity, gender, income, and other relevant factors.

8. Project Inventory

In this section, recipients should list the name and provide a brief description of each SLFRF funded project. Projects are defined as a grouping of closely related activities that together are intended to achieve a specific goal or are directed toward a common purpose. These activities can include new or existing eligible government services or investments funded in whole or in part by SLFRF funding.

[26] For more information on evidence-based tutoring programs, refer to the U.S. Department of Education's 2021 ED COVID-19 Handbook (Volume 2), which summarizes research on evidence-based tutoring programs (see the bottom of page 20.).

For each project, recipients should include the project name, funding amount, identification number (the same identification number created by the recipient that matches the identification number used in the quarterly Project and Expenditure Report), project Expenditure Category (see Appendix 1), and a description of the project that includes an overview of the main activities of the project, approximate timeline, primary delivery mechanisms and partners, and intended outcomes. Each jurisdiction should also include a link to the website of the project if available. This information will provide context and additional detail for the information reported quarterly in the Project and Expenditure Report.

For infrastructure projects, where relevant, recipients should describe how the project contributes to addressing climate change and/or advances the Justice40 initiative[27], which sets a target of providing 40 percent of the benefits of certain federal investments, including climate and clean energy investments to disadvantaged communities.

As noted above in section 6, the Project Inventory must also include information about the dollar amount of the total project spending that is allocated towards evidence-based interventions (or describe how projects are being evaluated as noted above). As described above in section 7, the Project Inventory must also contain information about the performance indicators for each project, including both those measures that recipients have defined for each project as well as the mandatory performance indicators defined by Treasury.

Recipients have flexibility in the presentation and format of their Project Inventory, provided it includes the minimum required information. Recipients have the option of downloading a spreadsheet of the information entered into their Project and Expenditure Report to assist them in creating the Project Inventory in their Recovery Plan. However, recipients must ensure that their Project Inventory contains the additional information required by this guidance, including but not limited to information about performance measures and evidence/evaluation for each project. In all cases, recipients must post publicly (and submit to Treasury) a single PDF file of their Recovery Plan, which includes the Project Inventory.

D. Distributions to NEUs

Each state and territory is required to provide regular updates on their NEU distributions as well as their distributions to units of general local government within counties that are not units of general local government. The distribution template generally requests information on whether the local government has (1) received funding; (2) declined funding and requested a transfer to the state under Section 603(c)(4) of the Act; or (3) not taken action on its funding or declined funding.

For NEUs, states and territories should be prepared to report on their information, including the following:

- NEU name
- NEU UEI number
- NEU Taxpayer Identification Number (TIN)
- NEU Recipient Number (a unique identification code for each NEU assigned by the State or territory to the NEU as part of the request for funding)
- NEU contact information (e.g., address, point of contact name, point of contact email address, and point of contact phone number)
- NEU authorized representative name and email address
- Initial allocation and, if applicable, subsequent allocation to the NEU (before application of the 75 percent cap)

[27] See Executive Order 14008, On Tackling the Climate Crisis at Home and Abroad and the Interim Implementation Guidance for the Justice40 Initiative, OMB M-21-28.

- Total NEU reference budget (as submitted by the NEU to the State or territory as part of the request for funding)
- Amount of the initial and, if applicable, subsequent allocation above 75 percent of the NEU's reference budget which will be returned to Treasury
- Payment amount(s)
- Payment date(s)

States with "weak" minor civil divisions (i.e., Illinois, Indiana, Kansas, Missouri, Nebraska, North Dakota, Ohio, and South Dakota) should also list any minor civil divisions that the state deemed ineligible.

For each eligible NEU that declined funding and requested a transfer to the state under Section 603(c)(4) of the Social Security Act, the state or territory must also attach a form signed by the NEU, as detailed in the Guidance on Distributions of Funds to Non-Entitlement Units of Local Government

Appendix 1: Expenditure Categories

Treasury's final rule provides greater flexibility and simplicity for recipients to fight the pandemic and support families and businesses struggling with its impacts, maintain vital services amid revenue shortfalls, and build a strong, resilient, and equitable recovery. As such, recipients began reporting on a broader set of eligible uses and associated Expenditure Categories ("EC"), starting with the April 2022 Project and Expenditure Report than they did in their interim reports, initial Recovery Plans, and January Project and Expenditure Report. The table below includes the new Expenditure Categories, as well as a reference to previous Expenditure Categories aligned with the interim final rule and used for reporting before this date.

The Expenditure Categories (EC) listed below must be used to categorize each project as noted in Part 2 above. The term "Expenditure Category" refers to the detailed level (e.g., 1.1 COVID-19 Vaccination). When referred to as a category (e.g., EC 1) it includes all Expenditure Categories within that level.

*Denotes areas where recipients must identify the amount of the total funds that are allocated to evidence-based interventions (see Use of Evidence section above for details)

^Denotes areas where recipients must report on whether projects are primarily serving disproportionately impacted communities (see Project Demographic Distribution section above for details)

Expenditure Category	EC[28]	Previous EC[29]
1: Public Health		
COVID-19 Mitigation & Prevention		
COVID-19 Vaccination^	1.1	1.1
COVID-19 Testing^	1.2	1.2
COVID-19 Contact Tracing^	1.3	1.3
Prevention in Congregate Settings (Nursing Homes, Prisons/Jails, Dense Work Sites, Schools, Child care facilities, etc.)*^	1.4	1.4
Personal Protective Equipment^	1.5	1.5
Medical Expenses (including Alternative Care Facilities)^	1.6	1.6
Other COVID-19 Public Health Expenses (including Communications, Enforcement, Isolation/Quarantine)^	1.7	1.8
COVID-19 Assistance to Small Businesses^	1.8	-
COVID 19 Assistance to Non-Profits^	1.9	-
COVID-19 Aid to Impacted Industries^	1.10	-
Community Violence Interventions		
Community Violence Interventions*^	1.11	3.16
Behavioral Health		
Mental Health Services*^	1.12	1.10
Substance Use Services*^	1.13	1.11
Other		
Other Public Health Services^	1.14	1.12
Capital Investments or Physical Plant Changes to Public Facilities that respond to the COVID-19 public health emergency	-	1.7
2: Negative Economic Impacts		
Assistance to Households		
Household Assistance: Food Programs*^	2.1	2.1

[28] Under the final rule to be used starting with April 2022 reports

[29] Under the interim final rule to be used in Interim Report and January 2022 Project and Expenditure Report

Expenditure Category	EC[28]	Previous EC[29]
Household Assistance: Rent, Mortgage, and Utility Aid*^	2.2	2.2
Household Assistance: Cash Transfers*^	2.3	2.3
Household Assistance: Internet Access Programs*^	2.4	2.4
Household Assistance: Paid Sick and Medical Leave^	2.5	-
Household Assistance: Health Insurance*^	2.6	-
Household Assistance: Services for Un/Unbanked*^	2.7	-
Household Assistance: Survivor's Benefits^	2.8	-
Unemployment Benefits or Cash Assistance to Unemployed Workers*^	2.9	2.6
Assistance to Unemployed or Underemployed Workers (e.g. job training, subsidized employment, employment supports or incentives)*^	2.10	2.7
Healthy Childhood Environments: Child Care*^	2.11	3.6
Healthy Childhood Environments: Home Visiting*^	2.12	3.7
Healthy Childhood Environments: Services to Foster Youth or Families Involved in Child Welfare System*^	2.13	3.8
Healthy Childhood Environments: Early Learning*^	2.14	3.1

Treasury has prepared the additional guidance below to support recipients in implementing the new expenditure categories. This table includes only those previous expenditure categories that are changing under the new structure, aligned with the final rule.

January 2022 Expenditure Categories		April 2022 Guidance
1: Public Health		
1.7	Capital Investments or Physical Plant Changes to Public Facilities that respond to the COVID-19 public health emergency	EC removed, capital expenditures can be designated in any relevant PH-NEI EC (e.g., new hospital wing would be tracked under EC 1.4)
1.8	Other COVID-19 Public Health Expenses (including Communications, Enforcement, Isolation/Quarantine)	EC is 1.7
1.9	Payroll Costs for Public Health, Safety, and Other Public Sector Staff Responding to COVID-19	EC is 3.1
1.10	Mental Health Services*	EC is 1.12
1.11	Substance Use Services*	EC is 1.13
1.12	Other Public Health Services	EC is 1.14
2: Negative Economic Impacts		
2.5	Household Assistance: Eviction Prevention	EC is now included as part of 2.2
2.6	Unemployment Benefits or Cash Assistance to Unemployed Workers*	EC is 2.9
2.7	Job Training Assistance (e.g., Sectoral job-training, Subsidized Employment, Employment Supports or Incentives)*^	EC is 2.10
2.8	Contributions to UI Trust Funds	EC is 2.28
2.9	Small Business Economic Assistance (General)*^	If public-health related (e.g., providing rapid tests for small businesses), EC is 1.8; if related to negative economic impact eligible use (e.g., grants, technical assistance, rehabilitation, incubators, or microbusinesses), EC is 2.29-2.33
2.10	Aid to Nonprofit Organizations*	If public-health related (e.g., providing rapid tests for non-profits), EC is 1.9; if related to negative economic impact (e.g., grants to stabilize non-profit budget), EC is 2.34
2.11	Aid to Tourism, Travel, or Hospitality	EC is 2.35
2.12	Aid to Other Impacted Industries	EC is 2.36
2.13	Other Economic Support*^	EC is 2.37, re-named Other Economic Impact
2.14	Rehiring Public Sector Staff	EC is 3.2
3: Services to Disproportionately Impacted Communities		
3.1	Education Assistance: Early Learning*^	EC is 2.14
3.2	Education Assistance: Aid to High-Poverty Districts ^	EC is 2.24
3.3	Education Assistance: Academic Services*^	EC is 2.25, social and emotional services will now be tracked under this EC
3.4	Education Assistance: Social, Emotional, and Mental Health Services*^	EC is 2.26, if social and emotional services, EC is 2.25;

January 2022 Expenditure Categories		April 2022 Guidance
3.5	Education Assistance: Other*^	EC is 2.37, collected under Other Economic Impact
3.6	Healthy Childhood Environments: Child Care*^	EC is 2.11
3.7	Healthy Childhood Environments: Home Visiting*^	EC is 2.12
3.8	Healthy Childhood Environments: Services to Foster Youth or Families Involved in Child Welfare System*^	EC is 2.13
3.9	Healthy Childhood Environments: Other*^	EC is 2.37, collected under Other Economic Impact
3.10	Housing Support: Affordable Housing*^	EC is 2.15
3.11	Housing Support: Services for Unhoused Persons*^	EC is 2.16
3.12	Housing Support: Other Housing Assistance*^	EC is 2.18
3.13	Social Determinants of Health: Other*^	EC is 2.37, collected under Other Economic Impact
3.14	Social Determinants of Health: Community Health Workers or Benefits Navigators*^	EC is 2.19
3.15	Social Determinants of Health: Lead Remediation^	EC is 2.20
3.16	Social Determinants of Health: Community Violence Interventions*^	EC is 1.11
5: Infrastructure		
5.16	Broadband: "Last Mile" projects	EC is 5.19
5.17	Broadband: Other projects	EC is 5.20
7: Administrative		
7.2	Evaluation and Data Analysis	EC is 3.4 and has been renamed Effective Service Delivery
7.3	Transfers to Other Units of Government	EC is 7.2
7.4	Transfers to Non-entitlement Units (States and territories only)	To be separately reported as part of NEU/Non-UGLG module. Refer to Part 2 Section D.

Appendix 2: Evidenced-Based Intervention Additional Information

What is evidence-based?
For the purposes of the SLFRF, with the exception of investments in educational services (see additional information below), evidence-based refers to interventions with strong or moderate evidence as defined below:

Strong evidence means that the evidence base can support causal conclusions for the specific program proposed by the applicant with the highest level of confidence. This consists of one or more well-designed and well-implemented experimental studies conducted on the proposed program with positive findings on one or more intended outcomes.

Moderate evidence means that there is a reasonably developed evidence base that can support causal conclusions. The evidence base consists of one or more quasi-experimental studies with positive findings on one or more intended outcomes OR two or more non-experimental studies with positive findings on one or more intended outcomes. Examples of research that meet the standards include: well-designed and well-implemented quasi-experimental studies that compare outcomes between the group receiving the intervention and a matched comparison group (i.e., a similar population that does not receive the intervention).

Preliminary evidence means that the evidence base can support conclusions about the program's contribution to observed outcomes. The evidence base consists of at least one non-experimental study. A study that demonstrates improvement in program beneficiaries over time on one or more intended outcomes OR an implementation (process evaluation) study used to learn about and improve program operations would constitute preliminary evidence. Examples of research that meet the standards include: (1) outcome studies that track program beneficiaries through a service pipeline and measure beneficiaries' responses at the end of the program; and (2) pre- and post-test research that determines whether beneficiaries have improved on an intended outcome.

For investments in educational services, "evidence-based", consistent with the American Rescue Plan Act, has the meaning in section 8101(21) of the Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 6301 *et seq.*). Please see page 16 of this Frequently Asked Questions resource on the Department of Education's Elementary and Secondary School Emergency Relief Programs and Governor's Emergency Education Relief Programs for more information.

Appendix 3: Expenditure Categories aligned with the Interim Final Rule

1: Public Health	
1.1	COVID-19 Vaccination ^
1.2	COVID-19 Testing ^
1.3	COVID-19 Contact Tracing
1.4	Prevention in Congregate Settings (Nursing Homes, Prisons/Jails, Dense Work Sites, Schools, etc.)*
1.5	Personal Protective Equipment
1.6	Medical Expenses (including Alternative Care Facilities)
1.7	Capital Investments or Physical Plant Changes to Public Facilities that respond to the COVID-19 public health emergency
1.8	Other COVID-19 Public Health Expenses (including Communications, Enforcement, Isolation/Quarantine)
1.9	Payroll Costs for Public Health, Safety, and Other Public Sector Staff Responding to COVID-19
1.10	Mental Health Services*
1.11	Substance Use Services*
1.12	Other Public Health Services
2: Negative Economic Impacts

Resolution: 270-22

File Number: 2022-1009

PEACE AT HOME FAMILY SHELTER SUBRECIPIENT AGREEMENT:

A RESOLUTION TO AUTHORIZE MAYOR JORDAN TO SIGN A SUBRECIPIENT AGREEMENT WITH PEACE AT HOME FAMILY SHELTER FOR THE EXPANSION OF THE EMERGENCY SHELTER FOR SURVIVORS OF DOMESTIC VIOLENCE UTILIZING AMERICAN RESCUE PLAN ACT FUNDS IN THE AMOUNT OF $686,500.00, AND TO APPROVE A BUDGET ADJUSTMENT

WHEREAS, the City of Fayetteville has received funding from the American Rescue Plan Act (ARPA) invited non-profit organizations to submit proposals for projects to fund with the available ARPA funding; and

WHEREAS, the Peace at Home Family Shelter submitted an application requesting $686,500.00 in American Rescue Plan Act funds for the expansion of the safety shelter for survivors of domestic violence; and

WHEREAS, the expansion will include 3 additional shelter bedrooms with bathrooms which will allow Peace at Home to provide safe, emergency shelter to approximately 60 additional adults and children fleeing domestic violence each year; and

WHEREAS, the Subrecipient Agreement would provide funding in the amount of $686,500.00 for the rehabilitation and construction costs.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign a Subrecipient Agreement with Peace at Home Family Shelter to provide the amount of

$686,500.00 in American Rescue Plan Act funds to fund the expansion of the emergency shelter.

Section 2: That the City Council of the City of Fayetteville, Arkansas hereby approves a budget adjustment, a copy of which is attached to this Resolution.

PASSED and APPROVED on 11/15/2022

Approved:

Lioneld Jordan, Mayor

CITY OF FAYETTEVILLE ARKANSAS

CITY OF FAYETTEVILLE
AMERICAN RESCUE PLAN ACT
2022 SUBRECIPIENT GRANT APPLICATION

NOTE: Submission of a Subrecipient Grant Application provides no guarantee that the applicant will receive funding. All organizations selected to receive funds will be subject to entering into a contract with the City of Fayetteville and subject to the rules and regulations pertaining to the American Rescue Plan Act.

Please review the City of Fayetteville American Rescue Plan Act 2022 Subrecipient Grant Application Guide for more information on the required items listed in this application.

PART 1 APPLICANT IDENTIFICATION	
Total Amount of Funding Requested (whole dollar) [Minimum $50,000]	$686,500
Applicant/Organization Name	Peace at Home Family Shelter
Mailing Address (street, city, zip)	PO Box 10946, Fayetteville, AR 72703
Organization Website	www.peaceathomeshelter.org
DUNS Number	029494593
Organization FEIN/SSN	71-0552563
PART 2 APPLICANT CONTACT INFORMATION	
Contact for Project (name & title)	Teresa Mills, CEO
Contact Phone Number	479-444-8310
Contact Email	tmills@peaceathomeshelter.com
Signature Authority (name, title & email address)	Teresa Mills, CEO tmills@peaceathomeshelter.com
PART 3 PROJECT INFORMATION	
Project Name	Expanding Safe Shelter for Survivors of Domestic Violence
Project Address (street, city, zip)	3045 E Ivey Ln, Fayetteville, AR 72764

PART 3 PROJECT INFORMATION continued	
Is anyone with control over the Organization (i.e. owner, manager, director, board member, or other) or any member of that person's immediate family, an employee or elected official of the City of Fayetteville	◉ Yes ○ No
If Yes, above, please identify person and position with the City	Blake Pennington, Assistant City Attorney (Peace at Home board member)
Project Summary (**brief** synopsis of proposed project)	The ongoing COVID-19 pandemic has made it more difficult and dangerous for victims of domestic violence seeking to flee abusive homes. Peace at Home Family Shelter proposes a renovation project to create 3 additional shelter bedrooms with bathrooms. This will allow Peace at Home to provide safe, emergency shelter to approximately 60 additional adults and children fleeing domestic violence each year.
Describe previous experience in providing similar services	As the first domestic violence shelter in the state of Arkansas, Peace at Home Family Shelter has been providing safe, emergency shelter to survivors of domestic violence and their children since 1979. In addition to safe shelter, Peace at Home also provides housing assistance, counseling, legal services exclusively to survivors of domestic violence and their children. In total, we serve over 1,000 individuals each year.
Programs will typically be funded for a time period not to exceed 12 months from the signed date of the subrecipient agreement. Please describe your organization's ability to plan and utilized requested funds within that timeframe.	The requested project will be for rehabilitation and construction costs in order to increase the physical capacity of our emergency shelter for survivors of domestic violence. We are already working with an architect for this and other projects and would be able to quickly begin construction to meet the limited time frame required.

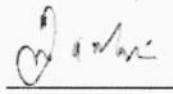
PART 4 PROJECT BENEFICIARIES	
Projected number of **Fayetteville** beneficiaries	60 per year

Because the federal rules vary depending on the type of project for which funds are being requested, the city has grouped project requests in 3 focus categories: Social Services, Economic, and Environmental. Please choose the corresponding category below that most closely identifies your project.

PART 4A **SOCIAL SERVICES APPLICATIONS ONLY**	
Will **ALL** beneficiaries live, work and/or go to school in Fayetteville	◉ Yes ○ No
Will **ALL** beneficiaries meet US Treasury Low to Moderate Income (LMI) Guidelines (please see Application Guide, Exhibit A).	◉ Yes ○ No
Will **ALL** beneficiaries have been negatively impacted by COVID-19	◉ Yes ○ No
Does this request respond to a **negative COVID-19 impact**?	◉ Yes ○ No
If answering Yes to the **question above**, please describe the COVID-19 impact and how this proposal will aid in responding to the impact	COVID-19 has made it more dangerous for victims of domestic violence to flee abusive homes and avoid homelessness. The Final Rule lists victims of domestic violence as a population disproportionately negatively impacted by COVID-19 (page 19). This proposal will increase our community's capacity to provide safe emergency housing for a vulnerable population.
Please indicate how the proposed project meets eligibility standards and requirements described in the Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds	As a project providing emergency housing assistance, this project is enumerated in the Final Rule as eligible to respond to the impacts of the pandemic on households and communities.

PART 4B **ENVIRONMENTAL APPLICATIONS ONLY**	
Please describe the effect of the proposed environmental impact or benefit. Please indicate how the proposed project meets eligibility standards under the EPA's Clean Water State Revolving Fund (CWSRF), Drinking Water State Revolving Fund (DWSRF), or eligible projects as described in Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds. See Subrecipient Application Guide for more information.	
PART 4C **ECONOMIC APPLICATIONS ONLY**	
Please describe the residents or industry sector this grant request is intended to serve or benefit. Please indicate how the proposed project meets eligibility standards and requirements described in the Department of Treasury's Final Rule for Coronavirus State and Local Fiscal Recovery Funds.	This project will exclusively serve survivors of domestic violence and their children in our community. As a project providing emergency housing assistance, this project is enumerated in the Final Rule as eligible to respond to the impacts of the pandemic on households and communities.
Does this request respond to a negative COVID-19 impact	(●) Yes ( ) No
If yes, please describe the COVID-19 impact and how this proposal will aid in the City's economic recovery	COVID-19 has made it more dangerous for victims of domestic violence to flee abusive homes and avoid homelessness. The Final Rule lists victims of domestic violence as a population disproportionately negatively impacted by COVID-19 (page 19). This proposal will aid in the City's economic recovery by meeting temporary housing needs for a vulnerable population so they have the stability to find or maintain employment and permanent housing in our community and achieve self-sufficiency.

PART 5 FAYETTEVILLE BUSINESS LICENSE



City Code Chapter 118 Business Registry and Licenses delineates what businesses are required to have a Fayetteville Business License. Submission of this grant application indicates that, if required, a current business license is in place.

PART 6 SIGNATURE OF SIGNATURE AUTHORITY AND DATE

I am an authorized employee/agent of the applicant organization and I am authorized to submit this application.

I have read and reviewed the American Rescue Plan Act documentation. I understand that as a subrecipient of the City of Fayetteville's American Rescue Plan Act funds, I will be responsible for maintaining records, complying with provisions of the subrecipient agreement, and providing any/all records and information necessary for the City of Fayetteville to report on this award.

All applications and documentation are subject to disclosure pursuant to the Arkansas Freedom of Information Act. All documentation may be provided to Federal and/or State government agencies for accounting and auditing purposes.

PART 7 ORGANIZATION DESCRIPTION Provide a brief description of your organization and the services offered.	
Year of Incorporation	1977
Philosophy, Purpose and/or Mission Statement	The mission of Peace at Home Family Shelter is to empower victims of domestic violence to survive and thrive by nurturing their self-determination and courage and to promote healthy relationships and compassionate communities through education, outreach, and advocacy. Peace at Home Family Shelter believes that everyone deserves to feel safe in their own homes. We operate with an empowerment philosophy centered on the rights of survivors of domestic violence to be the decision makers of their own lives.

Provide a brief description of your organization including information about programs and/or services other than the proposed project.

Peace at Home Family Shelter helps survivors of domestic violence and their children safely escape abusive homes and rebuild their lives. In addition to providing immediate safe shelter, our program connects survivors with the resources they need to transition out of shelter and into long-term safe housing. Our programs have five components working together to help survivors transition from homes of violence to homes of safety.

24 Hour Hotline -- First, Peace at Home operates a 24/7 crisis hotline and email inbox. Our crisis hotline is available in Spanish and English and serves as the entry point for clients. Hotline advocates assist callers with community referrals, safety planning, coming into shelter, and our additional programs. In 2021, we received 1,205 calls from members of our community seeking help.

Emergency Shelter -- The emergency shelter has 14 rooms available for women, men, children, and any person escaping violence. Bilingual staff are available to provide onsite assistance to clients. On average, families stay 45 days in shelter as they work on their individualized goals (90 day maximum stay). Peace at Home was able to provide emergency shelter to 151 individuals in the community in 2021, a reduced capacity due to COVID-19 and renovations to make the shelter safer for families during the on-going pandemic.

Advocacy -- While staying in shelter, clients are offered advocacy services to help them reach their goals. Advocates meet daily with clients to develop and implement self-sufficiency plans.

These plans are built around the current strengths of a survivor and provide steps to achieving long-term goals such as employment or affordable housing.

The purpose is to empower survivors to overcome their unique barriers such as education skill gaps, scarce work histories, unreliable transportation, career planning, affordable child-care, and self-confidence. Peace at Home maintains partnerships with life-skill agencies such as the Credit Counseling of Arkansas and Dress for Success. These agencies provide critical support for the clients to meet the variety of employment and financial goals that they have towards achieving a safe life. The Institute for Women's Policy Research indicates that 73% of respondents said that they had stayed with an abusive partner longer than they wanted or returned to them for economic reasons.

Working together, advocates eliminate barriers that might keep survivors economically or emotionally dependent on a violent partner. These advocacy services are also open to individuals in the community who are not currently living at our shelter but are survivors of domestic violence in need of assistance.

Housing Assistance -- Survivors of domestic violence in our emergency shelter and in our community also have access to support from our Home Restored and SHE housing assistance programs. These program provides direct financial support, landlord advocacy, budgeting skills, and case management to help families find permanent housing in the community that meets their long-term needs. In 2021, Peace at Home was able to provide housing-related assistance to 160 families.

Legal Services -- Peace at Home has an onsite staff attorney and a bilingual advocate to assist shelter residents and outreach clients with legal needs. Our legal services department enables Peace at Home to provide survivors of domestic violence with legal representation for divorce cases, child custody issues, and orders of protection as well as legal advocacy and financial assistance for legal fees. In 2021, Peace at Home provided legal services to 537 clients.

Mental Health/Emotional Support Services - Peace at Home employs a full-time bilingual counselor and partners with the University of Arkansas Doctorate Program in Psychology as a site for doctoral candidates in clinical psychology. These mental health professionals provide one-on-one and parent/child counseling to clients of Peace at Home free of charge. In 2021, Peace at Home provided direct counseling services to 94 individuals in our community.

All of our services are free of charge, personalized to meet individual survivor needs, and voluntary.

PART 8	PROJECT BUDGET Provide a descriptive line-item budget for the entire project including the American Rescue Plan Act (ARPA) funds being requested. **Provide specific information on how American Rescue Plan Act funds will be used and include any necessary supporting documentation. Please indicate whether any American Rescue Plan Act funds have been requested or received from other sources, and if so, provide detailed information on the source and proposed use of those funds.** Please indicate how you will spend all awarded ARPA funding by the project end date.

Peace at Home Family Shelter - Rehabilitation Project to Add Capacity

Budget (based on estimates received from WER Architects):
Construction:
1000 sf ($235 per sf renovation costs) - $235,000
1250 sf ($300 per sf building addition costs) - $375,000
Escalation - $18,000
FF&E - $35,000
Design/Engineering/Surveys/Geotech - $23,500

TOTAL PROJECT BUDGET: $686,500

Spending by Project Date - The requested funds will be for a building rehabilitation project and will be expensed within the project timeline on the above line items.

Other ARPAR Requests - Peace at Home Family Shelter has requested $25,000 in ARPAR funding from the Emergency Food and Shelter Program to support emergency shelter operations.

PART 9	PROJECT DESCRIPTION Describe the proposed project and provide the information requested under PART 9 of the American Rescue Plan Act 2022 Subrecipient Application Guide. Please provide any additional information that will assist in evaluating the project.

What Project Will Do

This project will increase the capacity of the emergency shelter for survivors of domestic violence by renovating and expanding a section of the existing shelter building to add three additional client rooms and bathrooms. This project will involve converting an existing storage space into client rooms while expanding out to replace the lost storage. Currently, Peace at Home Family Shelter has capacity for up to 14 households (survivors and their children) at the emergency shelter (40-55 people). This project would permanently increase that capacity to 17 households. Allowing approximately 60 additional individuals to access emergency shelter every year.

COVID-19 has negatively impacted victims of domestic violence, as many individuals have lost employment and social supports to help them successfully leave abusive relationships. In 2022, Peace at Home received 1,205 calls from individuals seeking support in our community, an increase from pre-pandemic 2019 numbers of 24%.

As more individuals are requesting shelter services, Peace at Home Family Shelter also had to change shelter operations due to COVID-19. Now, clients no longer share rooms or bathrooms to help prevent the spread of illness. While this change was necessary to protect the health of families in shelter, it reduced capacity for emergency shelter. The completion of this project will recover lost capacity and allow Peace at Home to safely shelter more families. Peace at Home operates with a waiting list for emergency shelter due to insufficient capacity and high community need.

This project is in alignment with the City of Fayetteville's Master Plan goals #1 and #6 as it involves the rehabilitation of an existing building and increasing access to housing.

Execution of Project

This is a building rehabilitation project that will involve the addition of three additional family rooms to Peace at Home's emergency shelter. If approved for funding, the construction would take place within the 12-month timeframe and services would continue for families residing in the newly expanded shelter. Peace at Home Family Shelter is already working with WER Architects on this project and, if approved for funding, would be able to complete the rehabilitation within the required time frame.

How Beneficiaries are Selected

Peace at Home Family Shelter advertises and operates a 24-hour crisis hotline, email help address, and limited online chat for individuals in the community to reach out to us for assistance.

PART 9 PROJECT DESCRIPTION continued

When a person contacts us for services, our only requirement is that they are a survivor of domestic violence and have a need for services. For the emergency shelter, someone must be either fleeing intimate partner violence or homeless as a result of recent intimate partner violence. Our emergency shelter program defines 'recent' as within the past three months. Per best practices laid out by the National Network to End Domestic Violence, no additional verifications are required. When a new client arrives at the shelter, they complete intake paperwork with an advocate.

Services Provided

In addition to meeting immediate needs for shelter, each emergency shelter client is assigned to a primary advocate who works with them to identify and work towards individualized goals for self-sufficiency and recovery from domestic violence. These goals can include: acquiring permanent housing, increasing income, rebuilding social support networks, legal needs, and mental wellbeing. Many of these needs can be addressed through Peace at Home's in-house programs, but advocates also offer robust community referrals to help clients connect with the community at large.

Verification of Final Rule Qualification

As a project providing emergency housing, this project is an enumerated in the Final Rule as a qualifying project. While there is no income requirement for emergency shelter services for victims of domestic violence, anyone seeking shelter at a domestic violence organization is considered homeless under Housing and Urban Development (HUD) Category 4 definition and is a presumed benefit clientele population assumed to be Low to Moderate Income according to Community Development Block Grant HUD regulations.

Benefit of Project – Limited Assistance and Creating Self-Sufficiency

This project will enhance Peace at Home Family Shelter's capacity to provide immediate, life-saving emergency shelter to survivors of domestic violence and their children at a time when survivors are more in need of shelter and our capacity has been reduced (both because of the ongoing COVID-19 pandemic). In addition to this immediate assistance, the individualized advocacy provided to all residents of Peace at Home's emergency shelter allows individuals to work towards and obtain self-sufficiency and thrive in our community.

How Project will Further Philosophy and Purpose

This project will further Peace at Home Family Shelter's philosophy and purpose by increasing our capacity to provide client-centered safe shelter and supportive services to survivors of domestic violence and their children in our community. With increased capacity, our emergency shelter can serve more families in need every day and help make our community a safe and thriving place for all of our neighbors.

PART 10	PROJECT TIMELINE Provide a complete and specific timeline for all activities related to proposed project.

Project Timeline

Upon Award Notification (0-3 months) - Finalize design details with WER Architects, receive bids from construction contractors and select a contractor for the project.

3 Months-9 Months into Project - Complete construction and renovation of shelter space to add 3 additional client rooms with bathrooms and replace storage area.

9 Months - 12 Months (if not completed sooner) - Ensure all construction is completed and payments are processed. Acquire and install all necessary furniture, fixtures, and equipment. Complete inspection. Open rooms up to survivors of domestic violence seeking safe shelter.

PART 11 DATA COLLECTION, RECORD MAINTENANCE, AND REPORTING Describe how the organization will collect data and maintain records to track program activities and eligibility verification. Please also describe your organization's ability to produce required documentation including financial reports, performance reports, progress reports, expenditure information, etc.

Data Collection and Maintenance:

Peace at Home Family Shelter utilizes a database system built for victim service organizations by Osnium called WomensShelter for all client and program tracking information, including program activities and client eligibility. This database is used to generate reports for any grant requirements and to assess program effectiveness. Data is collected by advocate staff members of Peace at Home at intake and on an ongoing basis throughout the client's stay.

Organizational Capacity

Peace at Home has extensive experience managing federal grants, including grants as a recipient and sub-recipient from the Department of Justice, Department of Health and Human Services, and the Department of Housing and Urban Development.

Peace at Home employs a full-time Chief Financial Officer (CFO) to oversee all finances, including financial reporting for grants. The CFO is a certified public accountant and successfully manages all necessary reporting for grants and ensure appropriate accounting for all restricted funding.

PART 12 PROJECT EVALUATION | OBJECTIVES AND OUTCOMES List the objectives (not activities) of the proposed project. Describe how each objective will be measured to determine if it has been met.

Use the following format

Objective #:
Outcome(s):
Method of Measurement:

Objective: More survivors of domestic violence and their children have access to safe, emergency housing in order to flee abusive homes.

Outcome: 60 more individuals will receive safe shelter in the 12 months following completion of the rehabilitation than in the 12 months previous, increasing the shelter's capacity by 25%.

Method of Measurement: Shelter stays are logged in our database system and the previous 12 months before the rooms were added can be compared to a period of time after the additional rooms are opened to measure an increase in capacity for safe shelter.

Objective: More survivors of domestic violence will have access to individualized advocacy and support to help them overcome barriers to independence.

Outcome: Peace at Home advocates will provide an average of 14 hours of individualized advocacy services to each household staying in the shelter, providing support in commonly identified needs, including: safety planning, emotional support, resource referrals, legal support, budgeting, and transportation.

Method of Measurement: Hours of advocacy services are logged in the database system and can be pulled in aggregate for all shelter clients.

PART 13 PARTIAL FUNDING Indicate whether the project can proceed with partial funding. If **YES**, indicate the minimum amount the applicant will accept with line items arranged from highest to lowest priority. Describe the impact that partial funding will have on the project. If **NO**, the project will not be considered for partial funding.

Yes, the project could proceed with partial funding. Given the limited 12-month time frame, the project would need to be funded at a minimum of 75% in order to move forward. The impact of partial funding could potentially be redirecting needed funds away from important programs serving survivors of domestic violence in our community in order to fill the budget gap and move forward.

Line Item Breakdown - All line items are equally necessary for funding as all are necessary aspects of the rehabilitation project.

PART 14 ADDITIONAL DOCUMENTATION CHECKLIST

Please provide these items with your application. See page 10 of the 2022 American Rescue Plan Act Subrecipient Application Guide for more information

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-769

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Susan Norton, Chief of Staff

FROM: Alison Jumper, Director of Parks, Natural Resources and Cultural Affairs

SUBJECT: **Approval of a Conservation Easement**

RECOMMENDATION:
Resolution to approve a conservation easement on 98 acres located on Deadhorse Mountain Road jointly owned by the City and Watershed Conservation Resource Center.

BACKGROUND:
The City Council passed Resolution 97- 19 on April 16, 2019 that approved a Land Purchase, Use and Conservation Contract with the Watershed Conservation Resource Center (WCRC). This contract was for the joint purchase of about 98 acres of land near Dead Horse Mountain Road for the purpose of conservation, restoration, and enhancement to provide water quality improvements and protection of the Beaver Lake Watershed and to provide recreational benefits to the citizens of Fayetteville and requires placing the majority of the property into a conservation easement.

DISCUSSION:
Per the contract requirement, WCRC, the Northwest Arkansas Land Trust, and the City have collaboratively developed conservation easement language that supports the original intent of the land purchase and allows for the use of limited improvements including visitor facilities, boat launch facilities, fences, wildlife viewing structures and indigenous shelters, access drives, one shared-use paved trail connecting to the citywide network, and one shared-use paved trail provide access to a boat launch area, other trail signage and facilities such as benches, picnic tables, etc, and utility improvements. Further, the easement allows for certain actives and uses consistent with conservation purposes such as demonstration gardens, maintenance, invasive removals, etc.

WCRC has reviewed and approved the easement language. The easement will be presented to the NWALT Board for approval on November 21st for signal approval. A signed copy will be included in the final council packet.

BUDGET/STAFF IMPACT:
None

Approval of a Conservation Easement

A RESOLUTION TO AUTHORIZE MAYOR JORDAN TO SIGN A GRANT OF CONSERVATION EASEMENT AND DECLARATION OF COVENANTS FOR 98 ACRES LOCATED ON DEAD HORSE MOUNTAIN ROAD

WHEREAS, on April 16, 2019 City Council passed Resolution 97-19 that approved a Land Purchase, Use, and Conservation Contract with the Watershed Conservation Resource Center (WCRC); and

WHEREAS, that contract was for the joint purchase of about 98 acres of land near Dead Horse Mountain Road for the purpose of conservation, restoration, and enhancement to provide water quality improvements and protection of the Beaver Lake Watershed and to provide recreational benefits to the citizens of Fayetteville and requires placing the majority of the property into a conservation easement; and

WHEREAS, pursuant to a requirement of the contract, WCRC, the Northwest Arkansas Land Trust, and the City have collaboratively developed a conservation easement that supports the original intent of the land purchase and allows for the construction of limited improvements including visitor facilities, boat launch facilities, fences, wildlife viewing structures and indigenous shelters, access drives, one shared-use paved trail connecting to the citywide network, and one shared-use paved trail provide access to a boat launch area, other trail signage and facilities such as benches, picnic tables, and utility improvements; and

WHEREAS, the easement also allows for certain activities and uses consistent with conservation purposes such as demonstration gardens, maintenance, and invasive removals.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign a Grant of Conservation Easement and Declaration of Covenants, a copy of which is attached to this Resolution, and all other documents necessary for the preservation of 98 acres of environmentally sensitive land located on Deadhorse Mountain Road.

GRANT OF CONSERVATION EASEMENT AND DECLARATION OF COVENANTS

THIS GRANT OF CONSERVATION EASEMENT AND DECLARATION OF COVENANTS (the **"Conservation Easement"** or "**Easement**") dated this _____ day of _____, 2024, but effective for all purposes as of the Effective Date (defined herein,) is entered into by and between **WATERSHED CONSERVATION RESOURCE CENTER,** an Arkansas nonprofit corporation ("**WCRC**"); the **CITY OF FAYETTEVILLE, ARKANSAS**, a duly constituted municipality under the laws of the State of Arkansas (the "**City**" and together with WCRC, the "**Owner**"), which shall include any successor in interest to any Owner executing this Easement, and the **NORTHWEST ARKANSAS LAND TRUST**, an Arkansas non-profit corporation ("**Holder**"), and is granted for the Conservation Purposes of the Property (both hereinafter defined). Owner and Holder are sometimes referred to in this Easement as "**Parties**".

ARTICLE I
BACKGROUND

1.01 Defined Terms. Initially capitalized terms not defined in this Article I are defined in Article IX.

1.02 Protected Property. Owner owns in fee simple certain real property, located in Washington County, Arkansas as more particularly described in Exhibit "A" attached hereto (the "**Property**"), and desires to grant and convey to Holder an unconditional and perpetual easement upon the Property for the Conservation Purposes described in Section 1.03. There are two areas included within the outside boundary of the Property that are not included in the Property, which are also described in Exhibit A. The two excluded areas are referred to herein as "**Excluded Areas**."

1.03 Easement; Covenants.

(a) **Easement**. By this Easement, Owner grants and conveys to Holder an unconditional and perpetual easement upon the Property for the Conservation Purposes described below (the "**Conservation Purposes**"). The Conservation Easement authorizes Holder to prevent and terminate activities, uses, and Improvements inconsistent with the Conservation Purposes. Article VI more fully describes the rights this Easement vests in Holder. It is the purpose of the Owner and Holder to avail themselves of the provisions of the Arkansas Conservation Easement Act, Ark. Code Ann. § 15-20-401 *et seq.*, without intending that the existence of this Conservation Easement be dependent on the continuing existence of that law.

(b) **Owner Covenants**. By this Easement, Owner, in furtherance of the Conservation Purposes, establishes covenants binding upon Owner's interest in the Property, which are set forth in Articles II through Article III. Article VII addresses potential violation of these covenants and remedies.

(c) **Holder Covenants**. By this Easement, Holder accepts the Conservation Easement and, in furtherance of the Conservation Purposes, establishes covenants binding upon Holder's easement interest in the Property, which are set forth in Article VI.

1.04 Easement Plan. Exhibit "B" is a graphic depiction of the Property subject to the Easement (the "**Easement Plan**") showing, among other details, the boundaries of the Property, including the boundaries of the Excluded Areas.

1.05 Conservation Purposes. Generally, the Conservation Purposes of this Conservation Easement are (i) to protect the "**Conservation Values**" (hereinafter defined and described), and other significant conservation interests (except to the extent it is necessary to impair such other conservation interests to protect the Conservation Values); (ii) to limit the use of the Property to those uses and activities that are consistent with such Conservation Values and interests; and (iii) to foster compatible educational and Passive Recreational Use of the Property.

In terms of the conservation purposes identified in Code Section 170(h)(4) the Conservation Purposes of this Easement include: (1) the protection of relatively natural habitats of fish, wildlife, and plants; (2) the preservation of Open Space for the scenic enjoyment of the public yielding a significant public benefit; and (3) the preservation of Open Space pursuant to clearly delineated governmental conservation policies yielding a significant public benefit.

More specifically, the Conservation Values and related Conservation Purposes, include the following, and are further detailed in the Baseline Documentation Report described in Article I, Section 1.06.

(a) **Resource-Specific**.

(i) **Water Resources**. The Property includes approximately 2,020 feet of the West Fork White River (WFWR), and numerous feet of unnamed tributary (including over-flow channels along the WFWR) and riparian forest and approximately 36 acres of wetlands including the spring-fed pond. Lands in the WFWR sub watershed are identified as a high priority for land conservation in the Beaver Lake Watershed Protection Strategy approved by the U.S. Environmental Protection Agency (EPA). It is among the Conservation Purposes to maintain and improve these water resources, both surface and groundwater, within, around, and downstream from the Property, particularly the protection of water quality of Beaver Lake, a Corps of Engineers impoundment that is a public source of drinking water and popular for boating, fishing, and swimming.

(ii) **Biological Resources**. It is among the Conservation Purposes to protect and improve the quality of relatively natural habitat of fish, wildlife, or plants, or similar ecosystems, including animals, fungi, other organisms, and particularly Native Species.

(iii) **Soil Resources**. It is among the Conservation Purposes to prevent the loss and depletion of soil on the Property.

(iv) **Local and Regional Conservation Plans.** The Property is identified as a conservation priority in the City of Fayetteville's Enduring Green network and the Northwest Arkansas Open Space Plan.

(v) **Ecosystem Services**. The property contributes to the resiliency and functioning of natural processes important to human systems, to retain, detain, and disperse stormwater runoff, thus mitigating erosion and flooding downstream of the Property, and to sequester carbon in plants and soil to mitigate rising atmospheric carbon levels.

1.06 Baseline Documentation. The specific Conservation Values of the Property and its use and state of Improvement as of the Effective Date are further documented in a Baseline Documentation Report (the "**Baseline Documentation Report**" or "**Report**") prepared by Holder and to be kept at the principal office of Holder. As of the Effective Date, Owner and Holder have signed an acknowledgement that the Report is complete and accurate. The Report includes reports, maps, photographs, and other documentation, to be used by Holder to assure that any future changes in the use of the Property will be consistent with the terms of this Conservation Easement. Notwithstanding the foregoing, the Report shall not be used to preclude the use of other evidence to establish additional Conservation Values or conditions on the Property now or in the future. The Report is incorporated by reference herein as if restated in full.

1.07 Consideration. Owner acknowledges receipt, as of the Effective Date, of good and valuable consideration for this Easement, including, but in no way limited to, the public benefit obtained, the covenants set forth in Article VII, and perpetual satisfaction of the Conservation Purposes. Notwithstanding the foregoing, Owner has received no monetary or other tangible economic benefit from Holder in exchange for the donation of this Conservation Easement.

1.08 Superior to all Liens. Owner warrants to Holder that the Property is, as of the Effective Date, free and clear of Liens or, if it is not, that Owner has obtained and recorded in the Public Records the legally binding subordination of the Liens affecting the Property as of the Effective Date.

ARTICLE II
TRANSFER; SUBDIVISION

2.01 Prohibitions. Owner is prohibited from taking the following actions, except as may be specifically permitted in Section 2.02. Owner may not:

(a) **Transfer of Portion of Property**. Transfer any part of the Property separate from any other part of the Property to any party other than WCRC or the City;

(b) **Subdivision**. Change the boundary of the Property or Subdivide the Property for the benefit of any party other than WCRC or the City;

(c) **Transfer of Density**. Except as necessitated by the Mitigation Activities allowed under Section 3.02(c), use the acreage protected under this Easement to increase allowable density or intensity of development within the Property or outside of the Property;

(d) **Transfer of Rights**. Except as necessitated by the Mitigation Activities allowed under Section 3.02(c), transfer development rights or other rights granted or allocated to the Property in support of development outside the Property;

(e) **Mining Prohibited**. Mine or permit any mining by surface, subsurface, or any other means anywhere on the Property; or

(f) **Compliance with Conservation Purposes.** Exercise any reserved right, or undertake any permitted use, in a manner that is inconsistent with the Conservation Purposes.

2.02 Permitted Changes. Owner is permitted to undertake the following uses and activities:

(a) **Lots within Property**. Merge two (2) or more Lots into one (1), or, subject to Review, reconfigure one (1) or more of the boundaries of such Lots, as long as the boundary of the Property as described in Exhibit "A" remains unchanged;

(b) **Transfer to Qualified Organization**. Subject to Review, create and transfer a Lot to a Qualified Organization for park, nature preserve, public trail, or other conservation purposes approved by Holder;

(c) **Transfer of Rights of Possession or Use**. Transfer of possession or use (but not ownership) of one or more portions of the Property for purposes permitted under, and subject to, compliance with the terms of this Easement. Tenants and lessees must comply with the applicable provisions of this Easement;

(d) **Conveyance of the Property**. To convey or devise the Property as a whole, subject to the provisions of this Easement; and

(e) **New Liens**. To place New Liens on the Property, provided that all such liens are subordinate to the provisions of this Easement.

2.03 Requirements.

(a) **Establishment of Lots for Transfer to a Qualified Organization; Allocations**. Prior to transfer of a Lot following a Subdivision to a Qualified Organization, Owner must (i) furnish Holder with the plan of Subdivision approved under Applicable Law and legal description of each Lot created or reconfigured by the Subdivision; (ii) mark the boundaries of each Lot with permanent markers; and (iii) allocate in a document recorded in the Public Records those limitations applicable to more than one Lot under this Easement. This information will become part of the Baseline Documentation Report incorporated into this Easement.

(b) **Amendment**. Holder may require Owner to execute an Amendment of this Easement to reflect a change to the description of the Property set forth in Exhibit "A," or other changes and allocations resulting from Subdivision, that are not established to the reasonable satisfaction of Holder by recordation in the Public Records of the plan of Subdivision approved under Applicable Law.

ARTICLE III
IMPROVEMENTS; ACTIVITIES AND USES

3.01 Improvements. Improvements are prohibited except as permitted in this Section 3.01.

(a) **Existing Improvements**. Existing Improvements, identified in Exhibit "B" and the Baseline Documentation Report, may be maintained, repaired, and replaced in their existing locations. Existing Improvements may be expanded or relocated if the expanded or relocated Improvement complies with requirements applicable to Additional Improvements of the same type. Existing Access Drives south of the West Fork White River may be expanded and rerouted in the Wet Area (the "Wet Area") identified in Exhibit "B" and described in Exhibit "C" to provide access to the West Fork White River.

(b) **Additional Improvements**. The following Additional Improvements are permitted:

(i) **Visitor Facilities.** The following visitor facilities are permitted provided they are located outside the Wet Area and so long as the size and location of such facilities are consistent with the Conservation Purpose of this Easement.

1) Visitor Exhibit Hall;[1]

2) Bathroom facilities;

3) Parking facilities for members of the public using the Property. Parking facilities must be constructed with Low Impact Design techniques,

[1] Architectural rendering included in Baseline Documentation Report as record of prototype.

4) No more than five (5) mobile food and beverage vendors;

5) One (1) storage structure for recreational equipment; and

6) Other structures and improvements that support education, recreation, or resource management, subject to Holder's approval at the sole discretion of the Holder.

(i) **Boat Launch Facilities**. Subject to Review, boat launch facilities on the pond, one boat launch on the West Fork White River, and accompanying boat houses for non-motorized boats only. Any permitted boat launching area must be designed to prevent erosion.

(ii) **Fences.** New fences and gates may be built on the Property for purposes of reasonable and customary access control and protection of resources, provided fencing does not substantially diminish or impair the Conservation Values. Fencing shall minimize adverse effects of fragmentation of habitat and facilitate the movements of wildlife across the Property;

(iii) **Wildlife Viewing, Habitat Structures, and Indigenous Shelters**. A reasonable number of wildlife viewing platforms, bird blinds, bird viewing towers[1], habitat enhancement devices, such as bat boxes and bird houses, indigenous shelter replicas or mounds;

(iv) **Access Drives**. Subject to Review, Access Drives (i) must not exceed thirty (30) feet in width, (ii) shall be located and constructed to protect the Conservation Purposes, (iii) should utilize existing road beds where possible, and (iv) shall incorporate Best Management Practices to manage erosion and stormwater runoff. Additional Access Drives are prohibited in the Wet Area unless otherwise approved by Holder.

(v) **Trails**. The location and density of trails shall be designed in a manner consistent with the Conservation Purposes. The following trails are permitted:

(1) Trails for pedestrian and non-motorized vehicle use constructed of (a) native, mowed grasses, or (b) wood chips, boardwalks, or other highly porous, natural, noninvasive material.

(2) One (1) shared-use paved trail connecting to the regional multiuse trail provided trail design plans are provided to the Holder prior to Construction.

(3) One (1) shared-use paved trail providing access to the boat launch on the West Fork White River provided trail Construction plans are provided to the Holder prior to Construction.

[1] Architectural rendering included in Baseline Documentation Report as record of prototype.

(4) Subject to Review, paved or pervious walkways approved by the Holder.

(vi) **Trail Signage**. Trails may only include signs to mark the trail, to provide information regarding restrictions, and for educational and interpretive purposes. Signage shall be unobtrusive in nature and designed with the express goal of minimizing impact to the vistas and Open Space nature of the Property.

(vii) **Trail Facilities**. Trails may include benches, picnic tables, wastebaskets, light fixtures, and bicycle racks, as may be deemed necessary. All other trail facilities are subject to Review. The design, location and density of trail facilities shall be architecturally consistent with the natural setting of the Property and designed with the express goal of minimizing impact to ecologically significant areas, including the Wet Area and species of special concern, and ensuring the vistas and Open Space nature of the Property.

(viii) **Utility Improvements**. Utility Improvements are permitted but must be underground or, subject to Review, may be aboveground where it is not reasonably feasible to install them underground.

3.02 Activities and Uses. Activities and uses are prohibited except as permitted below in this Section 3.02 and provided in any case that: (i) the intensity or frequency of the activity or use does not materially and adversely affect maintenance or attainment of Conservation Purposes, and (ii) no Invasive Species are introduced.

(a) **Resource Management and Disturbance**. The following activities and uses are permitted:

(i) Construction or other disturbance of resources, including cutting of trees, only to the extent reasonably prudent to remove, mitigate, or warn against an unreasonable risk of harm to Persons, their belongings, or health of Native Species on or about the Property.

(ii) Removal of Invasive Species;

(iii) Planting, replanting, and maintaining Native Species;

(iv) Construction of permitted Improvements with prompt restoration of soil and vegetation disturbed by such activity;

(v) Stream, wetland, and riparian restoration and habitat enhancement conducted in accordance with the approved WFWR Mitigation Bank Instrument Modification NO. SWL2012-00397-2 or other Resource Management Plan to be provided to the Holder.

(vi) Prescribed burns conducted in accordance with a Resource Management Plan approved by the Holder after Review.

(vii) Owner may use, or permit the use of, service vehicles and motorized equipment on the Property provided that:

(1) The use of such vehicles is reasonable and necessary for maintenance, security and/or emergency access to the Property, or for providing access to people with disabilities.

(2) Vehicles take care to avoid ecologically significant areas and species of special conservation concern on the Property.

(viii) Cutting or removing trees is permitted only as part of a Resource Management Plan and only trees greater than 6-inch diameter need to be approved by the Holder for the purposes of maintaining and improving natural areas and the ecological function of the Property.

(ix) Application of manure and plant material, both well composted, and, subject to compliance with manufacturer's recommendations, other substances to promote the health and growth of vegetation. These permitted substances do not include sewage sludge, industrial sludge, biosolids, septic system sludge or effluent, and related substances;

(x) Piling of brush and other vegetation to the extent reasonably necessary to accommodate permitted activities or uses.

(xi) Maintaining existing open areas in an open and unforested condition, by mowing, brush hogging, grazing, and removal of woody regeneration;

(xii) Design, construct, and maintain demonstration gardens for educational purposes and/or habitat improvement, including but not limited to rice fields, fruit and nut groves, vegetable gardens, and pollinator gardens. Demonstration gardens must contain continuous vegetative cover to protect the soil from erosion.

(xiii) Other activities that Holder, without any obligation to do so, determines are consistent with Conservation Purposes and are conducted in accordance with a Resource Management Plan or other plan approved for that activity after Review.

(c) **Mitigation Activities.** Owner may grant one (1) or more mitigation easements on portions of the Property to be subject to the Mitigation Activities ("Mitigation Areas"), and Owner or agents of Owner may undertake Mitigation Activities within such Mitigation Areas, and allow access to such areas across the Property as necessary to conduct such Mitigation Activities.

(i) Holder grants the right of Owner to conduct stream and wetland Mitigation Activities, including activities in the Existing WFWR Mitigation Bank Instrument Modification NO. SWL2012-00397-2. The Owner shall provide written notice to Holder prior to conducting New Mitigation Activities, including the grant of New mitigation easements or agreements, which notice shall include a copy of the mitigation easement or agreement. Owner also agrees to provide written notice to Holder prior to commencement of any New Mitigation Activities on the Property and to provide Holder with a copy of the mitigation plan or nutrient bank plan, and any amendments thereto, prior to commencement of the Mitigation Activities, or activities provided for in any amendment of the plan.

(ii) Owner retains the exclusive and sole rights to any payment for, or other benefits resulting from, the grant of a mitigation easement or nutrient bank agreement on the Property and for undertaking of any Mitigation Activities as reserved in this Section 3.02(c).

(iii) Holder is not responsible for monitoring any Mitigation Activities and has no obligation to enforce the provisions of any permit(s), restriction(s), or easement(s) therefor, other than the provisions of this Easement.

(d) **Cultural Rights.** Owner retains the right to grant cultural access to Indigenous communities, including but not limited to easements, licenses, and other interests for cultural activities such as harvesting native plants, ceremonies, and educational events.

(e) **Public Use and Access.** Public access and use of the Property for the purpose of passive outdoor recreational activities and educational outreach to enhance quality of life is permitted.

ARTICLE IV
INTENTIONALLY OMITTED

ARTICLE V
INTENTIONALLY OMITTED

ARTICLE VI
RIGHTS AND DUTIES OF HOLDER AND BENEFICIARIES

6.01 Holder Covenants. In support of the Conservation Purposes, Holder declares the following covenants binding upon its easement interest in the Property:

(a) **Exercise of Powers**. Holder must exercise the powers granted to it by this Easement to prevent and terminate activities, uses, and Improvements of the Property inconsistent with the Conservation Purposes;

(b) **Must be Qualified Organization**. Holder must be and remain at all times a Qualified Organization and must not transfer this Conservation Easement or otherwise assign its rights or responsibilities under this Easement to a Person other than a Qualified Organization committed to upholding the Conservation Purposes; and

(c) **Proceeds Used for Conservation Purposes**. Holder must use any funds received on account of the release, termination or extinguishment of this Conservation Easement in whole or in part in furtherance of its charitable conservation purposes;

6.02 Rights and Duties of Holder. The items set forth below are both rights and duties vested in Holder by this Easement:

(a) **Protect in Perpetuity**. To protect the Conservation Purposes of the Property in perpetuity;

(a) **Enforcement**. To enter the Property to investigate a suspected, alleged or threatened violation of the provisions of this Easement and, if found, to enforce the terms of this Easement by exercising Holder's remedies in this Easement. No prior Notice to Owner is required for entry on the Property by Holder when Holder, in good faith, believes such entry is necessary to terminate a violation or prevent a threatened violation which would significantly impair any Conservation Value. However, Holder shall first attempt to reach Owner by phone or email prior to such entry, and then provide a written explanation to Owner of the reason for such entry and a description of any actions taken immediately after such entry.

(b) **Inspection**. To enter and inspect the Property for compliance with the requirements of this Easement in a reasonable manner and at reasonable times;

(c) **Review**. To exercise rights of Review in accordance with the requirements of this Section; and

(d) **Interpretation**. To interpret the terms of this Easement and, at the request of Owner, furnish Holder's explanation of the application of such terms to then-existing, proposed, or reasonably foreseeable conditions within the Property.

6.03 Amendment and Holder's Discretionary Approval Background. Owner and Holder have determined, in good faith, the limitations of any permissible modifications hereto. Owner and Holder recognize that natural conditions, landscapes, uses and technologies change over time. Holder and Owner recognize that unforeseen or changed future circumstances may arise which makes it beneficial or necessary to take certain action in order to ensure the continued protection of the Conservation Purposes of the Property and to guarantee the perpetual nature of this Conservation Easement. Additional proposed activities may require the exercise of discretion by Holder, as further described below. This Section therefore ensures that the Holder protects the Conservation Purposes of the Property in perpetuity.

(a) **Purpose.** If approved by the Holder in its sole discretion, Owner and Holder have the right to modify this Easement. Holder may exercise its discretion in accordance with the

provisions and limitations of this Section. Holder has no obligation to agree to any modification of this Easement. No modification shall adversely affect the perpetual duration of this Easement or the perpetual protection of its Conservation Purposes.

(b) **Amendment Requirements**. Holder shall not consent to any amendment of this Easement unless Owner submits a written request for Amendment pursuant to Holder's existing amendment policy and such proposed Amendment qualifies under Holder's policy then in effect respecting conservation easement amendments. The effect of such Amendment shall enhance, or at least be neutral with respect to the Conservation Purposes of this Easement, shall comply with Code Section 170(h) and any Regulations promulgated pursuant to such section, shall comply with all applicable federal, state and local laws, shall be consistent with Holder's public mission, shall not jeopardize the Holder's tax-exempt status or status as a charitable organization under federal or state law, and shall not result in private inurement or confer impermissible private benefit. Owner and Holder may amend this Easement to be more restrictive to comply with the provisions of Code Section 2031(c). Holder may require subordination of any Lien arising after the Effective Date as a condition of permitting any substantive Amendment to this Easement.

(c) **General**. Holder and Owner shall have no power or right to agree to any activity, use or structure that would (i) result in the extinguishment in full of this Easement; (ii) adversely affect the perpetual nature of this Easement; (iii) adversely affect the qualification of this Easement or the status of Holder under any Applicable Laws, including Code Sections 170(h), 501(c)(3), and the laws of the State of Arkansas; or (iv) result in either impermissible private benefit or inurement to any party. For purposes of this Section, the terms impermissible private benefit and inurement shall have the same meanings ascribed to them in Code Section 501(c)(3) and associated Regulations.

(d) **Discretionary Acts.** Subject to the conditions and circumstances set forth below, Holder may consent to activities, structures or uses, issue waivers or licenses, or otherwise exercise discretion where this Easement is silent or ambiguous. Because of unforeseen or changed circumstances, if an activity, structure or use that is not expressly permitted under this Easement is deemed beneficial or necessary by Owner, Owner may request, and Holder may in its sole discretion grant, permission for such activity, structure or use without resorting to the formalities of Holder's amendment policy and process, subject to the following limitations: (i) such request for Holder's consent shall be made in writing and shall describe the proposed activity, structure or use in sufficient detail to allow Holder to evaluate the consistency of the proposed activity, structure or use with the preservation and protection of the Conservation Purposes; (ii) Holder may grant its consent only if it determines, in its sole discretion, that (A) the performance of such activity or activity or Construction of such structure is, in fact, beneficial or necessary; and (B) such activity, structure or use (x) shall not result in private inurement or confer impermissible private benefit, (y) results in neutral or enhanced Conservation Purposes of this Easement, and (z) does not violate the terms of this Easement. Owner shall not engage in the proposed activity, structure or use unless and until Owner receive Holder's approval in writing.

(e) **Costs**. If Owner is the party requesting an Amendment of, or discretionary approval pursuant to, this Easement, Owner shall be responsible for all reasonable and customary fees and costs related to Holder's evaluation of said request and an Amendment's execution, including

reasonable attorney's fees and costs, staff, contractor, legal, expert, and consultant fees and costs, and any costs associated with any updated Baseline Documentation Report prepared pursuant to the provisions of this Section.

(f) **Updated Baseline Documentation**. In the event Owner and Holder agree to an Amendment or discretionary approval pursuant to this Section that results in alterations to the Property, then the Baseline Documentation Report shall be supplemented appropriately to reflect the scope, scale and intensity of the alterations. The supplement shall be acknowledged by Owner and Holder to memorialize the condition of the Property as of the date of the Amendment or discretionary approval.

(g) **Recording.** Owner and the Holder shall execute any Amendment approved after following the procedures in this Section, and the revised document shall be recorded in the Public Records.

(h) **Form**. Any modification that Holder determines, in its sole discretion, to be beneficial or necessary shall be in the form of either (i) an Amendment, in the case of a permanent modification of this Easement, including but not by way of limitation, a clerical or technical correction or modification of a reserved right; or (ii) a discretionary approval, waiver or consent in the case of a temporary activity or impact relating to the maintenance or management of the Property which does not require a permanent modification of this Easement. All Amendments and discretionary approval, waiver or consent shall be subject to this section. Nothing in this Section, however, shall require Owner or Holder to agree to any Amendment or discretionary approval, consent, or waiver.

6.04 Other Rights of Holder. The items set forth below are also rights vested in Holder by this Easement. However, Holder, in its discretion, may or may not exercise them:

(a) **Signs**. To install one or more signs within the Property identifying the interest of Holder in this Conservation Easement. However, such signs will not reduce the number or size of signs permitted to Owner under this Easement. Signs are to be of the customary size installed by Holder and must be installed in locations readable from the public right-of-way and otherwise reasonably acceptable to Owner.

(b) **Proceedings**. To assert a claim, defend, intervene in, or appeal, any proceeding under Applicable Law that (1) pertains to the impairment of Conservation Values; or (2) may result in a transfer, Improvement or use that violates the terms of this Easement.

6.05 Review. The following provisions are incorporated into any provision of this Easement that is subject to Review:

(a) **Notice to Holder**. Unless advanced Notice is waived by Holder, at least 30 days before Owner intends to begin or allow an Improvement, activity, or use that is subject to Review, Owner must: (1) Notify Holder of the proposed Improvement, activity or use, including with the Notice such information as is reasonably sufficient to comply with

Review Requirements and otherwise describe the proposal and its potential impact on the Conservation Purposes, and (2) receive Holder's approval therefor.

(b) **Notice to Owner**. Upon receipt of Owner's Notice, Holder must review the proposed Improvement, activity or use, and Notify Owner of Holder's determination to (i) accept Owner's proposal in whole or in part; (ii) reject Owner's proposal in whole or in part; (iii) accept Owner's proposal conditioned upon compliance with conditions imposed by Holder; (iv) reject Owner's proposal for insufficient information upon which to base a determination; or (v) reject Owner's proposal for inconsistency with the Conservation Purposes. If Holder gives conditional acceptance under clause (iii), commencement of the proposed Improvement, activity, or use constitutes acceptance by Owner of all conditions set forth in Holder's Notice.

(c) **Time for Review**. If requested by Owner, Holder must furnish its estimate of the time required to review the proposed change and use its best efforts and due diligence to Notify Owner of its determination within this time period. Otherwise, Holder must make its determination within thirty (30) days following receipt of Owner's Notice by Holder.

(d) **Failure to Notify**. If Holder fails to Notify Owner as required in the preceding subsection, the proposal set forth in Owner's Notice is deemed disapproved. Because such disapproval is not a decision on the merits by the Holder, it is not final or binding on the Holder and the Owner can re-submit the same or a similar request for approval. Nevertheless, Owner may not undertake any activity or use for which approval has been requested until approval pursuant to this Section 6.05 has been granted by Holder.

(e) **Reasonableness Standard**. Upon review, the phrase "unless Holder, without any obligation to do so," in relation to an approval or determination by Holder, means that, in that particular case, Holder's approval is wholly discretionary. Holder's approval is not to be unreasonably withheld. It is reasonable for Holder to disapprove a proposal that may adversely affect natural resources described in the Conservation Purposes or that is otherwise inconsistent with maintenance or attainment of Conservation Purposes. Owner and Holder shall act in good faith; shall follow a reasonableness standard; shall use their best efforts to act in a timely manner in any determinations that are necessary or are contemplated to be made (either separately or jointly) under this Conservation Easement; shall cooperate with one another; and shall take all other reasonable action suitable to these ends.

6.06 Costs and Expenses. Owner must pay or reimburse Holder's costs and expenses (including Losses, Litigation Expenses, allocated personnel costs, and reasonably incurred liabilities) in connection with: (a) successful judicial enforcement (including exercise of remedies) under the terms of this Easement; and (b) response to requests by Owner for Amendment of this Easement. Owner may, before commencement of Holder's services, request an estimate of the costs and expenses Holder anticipates to incur in responding to Owner's request for any Amendment of this Easement. Owner is not responsible to reimburse costs and expenses arising from Holder's response to an inquiry or request by a Person other than Owner without Owner's approval.

ARTICLE VII.
VIOLATION; REMEDIES

7.01 Violation. If Holder determines that the terms of this Easement have been violated, or that a violation is threatened or imminent, then the provisions of this Section apply:

(a) **Notice**. Holder must Notify Owner of the violation or threatened violation of which it is aware. Holder's Notice may include its recommendation of measures Owner must take to cure the violation and restore features of the Property damaged or altered as a result of the violation.

(b) **Opportunity to Cure**. Owner's cure period expires thirty (30) days after the date of Holder's Notice to Owner subject to extension for the time reasonably necessary to cure, but only if all of the following conditions are satisfied:

(i) Owner ceases the activity constituting the violation or threatened violation promptly upon receipt of Holder's Notice;

(ii) Owner and Holder agree, within the initial 30-day period, upon the measures Owner will take to cure the violation;

(iii) Owner commences to cure within the initial 30-day period; and

(iv) Owner continues thereafter to use best efforts and due diligence to complete the agreed upon cure within the initial 30-day period.

(c) **Imminent Harm**. No Notice or cure period is required if Holder determines that circumstances require prompt action to prevent or mitigate irreparable harm to or alteration to a natural resource or other feature of the Property described in the Conservation Purposes and Conservation Values.

7.02 Remedies. Upon expiration of the cure period (if any) described in the preceding Section, and failing correction of the violation by Owner as provided above, Holder may do one or more of the following:

(a) **Injunctive Relief**. Seek injunctive relief to specifically enforce the terms of this Easement, to restrain present or future violations of the terms of this Easement, and/or to compel restoration of any Conservation Values destroyed or altered as a result of the violation to the condition that existed on the Effective Date, or to such other condition as may exist consistent with the provisions of this Easement;

(b) **Civil Action**. Recover from Owner or other Persons responsible for the violation all sums owed to Holder under applicable provisions of this Easement together with interest

thereon from the date due at the Default Rate. These monetary obligations include, among others, Losses and Litigation Expenses; and

(c) **Statutory**. Bring a private right of action pursuant to the Arkansas Conservation Easement enforcement provision found at Ark. Code Ann. § 15-20-409, including all remedies available pursuant to that law.

7.03 Modification or Termination. If this Conservation Easement is or is about to be modified or terminated by exercise of the power of eminent domain (condemnation) or adjudication of a court of competent jurisdiction sought by a Person other than Holder, the following provisions apply:

(a) **Compensatory Damages**. Holder is entitled to collect from the Person seeking the modification or termination, compensatory damages in an amount equal to the increase in Market Value of the Property resulting from the modification or termination plus reimbursement of Litigation Expenses as if a violation had occurred. In the event of an extinguishment of the Conservation Easement, Holder is entitled to the greater of the compensation provided under this Section or the compensation provided under any other provision of this Easement; and

(b) **Restitution**. Holder is entitled to recover from the Person seeking the modification or termination: (i) restitution of amounts paid for this Easement (if any) and any other sums invested in the Property for the benefit of the public as a result of rights vested by this Easement, plus (ii) reimbursement of Litigation Expenses.

7.04 Remedies Cumulative. The description of Holder's remedies in this Article VII does not preclude Holder from exercising any other right or remedy that may at any time be available to Holder under this Article or Applicable Law. If Holder chooses to exercise one remedy, Holder may nevertheless choose to exercise one or more of the other rights or remedies available to Holder at the same time or at any other time.

7.05 Waivers. Holder in its discretion may provide a Waiver if Holder determines that the Waiver will have no material effect on the Conservation Purposes. If Holder does not exercise a right or remedy when it is available to Holder, that is not to be interpreted as a Waiver of any non-compliance with the terms of this Easement or a Waiver of Holder's rights to exercise its rights or remedies at another time.

7.06 No Fault of Owner. Holder may waive its right to reimbursement under this Article VII as to Owner (but not other Persons who may be responsible for the violation) if Holder is reasonably satisfied that the violation was not the fault of Owner and could not have been anticipated or prevented by Owner by reasonable means.

7.07 Multiple Owners.

(a) **Liability of Owners of Different Portions of the Property**. If different Persons own portions of the Property, only Owners of the portion with respect to which a violation has occurred, or is threatened, will be held responsible for the violation or threatened violation.

(b) **Liability of Owners of a Single Portion of the Property**. If more than one Person owns of a portion of the Property with respect to which a violation has occurred, or is threatened, then the Owner who has caused the violation, or threatened to violate the terms of this Easement shall be held solely liable. If all of the Persons who are Owners caused the violation, or threatened to violate this Easement, then each Owner may be held liable for the damages resulting from the violation, or threatened violation, in proportion to their ownership interest in the Property. For the avoidance of doubt, an Owner of 50% of a portion of the Property shall not be held liable for more than 50% of the damages resulting from a violation or threatened violation.

ARTICLE VIII
MISCELLANEOUS

8.01 Notices.

(a) **Requirements**. Each Person giving any notice pursuant to this Conservation Easement (each a "**Notice**") must give the Notice in writing and must use one of the following methods of delivery: (i) personal delivery; (ii) certified mail, return receipt requested and postage prepaid; or (iii) nationally recognized overnight courier, with all fees prepaid. Each time the term "Notify" is used herein, it shall be deemed to refer to sending a Notice in accordance with this Article.

(b) **Address for Notices**. Each Person giving a Notice must address the Notice to the appropriate Person as the receiving party at the address listed below or to another address designated by that Person by Notice to the other Person:

If to Owner: Watershed Conservation Resource Center
380 West Rock Street
Fayetteville, AR 72701

City of Fayetteville
113 West Mountain Street
Fayetteville, AR 72701

If to Holder: Northwest Arkansas Land Trust
1725 S. Smokehouse Trail
Fayetteville, Arkansas 72701

8.02 Duty to update. Owner and Holder shall provide Notice to the other within thirty (30) days of a change in address specifying a New address for Notices.

8.03 Governing Law. The laws of the State of Arkansas, and the United States, govern this Easement.

8.04 Assignment and Transfer. Neither Owner nor Holder may assign or otherwise transfer any of their respective rights or duties under this Conservation Easement voluntarily or involuntarily, whether by merger, consolidation, dissolution, operation of law or any other manner except pursuant to the provisions of this Section 8.04. Any purported assignment or transfer in violation of this Section 8.04 is void.

(a) **Notice Required**. Not less than thirty (30) days prior to transfer of the Property or a Lot, or any portion thereof or interest therein, Owner must Notify Holder of the name(s) and address for Notice purposes of the Person who will become Owner following the transfer. At the time Holder is Notified of the transfer, Owner shall pay a $10 transfer fee to Holder.

(b) **Prior to Transfer**. Owner authorizes Holder to (i) contact the Persons to whom the Property or Lot will be transferred and other Persons representing Owner or the prospective transferees to discuss with them this Easement and, if applicable, other pertinent documents; and (ii) enter the Property to assess compliance with this Easement.

(c) **Ending Continuing Liability**. If Holder is not notified per this Section's requirement, it is not the obligation of Holder to determine whether a violation first occurred before or after the date of the transfer. The pre-transfer Owner continues to be liable on a joint and several basis with the post-transfer Owner for the correction of violations under this Easement until such time as Holder is given the opportunity to inspect and all violations noted in Holder's resulting inspection report are cured.

(d) **Subsequent Deeds and Transfers.** This Easement must be incorporated by reference in any deed or other legal instrument by which Owner conveys any interest in the Property, including without limitation, a leasehold or mortgage interest. The failure of Owner to perform any act required by this subsection shall not impair the validity of this Easement or limit its enforceability in any way.

8.05 Burdens; Benefits. This Easement binds and benefits Owner and Holder and their respective personal representatives, successors, and assigns.

(a) **Binding on All Owners**. This Easement vests a servitude running with the land and binding upon Owner and, upon recordation in the Public Records, all subsequent Owners of the Property or any portion of the Property are bound by its terms whether or not Owners had actual Notice of this Easement and whether or not the deed of transfer specifically referred to the transfer being under and subject to this Easement.

(b) **Rights Exclusive to Holder**. Except for rights of Beneficiaries (if any) under this Easement, only Holder has the right to enforce the terms of this Easement and exercise other rights of Holder. Owners of Lots within the Property do not have the right to enforce the terms of this Easement against Owners of other Lots within the Property. Only Owners of the Lot that is the subject of a request for Review, Waiver, Amendment, interpretation, or other decision by Holder have a right to Notice of, or other participation in, such decision.

8.06 Documentation Requirements.

(a) **Between Holder and Owner**. No Amendment, Waiver, approval after Review, interpretation, or other decision by Holder is valid or effective unless it is in writing and signed by an authorized signatory for Holder. This requirement may not be changed by oral agreement. The grant of an Amendment or Waiver in any instance or with respect to any Lot does not imply that an Amendment or Waiver will be granted in any other instance.

(b) **Between Holder and Assignee**. Any assignment of Holder's rights under this Easement, if otherwise permitted under this Easement, must be in a document signed by both the assigning Holder and the assignee Holder. The assignment document must include a covenant by which the assignee Holder assumes the covenants and other obligations of Holder under this Easement. The assigning Holder must deliver to the assignee Holder the Baseline Documentation Report and such other documentation in Holder's possession reasonably needed to uphold the Conservation Purposes.

8.07 Severability. If any provision of this Conservation Easement is determined to be invalid, illegal or unenforceable, the remaining provisions of this Conservation Easement remain valid, binding and enforceable. To the extent permitted by Applicable Law, the parties waive any provision of Applicable Law that renders any provision of this Conservation Easement invalid, illegal or unenforceable in any respect.

8.08 Counterparts. This Conservation Easement may be signed in multiple counterparts, each of which constitutes an original, and all of which, collectively, constitute only one document.

8.09 Guides to Interpretation.

(a) **Captions**. Except for the identification of defined terms in the Glossary, the descriptive headings of this Conservation Easement are for convenience only and do not constitute a part of this Conservation Easement.

(b) **Glossary**. If any term defined in the Glossary is not used in this Conservation Easement, the defined term is to be disregarded as surplus material.

(c) **Other Terms**.

(i) The word "including" means "including but not limited to".

(ii) The words "must" and "shall" are obligatory; the word "may" is permissive and does not imply any obligation.

(d) **Conservation Easement Act**. This Conservation Easement is intended to be interpreted so as to convey to Holder all of the rights and privileges of a Holder of a conservation easement under the Arkansas Conservation Easement Act, Ark. Code. Ann. § 15-20-401 *et seq.*, and any amendments, replacements, or successors to that law.

(e) **Restatement (Third) of the Law of Property: Servitudes**. This Conservation Easement is intended to be interpreted so as to convey to Holder all of the rights and privileges of a Holder of a conservation servitude under the Restatement (Third) of the Law of Property, to the extent that Arkansas law or other Applicable Law does not provide sufficient guidance.

8.10 Entire Agreement. This Easement, and the exhibits attached hereto and made a part hereof, and the Baseline Documentation Report constitute the entire agreement of Owner and Holder pertaining to this Conservation Easement. The terms of this Conservation Easement supersede in full all negotiations, agreements, statements and writings between Owner, Holder and others pertaining to this transaction.

8.11 Incorporation by Reference. Each exhibit attached to this Conservation Easement is incorporated herein by this reference. The Baseline Documentation Report (whether or not attached to this Conservation Easement) is incorporated herein by this reference.

8.12 Jurisdiction; Venue. Holder and Owner submit to the exclusive jurisdiction of the courts of the State of Arkansas located in Washington County and agree that any legal action or proceeding relating to this Easement or the Conservation Easement may be brought only in the courts located in such county.

ARTICLE IX.
GLOSSARY

As used herein, the following terms will have the meanings set out in this Article IX.

Access Drive(s). Roads, drives or lanes providing vehicular access to or located within the Property.

Additional Improvements. All buildings, structures, facilities and other Improvements within the Property, whether temporary or permanent, other than Existing Improvements.

Amendment. An amendment, modification or supplement to this Easement signed by Owner and Holder and recorded in the Public Records. The term "Amendment" includes an amendment and restatement of this Easement.

Applicable Law. Any federal, state or local laws, statutes, codes, ordinances, standards and regulations applicable to the Property, this Conservation Easement as amended through the applicable date of reference. If this Easement is intended to meet the requirements of a qualified conservation contribution, then applicable provisions of the Code and the Regulations are also included in the defined term.

Beneficiary(ies). A Person given rights under the terms of this Conservation Easement (other than Owner and Holder).

Best Management Practices. A series of guidelines or minimum standards (sometimes referred to as BMPs) recommended by federal, state, and/or county resource management agencies for

farming and Forestry operations; for preventing and reducing pollution of water resources and other disturbances of soil, water, and vegetative resources; and for protecting wildlife habitats.

Code. The Internal Revenue Code of 1986, as amended through the applicable date of reference.

Conservation Easement Act. The Arkansas Conservation Easements Act (Ark. Code Ann. § 15-20-401 *et seq*.) as amended through the applicable date of reference.

Construction. Any demolition, construction, re-construction, expansion, exterior alteration, installation or erection of temporary or permanent Improvements. This term does not include dredging, mining, filling or removal of gravel, soil, rock, sand, coal, petroleum or other minerals.

Default Rate. An annual rate of interest equal at all times to two percent (2.0%) above the "prime rate" announced from time to time in The Wall Street Journal; provided, however, that the Default Rate shall never exceed the maximum rate allowed under Applicable Law.

Effective Date. The date and time when this Easement was first put to Public Record.

Environmental Laws. Any and all federal, state, local, or administrative agency statutes, regulations, rules, codes, ordinances or requirements of any governmental authority regulating or imposing standards of liability or standards of conduct (including common law) regarding air, water, solid waste, hazardous materials, petroleum products, worker and community right-to-know, hazard communication, radioactive material, resource protection, wetlands and watercourses, health protection and similar environmental health, safety, building and land use laws and regulations as may now or at any time hereafter be in effect.

Excluded Areas. Land owned by the Owner on the Effective Date and shown on Exhibit "B" as "Excluded Areas".

Existing Improvements. All buildings, structures, facilities and other improvements, whether temporary or permanent, located on, above or under the Property as of the Effective Date as identified in the Baseline Documentation Report.

Forestry. Planting, growing, nurturing, managing and harvesting trees whether for timber and other useful products or for water quality, wildlife habitat and other Conservation Purposes.

Improvement. Any Existing Improvements or Additional Improvements.

Invasive Species. A plant species that is (a) Non-Native Species to the ecosystem under consideration; and (b) whose introduction causes or is likely to cause economic or environmental harm or harm to human health. In cases of uncertainty, published atlases are to be used to identify Invasive Species.

Lien. Any mortgage, lien or other encumbrance securing the payment of money.

Litigation Expense. Any filing fee or cost associated with any court or administrative review body, arbitration fee or cost, witness fee and every other fee and cost of investigating, defending, appealing, or asserting any claim of violation under this Easement including in each case, attorneys' fees, other professionals' fees, and disbursements.

Losses. Any liability, loss, claim, settlement payment, cost, expense, interest, award, judgment, damages (including punitive damages), diminution in value, fines, fees and penalties or other charge other than a Litigation Expense.

Lot. A unit, lot, or parcel of real property separated or transferable for separate ownership or lease under Applicable Law.

Low Impact Design. Design techniques that use or mimic natural processes that result in minimal interference with the Conservation Purposes.

Market Value. The fair value that a willing buyer, under no compulsion to buy, would pay to a willing seller, under no compulsion to sell as established by appraisal in accordance with the then-current edition of Uniform Standards of Professional Appraisal Practice issued by the Appraisal Foundation or, if applicable, a qualified appraisal in conformity with 26 C.F.R. §1.170A-13.

Mitigation Activities. The activities permitted by or required under a mitigation bank instrument approved by all necessary governmental agencies.

Native Species. A plant or animal indigenous to the locality under consideration. In cases of uncertainty, published atlases are to be used to establish whether or not a species is native.

New. Occurring or established after the Effective Date.

Non-Native Species. A plant or animal that is not indigenous (alien) to the locality under consideration. In cases of uncertainty, published atlases are to be used to establish whether or not a species is non-native.

Open Space. Open Space is any open piece of land that is undeveloped and helps enhance the beauty and environmental quality of a community for the benefit of the general public.

Owner/Ownership. Owner and all Persons after them who hold an interest in the Property.

Passive Recreational Use. Recreational uses that involve minimum alteration to vegetation and topography. Uses include but are not limited to non-team sports like hiking, bicycling, bird watching, picnicking, and non-motorized boating.

Person(s). An individual, organization, trust, government or other entity.

Public Records. The public records of the office for the recording of deeds in and for the county in which the Property is located.

Qualified Organization. A governmental or non-profit entity that (a) is established as a public charity for the purpose of preserving and conserving natural resources, natural habitats, environmentally sensitive areas and other charitable, scientific and educational purposes; (b) meets the criteria of a qualified organization under the Regulations; and (c) is duly authorized to acquire and hold conservation easements under Applicable Law.

Regulations. The provisions of 26 C.F.R. §1.170A-14, and any other regulations promulgated under the Code that pertain to qualified conservation contributions, as amended through the applicable date of reference.

Resource Management Plan. A record of the decisions and intentions of Owner prepared by a qualified resource management professional for the purpose of protecting natural resources that the Conservation Purposes aim to protect during certain operations potentially affecting those resources. It includes a resource assessment, identifies appropriate performance standards (based upon Best Management Practices where available and appropriate), and projects a multi-year description of planned activities for operations to be conducted in accordance with the plan.

Review. Review and approval of Holder under the procedure described in Article VI.

Review Requirements. Collectively, any plans, specifications or information required for approval of the activity, use or Construction under Applicable Law (if any) plus (a) the information required under the Review Requirements incorporated into this Conservation Easement either as an exhibit or as part of the Baseline Documentation Report or (b) if the information described in clause (a) is inapplicable, unavailable or insufficient under the circumstances, the guidelines for Review of submissions established by Holder to provide sufficient information to conduct its Review.

Subdivision. Any division of the Property or any Lot within the Property; and any creation of a unit, Lot or parcel of real property, including subsurface portions of the Property, for separate use or Ownership by any means including by lease or by implementing the condominium form of Ownership.

Utility Improvements. Improvements for the reception, storage, or transmission of potable water, storm water, sewage, electricity, gas and telecommunications or other sources of power.

Waiver. A written commitment by which Holder, without any obligation to do so, agrees to refrain from exercising one or more of its rights and remedies for a specific period of time with respect to a specific set of circumstances if Holder is satisfied that the accommodation will have no material effect on Conservation Purposes.

INTENDING TO BE LEGALLY BOUND, each of Owner and Holder, by its duly authorized representative, have signed and delivered this Conservation Easement as of the Effective Date. This Easement may be executed in multiple counterparts, which, when taken together, shall constitute a single instrument.

(479) 575-8323

Resolution: 97-19

File Number: 2019-0226

JOINT LAND PURCHASE, USE AND CONSERVATION CONTRACT - WCRC:

A RESOLUTION TO APPROVE A LAND PURCHASE, USE AND CONSERVATION CONTRACT WITH THE WATERSHED CONSERVATION RESOURCE CENTER FOR THE JOINT PURCHASE OF ABOUT 98 ACRES OF LAND NEAR DEAD HORSE MOUNTAIN ROAD FOR THE AMOUNT OF $250,000.00 PLUS CLOSING COSTS, WITH THE CITY'S PORTION OF THE COSTS NOT TO EXCEED $160,000.00

WHEREAS, the Watershed Conservation Resource Center and Fayetteville's Utilities Department recommend the joint purchase of about 98 acres of land (most of which is within the West Fork's flood plain) near Dead Horse Mountain Road for the purpose of conservation, restoration, and enhancement to provide water quality improvements and protection of the Beaver Lake Watershed; and

WHEREAS, the purchase of this property will also provide recreational benefits to Fayetteville residents including public access to the West Fork of the White River, a possible future trail along the river, a canoe and kayak access point, and the creation of a bird and butterfly park that supports bird and Monarch butterfly habitat; and

WHEREAS, the contract provides for a City contribution in the amount of $150,000.00 with the Watershed Conservation Resource Center contributing $100,000.00 and both parties paying half of the closing costs which could total $10,000.00 to $20,000.00.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan

to sign the attached Land Purchase, Use and Conservation Contract with the Watershed Conservation Resource Center for the purchase of approximately 98 acres near Dead Horse Mountain Road, and further authorizes Mayor Jordan to execute all other documents necessary to consummate the purchase of the land at a cost to the City of up to $160,000.00 including closing costs.

PASSED and APPROVED on 4/16/2019

Approved:

Lioneld Jordan, Mayor

Attest:

Sondra E. Smith, City Clerk Treasurer

CITY CLERK / TREASURER CITY OF FAYETTEVILLE ARKANSAS WASHINGTON COUNTY

LAND PURCHASE, USE AND CONSERVATION CONTRACT BETWEEN THE WATERSHED CONSERVATION RESOURCE CENTER AND CITY OF FAYETTEVILLE

This Contract is entered between the Watershed Conservation Resource Center and the City of Fayetteville. Watershed Conservation Resource Center and the City of Fayetteville agree to purchase a parcel of about 98 acres of land abutting Dead Horse Mountain Road (hereinafter referred to as the "**Property**") within the City of Fayetteville and in Washington County, Arkansas. A map of the Property along with the legal description can be found in **Exhibit A** attached hereto.

(A) PURPOSE

The purpose of this Contract is to establish a general framework for cooperation between Watershed Conservation Resource Center and the City of Fayetteville as co-owners of the Property. Both Watershed Conservation Resource Center and the City of Fayetteville share interest in the Property, which is mostly located within the 100-year floodplain of the West Fork of the White River downstream of Combs Park. Watershed Conservation Resource Center, a 501 (c) (3) nonprofit organization, strives to protect, conserve, and restore natural resources by utilizing the watershed approach, environmental outreach, and providing planning and technical assistance to landowners, communities, and government. Watershed Conservation Resource Center and the City of Fayetteville agree that each are mutually interested in conservation of the property, so the floodplain is not filled and developed and that both will work towards restoring the natural resources on the Property. Watershed Conservation Resource Center and the City of Fayetteville agree that the Property offers the following benefits:

(1) **Water quality improvements and the protection of the Beaver Lake watershed:**

- (a) Floodplains are natural filters of sediment, nutrients, and other pollutants. The Property currently provides quality green infrastructure by filtering contaminants from flood waters. Development of the Property would threaten this benefit.
- (b) The existing pond helps to capture and treat storm-water runoff.
- (c) The expansive floodplain of this section of the West Fork of the White River relieves stress on the river banks. Significant development of the site would damage this benefit and could result in increased stress on the river and its streambanks resulting in an increase of streambank erosion. Conservation of the Property will help prevent an increase of pollutant loadings to the Beaver Lake and its watershed.
- (d) The Property is a high priority for conservation in the North West Arkansas Open Space Plan.
- (e) Securing the site enables Watershed Conservation Resource Center to seek funding to restore the West Fork of the White River streambanks and improve the pollutant removal ability of the pond.
- (f) The Property will support needed resources for Watershed Conservation Resource Center's other restoration projects and environmental education programs.

(2) **Public access to West Fork of the White River and birding/butterfly sites:**

(a) The site can provide public access from a city street to the West Fork of the White River and floodplain, an under-utilized natural resource within the City of Fayetteville limits.

(b) The Property supports a proposed water trail along the West Fork of the White River.

(c) The Property can provide a canoe/kayak access point on the West Fork of the White River.

(d) The Property can provide an excellent bird sanctuary site for a 'Bird and Butterfly Park' that supports bird and Monarch Butterfly habitat.

(B) AGREEMENT TO PURCHASE

Watershed Conservation Resource Center has entered into that certain Real Estate Purchase Agreement dated effective October 8, 2018 with SA Holdings, Inc.(the "**Owner**") for the purchase of the Property (as amended, the "**Purchase Agreement**"). Watershed Conservation Resource Center and the City of Fayetteville agree to jointly close on the purchase of, and take fee title to, the Property as tenants in common. In connection therewith, and in consideration of the mutual promises, commitments and cash contributions set forth herein, the parties agree as follows:

(1) Watershed Conservation Resource Center will:

(a) Continue to work with the Owner to complete the purchase of the Property for $250,000.

(b) Provide and pay $100,000 towards the purchase price.

(c) Provide and pay one half of the closing costs (including, without limitation, the cost of environmental site assessments, survey and title policy premiums).

(d) Execute and deliver any and all documents reasonably necessary to complete the purchase of the Property.

(2) The City of Fayetteville will:

(a) Provide and pay $150,000 towards the purchase price.

(b) Provide and pay one half of the closing costs (including, without limitation, the cost of environmental site assessments, survey and title policy premiums).

(c) Execute and deliver any and all documents reasonably necessary to complete the purchase of the Property.

(C) OPERATIONAL AGREEMENT

Watershed Conservation Resource Center and the City of Fayetteville further mutually agree to work together cooperatively as co-owners or tenants-in-common to, among other things, restore and enhance natural condition of the Property as a priority. In connection therewith, the parties will use reasonable efforts to accomplish the following:

(1) Watershed Conservation Resource Center agrees to:

(a) Seek funding for and to the extent funding is secured and available, implement:

- Restoration of natural resources on the Property, which (if feasible) may be

accomplished through the establishment of a wetlands and/or stream mitigation bank;

- Establishment of native plant sources for restoration projects in northwest Arkansas; and
- Development of infrastructure to support public birding and boat access.

(b) In connection with the establishment of a mitigation bank, negotiate and execute a conservation easement covering most of the Property as may be necessary or desirable in order to restore, conserve, and protect the natural resources located on the Property.

(c) Establish facilities on the Property as Watershed Conservation Resource Center reasonably determines will support its mission and environmental activities, such facilities to include, but not be limited to, offices, storage, greenhouse, areas to grow native plants and generate native plant sod, and other needs for restoration projects.

(d) Work with partners to provide workshops to the public on stream and riparian restoration and residential storm-water management.

(e) Consider providing native plants to the community through a bi-annual one-day sale.

(f) Allow Fayetteville citizens to access the birding area and the West Fork of the White River at designated public and boat access locations on public trails which the City of Fayetteville shall be allowed to build across the Property.

(g) To the extent that the City of Fayetteville also provides funding or other financial support for the creation of a wetlands and stream mitigation bank, Watershed Conservation Resource Center agrees to set aside discounted mitigation credits established by such bank for the benefit of the City of Fayetteville in an amount to be determined by the parties in more detail at that time by separate agreement.

(2) The City of Fayetteville will:

(a) Work cooperatively with Watershed Conservation Resource Center to place the majority of the Property in a conservation easement. In connection therewith, the City will review and not unreasonably withhold its approval of the conservation easement, and shall execute and deliver such approved conservation easement for recording in the appropriate real property records.

(b) Support and financially assist with the development of trail access infrastructure and parking for public birding and boat access on the West Fork of the White River.

(c) Allow Watershed Conservation Resource Center to exercise the exclusive right to utilize the Property and engage in such activities as needed to restore and maintain natural resources of the Property (including, without limitation, establishing a mitigation bank as a funding mechanism that supports Watershed Conservation Resource Center's mission and restoration activities) for the benefit of the parties hereto and the general public.

(D) IT IS FURTHER MUTUALLY AGREED BY WATERSHED CONSERVATION RESOURCE CENTER AND CITY OF FAYETTEVILLE:

1. FREEDOM OF INFORMATION ACT (FOIA). Any information furnished to Watershed Conservation Resource Center under this instrument is subject to the Freedom of Information Act (5 U.S.C. 552) and A.C.A. § 25-19-101.

2. MODIFICATION. Modifications of this Contract that would increase the scope or price of this Contract must be approved by the City Council prior any such increase, becoming effective.

3. COMMENCEMENT/DATE. This Contract is effective as of the date of the last signature required.

4. IMPROVEMENTS. All improvements placed on the Property, whether by or on behalf of Watershed Conservation Resource Center or the City of Fayetteville must be consistent with, and not have a substantial adverse impact on, the natural condition of the Property as restored and enhanced. The parties further acknowledge and agree that the design and location of all such improvements (including, without limitation, offices, storage, greenhouses, planting areas, access points, trails, and parking facilities) must not preclude or otherwise unduly interfere with the establishment of a mitigation bank on the Property. Such improvements will be subject to approval by the applicable federal governmental authorities with jurisdiction over any such mitigation bank.

5. RESTRICTIVE COVENANTS. Upon request by either party to the other, the parties will cooperate to prepare, execute, and record in the Washington County Circuit Clerk's records an instrument that further evidences the provisions pertaining to restrictions and use of the Property if required by state or federal authorities.

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-640

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Susan Norton, Chief of Staff

FROM: Tim Nyander, Utilities Director

SUBJECT: **ARDOT - Change Order No. 4 for I-49/MLK Water & Sewer Relocations**

RECOMMENDATION:
Staff recommends approval of Change Order #4 to the agreement with the Arkansas Department of Transportation (ARDOT) related to the Interstate-49 MLK Interchange Improvements ARDOT Project 040846, and approval of a budget adjustment.

BACKGROUND:
ARDOT has requested utility relocations to prepare for the widening of Martin Luther King, Jr. Blvd. (Highway-62) from S. Leflar Way to S. Sang Ave. including reconstruction of the interstate overpass and creation of a new overpass at 15th Street. The relocation agreement has had several change orders to-date as the project has completed phasing milestones:

9/5/2023	Original Utility Relocation Agreement	(Res. 190-23)
1/2/2024	Change Order #1&2 for 15th Street Bid Award	(Res. 9-24)
5/7/2024	Change Order #3 for MLK Final Design	(Res. 129-24)

DISCUSSION:
Engineering design and permitting is completed and easement acquisition is underway. Change Order #4 with ARDOT is based on engineering cost estimates for all remaining project expenses for utility relocations along MLK Blvd. This includes construction, easement costs, and engineering inspections for 920 LF of 36-inch, 20 LF of 30-inch, 355 LF of 24-inch, 5,075 LF of 18-inch, 15 LF of 10-inch, 3,931 LF of 8-inch, 20 LF of 6-inch, and 25 LF of 2-inch water mains complete with appurtenances, as well as 253 LF of 24-inch, 593 LF of 15-inch, 345 LF of 10-inch, 641 LF of 8-inch, and 631 LF of 4-inch sewer mains complete with appurtenances.

This change order establishes the reimbursement percentage for the project at 72.54%. The estimated price increase is $17,497,448.28 and will be finalized once all project expenses are complete and reconciled. Based on the reimbursement percentage the City's portion of costs for the remainder of this project will be $4,804,799.30.

BUDGET/STAFF IMPACT:
A budget adjustment is attached to recognize revenue for this water and sewer relocations project.

ATTACHMENTS: 2024-640 SRF ARDOT CO4 for I-49 and MLK Interchange, 2024-640 BA ARDOT CO4 for I-49 and MLK Interchange, Change Order No. 4

ARDOT - Change Order No. 4 for I-49/MLK Water & Sewer Relocations

A RESOLUTION TO APPROVE CHANGE ORDER NO. 4 TO THE AGREEMENT WITH THE ARKANSAS DEPARTMENT OF TRANSPORTATION IN THE AMOUNT OF $4,804,799.30 FOR INTERSTATE-49 MLK INTERCHANGE IMPROVEMENTS, AND TO APPROVE A BUDGET ADJUSTMENT

WHEREAS, ARDOT has requested utility relocations to prepare for the widening of Martin Luther King, Jr. Blvd. from South Leflar Way to South Sang Avenue including reconstruction of the interstate overpass and creation of a new overpass at 15th Street; and

WHEREAS, on September 5, 2023, City Council passed Resolution 190-23 approving a utility relocation agreement with the Arkansas State Highway Commission; and

WHEREAS, on January 2, 2024, City Council passed Resolution 9-24 authorizing a contract with Brothers Construction, Inc. for construction of the utility relocations; and

WHEREAS, on May 5, 2024, City Council passed Resolution 129-24 approving Amendment No. 3 that increased the scope of engineering services to provide final engineering design on the remaining utility relocations; and

WHEREAS, Change Order No. 4 is based on engineering cost estimates for all remaining project expenses for utility relocations along MLK Blvd. which includes construction, easement costs, and engineering inspections and establishes the reimbursement percentage for the project at 72.54% which will be finalized once all project expenses are complete and reconciled.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign Change Order No. 4 to the agreement with the Arkansas Department of Transportation in the amount of $4,804,799.30 for I-49 MLK Interchange Improvements. A copy of Change Order No. 4 is attached to this Resolution and made a part hereof.

Section 2: That the City Council of the City of Fayetteville, Arkansas hereby approves a budget adjustment, a copy of which is attached to this Resolution.

ARKANSAS STATE HIGHWAY COMMISSION
UTILITY CHANGE ORDER

Job 040846
City of Fayetteville
Change Order #4

DESCRIPTION OF CHANGE:

1.) Add Phase II cost in the total amount of $18,144,378.28, resulting in an increase of $17,497,448.28.

2.) Add Phase II Reimbursable Factor in the amount of 72.54%.

REASON FOR CHANGE:

1.) Increase total agreement amount due to the addition of the Phase II scope of work along the Hwy. 62 portion of this project. Owner will adjust water and sewer facilities to clear highway construction by abandoning approximately 983 LF of 36-inch, 380 LF of 24-inch, 5,075 LF of 12-inch, 20 LF of 10-inch, 3,908 LF of 8-inch, 20 LF of 6-inch, and 20 LF of 2-inch water main complete with appurtenances as well as 253 LF of 24-inch, 636 LF of 15-inch, 345 LF of 10-inch, 183 LF of 6-inch, and 631 LF of 4-inch sewer main complete with appurtenances.

Owner will restore service by installing 920 LF of 36-inch, 20 LF of 30-inch, 355 LF of 24-inch, 5,075 LF of 18-inch, 15 LF of 10-inch, 3,931 LF of 8-inch, 20 LF of 6-inch, and 25 LF of 2-inch water main complete with appurtenances, as well as 253 LF of 24-inch, 593 LF of 15-inch, 345 LF of 10-inch, 641 LF of 8-inch, and 631 LF of 4-inch sewer main complete with appurtenances.

Owner has elected to upsize existing 12-inch water mains to 18-inch, and a betterment credit has been calculated and will be adjusted based on low bid received and final quantities installed. Owner has also elected to pre-order certain long-lead materials in advance of construction, and that material cost has been added as a separate line item. This work will be performed by competitively bid contract forces.

2.) Add Phase II Reimbursable Factor for the Hwy. 62 portion of this project. Of the 12,454 LF of main to be abandoned, 9,034 LF is located off of Department right-of-way; therefore this work is 72.54% reimbursable.

Re: Utility Relocations I-49/MLK Interchange
Change Order #4
ARDOT Project No. 040846

Dear Mr. Mashburn:

Enclosed you will find Change Order Number 4, Exhibit A – Estimated Easement Costs (including acquisition), Exhibit B - Reimbursement Percentage/Betterment, Exhibit C – The Opinion of Probable Construction Costs, Exhibit D – The Project Schedule, and Exhibit E – Amendment 4 with Hawkins-Weir Engineers.

The oldest asset in the MLK project area is an 8-inch Vitrified Clay Pipe with an install date of 1968.

Please let me know if you need any additional information.

Best,

Corey Granderson, P.E.

Utilities Engineer
City of Fayetteville, Arkansas

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-770

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Paul Becker, Chief Financial Officer

FROM: Waylon Abernathy, Bond Projects & Construction Dir

SUBJECT: **Utilities Offices Renovations and expansion project and approve a Budget Adjustment.**

RECOMMENDATION:
Approval of a proposal with Wash Away in the amount of $40,000.00 for the Utilities Financial Services office renovations and expansion and approve a budget adjustment.

BACKGROUND:
With the City's growth, the Utilities Division has experienced higher call volumes for services, and therefore a need for more staff and a larger call center.
The relocation of meeting room 111 to the Rock Street annex provides the needed spaces. This also affords the ability to create more efficient office configurations and added offices.

DISCUSSION:
Facilities management staff solicited quotes for this project and received 3 responses with Wash Away being the lowest.
The scope of this work includes metal stud, drywall, tape, float, finish, and paint. It also includes provisions for after-hours work.

BUDGET/STAFF IMPACT:
A budget adjustment transfers $30,000 to 5400.720.1840-5400.00 building grounds and maintenance. The balance of the funds will come from the Downtown Renovation project.

ATTACHMENTS: SRF (#3), BA (#4), Utilities Remodel-Wash Away (#5)

113 West Mountain Street
Fayetteville, AR 72701

File #: 2024-770

Utilities Offices Renovations and expansion project and approve a Budget Adjustment.

A RESOLUTION TO APPROVE A CONTRACT WITH WASH AWAY, LLC IN THE AMOUNT OF $40,000.00 FOR THE UTILITIES FINANCIAL SERVICES OFFICE RENOVATIONS AND EXPANSION, AND TO APPROVE A BUDGET ADJUSTMENT

WHEREAS, with the City's growth, the Utilities Division has experienced higher call volumes for services, and therefore a need for more staff and a larger call center; and

WHEREAS, the relocation of meeting room 111 to the Rock Street annex provides the needed spaces and affords the ability to create more efficient office configurations and added offices; and

WHEREAS, pursuant to Ark. Code Ann. § 22-9-203, competitive bidding is not required for major alterations to public improvements that cost less than $50,000.00, but the City Council must approve expenditures exceeding $35,000.00; and

WHEREAS, Facilities Management staff solicited quotes for this project and received three responses with Wash Away submitting the lowest quote.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby authorizes Mayor Jordan to sign a contract with Wash Away, LLC in the amount of $40,000.00 for the Utilities Financial Services office renovations.

Section 2: That the City Council of the City of Fayetteville, Arkansas hereby approves a budget adjustment, a copy of which is attached to this Resolution.

Terms

Upon acceptance, we will perform the services described in this proposal. Any additional services requested by you and not included in this estimate will incur additional charges.

Schedule. The services will be completed and will be made in accordance with the schedule agreed upon.

Changes. Changes in the specifications, quantities, schedule or other aspects of the services that are requested or approved by you do not become binding unless accepted in writing. Any such changes may result in additional or increased charges, and you agree to pay such increased charges.

Payment Terms. All invoices for services covered by the estimate are payable upon completion of work or date stated on the invoice.

Late Charges; Interest. Any invoices not paid by you on the date of completion may bear interest after the due date until the invoice is paid.

We abide to all of the statements stated on this estimate - Service Terms and Conditions.

If applicable, client agrees to authorize us on their property for the purposes of performing the services stated on this estimate. Client understands that although we try our best to provide you with an accurate timeframe, there is no set timeframe for the completion of services and several visits to the property may be required. The time stated on your appointment is just an arrival window, we will be sure to contact you when we are on our way. We also have permission to visit the property with little or no notice to assess service needs prior to the date of service, as well as to check completion after services have been rendered.

Client agrees to allow us to utilize any photos, descriptions, reviews, quotes, texts or videos of the property for marketing purposes.

By inquiring about our services or doing business with us, you are giving your consent to receive notifications and messages (e-mail or text) regarding our promotions or services.

Again, we appreciate you agreeing to these terms and conditions as we only set them in place to ensure everyone's safety and satisfaction. If you have any questions regarding these Terms and Conditions, please reach out to us.

You can be confident, that our goal is to provide you with the highest quality of service! We look forward to working with you!

CITY COUNCIL MEMO
2024-746

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Paul Becker, Chief Financial Officer

FROM: Waylon Abernathy, Bond Projects & Construction Dir

SUBJECT: **Bid 24-44 Construction-City Hall HVAC Improvement 2019/2022 Facilities Bond Project**

RECOMMENDATION:
Staff recommends approval of this resolution for Bid 24-44 Construction Contract with Milestone Construction Company, LLC for the City Hall HVAC improvements in the amount of $1,583,718.71, approve Change Order #1 in the amount of $300,000 for an owner contingency, and approve a Budget Adjustment.

BACKGROUND:
February 2024 Resolution 72-24 Authorized Engineering Services for Design, Construction Documents and Construction Administration for the City Hall HVAC equipment replacement.

DISCUSSION:
The scope of this contract includes replacement of pumps, boilers, air handlers, vav boxes, a new cental condensing unit at the roof, and an independent heat pump system in the basement.
The Change Order will include owner contingency funds for door, wall, ceiling, or other systems replacements that may be needed for the HVAC equipment replacements.

BUDGET/STAFF IMPACT:
A Budget Adjustment to move $1,883,718.71 from 4607.860.7999-5899.00 2022 Bond unallocated budget to 4707.860.7710-5804.00 City Hall Improvements Building Cost.

INVITATION TO BID

Bid 24-44, Construction – City Hall HVAC Improvements Rebid

DEADLINE: Wednesday, October 30, 2024 before 2:00 PM, Local Time
PRE-BID MEETING: Wednesday, October 16, 2024 at 3:00 PM in Room #111 of City Hall
SR. PURCHASING AGENT: Amanda Beilfuss, abeilfuss@fayetteville-ar.gov
DATE OF ISSUE & ADVERTISEMENT: 10/06/2024 & 10/13/2024

No late bids shall be accepted. Bids shall be submitted in one of the following methods: (1) through the City's third-party electronic bidding platform or (2) delivering in person via sealed envelope to the City of Fayetteville Purchasing Division. Submitting through the City's electronic bidding platform is strongly encouraged. All bids shall be submitted in accordance with the attached City of Fayetteville specifications and bid documents attached hereto. Each bidder is required to fill in every blank and shall supply all information requested; failure to do so may be used as basis of rejection.

NOTICE TO ALL BIDDERS:

All interested parties can obtain files for this project by going to http://fayetteville-ar.gov/bids. Bid documents shall be distributed electronically from the City of Fayetteville Purchasing Division only.

BID PACKAGE INCLUDES THE FOLLOWING FILES WHICH SHALL BE LISTED UNDER "ATTACHMENTS":

FILE #01: PROJECT MANUAL – **98 Total Pages**
FILE #02: PLANS – **11 Plan Sheets**

*Additional files added as addendums are issued. Addendums will be uploaded and posted to the City's electronic bidding platform.

***PLAN HOLDER LISTINGS: A listing of vendors who have received documents can be found in the City's electronic bidding platform under the project section tab titled 'Plan Holders'.**

Bidder shall assume all responsibility for receiving updates and any addenda issued to this project by monitoring http://fayetteville-ar.gov/bids. Failure to acknowledge addenda issued as instructed could result in bid rejection.

Project Check List

This checklist is for the Bidder's use in preparing & submitting a bid. It is not intended to include all details necessary to prepare a bid and shall not be used as a substitute for the requirements of the bid documents. Use of this checklist does not relieve the Bidder from the responsibility of meeting all requirements of the Specifications concerning the preparation of an acceptable bid. Bidders are welcome to use this form as a coversheet for a sealed envelope; however, using this form itself is NOT a requirement.

☐ **5% Bid Bond of the amount bid accompanied by required documentation (Power of Attorney, etc.)**

- In lieu of a bid bond, the bidder may submit a cashier's check from a bank located in the State of Arkansas for at least five percent (5%) of the amount bid (inclusive of any deductive alternates). Cashier's checks shall be made payable to the City of Fayetteville, AR and received prior to the bid deadline by making an in-person delivery appointment with the City Purchasing Division.

☐ All addenda shall be signed, acknowledged, and submitted on the appropriate forms (submitting the actual addendums or marking acknowledgement on other bid pages).

☐ All line items shall be appropriately filled out and extended to reveal the line item price as well as the total bid price. Total base bid should be calculated in the provided space.

☐ All pages provided with signature lines shall be appropriately signed, dated accordingly, and included with submitted bid documents

☐ All bids shall be received before the stated deadline utilizing the City's electronic bidding platform or submitting a physical sealed bid to the City Purchasing Division. Submitting a bid electronically is strongly encouraged. A public bid opening will be conducted shortly after the deadline at City Hall and livestreamed at https://www.youtube.com/user/cityoffayettevillear. Late or misdirected bids shall not be accepted. The City of Fayetteville shall not be responsible for lost or misdirected bids, or failure of bidder's technical equipment. If submitting a physical bid, all bid documents shall be delivered in a sealed envelope to the address stated in the advertisement or updated deadline issued via Addenda. All bids should be delivered with the name of the bidder (contractor) on the sealed envelope as well as the bidders Arkansas Contractor's License Number.

☐ Additional Information Required:

- AR Secretary of State Filing #: _____ OR submit electronically.
- Arkansas Contractor License #: _____ OR submit electronically.

- Pursuant Arkansas Code Annotated §25-1-503, the Contractor agrees and certifies that they do not currently boycott Israel and will not boycott Israel during any time in which they are entering into, or while in contract, with any public entity as defined in §25-1-503. If at any time during contract the contractor decides to boycott Israel, the contractor must notify the contracted public entity in writing.
  - Submit electronically or circle applicable answer: YES *or* NO

- Pursuant Arkansas Code Annotated §25-1-1002, the Contractor agrees and certifies that they do not currently boycott Energy, Fossil Fuel, Firearms, and Ammunition Industries during any time in which they are entering into, or while in contract, with any public entity as defined in §25-1-1002. If at any time during the contract the contractor decides to boycott Energy, Fossil Fuel, Firearms, and/or Ammunition Industries, the contractor must notify the contracted public entity in writing.
  - Submit electronically or circle applicable answer: YES *or* NO

SECTION 01
INSTRUCTIONS TO BIDDERS

PART ONE - DEFINED TERMS

1.1. Terms used in these Instructions to Bidders which are defined in the General Conditions have the meanings assigned to them in the General Conditions. Certain additional terms used in these Instructions to Bidders have the meanings indicated below which are applicable to both the singular and plural thereof.

1.2 Bidder – One who submits a Bid directly to City of Fayetteville as distinct from a sub-bidder, who submits a bid to a Bidder.

1.3 Issuing Office – The office from which the Bidding Documents are to be issued and where the bidding procedures are to be administered.

1.4 Successful Bidder – The lowest, responsible, and responsive Bidder to whom the City of Fayetteville (on the basis of the City of Fayetteville's evaluation as hereinafter provided) makes an award.

1.5 Local Time – Local time is defined as the time in Fayetteville, Arkansas on the due date of the deadline. Bids shall be received before the deadline time as shown by the atomic clock located in the Purchasing Division Office.

1.6 Substitution – Item(s) of material, equipment, or substrate that differs in application method, material, warranty, and/or performance as outlined in the specifications. Substitution requests shall be submitted to the Purchasing Division by bid question deadline. Substitution requests will be addressed via addendum.

1.7 Equivalent (or Equal) – Item(s) of material, equipment, or substrate that meets the application method, material, and performance but may differ in manufacturer and/or warranty from what is specified. Item(s) meeting these criteria shall be considered equal at time of bid.

a. Named manufacturers within the specifications shall be used as a basis of design in regard to establishing a minimum performance standard.

PART TWO - COPIES OF BIDDING DOCUMENTS

2.1 Complete sets of the Bidding Documents in the number and for the deposit sum, if any, stated in the Advertisement for Bids may be obtained from the Issuing Office.

2.2 Complete sets of Bidding Documents must be used in preparing Bids. Neither City of Fayetteville nor Project Manager assumes any responsibility for errors or misinterpretations resulting from the use of incomplete sets of Bidding Documents.

2.3 City of Fayetteville and Project Manager in making copies of Bidding Documents available on the above terms do so only for the purpose of obtaining Bids for the Work and do not confer a license or grant for any other use.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

PART THREE - EXAMINATION OF SITE AND CONTRACT DOCUMENTS

3.1 Bidders are advised that the Drawings and Specifications shall constitute all the information which the City of Fayetteville shall furnish. No other information given or sounding made by the City of Fayetteville or any official thereof, prior to the execution of said contract, shall ever become a part of, or change the contract, drawings, specifications, and estimates, or be binding on City of Fayetteville.

a. Prior to submitting any Bid, Bidders are required to: read carefully the Specifications, contract, and Bonds; examine carefully all Drawings; visit the site of the Work to carefully examine local conditions; inform themselves by their independent research and sounding of the difficulties to be encountered, and all attending circumstances affecting the cost of doing the work, and the time specified for its completion; and obtain all information required to make an intelligent bid.

3.2 Bidders shall rely exclusively upon their surveys, estimates, investigations, and other things which are necessary for full and complete information upon which the bid may be made and for which a contract is to be awarded. The Bid Form, providing for unit and lump sum prices bid by the Contractor, contains a statement that all bids are made with the full knowledge of the difficulties and conditions that may be encountered, the kind, quality and quantity of the plans, work to be done, excavation, and materials required and with full knowledge of the drawings, profiles, specifications, and estimates and all provisions of the contract and Bonds.

3.3 Bidders shall promptly notify the Purchasing Division of all conflicts, errors, ambiguities, or discrepancies which Bidder has discovered in or between the Contract Documents and such other related documents.

3.4 Information and data shown or indicated in the Contract Documents with respect to existing underground facilities at or contiguous to the site is based upon information and data furnished to City of Fayetteville and Project Manager by City of Fayetteville's of such underground facilities or others, and City of Fayetteville and Project Manager do not assume responsibility for the accuracy or completeness thereof unless it is expressly provided otherwise in the Supplementary Conditions.

3.5 On request, City of Fayetteville will provide each Bidder access to the site to conduct such examinations, investigations, explorations, tests, and studies as each Bidder deems necessary for submission of a Bid. Bidder must fill all holes and clean up and restore the site to its former conditions upon completion of such explorations, investigations, tests, and studies.

3.6 Reference is made to the General Requirements for the identification of the general nature of work that is to be performed at the site by City of Fayetteville or others (such as utilities and other prime contractors) that relates to the work for which a Bid is to be submitted. On request, and as available, City of Fayetteville will provide to each Bidder, for examination, access to or copies of Contract Documents (other than portions thereof related to price) for such work.

3.7 The submission of a Bid will constitute an incontrovertible representation by Bidder that Bidder has complied with every requirement of this Article 3, that without exception the Bid is premised upon performing and furnishing the Work required by the Contract Documents and applying the specific means, methods, techniques, sequences, or procedures of construction (if any) that may be shown or indicated

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

or expressly required by the Contract Documents, that Bidder has given Project Manager written notice of all conflicts, errors, ambiguities, and discrepancies that Bidder has discovered in the Contract Documents and that the written resolutions thereof by Project Manager are acceptable to Bidder, and that the Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performing and furnishing the Work.

3.8 Mobilization shall not exceed 5% of bid total. This price shall not include bonds and insurance.

3.9 City of Fayetteville will provide dumpster for this project.

3.10 Open burning and blasting are not allowed on City projects.

3.11 Contractor is responsible for obtaining all applicable permits; however, fees for City-issued permits shall be waived.

PART FOUR - AVAILABILITY OF LANDS FOR WORK AND WORK BY OTHERS

4.1 The lands upon which the Work is to be performed, rights-of-way and easements for access thereto and other lands designated for use by Contractor in performing the Work are identified in the Contract Documents. All additional lands and access thereto required for temporary construction facilities, construction equipment, or storage of materials and equipment to be incorporated in the Work are to be obtained and paid for by Contractor. Easements for permanent structures or permanent changes in existing facilities are to be obtained and paid for by City of Fayetteville unless otherwise provided in the Contract Documents.

PART FIVE - INTERPRETATION OF CONTRACT DOCUMENTS AND ADDENDA

5.1 If any person contemplating submitting a bid for construction of the Work is in doubt as to the true meaning of any part of the proposed Contract Documents or finds discrepancies in or omissions from any part of the proposed Contract Documents, he should submit a written request for interpretation thereof to the Project Manager not later than seven days before the date set for bid opening. The person submitting the request shall be responsible for its prompt delivery.

5.2 Interpretation or correction of proposed Contract Documents will be made only by Addendum through the City's online bidding portal. Only questions answered by formal written Addenda will be binding. Oral and other interpretations or clarifications will be without legal effect. City of Fayetteville will not be responsible for any other explanations or interpretations of the proposed Contract Documents.

5.3 Addenda may also be issued to modify the Bidding Documents as deemed advisable by City of Fayetteville or Project Manager.

5.4 Bidder assumes all responsibility for checking the City's online bidding portal at www.fayetteville-ar.gov/bids for updates and addenda issued to this project.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

PART SIX - APPROXIMATE ESTIMATE OF QUANTITIES

6.1 Estimated quantities are approximate only and shall be the basis for receiving unit price bids for each item but shall not be considered by Bidders as actual quantities that may be required for the completion of the proposed work. However, such quantities, at the unit and lump sum prices bid for each item, shall determine the amount of each bid for comparison of Bids and aid in determining the low and responsive Bidder for the purpose of awarding the contract, and will be used as basis for fixing the amount of the required Bonds.

PART SEVEN - UNIT PRICES

7.1 Bidders must state a price for each item of work named in the Bid. Unit and Lump Sum prices shall include amounts sufficient for the furnishing of all labor, materials, tools, equipment, and apparatus of every description to construct, erect, and finish completely all the work as called for in the Specifications or indicated on the Drawings.

7.2 Prices bid shall bear a fair relationship to the cost of the work to be done. Bids which appear unbalanced and are deemed not to be in the best interest of City of Fayetteville may be rejected at the discretion of City of Fayetteville.

7.3 By submission of a Bid, Bidder represents that Bidder has considered the entire Project and the Work required and has reviewed the Drawings and Specifications to verify the full scope of the Work.

PART EIGHT - BID FORM

8.1 Bids are due as indicated in the Advertisement for Bids.

8.2 Bids which are incomplete, unbalanced, conditional, or obscure or which contain additions not called for, erasures, alterations, or irregularities of any kind or which do not comply with these Instructions to Bidders may be rejected as informal or non-responsive at the option of City of Fayetteville. However, City of Fayetteville reserves the right to waive technicalities as to changes, alterations, or revisions and to make the award in the best interest of City of Fayetteville.

8.3 Acceptance of alternate bids is at the City of Fayetteville's discretion, as best services the City of Fayetteville's interest. Each deductive alternate is provided for on the Bid Form (if applicable). The price of the Bid for each alternate will be the amount to be deducted from the price of the Total Base Bid if the City of Fayetteville selects any of the alternates. The unit price amount for each alternate shall be the same as the unit price amount listed in the Bid.

8.4 No Bidder shall divulge the information in the Bid to any person whomsoever, except those having a partnership or other financial interest with him in the Bid, until after the bids have been opened.

8.5 All bids shall include all costs including but not limited to sales tax, use tax, permits, insurance, etc. The contractor on this project is defined by the Arkansas Revenue Laws as the user and is responsible for the appropriate taxes. There are NO provisions in this bid for a contractor to avoid taxes. The City of Fayetteville is not a tax-exempt entity.

Appendix A
Bid 24-44, Construction –
City Hall HVAC Improvements Rebid

PART NINE - SIGNATURE ON BIDS

9.1 If the Bid is made by an individual, the firm name must be given, and the Bid Form signed by the individual or a duly authorized agent. If the Bid is made by a partnership, the firm name and the names of each member must be given, and the Bid signed by a member of the partnership, or a person duly authorized. If the Bid is made by a company or corporation, the company or corporate name must be given, and the Bid signed by an officer or agent duly authorized. The corporate seal must be affixed and attested by the secretary or an assistant secretary. The corporate address and state of incorporation must be shown below the signature.

9.2 All names must be typed or printed in black ink below the signature.

9.3 The address and telephone number for communications regarding the Bid must be shown.

9.4 Powers of attorney, properly certified, for agents and others to sign Bids must be in writing and filed with City of Fayetteville.

9.5 The Bid shall also contain a signed acknowledgment of receipt of all Addenda.

9.6 Arkansas Contractor's License and registration with the Arkansas Secretary of State shall both be valid at time of bid deadline.

9.7 Vendor shall not be debarred from doing business with any government entity.

PART TEN - BID BOND

10.1 A five percent (5%) bid security, in the form of a bid bond, or cashier's check from a bank located in the State of Arkansas, as stated in the Advertisement for Bids, shall accompany each bid. Bid bonds for the difference in price between low bidder and second low bidder shall not be acceptable. The Successful Bidder's security will be retained until City of Fayetteville receives a signed Agreement and required Bonds and Certificates of Insurance. If the Successful Bidder fails to execute and deliver the Agreement and furnish the required contract security within fifteen days after the Notice of Selection, City of Fayetteville may annul the Notice of Selection and the Bid security of that Bidder will be forfeited.

10.2 The City of Fayetteville reserves the right to retain the security of the three low bidders until the Successful Bidder enters into the Contract or until sixty (60) days after bid opening, whichever is sooner. Cash equivalent security of the second and third low bidder may be exchanged for an equivalent bid bond after bid tabulations are complete or thirty (30) days after bid opening, whichever is sooner. If any Bidder refuses to enter into an Agreement, City of Fayetteville may retain Bidder's bid security as liquidated damages but not as a penalty.

Appendix A - Bid 24-44, Construction - City Hall HVAC Improvements Rebid

PART ELEVEN - PERFORMANCE BOND AND PAYMENT BOND

11.1 NOTICE TO PROCEED, BONDS AND ORDERING PROCEDURES

a. After contract award, the Contractor will provide the City with separate 100% performance and payment bonds, as required in the contract.

b. Upon the City receiving and accepting the 100% Performance and Payment Bonds, the City will issue a Purchase Order along with a Notice of Award (NOA).

c. The Notice of Award shall serve as permission for the Contractor to order any materials needed to complete the project, specifically those with a long lead time.

d. The City will coordinate with the Contractor on the timing of the Notice to Proceed being issued, which shall take into consideration the expected delivery of items with a long lead time.

e. Calendar days for substantial and final completion shall not start until the day following the issuance of a Notice to Proceed.

f. The City will make progress payments for materials delivered on site, after verification of delivered materials by City.

11.3 If Required -- Contractor shall include provisions in the bonds which will guarantee the faithful performance of the prevailing hourly wage clause as required by the Arkansas Prevailing Wage Law, Arkansas Code Annotated § 22-9-308(d).

11.4 Contractor shall pay all expenses in connection with the obtaining of said Bonds. The Bonds shall be conditioned that Contractor shall faithfully perform the contract and shall pay all indebtedness for labor and materials furnished or performed in the construction of such alterations and additions as prescribed in this contract.

11.5 The surety company issuing the Bonds must be a solvent company on the "Surety Companies Annual List" issued by the U.S. Department of the Treasury, and the Bonds are not to be issued in an amount greater than the underwriting limitations for the surety company as set out therein.

11.6 In Arkansas, prevailing law requires that performance and payment Bonds on public works contracts shall be executed by a resident local agent who is licensed by the Insurance Commissioner to represent the surety company executing said Bonds and filing with such Bonds his Power of Attorney as his authority. The mere countersigning of the Bonds will not be sufficient.

11.7 The date of the Bonds, and of the Power of Attorney, must not be prior to the date of the contract. At least two originals of the Bonds shall be furnished, each with Power of Attorney attached. The performance and payment bond shall be furnished to the City of Fayetteville accompanied by a receipt stamped by the Washington County Circuit Clerk's Office. Before any work is performed under this contract, the bond shall be filed with the clerk of the circuit court of Washington County, Arkansas and accepted by the City of Fayetteville Project Manager.

Appendix A
Bid 24-44, Construction –
City Hall HVAC Improvements Rebid

11.8 Bonds are to be approved by City of Fayetteville. If any Bonds contracted for become unsatisfactory or unacceptable to City of Fayetteville after the acceptance and approval thereof, Contractor, upon being notified to that effect, shall promptly execute and furnish acceptable Bonds in the amounts herein specified. Upon presentation of acceptable Bonds, the unsatisfactory Bonds may be canceled at the discretion of Contractor.

PART TWELVE – INSURANCE REQUIREMENTS

12.1 The successful bidder shall provide a Certificate of Insurance in accordance with the following guidelines, prior to commencement of any work: $1,000,000 Commercial Liability, Statutory Worker's Compensation, and General Automotive, if applicable. **SUCH CERTIFICATE SHALL LIST THE CITY OF FAYETTEVILLE AS AN ADDITIONAL INSURED. LISTING THE CITY OF FAYETTEVILLE AS A CERTIFICATE HOLDER ONLY IS NOT AN ACCEPTABLE SUBSTITUTE. CERTIFICATE OF INSURANCE MUST INCLUDE THE ENDORSEMENT SHOWING THE CITY OF FAYETTEVILLE LISTED AS AN ADDITIONAL INSURED.** Insurance shall remain valid, when applicable, throughout project completion.

12.2 This bid is considered a public improvement bid. Public improvement bids shall submit certificates of insurance within 10 days of notice of notice to proceed, after City Council approval. Certificates of insurance are to be addressed to the City of Fayetteville, showing that the contractor carries the following insurance which shall be maintained throughout the term of the bid. Any work sublet; the contractor shall require the subcontractor similarly to provide the same insurance coverage. In case any employee engaged in work on the project is not protected under Workers' Compensation, the Contractor shall provide, and shall cause each subcontractor to provide, adequate employer's liability insurance for the protection of such of his employees as are not otherwise protected.

PART THIRTEEN - CONTRACT TIME

13.1 Bidder agrees that the Work shall be substantially completed within __**365**__ consecutive calendar days from the date established in the written notice to proceed. Total completion (completed and ready for final payment) shall be __**395**__ consecutive calendar days from the date established in the written notice to proceed. The bidder agrees to pay liquidated damages for each consecutive calendar day thereafter the total completion time.

13.2 Except in connection with the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise indicated in the Contract Documents, all Work at the Site shall be performed during regular working hours, and Contractor will not permit overtime work or the performance of Work on Saturday, Sunday, or any legal holiday without City of Fayetteville's written consent.

PART FOURTEEN - LIQUIDATED DAMAGES

14.1 Bidder accepts the provisions as to liquidated damages in the event of failure to complete the Work within the total completion time. Liquidated damages in the sum of __**$250.00**__ for each consecutive day thereafter will be assessed.

Appendix A
Bid 24-44, Construction - City Hall HVAC Improvements Rebid

PART FIFTEEN – SUBCONTRACTORS, SUPPLIERS, AND OTHERS

15.1 Contractor shall not assign or sublet all or any part of this contract without the prior written approval of City of Fayetteville nor shall Contractor allow such subcontractor to commence work until approval of workman's compensation insurance and public liability insurance as may be required. Approval of each subcontract by City of Fayetteville will in no manner release Contractor from any obligations as set out in the Drawings, Specifications, contract, and Bonds.

PART SIXTEEN - SUBSTITUTE AND "OR EQUAL" ITEMS

16.1 Any reference to a particular brand or manufacture is in an effort to establish an acceptable level of quality for this purchase and are used as a basis of design in regard to establishing a minimum performance standard. Brands or manufacturers that are included in a bid that are of at least equal quality, size, and specification as to what has been specified, will be acceptable for consideration. All requests for approved substitutions shall be submitted by e-mail. Such request to obtain an acceptable substitution shall be made in writing to Amanda Beilfuss, Sr. Purchasing Agent, at abeilfuss@fayetteville-ar.gov. The Sr. Purchasing Agent will forward any such requests to the responsible City Department for review. Approval of all submittals will be made only by Addendum issued by the City of Fayetteville Purchasing Division.

PART SEVENTEEN - QUALIFICATIONS AND RESPONSIBILITY OF BIDDERS

17.1 To demonstrate qualifications to perform the Work, each Bidder must be prepared to submit within five days after bid opening, upon City of Fayetteville's or Project Manager's request, detailed written evidence such as financial data, present commitments, and other such data as may be called for. Each Bid must contain evidence of Bidder's qualification to do business in the State of Arkansas.

17.2 CERTIFICATION OF FUNDS:

Notice: bidders are required to provide pricing for all line items. Failure to provide deductive alternate pricing can result in bid rejection. The City intends to award this contract to the lowest qualified responsive responsible bidder based on the lump sum bid as long as such bid falls within the amount of funds certified for the project, plus 25%.

a. In the event no bid falls within the amount of funds certified for the project, plus 25%, the City will utilize the deductive alternates in order until bids can be compared within the amount certified, plus 25%. In the event all deductive alternates are subtracted and no bid falls within the amount certified, plus 25%, all bids will be rejected.

b. The City shall have the authority to negotiate an award with the apparent responsive responsible low bidder but only if the low bid is within twenty-five present (25%) of the certification of funds.

17.3 DEDUCTIVE ALTERNATES:

This bid includes two (2) deductive alternate. Bidders shall submit fair, marketable representation for bid pricing for all deductive alternates. Failure to submit fair, marketable representation pricing for deductive alternates can result in rejection of bid at the discretion of the City. If deductive alternates are utilized, they shall be taken in order.

Appendix A - Bid 24-44, Construction - City Hall HVAC Improvements Rebid

a. DEDUCTIVE ALTERNATE 1 – VRF SYSTEM

- Deductive amount pricing shall be the price for the removal of all work associated with the VRF system.

b. DEDUCTIVE ALTERNATE 2 – NEW FAN POWERED HYRDRONIC VAV BOXES

- Deductive amount pricing shall be the price for the removal of all work associated with the new fan powered hydronic vav boxes in place with no demolition work occurring.

17.4 ALLOWANCES:
In the total base bid, Bidder shall include the amount of $239,000.00 for furnishing and installation of the BAS HVAC controls.

PART EIGHTEEN - DISQUALIFICATIONS OF BIDDERS

18.1 Any one or more of the following may be considered as sufficient for the disqualification of bidders and the rejection of Bids.

18.2 More than one Bid Form for the same work from an individual, firm, partnership, or corporation under the same or different names.

18.3 Evidence of collusion among bidders. Participants in such collusion may receive no recognition as bidders for any future work.

18.4 Unbalanced Bid Forms in which the prices for some items are out of proportion to the prices for other items, or changes written in, or amendments by letter, or failure to submit a unit price for each item of work for which a bid price is required by the Bid Form, or failure to include all required contract documents.

18.5 Lack of competency as revealed by the financial statement, experience, plant, and equipment statements submitted. Lack of responsibility as shown by past work judged from the standpoint of workmanship and progress.

18.6 Uncompleted work which, in the judgment of City of Fayetteville, might hinder or prevent the prompt completion of additional work if awarded.

18.7 Being in arrears on existing contracts, in litigation with City of Fayetteville, or having defaulted on a previous contract.

PART NINETEEN - OPENING OF BIDS

19.1 Bids will be opened and read aloud publicly at the place where Bids are to be submitted in a room to be designated by City of Fayetteville the day of the bid opening. A bid tabulation of the amounts of the base Bids and major alternates (if any) will be made available to Bidders after the opening of Bids.

Bid 24-44, Appendix A
City Hall HVAC Improvements Rebid - Construction

PART TWENTY - EVALUATION OF BIDS

20.1 After the bids are opened and read, the quantities will be extended and totaled in accordance with the bid prices of the accepted Bids. This review of the Bids will confirm the low bidder.

20.2 In evaluating Bids, City of Fayetteville will consider the qualifications of Bidders, whether or not the Bids comply with the prescribed requirements, and such alternates, unit prices, and other data as may be requested in the Bid Form or prior to the Notice of Selection.

20.3 City of Fayetteville may consider the qualifications and experience of Subcontractors, Suppliers, and other persons and organizations proposed for those portions of the Work as to which the identity of Subcontractors, Suppliers, and other persons and organizations must be submitted as provided in the Supplementary Conditions. City of Fayetteville also may consider the operating costs, maintenance requirements, performance data, and guarantees of major items of materials and equipment proposed for incorporation in the Work when such data is required to be submitted prior to the Notice of Selection.

PART TWENTY-ONE - RIGHT TO REJECT BIDS

21.1 City of Fayetteville reserves the right to reject any and all Bids, to waive technicalities, and to advertise for new bids. All Bids are subject to this reservation. City of Fayetteville reserves to itself the right to decide which shall be deemed the lowest responsive and responsible Bid. Due consideration will be given to the reputation, financial ability, experience and equipment of the Bidder.

21.2 City of Fayetteville also reserves the right to waive informalities not involving price, time or changes in the Work and to negotiate contract terms with the Successful Bidder.

PART TWENTY-TWO - AWARDING OF CONTRACT

22.1 City of Fayetteville reserves the right to withhold the awarding of a contract a reasonable period of time from the date of opening bids, not to exceed sixty (60) days except with the consent of the Successful Bidder. The awarding of a contract upon a successful Bid shall give the Bidder no right to action or claim against City of Fayetteville upon the contract until the contract is reduced to writing and signed by the contracting parties. The letting of a contract shall not be complete until the contract is executed, and the necessary Bonds approved.

PART TWENTY-THREE - RETAINAGE

23.1 The City of Fayetteville shall make progress payments within two (2) weeks after Architect/Engineer's Certification of Payment. All such payments will be measured by the schedule of values established as provided in the General Requirements.

a. Prior to Substantial Completion, progress payments will be made in an amount equal to the percentage indicated below, but, in each case, less the aggregate of payments previously made and less such amounts as Engineer/Architect shall determine, or The City of Fayetteville may withhold, in accordance with the General Requirements.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

b. Retainage will be with-held from each pay request in the amount of 5%. After Substantial Completion has been issued by the Architect, Payments can be made for 100% less the value of remaining punch list items as identified by the Architect on the Certificate of Substantial Completion.

c. 100% of Equipment and Materials not incorporated in the Work but delivered, suitably stored, and accompanied by documentation satisfactory to The City of Fayetteville as provided in the General Requirements.

PART TWENTY-FOUR - SIGNING OF AGREEMENT

24.1 When City of Fayetteville gives a Notice of Selection to the Successful Bidder, it will be accompanied by the number of unsigned counterparts of the Agreement as indicated in the Supplementary Conditions, with all other written Contract Documents attached. Within five (5) days thereafter, the Contractor shall execute the contract and return to the City to submit to City Council for approval. Within 21 days, the City of Fayetteville shall return the fully executed contract to Contractor. Contractor will have five (5) days to provide the Performance and Payment Bonds for the project.

PART TWENTY-FIVE - MATERIALS GUARANTY

25.1 Before any contract is awarded Bidder may be required to furnish a complete statement of the origin, composition, or manufacture of any or all materials proposed to be used in the construction of the Work, together with samples, which may be subjected to tests provided for in the Specifications to determine their quality and fitness for the Work.

PART TWENTY-SIX - FAMILIARITY WITH LAWS

26.1 Bidder is presumed to be familiar with all federal, state, and city laws, ordinances, and regulations which in any manner affect those engaged or employed in the Work, or the materials or equipment used, or that in any way affect the Work and shall in all respects comply with said laws, ordinances, and regulations. No claim of misunderstanding or ignorance on the part of Contractor will in any way serve to modify the provisions of the contract. No representations shall be binding unless embodied in the contract.

PART TWENTY-SEVEN - INDEMNIFICATION

27.1 To the extent of the limits of the Contractor's Commercial General Liability Insurance, the Contractor shall indemnify and hold harmless the City of Fayetteville against any and all liability, claims, demands, damages, losses, and expenses, including attorneys' fees, in connection with or arising out of any damage or alleged damage to any of the City's existing adjacent property, including personal property, that may arise from the performance of the Work, to the extent caused by the negligent or intentionally wrongful acts or omissions of the Contractor, Subcontractor, Supplier, Sub subcontractor, or anyone employed directly or indirectly by any of them or by anyone for whose acts any of them may be liable.

PART TWENTY-EIGHT - MISCELLANEOUS

28.1 Any building repair and demolition for this Project will be performed by the City of Fayetteville.

28.2 The use of a crane is not anticipated to be needed for this Project.

Appendix A - Bid 24-44, Construction - City Hall HVAC Improvements Rebid

28.3 CITY HALL ACCESS:

a. Contractor will be given temporary badge access during non-City work hours.

b. Contractor is required to be CJIS (Criminal Justice Information Services) Certified to perform the scope of work in the basement.

c. Access to the basement must be coordinated through City Staff.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

ARTICLE 1 - INTENT

1.01 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an agreement with Owner in the form included in the Contract Documents to perform and furnish all Work as specified or indicated in the Contract Documents for the Bid price and within the Bid time indicated in this Bid and in accordance with the other terms and conditions of the Contract Documents.

ARTICLE 2 - TERMS AND CONDITIONS

2.01 Bidder accepts all terms and conditions of the Invitation to Bid and Instructions to Bidders, including without limitation those dealing with the disposition of Bid Security. This Bid will remain subject to acceptance for 90 days after the day of Bid opening. Bidder will sign and deliver the required number of counterparts of the Agreement with the Bonds and other documents required by the Bidding Requirements within 15 days after the date of Owner's Notice of Award.

ARTICLE 3 - BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents, as more fully set forth in the Agreement, that:

A. Bidder has examined and carefully studied the Bid Documents, and the following Addenda, receipt of all which is hereby acknowledged:

Number	Date
_____	_____
_____	_____
_____	_____
_____	_____

B. Bidder has visited the Site and become familiar with and is satisfied as to the general, local, and Site conditions that may affect cost, progress, performance, and furnishing of the Work.

C. Bidder is familiar with and is satisfied as to all federal, state, and local Laws and Regulations that may affect cost, progress, performance, and furnishing of the Work.

D. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to Work for which this Bid is submitted as indicated in the Contract Documents.

E. Bidder has correlated the information known to Bidder, information and observations obtained from visits to the Site, reports, and drawings identified in the Contract Documents, and all additional examinations, investigations, explorations, tests, studies, and data with the Contract Documents.

F. Bidder has given Purchasing Division written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Contract Documents, and the written resolution thereof by Purchasing Division is acceptable to Bidder.

G. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performing and furnishing the Work for which this Bid is submitted.

H. This Bid is genuine and not made in the interest of or on behalf of any undisclosed person, firm, or corporation and is not submitted in conformity with any agreement or rules of any group,

Appendix A
Bid 24-44 Construction -
City Hall HVAC Improvements Rebid

association, organization, or corporation; Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham bid; Bidder has not solicited or induced any person, firm, or a corporation to refrain from bidding; and Bidder has not sought by collusion to obtain for himself any advantage over any other Bidder or over Owner.

I. Upon receipt of written notice of acceptance of this bid, bidder will execute the formal contract attached within 10 days and deliver a Surety Bond or Bonds as required by the General Conditions.

J. The bid security attached in the sum of $_____ is to become the property of the Owner in the event the contract and bond are not executed within the time set forth above, as liquidated damages for the delay and additional expense to the Owner caused thereby.

ARTICLE 4 - CONTRACT TIMES

5.01 Bidder agrees that the Work will be substantially completed and completed and ready for final payment __365__ consecutive calendar days from the date established in a written notice to proceed. Total completion shall be __395__ consecutive calendar days from the date established in a written notice to proceed. The bidder agrees to pay liquidated damages for each consecutive calendar day thereafter the total completion time.

5.02 Bidder accepts the provisions as to liquidated damages in the event of failure to complete the Work within the total completion time. Liquidated damages in the sum of $__250.00___ for each consecutive calendar day thereafter will be assessed.

ARTICLE 5 – TERMINOLOGY

6.01 The terms used in this Bid which are defined in the GENERAL CONDITIONS or Instructions to Bidders will have the meanings assigned to them.

SUBMITTED on _____, 20_____.

SECTION 05
BID BOND

KNOW ALL MEN BY THESE PRESENTS: that we

_____

_____

_____

as Principal, hereinafter called the Principal, and

_____

_____

_____

a corporation duly organized under the laws of the State of _____ as Surety, hereinafter called Surety, are held and firmly bound unto

City of Fayetteville, Arkansas
113 West Mountain Street
Fayetteville, Arkansas 72701

as Obligee, hereinafter called Owner, in the sum of _____ _____ Dollars ($_____), for the payment of which sum, well and truly to be made, Principal and said Surety, bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Principal has submitted a Bid for:

BID 24-44, CONSTRUCTION – CITY HALL HVAC IMPROVEMENTS REBID

NOW, THEREFORE, if the Owner shall accept the Bid of Principal and the Principal shall enter into a Contract with the Owner in accordance with the terms of such Bid, and give such Bond or Bonds as may be specified in the Bidding or Contract Documents with good and sufficient surety for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof, or in the event of the failure of Principal to enter such Contract and give such Bond or Bonds, if the Principal shall pay to the Owner the difference not to exceed the penalty hereof between the amount specified in said Bid and such larger amount for which the Owner may in good faith contract with another party to perform the Work covered by said Bid, then this obligation shall be null and void, otherwise to remain in full force and effect.

SECTION 06
PERFORMANCE BOND

KNOW ALL MEN BY THESE PRESENTS: that

_____

_____

_____

as Principal, hereinafter called Contractor, and

_____

_____

_____

as Surety, hereinafter called Surety, are held and firmly bound unto

City of Fayetteville, Arkansas

113 West Mountain Street

Fayetteville, Arkansas 72701

as Obligee, hereinafter called Owner, in the amount of **$_____**, for the payment whereof Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Contractor has by written Agreement dated _____, 20_____, entered into a contract with Owner for **BID 24-44, CONSTRUCTION – CITY HALL HVAC IMPROVEMENTS REBID** which contract is by reference made a part hereof and is hereinafter referred to as the Contract.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Contractor shall promptly and faithfully perform said Contract, then this obligation shall be null and void; otherwise it shall remain in full force and effect.

The Surety hereby waives notice of any alteration or extension of time made by the Owner. Whenever Contractor shall be, and declared by Owner to be in default under the Contract, the Owner having performed Owner's obligations, thereunder, the Surety may promptly remedy the default, or shall promptly:

A. Complete the Contract in accordance with its terms and conditions, or

B. Obtain a bid or bids for completing the Contract in accordance with its terms and conditions, and upon determination by Surety of the lowest responsible bidder, or, if the Owner elects, upon determination

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

by the Owner and the Surety jointly of the lowest responsible bidder, arrange for a contract between such bidder and Owner, and make available as Work progresses (even though there should be a default or a succession of defaults under the contract or contracts of completion arranged under this paragraph) sufficient funds to pay the cost of completion less the balance of the Contract Price; but not exceeding, including other costs and damages for which the Surety may be liable hereunder, the amount set forth in the first paragraph hereof. The term "balance of the Contract Price," as used in this paragraph, shall mean the total amount payable by Owner to Contractor under the Contract and any amendments thereto, less the amount properly paid by Owner to Contractor.

Any suit under this Bond must be instituted before the expiration of two years from the date on which final payment under the Contract falls due.

No right of action shall accrue on this Bond to or for the use of any person or corporation other than the Owner named herein or the heirs, executors, administrators, or successors of the Owner.

SECTION 07
LABOR AND MATERIAL PAYMENT BOND

This Bond is issued simultaneously with the Performance Bond in favor of Owner conditioned on the full and faithful performance of the Contract.

KNOW ALL MEN BY THESE PRESENTS: that

_____

_____

_____

as Principal, hereinafter called Contractor, and

_____

_____

_____

as Surety, hereinafter called Surety, are held and firmly bound unto

City of Fayetteville, Arkansas

113 West Mountain Street

Fayetteville, Arkansas 72701

as Obligee, hereinafter called Owner, for the use and benefit of claimants as hereinbelow defined, in the amount of **$**_____, for the payment whereof Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, Contractor has by written Agreement dated _____, 20_____, entered into a contract with Owner for **BID 24-44, CONSTRUCTION – CITY HALL HVAC IMPROVEMENTS REBID** which contract is by reference made a part hereof and is hereinafter referred to as the Contract.

NOW, THEREFORE, THE CONDITION OF THIS OBLIGATION is such that, if Contractor shall promptly make payment to all claimants as hereinafter defined, for all labor and material used or reasonably required for use in the performance of the Contract, then this obligation shall be void; otherwise it shall remain in full force and effect, subject, however, to the following conditions:

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

A. A claimant is defined as one having a direct contract with the Contractor or with a Subcontractor of the Contractor for labor, material, or both, used or reasonably required for use in the performance of the Contract, labor and material being construed to include that part of water, gas, power, light, heat, oil, gasoline, telephone service, or rental of equipment directly applicable to the Contract.

B. The above-named Contractor and Surety hereby jointly and severally agree with the Owner that every claimant as herein defined, who has not been paid in full before the expiration of a period of 90 days after the date on which the last of such claimant's work or labor was done or performed, or materials were furnished by such claimant, may sue on this Bond for the use of such claimant, prosecute the suit to final judgment for such sum or sums as may be justly due claimant, and have execution thereon. The Owner shall not be liable for the payment of any costs or expenses of any such suit.

C. No suit or action shall be commenced hereunder by any claimant:

1. Unless claimant other than one having a direct contract with Principal, shall have given written notice to any two of the following: the Contractor, the Owner, or the Surety within 90 days after such claimant did or performed the last of the work or labor, or furnished the last of the materials for which said claim is made, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were furnished, or for whom the work or labor was done or performed. Such notice shall be served by mailing the same by registered mail or certified mail, postage prepaid, in an envelope addressed to Contractor, Owner or Surety, at any place where an office is regularly maintained for the transaction of business, or served in any manner in which legal process may be served in the state in which the aforesaid Project is located, save that such service need not be made by a public officer.

2. After the expiration of one year following the date on which Contractor ceased Work on the Contract, it being understood, however, that if any limitation embodied in this Bond is prohibited by any Law controlling the construction hereof, such limitation shall be deemed to be amended so as to be equal to the minimum period of limitation permitted by such Law.

3. Other than in a state court of competent jurisdiction in and for the county or other political subdivision of the state in which the Project, or any part thereof, is situated, or in the United States District Court for the district in which the Project, or any part thereof, is situated, and not elsewhere.

D. The amount of this Bond shall be reduced by and to the extent of any payment or payments made in good faith hereunder, inclusive of the payment by Surety of mechanics' liens which may be filed of record against said improvement, whether or not claim for the amount of such lien be presented under and against this Bond.

SECTION 230100

BASIC MECHANICAL MATERIALS AND METHODS

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Piping materials and installation instructions common to most piping systems.
2. Dielectric fittings.
3. Vibration Isolators
4. Mechanical sleeve seals.
5. Sleeves.
6. Escutcheons.
7. Grout.
8. Mechanical demolition.
9. Equipment installation requirements common to equipment sections.
10. Concrete bases.
11. Supports and anchorages.

1.2 DEFINITIONS

A. Finished Spaces: Spaces other than mechanical and electrical equipment rooms, furred spaces, pipe and duct shafts, unheated spaces immediately below roof, spaces above ceilings, unexcavated spaces, crawlspaces, and tunnels.

B. Exposed, Interior Installations: Exposed to view indoors. Examples include finished occupied spaces and mechanical equipment rooms.

C. Exposed, Exterior Installations: Exposed to view outdoors or subject to outdoor ambient temperatures and weather conditions. Examples include rooftop locations.

D. Concealed, Interior Installations: Concealed from view and protected from physical contact by building occupants. Examples include above ceilings and in duct shafts.

E. Concealed, Exterior Installations: Concealed from view and protected from weather conditions and physical contact by building occupants but subject to outdoor ambient temperatures. Examples include installations within unheated shelters.

1.3 SUBMITTALS

A. Submit for approval, Manufacturer's technical data sheets including performance specifications for all equipment and air devices shown on the schedules. Also, provide data on all system accessories and all materials. Include all piping, ductwork and insulation materials. Accessories to be submitted on shall include valves and all piping accessories, and all ductwork accessories including extractors, turning vanes, control dampers and balancing dampers.

B. Submit for approval, contractor's original shop drawings of all assemblies of manufactured items including control diagrams. Submit all items called out in individual sections, in addition to those called for in this section.

Appendix A
Bid 24-44 Construction -
City Hall HVAC Improvements Rebid

C. Indicate all pertinent dimensions on scale drawings necessary for clarity and/or coordination of the installation between trades.

D. Provide complete electrical wiring diagrams.

E. Make submittals for all work contained in Division 15 at one time except by special permission.

F. Bind submittals in durable covers with contents conveniently organized and properly indexed with index tabs.

G. Obtain approval on product manufacturers not specifically named prior to making bidding.

H. Each mechanical section contains a listing of required submittals only for convenience.

I. Submit for approval a schedule of nameplates and manufacturer's data sheets and shop drawings on special supports and seals.

J. Provide performance data on all substituted items to demonstrate equality to those scheduled. Include all sound levels, rpm, velocity and other data as applicable.

K. Submit proposed changes in ducts, piping, and equipment layout before ordering or fabrication as stated below under intent.

1.4 INTENT

A. It is intended that the contractor provide a complete and operating mechanical system including all incidental items and connections necessary for proper operation or customarily included even though each and every item may not be indicated.

B. The drawings indicate the general layout requirements for equipment, fixtures, piping, ductwork, etc. Final layout will be governed by actual field conditions with all measurements verified at the site. Contractor shall verify that all equipment, piping, ducts and other components will fit in the space provided before fabrication or ordering. Contractor shall submit any proposed changes to the Engineer for approval before fabrication or ordering.

C. It is intended that the mechanical installation be safe, reliable, energy efficient, and easily maintained with adequate provisions allowed for access to equipment.

D. It is intended that the mechanical system operate quietly with noise levels below the criteria recommended for the application by ASHRAE. Provide corrective action as required to reduce objectionable noise or vibration.

1.5 QUALITY ASSURANCE

A. Steel Support Welding: Qualify processes and operators according to AWS D1.1, "Structural Welding Code--Steel."

B. Steel Pipe Welding: Qualify processes and operators according to ASME Boiler and Pressure Vessel Code: Section IX, "Welding and Brazing Qualifications."

1. Comply with provisions in ASME B31 Series, "Code for Pressure Piping."
2. Certify that each welder has passed AWS qualification tests for welding processes involved and that certification is current.

C. Electrical Characteristics for Mechanical Equipment: Equipment of higher electrical characteristics may be furnished provided such proposed equipment is approved in writing and

Bid 24-A - Appendix A - Construction - City Hall HVAC Improvements Rebid

connecting electrical services, circuit breakers, and conduit sizes are appropriately modified. If minimum energy ratings or efficiencies are specified, equipment shall comply with requirements.

PART 2 - PRODUCTS

2.1 PRODUCT REQUIREMENTS

A. Furnish only new standard products of a manufacturer regularly engaged in the production of said products.

B. Support all products by service organizations with adequate spare parts inventory and personnel located reasonably close to the site.

C. Where multiple units of the same type or class of product are required, provide all units of the same manufacturer.

D. Store products in the original containers and shelter in a suitable environment at an approved location. Make readily accessible for inspections and inventory accounting.

E. For products specified by generic reference standard, select any product meeting such standard.

F. For products specified by naming one or more products or manufacturers, select any named. Submit request, in writing, for substitution of any product or manufacturer not specifically named and obtain approval at least five working days prior to bid date.

G. Provide all information to support claim of equality of product proposed for substitution. Substitutions will be considered only if equivalent in quality, efficiency, performance, size, weight, reliability, appearance, and ease of maintenance to the specified product.

H. Where approved product substitutions alter the design, space requirements, electrical requirements, connections, etc. include all work necessary to provide a complete installation of quality equal to or better than that which would have been achieved with products or manufacturers as specified.

2.2 MECHANICAL IDENTIFICATION

A. Identify each major component as to manufacturer's name, address, model and serial number, and pertinent ratings on a durable nameplate attached to the component in a conspicuous place.

B. Identify each major component as it is named on the drawings or referred to herein with engraved nameplates made from laminated plastic sheets.

C. Identify each valve, except obvious equipment isolation valves, with black filled coded numbers engraved on brass nametags attached with brass jack chains. Provide typewritten legend of numbered valves.

D. Identify each pipe or exposed duct in equipment rooms or above accessible ceilings with permanent markers as manufactured by Seton. Indicate fluid conveyed and direction of flow. Install on each pipe or duct where it enters or leaves a wall or floor and at other intervals not to exceed 20 feet.

E. Identify each major outdoor underground line with continuous strips of plastic utility marker tape as manufactured by Seton stating at regular intervals "CAUTION (identify utility) PIPE BELOW". Install one foot directly above pipe before backfilling to grade.

Appendix A
Bid 24-44 Construction -
City Hall HVAC Improvements Rebid

2.3 AIR FILTRATION

A. Filter media shall be blend of polypropylene/polyethylene fibers, multi-layered incorporating mechanical efficiency and a post-manufacturer electric charge. The media shall be formed in a radial pleat design to ensure full utilization of the media area. When tested in accordance with ASHRAE standard 52.2-1999, the filter shall have a minimum efficiency reporting value (MERV) of 8. When tested in accordance with ASHRAE Standard 52.1-1992, the filter shall have a dust spot efficiency of 25-30%, arrestance of 90-92%, and a minimum dust holding capacity of 170 grams.

2.4 VIBRATION ISOLATORS

A. Double deflection neoprene mounting shall have a minimum static deflection of 0.35 inches. All metal surfaces shall be neoprene covered to avoid corrosion and have friction pads both top and bottom so they need not be bolted to the floor. Bolt holes shall be provided for these areas where bolting is required. On equipment such as small vent sets and close coupled pumps, steel rails shall be used above the mountings to compensate for the overhang. Mountings shall be type ND or rails type DNR as manufactured by Mason Industries.

B. Spring type isolators shall be free standing and laterally stable without any housing and complete with ¼" neoprene acoustical friction pads between base plate and support. All mountings shall have leveling bolts that must be rigidly bolted to the equipment. Spring diameters shall be no less than 0.8 of the compressed height of the spring at rated load. Springs shall have a minimum additional travel to solid equal to 50% of the rated deflection. Submittals shall include spring diameters, deflections, compressed spring height and solid spring height. Mounting shall be type SLF as manufactured by Mason Industries.

C. Vibration Hangers shall contain a steel spring and 0.3" deflection neoprene element in series. The neoprene element shall be molded with a rod isolation bushing that passes through the hanger box. Spring diameters and hanger box lower hole sizes shall be large enough to permit the hanger rod to swing through a 30 degree arc before contacting the hole and short circuiting the spring. Springs shall have a minimum additional travel to solid equal to 50% of the rated deflection. Hangers shall be type 30N as manufactured by Mason Industries.

D. Install vibration isolators on all motor driven equipment.

2.5 PIPE, TUBE, AND FITTINGS

A. Refer to individual Division 15 piping Sections for pipe, tube, and fitting materials and joining methods.

B. Pipe Threads: ASME B1.20.1 for factory-threaded pipe and pipe fittings.

2.6 JOINING MATERIALS

A. Refer to individual Division 15 piping Sections for special joining materials not listed below.

B. Pipe-Flange Gasket Materials: ASME B16.21, nonmetallic, flat, asbestos-free, 1/8-inch maximum thickness unless thickness or specific material is indicated.

C. Plastic, Pipe-Flange Gasket, Bolts, and Nuts: Type and material recommended by piping system manufacturer, unless otherwise indicated.

D. Solder Filler Metals: ASTM B 32, lead-free alloys. Include water-flushable flux according to ASTM B 813.

Bid 24-44 Construction
Appendix A
City Hall HVAC Improvements Rebid

E. Brazing Filler Metals: AWS A5.8, BCuP Series or BAg1, unless otherwise indicated.

F. Welding Filler Metals: Comply with AWS D10.12.

G. Solvent Cements for Joining Plastic Piping:

1. ABS Piping: ASTM D 2235.
2. CPVC Piping: ASTM F 493.
3. PVC Piping: ASTM D 2564. Include primer according to ASTM F 656.
4. PVC to ABS Piping Transition: ASTM D 3138.

2.7 DIELECTRIC FITTINGS

A. Description: Combination fitting of copper alloy and ferrous materials with threaded, solder-joint, plain, or weld-neck end connections that match piping system materials.

B. Insulating Material: Suitable for system fluid, pressure, and temperature.

C. Dielectric Unions: Factory-fabricated, union assembly, for 250-psig minimum working pressure at 180 deg F.

D. Dielectric Flanges: Factory-fabricated, companion-flange assembly, for 150- or 300-psig minimum working pressure as required to suit system pressures.

E. Dielectric Couplings: Galvanized-steel coupling with inert and noncorrosive, thermoplastic lining; threaded ends; and 300-psig minimum working pressure at 225 deg F.

F. Dielectric Nipples: Electroplated steel nipple with inert and noncorrosive, thermoplastic lining; plain, threaded, or grooved ends; and 300-psig minimum working pressure at 225 deg F.

2.8 MECHANICAL SLEEVE SEALS

A. Description: Modular sealing element unit, designed for field assembly, to fill annular space between pipe and sleeve.

B. Sealing Elements: EPDM interlocking links shaped to fit surface of pipe. Include type and number required for pipe material and size of pipe.

C. Pressure Plates: Stainless steel. Include two for each sealing element.

D. Connecting Bolts and Nuts: Stainless steel of length required to secure pressure plates to sealing elements. Include one for each sealing element.

2.9 SLEEVES

A. Galvanized-Steel Sheet: 0.0239-inch minimum thickness; round tube closed with welded longitudinal joint.

B. Steel Pipe: ASTM A 53, Type E, Grade B, Schedule 40, galvanized, plain ends.

C. Cast Iron: Cast or fabricated "wall pipe" equivalent to ductile-iron pressure pipe, with plain ends and integral waterstop, unless otherwise indicated.

D. PVC Pipe: ASTM D 1785, Schedule 40.

Bid 24-44 ; Construction - Appendix A City Hall HVAC Improvements Rebid

E. Molded PE: Reusable, PE, tapered-cup shaped, and smooth-outer surface with nailing flange for attaching to wooden forms.

2.10 ESCUTCHEONS

A. Description: Manufactured wall and ceiling escutcheons and floor plates, with an ID to closely fit around pipe, tube, and insulation of insulated piping and an OD that completely covers opening.

2.11 GROUT

A. Description: ASTM C 1107, Grade B, nonshrink and nonmetallic, dry hydraulic-cement grout.

1. Characteristics: Post-hardening, volume-adjusting, nonstaining, noncorrosive, nongaseous, and recommended for interior and exterior applications.
2. Design Mix: 5000-psi, 28-day compressive strength.
3. Packaging: Premixed and factory packaged.

PART 3 - EXECUTION

3.1 MECHANICAL DEMOLITION

A. Disconnect, demolish, and remove mechanical systems, equipment, and components indicated to be removed.

1. Piping to Be Removed: Remove portion of piping indicated to be removed and cap or plug remaining piping with same or compatible piping material.
2. Piping to Be Abandoned in Place: Drain piping and cap or plug piping with same or compatible piping material.
3. Ducts to Be Removed: Remove portion of ducts indicated to be removed and plug remaining ducts with same or compatible ductwork material.
4. Ducts to Be Abandoned in Place: Cap or plug ducts with same or compatible ductwork material.
5. Equipment to Be Removed: Disconnect and cap services and remove equipment.
6. Equipment to Be Removed and Reinstalled: Disconnect and cap services and remove, clean, and store equipment; when appropriate, reinstall, reconnect, and make equipment operational.
7. Equipment to Be Removed and Salvaged: Disconnect and cap services and remove equipment and deliver to Owner.

B. If pipe, insulation, or equipment to remain is damaged in appearance or is unserviceable, remove damaged or unserviceable portions and replace with new products of equal capacity and quality.

3.2 MANUFACTURER'S DIRECTIONS

A. Handle, install, connect, test, and operate all products, assemblies, and systems in accordance with manufacturer's recommendations.

B. In case of conflicting requirements between the manufacturer's directions and the Contract Documents, obtain specific instructions before proceeding with any work.

Bid 24-14, Construction - Appendix A
City Hall HVAC Improvements Rebid

3.3 WORKMANSHIP

A. Keep the premises clean and free from debris, dirt, etc. Upon completion of work, clean and polish all fixtures, equipment, etc.

B. Seal all ductwork during construction to prevent construction dust from entering ductwork.

C. Perform all work in accordance with best practices of the trade and provide a “neat” installation by mechanics skilled in their respective trades and properly licensed.

D. Accurately install piping, ductwork and other equipment plumb, level and true to line with runs parallel or perpendicular to building lines. Make bends and offsets uniform.

E. Do not cut any structural members without specific approval. Do not cut mechanical or electrical lines that may be concealed.

F. Coordinate with other trade’s work and install all work so that systems and components can be easily maintained and can be removed for replacement in the future.

3.4 FAN SHUTDOWN CONTROLS

A. Provide fan shutdown control smoke detector in the return duct of units greater than 2000 cfm. The detector shall be installed prior to mixing with outside air. The smoke detectors shall shut down the respective unit.

B. If the building contains a fire alarm system, the smoke detectors shall be furnished by the fire alarm supplier. The smoke detectors shall also signal the fire alarm control panel. If the building does NOT contain a fire alarm system, then remote indicators shall be provided in a readily visible location.

C. The mechanical contractor shall install the smoke detector in the ductwork as appropriate. The controls contractor shall provide a dry contact on the outside of each unit to shut the unit down. The fire alarm contractor shall wire the detector to the dry contacts and to his own system. Mechanical contractor shall provide the smoke detectors if they are not provided by the fire alarm contractor.

3.5 PIPING SYSTEMS - COMMON REQUIREMENTS

A. Install piping according to the following requirements and Division 15 Sections specifying piping systems.

B. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems. Indicated locations and arrangements were used to size pipe and calculate friction loss, expansion, pump sizing, and other design considerations. Install piping as indicated unless deviations to layout are approved on Coordination Drawings.

C. Install piping in concealed locations, unless otherwise indicated and except in equipment rooms and service areas.

D. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

E. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.

F. Install piping to permit valve servicing.

Appendix A
Bid 24-24 Construction -
City Hall HVAC Improvements Rebid

G. Install piping at indicated slopes.

H. Install piping free of sags and bends.

I. Install fittings for changes in direction and branch connections.

J. Install piping to allow application of insulation.

K. Select system components with pressure rating equal to or greater than system operating pressure.

L. Install escutcheons for penetrations of walls, ceilings, and floors.

M. Install sleeves for pipes passing through concrete and masonry walls, gypsum-board partitions, and concrete floor and roof slabs.

N. Aboveground, Exterior-Wall Pipe Penetrations: Seal penetrations using sleeves and mechanical sleeve seals. Select sleeve size to allow for 1-inch annular clear space between pipe and sleeve for installing mechanical sleeve seals.

1. Install steel pipe for sleeves smaller than 6 inches in diameter.
2. Install cast-iron "wall pipes" for sleeves 6 inches and larger in diameter.
3. Mechanical Sleeve Seal Installation: Select type and number of sealing elements required for pipe material and size. Position pipe in center of sleeve. Assemble mechanical sleeve seals and install in annular space between pipe and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

O. Underground, Exterior-Wall Pipe Penetrations: Install cast-iron "wall pipes" for sleeves. Seal pipe penetrations using mechanical sleeve seals. Select sleeve size to allow for 1-inch annular clear space between pipe and sleeve for installing mechanical sleeve seals.

1. Mechanical Sleeve Seal Installation: Select type and number of sealing elements required for pipe material and size. Position pipe in center of sleeve. Assemble mechanical sleeve seals and install in annular space between pipe and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

P. Fire-Barrier Penetrations: Maintain indicated fire rating of walls, partitions, ceilings, and floors at pipe penetrations. Seal pipe penetrations with firestop materials.

Q. Verify final equipment locations for roughing-in.

R. Refer to equipment specifications in other Sections of these Specifications for roughing-in requirements.

3.6 PIPING JOINT CONSTRUCTION

A. Join pipe and fittings according to the following requirements and Division 15 Sections specifying piping systems.

B. Ream ends of pipes and tubes and remove burrs. Bevel plain ends of steel pipe.

C. Remove scale, slag, dirt, and debris from inside and outside of pipe and fittings before assembly.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

D. Soldered Joints: Apply ASTM B 813, water-flushable flux, unless otherwise indicated, to tube end. Construct joints according to ASTM B 828 or CDA's "Copper Tube Handbook," using lead-free solder alloy complying with ASTM B 32.

E. Brazed Joints: Construct joints according to AWS's "Brazing Handbook," "Pipe and Tube" Chapter, using copper-phosphorus brazing filler metal complying with AWS A5.8.

F. Threaded Joints: Thread pipe with tapered pipe threads according to ASME B1.20.1. Cut threads full and clean using sharp dies. Ream threaded pipe ends to remove burrs and restore full ID. Join pipe fittings and valves as follows:

1. Apply appropriate tape or thread compound to external pipe threads unless dry seal threading is specified.
2. Damaged Threads: Do not use pipe or pipe fittings with threads that are corroded or damaged. Do not use pipe sections that have cracked or open welds.

G. Welded Joints: Construct joints according to AWS D10.12, using qualified processes and welding operators according to Part 1 "Quality Assurance" Article.

H. Flanged Joints: Select appropriate gasket material, size, type, and thickness for service application. Install gasket concentrically positioned. Use suitable lubricants on bolt threads.

I. Plastic Piping Solvent-Cement Joints: Clean and dry joining surfaces. Join pipe and fittings according to the following:

1. Comply with ASTM F 402, for safe-handling practice of cleaners, primers, and solvent cements.
2. ABS Piping: Join according to ASTM D 2235 and ASTM D 2661 Appendixes.
3. CPVC Piping: Join according to ASTM D 2846/D 2846M Appendix.
4. PVC Pressure Piping: Join schedule number ASTM D 1785, PVC pipe and PVC socket fittings according to ASTM D 2672. Join other-than-schedule-number PVC pipe and socket fittings according to ASTM D 2855.
5. PVC Nonpressure Piping: Join according to ASTM D 2855.
6. PVC to ABS Nonpressure Transition Fittings: Join according to ASTM D 3138 Appendix.

J. Plastic Pressure Piping Gasketed Joints: Join according to ASTM D 3139.

K. Plastic Nonpressure Piping Gasketed Joints: Join according to ASTM D 3212.

L. PE Piping Heat-Fusion Joints: Clean and dry joining surfaces by wiping with clean cloth or paper towels. Join according to ASTM D 2657.

1. Plain-End Pipe and Fittings: Use butt fusion.
2. Plain-End Pipe and Socket Fittings: Use socket fusion.

M. Fiberglass Bonded Joints: Prepare pipe ends and fittings, apply adhesive, and join according to pipe manufacturer's written instructions.

3.7 PIPING CONNECTIONS

A. Make connections according to the following, unless otherwise indicated:

1. Install unions, in piping NPS 2 and smaller, adjacent to each valve and at final connection to each piece of equipment.
2. Install flanges, in piping NPS 2-1/2 and larger, adjacent to flanged valves and at final connection to each piece of equipment.
3. Dry Piping Systems: Install dielectric unions and flanges to connect piping materials of dissimilar metals.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

4. Wet Piping Systems: Install dielectric coupling and nipple fittings to connect piping materials of dissimilar metals.

3.8 EQUIPMENT INSTALLATION - COMMON REQUIREMENTS

A. Install equipment to allow maximum possible headroom unless specific mounting heights are not indicated.

B. Install equipment level and plumb, parallel and perpendicular to other building systems and components in exposed interior spaces, unless otherwise indicated.

C. Install mechanical equipment to facilitate service, maintenance, and repair or replacement of components. Connect equipment for ease of disconnecting, with minimum interference to other installations. Extend grease fittings to accessible locations.

D. Install equipment to allow right of way for piping installed at required slope.

3.9 CONCRETE BASES

A. Concrete Bases: Anchor equipment to concrete base according to equipment manufacturer's written instructions and according to seismic codes at Project.

1. Construct concrete bases of dimensions indicated, but not less than 4 inches larger in both directions than supported unit.
2. Install dowel rods to connect concrete base to concrete floor. Unless otherwise indicated, install dowel rods on 18-inch centers around the full perimeter of the base.
3. Install epoxy-coated anchor bolts for supported equipment that extend through concrete base, and anchor into structural concrete floor.
4. Place and secure anchorage devices. Use supported equipment manufacturer's setting drawings, templates, diagrams, instructions, and directions furnished with items to be embedded.
5. Install anchor bolts to elevations required for proper attachment to supported equipment.
6. Install anchor bolts according to anchor-bolt manufacturer's written instructions.
7. Use 3000-psi, 28-day compressive-strength concrete and reinforcement as specified in Division 3.

3.10 ERECTION OF METAL SUPPORTS AND ANCHORAGES

A. Cut, fit, and place miscellaneous metal supports accurately in location, alignment, and elevation to support and anchor mechanical materials and equipment.

B. Field Welding: Comply with AWS D1.1.

3.11 ERECTION OF WOOD SUPPORTS AND ANCHORAGES

A. Cut, fit, and place wood grounds, nailers, blocking, and anchorages to support, and anchor mechanical materials and equipment.

B. Select fastener sizes that will not penetrate members if opposite side will be exposed to view or will receive finish materials. Tighten connections between members. Install fasteners without splitting wood members.

C. Attach to substrates as required to support applied loads.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

3.12 PAINTING

A. Surface prep and paint ductwork, piping, equipment, etc. exposed in finished areas to match adjacent surfaces as directed. Paint items flat black or as directed if visible through grilles or other openings.

B. Paint all exposed piping and equipment in mechanical spaces for uniform appearance or identification as directed.

C. Paint ferrous piping, equipment, hangers, etc. exposed outdoors or subject to rusting with one coat primer and two coats exterior enamel based paint.

D. Paint plywood backboards used for mounting equipment.

3.13 GROUTING

A. Mix and install grout for mechanical equipment base bearing surfaces, pump and other equipment base plates, and anchors.

B. Clean surfaces that will come into contact with grout.

C. Provide forms as required for placement of grout.

D. Avoid air entrapment during placement of grout.

E. Place grout, completely filling equipment bases.

F. Place grout on concrete bases and provide smooth bearing surface for equipment.

G. Place grout around anchors.

H. Cure placed grout.

3.14 POST CONSTRUCTION SUBMITTALS

A. Deliver special tools, lubricants, and other products necessary for proper operation and maintenance of the mechanical system.

B. Deliver spare parts called for under other mechanical sections contained herein or on drawings.

C. Submit project record documents indicating all changes made during construction.

D. Submit certificates of Final Inspection from the administrative authority.

E. Submit Operations and Maintenance manuals covering all phases of equipment and systems provided. Include complete spare parts data. With a source of supply. Include a copy of the shop drawings required in the “Pre-Construction Submittals”.

F. Submit extended warranties in excess of the standard one year construction warranty where required by other mechanical sections.

G. Submit Test, Adjust and Balance (TAB) report on approved record forms.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

3.15 INSTRUCTIONS TO OWNER

A. Provide competent instruction to Owner's personnel covering operation and maintenance of all mechanical systems. Provide specialized training by manufacturer's technical representatives when required.

B. Make provisions to record all Owner instruction in video form, and provide three sets of the video training the Owner.

END OF SECTION 230100

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 230593
TESTING, ADJUSTING, AND BALANCING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:
1. Testing, adjustment, and balancing of air systems.
2. Measurement of final operating condition of HVAC systems.
3. Sound measurement of equipment operating conditions.
4. Vibration measurement of equipment operating conditions.

B. Related Documents: The Contract Documents, as defined in Section 01110 - Summary of Work, apply to the Work of this Section. Additional requirements and information necessary to complete the Work of this Section may be found in other Documents.

1.2 REFERENCES

A. Associated Air Balance Council (AABC):
1. AABC - National Standards for Total System Balance.

B. National Environmental Balancing Bureau (NEBB).

1.3 SUBMITTALS

A. Submittal Procedures:
1. Assurance/Control Submittals:
a. Test Reports:
1) Indicate deficiencies in systems that would prevent proper testing, adjusting, and balancing of systems and equipment to achieve specified performance.
2) Submit draft copies of report for review prior to final acceptance of Project. Provide final copies for inclusion in operating and maintenance manuals.
3) Provide reports in binder manuals, complete with index page and indexing tabs, with cover identification at front and side. Include set of reduced drawings with air outlets and equipment identified to correspond with data sheets, and indicating thermostat locations.
4) Indicate data on AABC National Standards for Total System Balance forms.
b. Certificates: Manufacturer's certificate that Products meet or exceed specified requirements.
c. Qualification Documentation: Submit documentation of experience indicating compliance with specified qualification requirements.

B. Closeout Submittals: Procedures for closeout submittals.
1. Project Record Documents: Accurately record the following:
a. Actual locations of balancing valves and rough setting.

1.4 QUALITY ASSURANCE

A. Qualifications:

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

1. Company specializing in testing, adjusting, and balancing of specified with minimum 5 years documented experience. Company to be certified by one of the following.
   a. AABC Certified Independent Testing and Balancing Agency.
   b. National Environmental Balancing Bureau Certified Independent Agency. (NEBB).

B. Certification: Certify the testing, adjusting, and balancing field data reports.

C. Testing, Adjusting, and Balancing Reports: Use testing, adjusting, and balancing Agent's standard forms.

PART 2 - PRODUCTS

(Not Used.)

PART 3 - EXECUTION

3.1 EXAMINATION

A. Verify that systems are complete and operable before commencing work. Ensure the following conditions:
   1. Systems are started and operating in a safe and normal condition.
   2. Temperature control systems are installed complete and operable.
   3. Proper thermal overload protection is in place for electrical equipment.
   4. Final filters are clean and in place. If required, install temporary media in addition to final filters.
   5. Duct systems are clean of debris.
   6. Fans are rotating correctly.
   7. Fire and volume dampers are in place and open.
   8. Air coil fins are cleaned and combed.
   9. Access doors are closed and duct end caps are in place.
   10. Air outlets are installed and connected.
   11. Duct system leakage is minimized.
   12. Hydronic systems are flushed, filled and vented.
   13. Pumps are rotating correctly.
   14. Proper strainer baskets are clean and in place.
   15. Service and balance valves are open.

3.2 PREPARATION

A. Provide instruments required for testing, adjusting, and balancing operations. Make instruments available to Contracting Officer to facilitate spot checks during testing.

B. Provide additional balancing instruments as required.

3.3 INSTALLATION TOLERANCES

A. Air Handling Systems: Adjust to within plus or minus 5 percent of design for supply systems and plus or minus 10 percent of design for return and exhaust systems.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

B. Air Outlets and Inlets: Adjust total to within plus 10 percent and minus 5 percent of design to space. Adjust outlets and inlets in space to within plus or minus 10 percent of design.

3.4 ADJUSTING

A. Ensure recorded data represents actual measured or observed conditions.

B. Permanently mark settings of valves, dampers, and other adjustment devices allowing settings to be restored. Set and lock memory stops.

C. After adjustment, take measurements to verify balance has not been disrupted or that such disruption has been rectified.

D. Leave systems in proper working order, replacing belt guards, closing access doors, closing doors to electrical switch boxes, and restoring thermostats to specified settings.

E. At final inspection, recheck random selections of data recorded in report. Recheck points or areas as selected and witnessed by Contracting Officer.

F. Check and adjust systems approximately six months after final acceptance and submit report.

3.5 AIR SYSTEM PROCEDURE

A. Adjust air handling and distribution systems to provide required or design supply, return, and exhaust air quantities. Perform this work with cooling system energized where applicable to obtain the extra resistance of wet coils.

B. Make air quantity measurements in ducts by Pitot tube traverse of entire cross sectional area of duct.

C. Measure air quantities at air inlets and outlets.

D. Adjust distribution system to obtain uniform space temperatures free from objectionable drafts and noise.

E. Use volume control devices to regulate air quantities only to extend that adjustments do not create objectionable air motion or sound levels. Effect volume control by duct internal devices.

F. Vary total system air quantities by adjustment of fan speeds. Provide drive changes required. Vary branch air quantities by damper regulation.

G. Provide system schematic with required and actual air quantities recorded at each outlet or inlet.

H. Measure static air pressure conditions on air supply units, including filter and coil pressure drops, and total pressure across the fan. Make allowances for 50 percent loading of filters.

I. Adjust outside air automatic dampers, outside air, return air, and exhaust dampers for design conditions.

J. Measure temperature conditions across outside air, return air, and exhaust dampers to check leakage.

Appendix A - Bid 24-44, Construction - City Hall HVAC Improvements Rebid

K. Measure building static pressure and adjust supply, return, and exhaust air systems to provide required relationship between each to maintain approximately 0.05 inches (12.5 Pa) positive static pressure near the building entries.

END OF SECTION 230593

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 230700

HVAC INSULATION

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Insulation Materials:

a. Cellular glass.
b. Flexible elastomeric.
c. Foam/vinyl.
d. Polystyrene.

B. Systems Included:
1. Interior air duct acoustical liner.
2. Exterior duct wrap insulation.
3. Refrigerant piping insulation.
4. Cooling condensate drain insulation.

C. Related Sections include the following:
1. Division 23 Section "Ductwork and Accessories".

1.2 SUBMITTALS

A. Product Data: Submit for each type of insulation to be used.

1.3 QUALITY ASSURANCE

A. Perform installation in accordance with MICA, Commercial and Industrial Insulation Standards.

B. Follow manufacturer's directions on adhesive application, fastener spacing, etc.

C. Fire-Test-Response Characteristics: Insulation and related materials shall have fire-test-response characteristics indicated, as determined by testing identical products per ASTM E 84, by a testing and inspecting agency acceptable to authorities having jurisdiction. Factory label insulation and jacket materials and adhesive, mastic, tapes, and cement material containers, with appropriate markings of applicable testing and inspecting agency.

1. Insulation Installed Indoors: Flame-spread index of 25 or less, and smoke-developed index of 50 or less.
2. Insulation Installed Outdoors: Flame-spread index of 75 or less, and smoke-developed index of 150 or less.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

PART 2 - PRODUCTS

2.1 INSULATION MATERIALS

A. Acoustical fiberglass interior duct liner with 1-1/2 lb. density and coated face. Meet UL 181 on erosion tests and NFPA 90A on flame/smoke rating.

B. Flexible fiberglass exterior duct wrap equal to FRK-25.

1. K-Factor no greater than 0.3.
2. ¾ pound density.
3. Foil reinforced kraft (FRK) vapor barrier.

C. Products shall not contain asbestos, lead, mercury, or mercury compounds.

D. Products that come in contact with stainless steel shall have a leachable chloride content of less than 50 ppm when tested according to ASTM C 871.

PART 3 - EXECUTION

3.1 PREPARATION

A. Surface Preparation: Clean and dry surfaces to receive insulation. Remove materials that will adversely affect insulation application.

B. Coordinate insulation installation with the trade installing heat tracing. Comply with requirements for heat tracing that applies to insulation.

C. Mix insulating cements with clean potable water; if insulating cements are to be in contact with stainless-steel surfaces, use demineralized water.

3.2 GENERAL INSTALLATION REQUIREMENTS

A. Install insulation materials, accessories, and finishes with smooth, straight, and even surfaces; free of voids throughout the length of equipment and piping including fittings, valves, and specialties.

B. Install insulation materials, forms, vapor barriers or retarders, jackets, and thicknesses required for each item of equipment and pipe system as specified in insulation system schedules.

C. Install insulation with longitudinal seams at top and bottom of horizontal runs.

D. Install multiple layers of insulation with longitudinal and end seams staggered.

E. Do not weld brackets, clips, or other attachment devices to piping, fittings, and specialties.

F. Keep insulation materials dry during application and finishing.

G. Install insulation with tight longitudinal seams and end joints. Bond seams and joints with adhesive recommended by insulation material manufacturer.

Appendix A - Bid 24-44; Construction - City Hall HVAC Improvements Rebid

H. Install insulation with least number of joints practical.

I. Where vapor barrier is indicated, seal joints, seams, and penetrations in insulation at hangers, supports, anchors, and other projections with vapor-barrier mastic.

1. Install insulation continuously through hangers and around anchor attachments.
2. For insulation application where vapor barriers are indicated, extend insulation on anchor legs from point of attachment to supported item to point of attachment to structure. Taper and seal ends at attachment to structure with vapor-barrier mastic.
3. Install insert materials and install insulation to tightly join the insert. Seal insulation to insulation inserts with adhesive or sealing compound recommended by insulation material manufacturer.
4. Cover inserts with jacket material matching adjacent pipe insulation. Install shields over jacket, arranged to protect jacket from tear or puncture by hanger, support, and shield.

J. Apply adhesives, mastics, and sealants at manufacturer's recommended coverage rate and wet and dry film thicknesses.

K. Cut insulation in a manner to avoid compressing insulation more than 75 percent of its nominal thickness.

L. Finish installation with systems at operating conditions. Repair joint separations and cracking due to thermal movement.

M. Repair damaged insulation facings by applying same facing material over damaged areas. Extend patches at least 4 inches beyond damaged areas. Adhere, staple, and seal patches similar to butt joints.

N. For above ambient services, do not install insulation to the following:

1. Vibration-control devices.
2. Testing agency labels and stamps.
3. Nameplates and data plates.
4. Manholes.
5. Handholes.
6. Cleanouts.

O. Provide aluminum sheet metal over insulation exposed outdoors above grade. Use rivets and seal joints watertight.

P. Ducts 18” upstream and 30” downstream of electric resistance and fuel-burning heaters located within duct system will be wrapped externally with fiberglass duct wrap.

Q. All supply and return air duct systems installed in any unconditioned space shall be insulated with a minimum of 2” thickness, ¾ lb. density wrap, or 1” thickness, 1-1/2 lb. density liner.

3.3 FIELD QUALITY CONTROL

A. Perform tests and inspections.

B. Tests and Inspections:

All insulation applications will be considered defective Work if sample inspection reveals noncompliance with requirements.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

3.4 INSULATION SCHEDULE

A. Refer to the drawings.

END OF SECTION 230700

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 231123

NATURAL-GAS PIPING

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Under ground natural gas service piping.
2. Interior natural gas piping.
3. Exterior exposed natural gas piping.
4. Connectors for appliances and equipment.
5. Pressure regulators.
6. Cocks

1.2 PERFORMANCE REQUIREMENTS

A. Minimum Operating-Pressure Ratings:

1. Piping and Valves: 100 psig minimum unless otherwise indicated.
2. Service Regulators: 100 psig minimum unless otherwise indicated.

B. Natural-Gas System Pressure within Buildings: 0.5 psig or less, or more than 0.5 psig but not more than 2 psig.

1.3 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Record Drawings: Indicate actual location and routing of natural-gas piping as installed.

C. Welding certificates.

D. Operation and maintenance data.

1.4 QUALITY ASSURANCE

A. Steel Support Welding Qualifications: Qualify procedures and personnel according to AWS D1.1/D1.1M, "Structural Welding Code - Steel."

B. Pipe Welding Qualifications: Qualify procedures and operators according to ASME Boiler and Pressure Vessel Code.

C. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, by a qualified testing agency, and marked for intended location and application.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

PART 2 - PRODUCTS

2.1 PIPES, TUBES, AND FITTINGS

A. Underground piping:

1. Schedule 40 black steel or galvanized steel with malleable iron fittings or welded joints with butt weld fittings.
2. Mill coat pipe with high density polyethylene over adhesive undercoating.
3. Wrap field joints and fittings with Republic “X-Tru-Tape” or equal per manufacturer’s recommendations.

B. Above ground piping:

1. Schedule 40 black steel or galvanized steel with malleable iron fittings or welded joints with buttweld fittings.

C. Connectors for appliances and other equipment:

1. PVC coated spiral flexible brass connector with brass flared gas tubing fittings.

D. Cathodic Protection – Packaged magnesium anodes.

E. Welding rod – Same material as piping.

2.2 GAS COCKS

A. Iron body with brass plug and washer with screwed or flanged ends rated for 125 lb. WOG.

PART 3 - EXECUTION

3.1 OUTDOOR PIPING INSTALLATION

A. Comply with NFPA 54 for installation and purging of natural-gas piping.

B. All above ground piping exposed to the weather shall have a protective coating applied to the piping. Refer to Arkansas Fuel Gas Code section 403.8.

C. Install underground, natural-gas piping buried at least 24 inches below finished grade.

D. Provide one or more anodes, sized for pipe size and length of underground service.

E. Provide dielectric union where gas piping emerges from underground.

F. Arrange with local utility company for gas tap and meter installation. Pay all costs to establish natural gas service.

G. Install continuous strip of utility marker tape over gas piping. Use strip with trace wire for plastic pipe.

Appendix A
Bid 24-44; Construction -
City Hall HVAC Improvements Rebid

3.2 INDOOR PIPING INSTALLATION

A. Comply with NFPA 54 for installation and purging of natural-gas piping.

B. Drawing plans, schematics, and diagrams indicate general location and arrangement of piping systems. Indicated locations and arrangements are used to size pipe and calculate friction loss, expansion, and other design considerations. Install piping as indicated unless deviations to layout are approved on Coordination Drawings.

C. Arrange for pipe spaces, chases, slots, sleeves, and openings in building structure during progress of construction, to allow for mechanical installations.

D. Install piping in concealed locations unless otherwise indicated and except in equipment rooms and service areas.

E. Install piping indicated to be exposed and piping in equipment rooms and service areas at right angles or parallel to building walls. Diagonal runs are prohibited unless specifically indicated otherwise.

F. Install piping above accessible ceilings to allow sufficient space for ceiling panel removal.

G. Locate valves for easy access.

H. Verify final equipment locations for roughing-in.

I. Extend relief vent connections for service regulators, line regulators, and overpressure protection devices to outdoors and terminate with weatherproof vent cap.

J. Do not use natural-gas piping as grounding electrode.

K. Install strainer on inlet of each line-pressure regulator and automatic or electrically operated valve.

L. Use flexible connector and gas cock for final connection to each appliance or gas fueled unit.

M. Bond interior metal gas pipe to electric system ground. Piping shall be electrically continuous.

3.3 VALVE INSTALLATION

A. Install manual gas shutoff valve for each gas appliance ahead of corrugated stainless-steel tubing or copper connector.

3.4 FIELD QUALITY CONTROL

A. Test, inspect, and purge natural gas according to NFPA 54 and authorities having jurisdiction.

END OF SECTION 231123

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 233113

METAL DUCTWORK

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes metal, rectangular ducts and fittings for supply, return, outside, and exhaust air-distribution systems in pressure classes from minus 2- to plus 10-inch wg.

B. See Division 23 Section "Duct Accessories" for dampers, sound-control devices, duct-mounting access doors and panels, turning vanes, and flexible ducts.

1.2 SUBMITTALS

A. Shop Drawings: Show fabrication and installation details for metal ducts.

1. Penetrations through fire-rated and other partitions.
2. Duct accessories, including access doors and panels.

1.3 QUALITY ASSURANCE

A. NFPA Compliance:

1. NFPA 90A, "Installation of Air Conditioning and Ventilating Systems."
2. NFPA 90B, "Installation of Warm Air Heating and Air Conditioning Systems."

PART 2 - PRODUCTS

2.1 SHEET METAL MATERIALS

A. Comply with SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for acceptable materials, material thicknesses, and duct construction methods, unless otherwise indicated. Sheet metal materials shall be free of pitting, seam marks, roller marks, stains, discolorations, and other imperfections.

B. Galvanized Sheet Steel: Lock-forming quality; complying with ASTM A 653/A 653M and having G60 coating designation; ducts shall have mill-phosphatized finish for surfaces exposed to view.

C. Reinforcement Shapes and Plates: Galvanized-steel reinforcement where installed on galvanized sheet metal ducts.

D. Tie Rods: Galvanized steel, 1/4-inch minimum diameter for lengths 36 inches or less; 3/8-inch minimum diameter for lengths longer than 36 inches.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

2.2 SEALANT MATERIALS

A. Joint and Seam Tape: 2 inches wide; glass-fiber-reinforced fabric.

B. Flange Gaskets: Butyl rubber or EPDM polymer with polyisobutylene plasticizer.

2.3 HANGERS AND SUPPORTS

A. Building Attachments: Concrete inserts, powder-actuated fasteners, or structural-steel fasteners appropriate for construction materials to which hangers are being attached.

1. Use powder-actuated concrete fasteners for standard-weight aggregate concretes or for slabs more than 4 inches thick.
2. Exception: Do not use powder-actuated concrete fasteners for lightweight-aggregate concretes or for slabs less than 4 inches thick.

B. Hanger Materials: Galvanized sheet steel or threaded steel rod.

1. Hangers Installed in Corrosive Atmospheres: Electrogalvanized, all-thread rods or galvanized rods with threads painted with zinc-chromate primer after installation.
2. Strap and Rod Sizes: Comply with SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for steel sheet width and thickness and for steel rod diameters.

C. Duct Attachments: Sheet metal screws, blind rivets, or self-tapping metal screws; compatible with duct materials.

D. Trapeze and Riser Supports: Galvanized-steel shapes and plates complying with ASTM A 36/A 36M.

E. Gripple Cable Hanger System for Air Distribution.

2.4 RECTANGULAR DUCT FABRICATION

A. Fabricate ducts, elbows, transitions, offsets, branch connections, and other construction according to SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" and complying with requirements for metal thickness, reinforcing types and intervals, tie-rod applications, and joint types and intervals.

1. Lengths: Fabricate rectangular ducts in lengths appropriate to reinforcement and rigidity class required for pressure class.
2. Deflection: Duct systems shall not exceed deflection limits according to SMACNA's "HVAC Duct Construction Standards--Metal and Flexible."

B. Transverse Joints: Prefabricated slide-on joints and components constructed using manufacturer's guidelines for material thickness, reinforcement size and spacing, and joint reinforcement.

C. Formed-On Flanges: Construct according to SMACNA's "HVAC Duct Construction Standards--Metal and Flexible," Figure 1-4, using corner, bolt, cleat, and gasket details.

D. Cross Breaking or Cross Beading: Cross break or cross bead duct sides 19 inches and larger and 0.0359 inch thick or less, with more than 10 sq. ft. of nonbraced panel area unless ducts are lined.

City Hall HVAC Improvements Rebid Bid 24-44, Construction - Appendix A

2.5 WET DUCT

A. For dishwasher exhaust, use No. 22 MSG stainless steel. Weld seams and make airtight.

B. All exhaust, supply and return ducts in shower areas shall be 3003-H14 aluminum. Fasten with rivets or sheet metal screws.

PART 3 - EXECUTION

3.1 DUCT INSTALLATION

A. Construct and install ducts according to SMACNA's "HVAC Duct Construction Standards--Metal and Flexible," unless otherwise indicated.

B. Install ducts with fewest possible joints.

C. Install fabricated fittings for changes in directions, size, and shape and for connections.

D. Install couplings tight to duct wall surface with a minimum of projections into duct. Secure couplings with sheet metal screws. Install screws at intervals of 12 inches, with a minimum of 3 screws in each coupling.

E. Install ducts, unless otherwise indicated, vertically and horizontally and parallel and perpendicular to building lines; avoid diagonal runs.

F. Install ducts close to walls, overhead construction, columns, and other structural and permanent enclosure elements of building.

G. Install ducts with a clearance of 1 inch, plus allowance for insulation thickness.

H. Conceal ducts from view in finished spaces. Do not encase horizontal runs in solid partitions unless specifically indicated.

I. Coordinate layout with suspended ceiling, fire- and smoke-control dampers, lighting layouts, and similar finished work.

J. Seal all joints and seams. Apply sealant to male end connectors before insertion, and afterward to cover entire joint and sheet metal screws.

K. Electrical Equipment Spaces: Route ducts to avoid passing through transformer vaults and electrical equipment spaces and enclosures.

L. Non-Fire-Rated Partition Penetrations: Where ducts pass through interior partitions and exterior walls and are exposed to view, conceal spaces between construction openings and ducts or duct insulation with sheet metal flanges of same metal thickness as ducts. Overlap openings on 4 sides by at least 1-1/2 inches.

M. Fire-Rated Partition Penetrations: Where ducts pass through interior partitions and exterior walls, install appropriately rated fire dampers, sleeves, and firestopping sealant. Fire and smoke dampers are specified in Division 15 Section "Duct Accessories." Firestopping materials and installation methods are specified in Division 7 Section "Through-Penetration Firestop Systems."

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

N. Protect duct interiors from the elements and foreign materials until building is enclosed.

3.2 SEAM AND JOINT SEALING

A. Seal duct seams and joints according to SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for duct pressure class indicated.

B. Seal ducts before external insulation is applied.

3.3 HANGING AND SUPPORTING

A. Support horizontal ducts within 24 inches of each elbow and within 48 inches of each branch intersection.

B. Support vertical ducts at maximum intervals of 16 feet and at each floor.

C. Install upper attachments to structures with an allowable load not exceeding one-fourth of failure (proof-test) load.

D. Install concrete inserts before placing concrete.

E. Install powder-actuated concrete fasteners after concrete is placed and completely cured.

1. Do not use powder-actuated concrete fasteners for lightweight-aggregate concretes or for slabs less than 4 inches thick.

3.4 CONNECTIONS

A. Make connections to equipment with flexible connectors.

B. Comply with SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for branch, outlet and inlet, and terminal unit connections.

END OF SECTION 233113

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 233300

DUCT ACCESSORIES

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Backdraft and Volume dampers.
2. Fire dampers (including ceiling fire dampers).
3. Turning vanes.
4. Duct-mounting access doors.
5. Flexible connectors.
6. Flexible ducts.
7. Duct accessory hardware.

1.2 SUBMITTALS

A. Product Data: For the following:

1. Backdraft and Volume dampers.
2. Fire dampers.
3. Turning vanes.
4. Duct-mounting access doors.
5. Flexible connectors.
6. Flexible ducts.

B. Shop Drawings: Detail equipment assemblies and indicate dimensions, weights, required clearances, method of assembly, components, and location and size of each field connection.

1. Special fittings.
2. Manual-volume damper installations.
3. Fire-damper installations, including sleeves and duct-mounting access doors.
4. Wiring Diagrams: Power, signal, and control wiring.

1.3 QUALITY ASSURANCE

A. Comply with NFPA 90A, "Installation of Air Conditioning and Ventilating Systems," and NFPA 90B, "Installation of Warm Air Heating and Air Conditioning Systems."

Bid 24-44; Construction - Appendix A
City Hall HVAC Improvements Rebid

PART 2 - PRODUCTS

2.1 SHEET METAL MATERIALS

A. Comply with SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for acceptable materials, material thicknesses, and duct construction methods, unless otherwise indicated.

B. Galvanized Sheet Steel: Lock-forming quality; complying with ASTM A 653/A 653M and having G60 coating designation; ducts shall have mill-phosphatized finish for surfaces exposed to view.

C. Stainless Steel: ASTM A 480/A 480M.

D. Aluminum Sheets: ASTM B 209, alloy 3003, temper H14; with mill finish for concealed ducts and standard, 1-side bright finish for exposed ducts.

E. Reinforcement Shapes and Plates: Galvanized-steel reinforcement where installed on galvanized sheet metal ducts; compatible materials for aluminum and stainless-steel ducts.

F. Tie Rods: Galvanized steel, 1/4-inch minimum diameter for lengths 36 inches or less; 3/8-inch minimum diameter for lengths longer than 36 inches.

2.2 BACKDRAFT DAMPERS

A. Description: Multiple-blade, parallel action gravity balanced, with center-pivoted blades of maximum 6-inch width, with sealed edges, assembled in rattle-free manner with 90-degree stop, steel ball bearings, and axles; adjustment device to permit setting for varying differential static pressure.

2.3 VOLUME DAMPERS

A. General Description: Factory fabricated, with required hardware and accessories. Stiffen damper blades for stability. Include locking device to hold single-blade dampers in a fixed position without vibration. Close duct penetrations for damper components to seal duct consistent with pressure class.

B. Standard Volume Dampers: Multiple- or single-blade, parallel- or opposed-blade design as indicated, standard leakage rating, with linkage outside airstream and suitable for horizontal or vertical applications.

1. Steel Frames: Hat-shaped, galvanized sheet steel channels, minimum of 0.064 inch thick, with mitered and welded corners; frames with flanges where indicated for attaching to walls and flangeless frames where indicated for installing in ducts.
2. Roll-Formed Steel Blades: 0.064-inch- thick, galvanized sheet steel.
3. Blade Axles: Galvanized steel.
4. Bearings: Molded synthetic.
5. Tie Bars and Brackets: Galvanized steel.

C. Jackshaft: 1-inch-diameter, galvanized-steel pipe rotating within pipe-bearing assembly mounted on supports at each mullion and at each end of multiple-damper assemblies.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

1. Length and Number of Mountings: Appropriate to connect linkage of each damper in multiple-damper assembly.

D. Damper Hardware: Zinc-plated, die-cast core with dial and handle made of 3/32-inch-thick zinc-plated steel, and a 3/4-inch hexagon locking nut. Include center hole to suit damper operating-rod size. Include elevated platform for insulated duct mounting.

2.4 FIRE DAMPERS

A. Manufacturers:
1. Ruskin Company.
2. Nailor Industries.
3. United Enertech.

B. Fire dampers shall be labeled according to UL 555.

C. Fire Rating: 1-1/2 hours.

D. Frame: Curtain type with blades inside airstream; fabricated with roll-formed, 0.034-inch-thick galvanized steel; with mitered and interlocking corners.

E. Mounting Sleeve: Factory- or field-installed, galvanized sheet steel.

1. Minimum Thickness: 0.052 or 0.138 inch thick as indicated and of length to suit application.
2. Exceptions: Omit sleeve where damper frame width permits direct attachment of perimeter mounting angles on each side of wall or floor, and thickness of damper frame complies with sleeve requirements.

F. Mounting Orientation: Vertical or horizontal as indicated.

G. Blades: Roll-formed, interlocking, 0.034-inch-thick, galvanized sheet steel. In place of interlocking blades, use full-length, 0.034-inch-thick, galvanized-steel blade connectors.

H. Horizontal Dampers: Include blade lock and stainless-steel closure spring.

I. Fusible Links: Replaceable, 165 deg F rated.

2.5 CEILING FIRE DAMPERS

A. General Description: Labeled according to UL 555C; comply with construction details for tested floor- and roof-ceiling assemblies as indicated in UL's "Fire Resistance Directory."

B. Frame: Galvanized sheet steel, round or rectangular, style to suit ceiling construction.

C. Blades: Galvanized sheet steel with refractory insulation.

D. Fusible Links: Replaceable, 165 deg F rated.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

2.6 TURNING VANES

A. Fabricate to comply with SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for vanes and vane runners. Vane runners shall automatically align vanes.

B. Acoustic Turning Vanes: Fabricate airfoil-shaped aluminum extrusions with perforated faces and fibrous-glass fill.

2.7 DUCT-MOUNTING ACCESS DOORS

A. General Description: Fabricate doors airtight and suitable for duct pressure class.

B. Door: Double wall, duct mounting, and rectangular; fabricated of galvanized sheet metal with insulation fill and thickness as indicated for duct pressure class. Include vision panel where indicated. Include 1-by-1-inch butt or piano hinge and cam latches.

1. Frame: Galvanized sheet steel, with bend-over tabs and foam gaskets.

C. Door: Double wall, duct mounting, and round; fabricated of galvanized sheet metal with insulation fill and 1-inch thickness. Include cam latches.

1. Frame: Galvanized sheet steel, with spin-in notched frame.

D. Seal around frame attachment to duct and door to frame with neoprene or foam rubber.

E. Insulation: 1-inch- thick, fibrous-glass or polystyrene-foam board.

2.8 FLEXIBLE CONNECTORS

A. General Description: Flame-retardant or noncombustible fabrics, coatings, and adhesives complying with UL 181, Class 1.

B. Flexible Connector Fabric: Glass fabric double coated with neoprene.

1. Minimum Weight: 26 oz./sq. yd.
2. Tensile Strength: 480 lbf/inch in the warp and 360 lbf/inch in the filling.
3. Service Temperature: Minus 40 to plus 200 deg F.

2.9 FLEXIBLE DUCTS

A. Noninsulated-Duct Connectors: UL 181, Class 1, multiple layers of aluminum laminate supported by helically wound, spring-steel wire.

1. Pressure Rating: 10-inch wg positive and 1.0-inch wg negative.
2. Maximum Air Velocity: 4000 fpm.
3. Temperature Range: Minus 20 to plus 210 deg F.

B. Insulated-Duct Connectors: UL 181, Class 1, 2-ply vinyl film supported by helically wound, spring-steel wire; fibrous-glass insulation; polyethylene vapor barrier film.

1. Pressure Rating: 10-inch wg positive and 1.0-inch wg negative.
2. Maximum Air Velocity: 4000 fpm.

Bid 24-44, Appendix A City Hall HVAC Improvements Rebid Construction

3. Temperature Range: Minus 10 to plus 160 deg F.

C. Flexible Duct Clamps: Stainless-steel band with cadmium-plated hex screw to tighten band with a worm-gear action, in sizes 3 through 18 inches to suit duct size.

2.10 DUCT ACCESSORY HARDWARE

A. Instrument Test Holes: Cast iron or cast aluminum to suit duct material, including screw cap and gasket. Size to allow insertion of pitot tube and other testing instruments and of length to suit duct insulation thickness.

B. Adhesives: High strength, quick setting, neoprene based, waterproof, and resistant to gasoline and grease.

PART 3 - EXECUTION

3.1 APPLICATION AND INSTALLATION

A. Install duct accessories according to applicable details in SMACNA's "HVAC Duct Construction Standards--Metal and Flexible" for metal ducts.

B. Provide duct accessories of materials suited to duct materials: use galvanized-steel accessories in galvanized-steel, stainless-steel accessories in stainless-steel ducts, and aluminum accessories in aluminum ducts.

C. Install backdraft dampers on exhaust fans or nearest to outside and where indicated.

D. Install volume dampers in ducts with liner; avoid damage to and erosion of duct liner.

E. Provide balancing dampers at points on supply, return, and exhaust systems where branches lead from larger ducts as required for air balancing. Install at a minimum of two duct widths from branch takeoff.

F. Install fire dampers, with fusible links, according to manufacturer's UL-approved written instructions.

G. Install duct access doors to allow for inspecting, adjusting, and maintaining accessories and terminal units as follows:

1. On both sides of duct coils.
2. Downstream from volume dampers and equipment.
3. Adjacent to fire or smoke dampers, providing access to reset or reinstall fusible links.
4. On sides of ducts where adequate clearance is available.

H. Install flexible connectors immediately adjacent to equipment in ducts associated with fans and motorized equipment supported by vibration isolators.

I. For fans developing static pressures of 5-inch wg and higher, cover flexible connectors with loaded vinyl sheet held in place with metal straps.

J. Connect terminal units to supply ducts with maximum 12-inch lengths of flexible duct. Do not use flexible ducts to change directions.

City Hall HVAC Improvements Rebid Bid 24-44, Construction - Appendix A

K. Connect diffusers or light troffer boots to low pressure ducts with maximum 60-inch lengths of flexible duct clamped or strapped in place.

L. Connect flexible ducts to metal ducts with adhesive.

3.2 ADJUSTING

A. Adjust duct accessories for proper settings.

B. Adjust fire and smoke dampers for proper action.

C. Final positioning of manual-volume dampers is specified in Division 23 Section "Testing, Adjusting, and Balancing."

END OF SECTION 233300

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 233413

FANS

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Centrifugal roof ventilators.
2. Ceiling-mounting ventilators.
3. In-line centrifugal fans.
4. Accessories.

1.2 SUBMITTALS

A. Product Data: Include rated capacities, furnished specialties, and accessories for each type of product indicated and include the following:

B. Shop Drawings: Detail equipment assemblies and indicate dimensions, weights, loads, required clearances, method of field assembly, components, and location and size of each field connection.

C. Operation and maintenance data.

1.3 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

B. NEMA Compliance: Motors and electrical accessories shall comply with NEMA standards.

C. UL Standard: Power ventilators shall comply with UL 705.

PART 2 - PRODUCTS

2.1 FANS

A. Basis-of-Design Product: Subject to compliance with requirements, provide the product indicated on Drawings or a comparable product by one of the following:
1. Loren Cook Company.
2. Twin City Fans & Blowers.

B. Description: Direct- or belt-driven centrifugal fans consisting of housing, wheel, fan shaft, bearings, motor and disconnect switch, drive assembly, curb base, and accessories.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

C. Housing: Removable, spun-aluminum, dome top and outlet baffle; square, one-piece, aluminum base with venturi inlet cone.

1. Hinged Subbase: Galvanized-steel hinged arrangement permitting service and maintenance.

D. Fan Wheels: Aluminum hub and wheel with backward-inclined blades.

E. Belt-Driven Drive Assembly: Resiliently mounted to housing, with the following features:

1. Fan Shaft: Turned, ground, and polished steel; keyed to wheel hub.
2. Shaft Bearings: Permanently lubricated, permanently sealed, self-aligning ball bearings.
3. Pulleys: Cast-iron, adjustable-pitch motor pulley.
4. Fan and motor isolated from exhaust airstream.

F. Accessories:

1. Disconnect Switch: Nonfusible type, with thermal-overload protection mounted inside fan housing, factory wired through an internal aluminum conduit.
2. Bird Screens: Removable, 1/2-inch mesh, aluminum or brass wire.
3. Dampers: Counterbalanced, parallel-blade, backdraft dampers mounted in curb base; factory set to close when fan stops.
4. Motorized Dampers: Parallel-blade dampers mounted in curb base with electric actuator; wired to close when fan stops.

G. Roof Curbs: Galvanized steel; mitered and welded corners; 1-1/2-inch-thick, rigid, fiberglass insulation adhered to inside walls; and 1-1/2-inch wood nailer. Size as required to suit roof opening and fan base.

1. Configuration: Self-flashing without a cant strip, with mounting flange.
2. Overall Height: 12 inches.

2.2 CEILING-MOUNTING VENTILATORS

A. Basis-of-Design Product: Subject to compliance with requirements, provide the product indicated on Drawings or a comparable product by one of the following:
1. Loren Cook Company.
2. Penn Ventilation.

B. Description: Centrifugal fans designed for installing in ceiling or wall or for concealed in-line applications.

C. Housing: Steel, lined with acoustical insulation.

D. Fan Wheel: Centrifugal wheels directly mounted on motor shaft. Fan shrouds, motor, and fan wheel shall be removable for service.

E. Grille: Aluminum, louvered grille with flange on intake and thumbscrew attachment to fan housing.

F. Electrical Requirements: Junction box for electrical connection on housing and receptacle for motor plug-in.

G. Accessories:

Bid 24-44, Appendix A Construction - City Hall HVAC Improvements Rebid

1. Manual Starter Switch: Single-pole rocker switch assembly with cover and pilot light.
2. Ceiling Radiation Damper: Fire-rated assembly with ceramic blanket, stainless-steel springs, and fusible link.
3. Isolation: Rubber-in-shear vibration isolators.
4. Manufacturer's standard roof jack or wall cap, and transition fittings.

2.3 IN-LINE CENTRIFUGAL FANS

A. Basis-of-Design Product: Subject to compliance with requirements, provide the product indicated on Drawings or a comparable product by one of the following:
1. Loren Cook Company.
2. Penn Ventilation.

B. Description: In-line, direct-driven centrifugal fans consisting of housing, wheel, outlet guide vanes, fan shaft, bearings, motor and disconnect switch, drive assembly, mounting brackets, and accessories.

C. Housing: Split, spun aluminum with aluminum straightening vanes, inlet and outlet flanges, and support bracket adaptable to floor, side wall, or ceiling mounting.

D. Direct-Driven Units: Motor mounted in airstream, factory wired to disconnect switch located on outside of fan housing.

E. Fan Wheels: Aluminum, airfoil blades welded to aluminum hub.

F. Accessories:

1. Volume-Control Damper: Manually operated with quadrant lock, located in fan outlet.
2. Companion Flanges: For inlet and outlet duct connections.
3. Fan Guards: 1/2- by 1-inch mesh of galvanized steel in removable frame. Provide guard for inlet or outlet for units not connected to ductwork.
4. Motor and Drive Cover: Epoxy-coated steel.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install power ventilators level and plumb.

B. Support units using spring isolators.

C. Install floor-mounting units on concrete bases.

D. Secure roof-mounting fans to roof curbs with cadmium-plated hardware.

E. Ceiling Units: Suspend units from structure; use steel wire or metal straps.

F. Support suspended units from structure using threaded steel rods and elastomeric hangers.

G. Install units with clearances for service and maintenance.

H. Make final duct connections with flexible connectors.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

I. Install ducts adjacent to power ventilators to allow service and maintenance.

3.2 FIELD QUALITY CONTROL

A. Perform the following field tests and inspections and prepare test reports:

1. Verify that shipping, blocking, and bracing are removed.
2. Verify that unit is secure on mountings and supporting devices and that connections to ducts and electrical components are complete. Verify that proper thermal-overload protection is installed in motors, starters, and disconnect switches.
3. Verify that cleaning and adjusting are complete.
4. Disconnect fan drive from motor, verify proper motor rotation direction, and verify fan wheel free rotation and smooth bearing operation. Reconnect fan drive system, align and adjust belts, and install belt guards.
5. Adjust belt tension.
6. Adjust damper linkages for proper damper operation.
7. Verify lubrication for bearings and other moving parts.
8. Verify that manual and automatic volume control and fire and smoke dampers in connected ductwork systems are in fully open position.
9. Disable automatic temperature-control operators, energize motor and adjust fan to indicated rpm, and measure and record motor voltage and amperage.
10. Shut unit down and reconnect automatic temperature-control operators.
11. Remove and replace malfunctioning units and retest as specified above.

B. Test and adjust controls and safeties. Replace damaged and malfunctioning controls and equipment.

END OF SECTION 233413

Appendix A - Construction - Bid 24-44, City Hall HVAC Improvements Rebid

SECTION 260500

GENERAL ELECTRICAL REQUIREMENTS

PART 1 - GENERAL

1.1 SUMMARY

A. Section Includes:

1. Sleeves for raceways and cables.
2. Sleeve seals.
3. Grout.
4. General electrical installation requirements.

1.2 PRE-CONSTRUCTION SUBMITTALS

A. Submit for approval Manufacturer's technical data sheets including performance specifications for all equipment, major materials and other manufactured items. Obtain approval on product manufacturers not specifically names prior to making submittals.

B. Bind submittals in durable covers with contents conveniently organized and properly indexed.

C. Make submittals on all work in Division 26 at one time, except by special permission.

1.3 INTENT

A. It is intended that the contractor provide a complete and operating electrical system including all incidental items and conditions necessary for proper operation or customarily included even though each and every item may not be indicated.

B. The drawings indicate the general layout requirements for equipment, fixtures, conduit, devices, etc. Final layout will be governed by actual field conditions with all measurements verified at the site.

C. Conduit and wiring shown on the drawings is diagrammatic unless otherwise noted, and is intended to indicate switching and branch circuit arrangements, phase balance, and general wiring connection requirements.

D. It is intended that the electrical installation be safe, reliable, energy efficient and easily maintained with adequate provisions for access to equipment.

E. It is intended that the electrical system operate with noise levels below the criteria recommended by NEMA. Provide corrective action to reduce objectionable hum or vibration.

F. Isolated ground circuits as well as circuits serving non-linear loads and those serving ground fault circuit breakers must have their own neutral or isolated ground.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

1.4 TEMPORARY LIGHTING AND POWER

A. Provide general and task lighting for construction activity as required for adequate illumination. Provide 5 foot candles minimum for general illumination. Protect lamps with wire guards or tempered glass enclosures. Provide exterior type fixtures where exposed to weather or moisture.

B. Provide general purpose outlets and special outlets for construction activities. Provide circuits of proper sizes and ratings for each use required. Install wiring where least exposed to damage. Provide rigid steel conduit to protect wiring on grade, floors or decks.

C. Provide 20 amp, 4-gang receptacle outlets, equipped with ground fault circuit interrupters, reset button and pilot light, spaced so that a 100 foot extension cord can reach each area of work.

D. Provide warning signs at outlets that are other than 20 amp, 120 volt.

1.5 COORDINATION

A. The contractor is cautioned to examine all drawings and specifications relating to other trades of work, and he shall make proper provisions to review all other work.

B. The architectural, structural and civil plans and specifications, including the General Conditions and all supplements issued thereto, information to bidders, and other pertinent documents issued by the Engineer, are a part of these specifications and the accompanying electrical plans, and shall be complied with in every respect. All of the above is included herewith, and shall be examined by all bidders. Failure to comply shall not relieve the contractor of responsibility or be used as a basis for additional compensation due to omission of architectural, structural or civil details from the electrical drawings.

PART 2 - PRODUCTS

2.1 PRODUCT REQUIREMENTS

A. All materials and equipment used in carrying out these specifications to be American made unless approved otherwise by the Engineer and to be new and have UL listing, or listing by other recognized testing laboratory when such listings are available. Specifications and drawings indicate name, type, or catalog numbers of materials and equipment to be used as standards. Proposals shall be based on these standards. Contractor may use materials and equipment equivalent to those specified, subject to Engineer approval.

B. Furnish only new standard products of a manufacturer regularly engaged in the production of said products.

C. Support all products by service organizations with spare parts inventory and personnel located reasonably close to the site.

D. Where multiple units of the same type or class are required, provide all units of the same manufacturer.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

2.2 PRODUCT HANDLING

A. Store products in their original containers and shelter in a suitable environment.

B. Make products readily available for inspections and inventory.

2.3 SUBSTITUTIONS

A. For products specified by generic reference, select any product meeting such standard.

B. For products specified by naming one or more products or manufacturers, select any named. Submit request in writing for substitution of any manufacturer not specifically named and obtain approval at least 5 days prior to bidding.

C. Provide all information required to support claim of equality of product proposed for substitution. Substitutions will be considered only if equivalent in quality, efficiency, performance, size, weight, reliability, appearance and ease of maintenance to specified product.

D. Where approved substitutions alter the design, space requirements, electrical requirements, connections, cooling loads, etc. include all work necessary to provide a complete installation of quality equal to or better than that obtained with product or manufacturer specified.

2.4 SLEEVES FOR RACEWAYS AND CABLES

A. Steel Pipe Sleeves: ASTM A 53/A 53M, Type E, Grade B, Schedule 40, galvanized steel.

B. Cast-Iron Pipe Sleeves: Cast or fabricated "wall pipe," equivalent to ductile-iron pressure pipe, with plain ends and integral waterstop, unless otherwise indicated.

2.5 SLEEVE SEALS

A. Description: Modular sealing device, designed for field assembly, to fill annular space between sleeve and raceway or cable.

1. Sealing Elements: EPDM interlocking links shaped to fit surface of cable or conduit. Include type and number required for material and size of raceway or cable.
2. Pressure Plates: Plastic. Include two for each sealing element.
3. Connecting Bolts and Nuts: Stainless steel of length required to secure pressure plates to sealing elements. Include one for each sealing element.

2.6 GROUT

A. Nonmetallic, Shrinkage-Resistant Grout: ASTM C 1107, factory-packaged, nonmetallic aggregate grout, noncorrosive, nonstaining, mixed with water to consistency suitable for application and a 30-minute working time.

Bid 24-44; Construction - Appendix A
City Hall HVAC Improvements Rebid

PART 3 - EXECUTION

3.1 COMMON REQUIREMENTS FOR ELECTRICAL INSTALLATION

A. Comply with NECA 1.

B. Measure indicated mounting heights to bottom of unit for suspended items and to center of unit for wall-mounting items.

C. Headroom Maintenance: If mounting heights or other location criteria are not indicated, arrange and install components and equipment to provide maximum possible headroom consistent with these requirements.

D. Equipment: Install to facilitate service, maintenance, and repair or replacement of components of both electrical equipment and other nearby installations. Connect in such a way as to facilitate future disconnecting with minimum interference with other items in the vicinity.

E. Right of Way: Give to piping systems installed at a required slope.

3.2 SLEEVE INSTALLATION FOR ELECTRICAL PENETRATIONS

A. Electrical penetrations occur when raceways, cables, wireways, cable trays, or busways penetrate concrete slabs, concrete or masonry walls, or fire-rated floor and wall assemblies.

B. Concrete Slabs and Walls: Install sleeves for penetrations unless core-drilled holes or formed openings are used. Install sleeves during erection of slabs and walls.

C. Use pipe sleeves unless penetration arrangement requires rectangular sleeved opening.

D. Fire-Rated Assemblies: Install sleeves for penetrations of fire-rated floor and wall assemblies unless openings compatible with firestop system used are fabricated during construction of floor or wall.

E. Cut sleeves to length for mounting flush with both surfaces of walls.

F. Extend sleeves installed in floors 2 inches above finished floor level.

G. Size pipe sleeves to provide 1/4-inch annular clear space between sleeve and raceway or cable, unless indicated otherwise.

H. Seal space outside of sleeves with grout for penetrations of concrete and masonry

1. Promptly pack grout solidly between sleeve and wall so no voids remain. Tool exposed surfaces smooth; protect grout while curing.

I. Interior Penetrations of Non-Fire-Rated Walls and Floors: Seal annular space between sleeve and raceway or cable, using joint sealant appropriate for size, depth, and location of joint.

J. Fire-Rated-Assembly Penetrations: Maintain indicated fire rating of walls, partitions, ceilings, and floors at raceway and cable penetrations. Install sleeves and seal raceway and cable penetration sleeves with firestop materials.

Appendix A
Bid 24-44; Construction -
City Hall HVAC Improvements Rebid

K. Roof-Penetration Sleeves: Seal penetration of individual raceways and cables with flexible boot-type flashing units applied in coordination with roofing work.

L. Aboveground, Exterior-Wall Penetrations: Seal penetrations using steel pipe sleeves and mechanical sleeve seals. Select sleeve size to allow for 1-inch annular clear space between pipe and sleeve for installing mechanical sleeve seals.

M. Underground, Exterior-Wall Penetrations: Install cast-iron pipe sleeves. Size sleeves to allow for 1-inch annular clear space between raceway or cable and sleeve for installing mechanical sleeve seals.

3.3 SLEEVE-SEAL INSTALLATION

A. Install to seal exterior wall penetrations.

B. Use type and number of sealing elements recommended by manufacturer for raceway or cable material and size. Position raceway or cable in center of sleeve. Assemble mechanical sleeve seals and install in annular space between raceway or cable and sleeve. Tighten bolts against pressure plates that cause sealing elements to expand and make watertight seal.

3.4 FIRESTOPPING

A. Apply firestopping to penetrations of fire-rated floor and wall assemblies for electrical installations to restore original fire-resistance rating of assembly.

3.5 MANUFACTURER'S DIRECTIONS

A. Handle, install, connect, test and operate all products and systems in accordance with manufacturer's recommendations. In case of conflicting requirements between manufacturer's directions and contract documents, obtain instructions before proceeding with work.

3.6 INSPECTIONS

A. Arrange with administrative authority for inspections of all work and obtain approval prior to concealing or proceeding. Give adequate notice before concealing any work for inspections by Owner's representatives.

3.7 CLEANING

A. Keep premises free and clean of dirt, debris, etc. Upon completion of work clean and polish all fixtures, equipment, etc.

3.8 WORKMANSHIP

A. No person shall perform electrical work without possessing a Master or Journeyman License from the state electrical examiner's board. All electrical work and apprentices shall be supervised by a Master or Journeyman electrician.

Appendix A - Bid 24-14, Construction - City Hall HVAC Improvements Rebid

B. Carefully perform all cutting, drilling, digging, etc. and patch or refinish disturbed area to the condition of adjoining or similar surfaces. Do not cut any structural members.

C. Conceal conduit in chases, furrings, or above ceilings unless otherwise noted. Flush mount equipment in finished walls wherever possible.

3.9 FLAME AND SMOKE CONSIDERATIONS

A. In enclosures or plenums used for transporting environmental air, use only products conforming to NFPA and UL classifications not exceeding 25 for flame spread and 50 for smoke developed ratings, or install in conduit. This requirement applies to all materials.

B. Completely seal all penetrations through fire and/or smoke rated walls, ceilings, floors or other barriers with UL listed material to preserve the rating of the barrier.

3.10 COORDINATION

A. Coordinate the electrical work with the work of all other trades. Piping or equipment requiring slope or specific mounting height will have right of way over conduit and other products whose elevation can be changed.

3.11 EQUIPMENT CONNECTIONS

A. Make all required electrical connections to each item of equipment shown or specified including equipment furnished by Owner, and make operational.

3.12 PROTECTION REQUIREMENTS

A. Locate existing utility lines and identify and protect during excavation and installation.

B. Protect all work including building finishes against damage due to dirt, water, chemicals, handling, theft, etc. Close all openings in conduit and equipment during installation.

C. Provide warning devices around all exposed “live” parts or high temperature surfaces.

3.13 PAINTING

A. Paint conduit, equipment, etc. exposed in finished areas to match adjacent surfaces. Touch up scratches in factory finished surfaces with a paint to match.

B. All exposed exterior conduit and equipment shall be painted for a uniform appearance. If exposed through grilles or other openings, paint conduit flat black.

C. Paint plywood backboards used for mounting equipment.

3.14 TESTING AND ADJUSTING

A. Test the completed electrical system and prove free of short circuits, poor connections, and improper grounding. Test all systems to assure safe operation.

Bid 24-44, Appendix A
City Hall HVAC Improvements Rebid
Construction -

B. Verify proper taps on motors and transformers for rated performance.

3.15 POST CONSTRUCTION SUBMITTALS

A. Submit project record documents indicating all changes to contract documents made during construction.

B. Submit certificates of final inspection from administrative authority or manufacturer.

C. Deliver all special tools and spare parts necessary for proper operation and maintenance and as called for in other electrical sections.

D. Submit operations and maintenance (O&M) manuals covering all phases of equipment and systems provided. Include complete spare parts data and copy of manufacturing data sheets and shop drawings required in pre-construction submittals.

E. Submit extended warranties required in excess of one year.

F. Assemble all closeout documents for electrical system in 3-ring binders with divider tabs labeled and properly indexed. Submit the number of sets as required by the Architect.

3.16 INSTRUCTIONS TO OWNER

A. Provide competent instruction to the Owner's personnel covering operation and maintenance of all electrical systems. Provide specialized instruction by manufacturer's technical representative when required.

3.17 USE OF EQUIPMENT

A. The contractor shall not use the permanent electrical system for construction activity except by special permission. If permitted, the contractor's use of any equipment shall not reduce the warranty time specified for any equipment.

3.18 GENERAL WARRANTY

A. Warrant the electrical installation against defects for a period of one year from the date of substantial completion in accordance with Architect's specifications. Provide all labor, replacement parts, services, transportation and incidental costs necessary for proper operation of electrical systems during the warranty period. Make good any damage to the building or grounds or other equipment resulting from defects in products and/or workmanship during the warranty period.

END OF SECTION 260500

City Hall HVAC Improvements Rebid Appendix A Bid 24-44, Construction -

SECTION 260513

CONDUCTORS AND CABLES

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Building wires and cables rated 600 V and less.
2. Connectors, splices, and terminations rated 600 V and less.
3. Control and signal wiring and connectors.
4. Sleeves and sleeve seals for cables.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

1.3 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

B. Comply with NFPA 70.

PART 2 - PRODUCTS

2.1 CONDUCTORS AND CABLES

A. Copper Conductors: Comply with NEMA WC 70.

B. Conductor Insulation: Comply with NEMA WC 70 for Types THW, THHN-THWN, and XHHW.

C. Multiconductor Cable: Comply with NEMA WC 70 for metal-clad cable, Type MC with ground wire.

2.2 CONNECTORS AND SPLICES

A. Description: Factory-fabricated connectors and splices of size, ampacity rating, material, type, and class for application and service indicated.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

2.3 SLEEVES FOR CABLES

A. Steel Pipe Sleeves: ASTM A 53/A 53M, Type E, Grade B, Schedule 40, galvanized steel, plain ends.

B. Cast-Iron Pipe Sleeves: Cast or fabricated "wall pipe," equivalent to ductile-iron pressure pipe, with plain ends and integral waterstop, unless otherwise indicated.

2.4 SLEEVE SEALS

A. Description: Modular sealing device, designed for field assembly, to fill annular space between sleeve and cable.

1. Sealing Elements: EPDM interlocking links shaped to fit surface of cable or conduit. Include type and number required for material and size of raceway or cable.
2. Pressure Plates: Plastic. Include two for each sealing element.
3. Connecting Bolts and Nuts: Stainless steel of length required to secure pressure plates to sealing elements. Include one for each sealing element.

PART 3 - EXECUTION

3.1 CONDUCTOR MATERIAL APPLICATIONS

A. Feeders and Branch Circuits: Copper. Solid for No. 10 AWG and smaller; stranded for No. 8 AWG and larger.

3.2 CONDUCTOR INSULATION AND MULTICONDUCTOR CABLE APPLICATIONS AND WIRING METHODS

A. Service Entrance: Type THHN-THWN, single conductors in raceway or Type XHHW, single conductors in raceway.

B. Exposed Feeders: Type THHN-THWN, single conductors in raceway.

C. Feeders Concealed in Ceilings, Walls, Partitions, and Crawlspaces: Type THHN-THWN, single conductors in raceway.

D. Feeders Concealed in Concrete, below Slabs-on-Grade, and Underground: Type THHN-THWN, single conductors in raceway.

E. Exposed Branch Circuits, Including in Crawlspaces: Type THHN-THWN, single conductors in raceway.

F. Branch Circuits Concealed in Ceilings, Walls, and Partitions: Type THHN-THWN, single conductors in raceway.

G. Branch Circuits Concealed in Concrete, below Slabs-on-Grade, and Underground: Type THHN-THWN, single conductors in raceway.

H. Metal-clad, Type MC cable may not be used for homeruns on branch circuits. Type MC cable will be allowed between junction boxes serving light fixtures above a lay-in ceiling. Do not

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

install type MC cable in exterior walls or within walls containing foam insulation. Contact engineer for approval to use type MC cable at all other locations.

I. Cord Drops and Portable Appliance Connections: Type SO, hard service cord with stainless-steel, wire-mesh, strain relief device at terminations to suit application.

J. Class 1 Control Circuits: Type THHN-THWN, in raceway.

K. Class 2 Control Circuits: Type THHN-THWN, in raceway, power-limited cable, concealed in building finishes or power-limited tray cable, in cable tray.

3.3 INSTALLATION OF CONDUCTORS AND CABLES

A. Conceal cables in finished walls, ceilings, and floors, unless otherwise indicated.

B. Use manufacturer-approved pulling compound or lubricant where necessary; compound used must not deteriorate conductor or insulation. Do not exceed manufacturer's recommended maximum pulling tensions and sidewall pressure values.

C. Use pulling means, including fish tape, cable, rope, and basket-weave wire/cable grips, that will not damage cables or raceway.

D. Install exposed cables parallel and perpendicular to surfaces of exposed structural members, and follow surface contours where possible.

E. Identify and color-code conductors and cables according to Division 16 Section "Electrical Identification."

F. Tighten electrical connectors and terminals according to manufacturer's published torque-tightening values. If manufacturer's torque values are not indicated, use those specified in UL 486A and UL 486B.

G. Do not splice any conductors for new installations. All splices shall be approved by the engineer and owner prior to installation. Make approved splices and taps that are compatible with conductor material and that possess equivalent or better mechanical strength and insulation ratings than unspliced conductors.

H. Wiring at Outlets: Install conductor at each outlet, with at least 6 inches of slack.

3.4 SLEEVE INSTALLATION FOR ELECTRICAL PENETRATIONS

A. Concrete Slabs and Walls: Install sleeves for penetrations unless core-drilled holes or formed openings are used. Install sleeves during erection of slabs and walls.

B. Fire-Rated Assemblies: Install sleeves for penetrations of fire-rated floor and wall assemblies unless openings compatible with firestop system used are fabricated during construction of floor or wall.

C. Cut sleeves to length for mounting flush with both wall surfaces.

D. Extend sleeves installed in floors 2 inches above finished floor level.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

E. Seal space outside of sleeves with grout for penetrations of concrete and masonry and with approved joint compound for gypsum board assemblies.

F. Fire-Rated-Assembly Penetrations: Maintain indicated fire rating of walls, partitions, ceilings, and floors at cable penetrations.

G. Roof-Penetration Sleeves: Seal penetration of individual cables with flexible boot-type flashing units applied in coordination with roofing work.

H. Aboveground Exterior-Wall Penetrations: Seal penetrations using sleeves and mechanical sleeve seals. Size sleeves to allow for 1-inch annular clear space between pipe and sleeve for installing mechanical sleeve seals.

I. Underground Exterior-Wall Penetrations: Install cast-iron "wall pipes" for sleeves. Size sleeves to allow for 1-inch annular clear space between cable and sleeve for installing mechanical sleeve seals.

3.5 FIRESTOPPING

A. Apply firestopping to electrical penetrations of fire-rated floor and wall assemblies to restore original fire-resistance rating of assembly.

END OF SECTION 260513

Appendix A
Bid 24-44, Construction - Rebid
City Hall HVAC Improvements

SECTION 260526

GROUNDING AND BONDING

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes methods and materials for grounding systems and equipment.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Certified test report of grounding electrode resistance.

1.3 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

B. Comply with UL 467 for grounding and bonding materials and equipment.

PART 2 - PRODUCTS

2.1 CONDUCTORS

A. Insulated Grounding Conductors: Copper wire or cable insulated for 600 V unless otherwise required by applicable Code or authorities having jurisdiction. Identify with continuous green insulation or green tape at each termination.

B. Bare Copper Conductors:

1. Solid Conductors: ASTM B 3.
2. Stranded Conductors: ASTM B 8.
3. Tinned Conductors: ASTM B 33.

2.2 CONNECTORS

A. Listed and labeled by a nationally recognized testing laboratory acceptable to authorities having jurisdiction for applications in which used, and for specific types, sizes, and combinations of conductors and other items connected.

B. Bolted Connectors for Conductors and Pipes: Copper or copper alloy, bolted pressure-type, with at least two bolts.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

1. Pipe Connectors: Clamp type, sized for pipe.

C. Welded Connectors: Exothermic-welding kits of types recommended by kit manufacturer for materials being joined and installation conditions.

2.3 GROUNDING ELECTRODES

A. Ground Rods: Copper-clad steel; 5/8” by 10 feet.

PART 3 - EXECUTION

3.1 APPLICATIONS

A. Conductors: Install solid conductor for No.8 AWG and smaller, and stranded conductors for No. 6 AWG and larger, unless otherwise indicated.

B. Underground Grounding Conductors: Install bare copper conductor, No. 2/0 AWG minimum. Bury at least 24 inches below grade.

C. Isolated Grounding Conductors: Green-colored insulation with continuous yellow stripe. On feeders with isolated ground, identify grounding conductor where visible to normal inspection, with alternating bands of green and yellow tape, with at least three bands of green and two bands of yellow.

D. Conductor Terminations and Connections:

1. Pipe and Equipment Grounding Conductor Terminations: Bolted connectors.
2. Underground Connections: Welded connectors, except at test wells and as otherwise indicated.
3. Connections to Ground Rods at Test Wells: Bolted connectors.
4. Connections to Structural Steel: Welded connectors.

3.2 EQUIPMENT GROUNDING

A. Install insulated equipment grounding conductors in all raceway systems, in addition to those required by NFPA 70:

B. Air-Duct Equipment Circuits: Install insulated equipment grounding conductor to duct-mounted electrical devices operating at 120 V and more, including air cleaners, heaters, dampers, humidifiers, and other duct electrical equipment. Bond conductor to each unit and to air duct and connected metallic piping.

C. Water Heater, Heat-Tracing, and Antifrost Heating Cables: Install a separate insulated equipment grounding conductor to each electric water heater and heat-tracing cable. Bond conductor to heater units, piping, connected equipment, and components.

D. Isolated Grounding Receptacle Circuits: Install an insulated equipment grounding conductor connected to the receptacle grounding terminal. Isolate conductor from raceway and from panelboard grounding terminals. Terminate at equipment grounding conductor terminal of the applicable derived system or service, unless otherwise indicated.

Bid 24-44: Construction - Appendix A
City Hall HVAC Improvements Rebid

E. Signal and Communication Equipment: For telephone, alarm, voice and data, and other communication equipment, provide No. 4 AWG minimum insulated grounding conductor in raceway from grounding electrode system to each service location, terminal cabinet, wiring closet, and central equipment location.

1. Service and Central Equipment Locations and Wiring Closets: Terminate grounding conductor on a 1/4-by-2-by-12-inch grounding bus.
2. Terminal Cabinets: Terminate grounding conductor on cabinet grounding terminal.

F. Metal Poles Supporting Outdoor Lighting Fixtures: Install grounding electrode and a separate insulated equipment grounding conductor in addition to grounding conductor installed with branch-circuit conductors.

3.3 INSTALLATION

A. Grounding Conductors: Route along shortest and straightest paths possible, unless otherwise indicated or required by Code. Avoid obstructing access or placing conductors where they may be subjected to strain, impact, or damage.

B. Ground Rods: Drive rods until tops are 2 inches below finished floor or final grade, unless otherwise indicated.

1. Interconnect ground rods with grounding electrode conductor below grade and as otherwise indicated. Make connections without exposing steel or damaging coating.

C. Bonding Straps and Jumpers: Install in locations accessible for inspection and maintenance, except where routed through short lengths of conduit.

1. Bonding to Structure: Bond straps directly to basic structure, taking care not to penetrate any adjacent parts.
2. Bonding to Equipment Mounted on Vibration Isolation Hangers and Supports: Install so vibration is not transmitted to rigidly mounted equipment.
3. Use exothermic-welded connectors for outdoor locations, but if a disconnect-type connection is required, use a bolted clamp.

D. Grounding and Bonding for Piping:

1. Install insulated copper grounding conductors, in conduit, from building's main service equipment, or grounding bus, to main metal water service entrances to building. Connect grounding conductors to main metal water service pipes, using a bolted clamp connector or by bolting a lug-type connector to a pipe flange, using one of the lug bolts of the flange. Bond metal grounding conductor conduit or sleeve to conductor at each end.
2. Bond each aboveground portion of gas piping system downstream from equipment shutoff valve.

END OF SECTION 260526

City Hall HVAC Improvements Rebid Bid 24-44, Construction - Appendix A

SECTION 260533

RACEWAYS AND BOXES

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes raceways, fittings, boxes, enclosures, and cabinets for electrical wiring.

1.2 SUBMITTALS

A. Product Data: For surface raceways, wireways and fittings, floor boxes, hinged-cover enclosures, and cabinets.

1.3 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

PART 2 - PRODUCTS

2.1 METAL CONDUIT AND TUBING

A. Rigid Steel Conduit: ANSI C80.1.

B. EMT: ANSI C80.3.

C. FMC: Zinc-coated steel.

D. LFMC: Flexible steel conduit with PVC jacket.

E. Fittings for Conduit (Including all Types and Flexible and Liquidtight), EMT, and Cable: NEMA FB 1; listed for type and size raceway with which used, and for application and environment in which installed.

1. Conduit Fittings for Hazardous (Classified) Locations: Comply with UL 886.
2. Fittings for EMT: Steel or die-cast, set-screw or compression type.

2.2 NONMETALLIC CONDUIT AND TUBING

A. ENT: NEMA TC 13.

B. RNC: NEMA TC 2, Type EPC-40-PVC unless otherwise indicated.

C. Fittings for ENT and RNC: NEMA TC 3; match to conduit or tubing type and material.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

2.3 METAL WIREWAYS

A. Description: Sheet metal sized and shaped as indicated, NEMA 250, Type 1, 12 or 3R, unless otherwise indicated.

B. Fittings and Accessories: Include couplings, offsets, elbows, expansion joints, adapters, hold-down straps, end caps, and other fittings to match and mate with wireways as required for complete system.

C. Wireway Covers: Screw-cover type.

D. Finish: Manufacturer's standard enamel finish.

2.4 NONMETALLIC WIREWAYS

A. Description: PVC plastic, extruded and fabricated to size and shape indicated, with snap-on cover and mechanically coupled connections with plastic fasteners.

B. Fittings and Accessories: Include couplings, offsets, elbows, expansion joints, adapters, hold-down straps, end caps, and other fittings to match and mate with wireways as required for complete system.

2.5 SURFACE RACEWAYS

A. Surface Metal Raceways: Galvanized steel with snap-on covers. Manufacturer's standard enamel finish in color selected by Architect or prime coating, ready for field painting (see drawings).

B. Surface Nonmetallic Raceways: Two-piece construction, manufactured of rigid PVC with texture and color selected by Architect from manufacturer's standard colors.

2.6 BOXES, ENCLOSURES, AND CABINETS

A. Sheet Metal Outlet and Device Boxes: NEMA OS 1.

B. Cast-Metal Outlet and Device Boxes: NEMA FB 1 or Type FD, with gasketed cover.

C. Nonmetallic Outlet and Device Boxes: NEMA OS 2.

D. Metal Floor Boxes: Cast metal, fully adjustable, rectangular.

E. Nonmetallic Floor Boxes: Nonadjustable, round.

F. Small Sheet Metal Pull and Junction Boxes: NEMA OS 1.

G. Cast-Metal Access, Pull, and Junction Boxes: NEMA FB 1, with gasketed cover.

H. Hinged-Cover Enclosures: NEMA 250, Type 1, with continuous-hinge cover with flush latch, unless otherwise indicated.

1. Metal Enclosures: Steel, finished inside and out with manufacturer's standard enamel.
2. Nonmetallic Enclosures: Plastic.

Appendix A - Bid 24-44 - Construction - City Hall HVAC Improvements Rebid

I. Cabinets:

1. NEMA 250, Type 1, galvanized-steel box with removable interior panel and removable front, finished inside and out with manufacturer's standard enamel.
2. Hinged door in front cover with flush latch and concealed hinge.
3. Key latch to match panelboards.
4. Metal barriers to separate wiring of different systems and voltage.
5. Accessory feet where required for freestanding equipment.

PART 3 - EXECUTION

3.1 RACEWAY APPLICATION

A. Outdoors: Apply raceway products as specified below, unless otherwise indicated:

1. Exposed Conduit: Rigid steel conduit.
2. Concealed Conduit, Aboveground: Rigid steel conduit.
3. Underground Conduit: RNC, Type EPC-40-PVC, direct buried.
4. Connection to Vibrating Equipment (Including Transformers and Hydraulic, Pneumatic, Electric Solenoid, or Motor-Driven Equipment): LFMC.
5. Boxes and Enclosures, Aboveground: NEMA 250, Type 3R.

B. Comply with the following indoor applications, unless otherwise indicated:

1. Exposed, Not Subject to Physical Damage: EMT.
2. Exposed and Subject to Severe Physical Damage: Rigid steel conduit.
3. Concealed in Ceilings and Interior Walls and Partitions: EMT.
4. Connection to Vibrating Equipment (Including Transformers and Hydraulic, Pneumatic, Electric Solenoid, or Motor-Driven Equipment): FMC, except use LFMC in damp or wet locations.
5. Damp or Wet Locations: Rigid steel conduit.
6. Raceways for Optical Fiber or Communications Cable: EMT.
7. Boxes and Enclosures: NEMA 250, Type 1, except use NEMA 250, Type 4, stainless steel in damp or wet locations.

C. Minimum Raceway Size: ¾ inch trade size.

D. Raceway Fittings: Compatible with raceways and suitable for use and location.

1. Rigid and Intermediate Steel Conduit: Use threaded rigid steel conduit fittings, unless otherwise indicated.

3.2 INSTALLATION

A. Keep raceways at least 6 inches away from parallel runs of flues and steam or hot-water pipes. Install horizontal raceway runs above water and steam piping.

B. Complete raceway installation before starting conductor installation.

C. Arrange stub-ups so curved portions of bends are not visible above the finished slab.

City Hall HVAC Improvements Rebid
Bid 24-44, Construction -
Appendix A

D. Install no more than the equivalent of three 90-degree bends in any conduit run except for communications conduits, for which fewer bends are allowed.

E. Conceal conduit and EMT within finished walls, ceilings, and floors, unless otherwise indicated.

F. Raceways Embedded in Slabs:

1. Run conduit larger than 1-inch trade size, parallel or at right angles to main reinforcement. Where at right angles to reinforcement, place conduit close to slab support.
2. Arrange raceways to cross building expansion joints at right angles with expansion fittings.

G. Raceway Terminations at Locations Subject to Moisture or Vibration: Use insulating bushings to protect conductors, including conductors smaller than No. 4 AWG.

H. Install pull wires in empty raceways. Use polypropylene or monofilament plastic line with not less than 200-lb tensile strength. Leave at least 12 inches of slack at each end of pull wire.

I. Raceways for Optical Fiber and Communications Cable: Install as follows:

1. 3/4-Inch Trade Size and Smaller: Install raceways in maximum lengths of 50 feet.
2. 1-Inch Trade Size and Larger: Install raceways in maximum lengths of 75 feet.
3. Install with a maximum of two 90-degree bends or equivalent for each length of raceway unless Drawings show stricter requirements. Separate lengths with pull or junction boxes or terminations at distribution frames or cabinets where necessary to comply with these requirements.

J. Install raceway sealing fittings at suitable, approved, and accessible locations and fill them with listed sealing compound. For concealed raceways, install each fitting in a flush steel box with a blank cover plate having a finish similar to that of adjacent plates or surfaces. Install raceway sealing fittings at the following points:

1. Where conduits pass from warm to cold locations, such as boundaries of refrigerated spaces.
2. Where otherwise required by NFPA 70.

K. Flexible Conduit Connections: Use maximum of 72 inches of flexible conduit for recessed and semirecessed lighting fixtures, equipment subject to vibration, noise transmission, or movement; and for transformers and motors.

1. Use LFMC in damp or wet locations subject to severe physical damage.

L. Recessed Boxes in Masonry Walls: Saw-cut opening for box in center of cell of masonry block, and install box flush with surface of wall.

M. Set metal floor boxes level and flush with finished floor surface.

N. Set nonmetallic floor boxes level. Trim after installation to fit flush with finished floor surface.

3.3 INSTALLATION OF UNDERGROUND CONDUIT

A. Direct-Buried Conduit:

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

1. Excavate trench bottom to provide firm and uniform support for conduit.
2. After installing conduit, backfill and compact. Start at tie-in point, and work toward end of conduit run, leaving conduit at end of run free to move with expansion and contraction as temperature changes during this process. Firmly hand tamp backfill around conduit to provide maximum supporting strength. After placing controlled backfill to within 12 inches of finished grade, make final conduit connection at end of run.
3. Install manufactured rigid steel conduit elbows for stub-ups at poles and equipment and at building entrances through the floor.

    a. Couple steel conduits to ducts with adapters designed for this purpose, and encase coupling with 3 inches of concrete.
    b. For stub-ups at equipment mounted on outdoor concrete bases, extend steel conduit horizontally a minimum of 60 inches from edge of equipment pad or foundation. Install insulated grounding bushings on terminations at equipment.

4. Warning Planks: Bury warning planks approximately 12 inches above direct-buried conduits, placing them 24 inches o.c. Align planks along the width and along the centerline of conduit.

3.4 FIRESTOPPING

A. Apply firestopping to electrical penetrations of fire-rated floor and wall assemblies to restore original fire-resistance rating of assembly.

END OF SECTION 260533

Appendix A
Bid 24-44, Construction - Rebid
City Hall HVAC Improvements

SECTION 262416

PANELBOARDS

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes distribution panelboards and lighting and appliance branch-circuit panelboards.

1.2 SUBMITTALS

A. Product Data: For each type of panelboard, overcurrent protective device, accessory, and component indicated. Include dimensions and manufacturers' technical data on features, performance, electrical characteristics, ratings, and finishes.

B. Shop Drawings: For each panelboard and related equipment, include the following.

a. Enclosure types and details for types other than NEMA 250, Type 1.
b. Bus configuration, current, and voltage ratings.
c. Short-circuit current rating of panelboards and overcurrent protective devices.
d. UL listing for series rating of installed devices.
e. Features, characteristics, ratings, and factory settings of individual overcurrent protective devices and auxiliary components.

1.3 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

B. Comply with NEMA PB 1.

PART 2 - PRODUCTS

2.1 MANUFACTURERS

A. Manufacturers: Subject to compliance with requirements, provide products by one of the following:

1. Panelboards, Overcurrent Protective Devices, Controllers, Contactors, and Accessories:

a. Eaton Corporation; Cutler-Hammer Products.
b. Square D.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

2.2 MANUFACTURED UNITS

A. Enclosures: Flush- and surface-mounted cabinets. NEMA PB 1, Type 1.

1. Rated for environmental conditions at installed location.

a. Outdoor Locations: NEMA 250, Type 3R.
b. Other Wet or Damp Indoor Locations: NEMA 250, Type 4.
c. Hazardous Areas Indicated on Drawings: NEMA 250, Type 7C.

2. Front: Secured to box with concealed trim clamps. For surface-mounted fronts, match box dimensions; for flush-mounted fronts, overlap box.
3. Hinged Front Cover: Entire front trim hinged to box and with standard door within hinged trim cover.

B. Phase and Ground Buses: Hard-drawn copper, 98 percent conductivity.

C. Conductor Connectors: Suitable for use with conductor material.

1. Ground Lugs and Bus Configured Terminators: Compression type.

D. Service Equipment Label: UL labeled for use as service equipment for panelboards with main service disconnect switches.

E. Future Devices: Mounting brackets, bus connections, and necessary appurtenances required for future installation of devices.

F. Panelboard Short-Circuit Rating:

1. UL label indicating series-connected rating with integral or remote upstream overcurrent protective devices. Include size and type of upstream device allowable, branch devices allowable, and UL series-connected short-circuit rating.
2. Fully rated to interrupt symmetrical short-circuit current available at terminals.

2.3 DISTRIBUTION PANELBOARDS

A. Doors: Secured with vault-type latch with tumbler lock; keyed alike. Omit for fused-switch panelboards.

B. Main Overcurrent Protective Devices: Circuit breaker.

C. Branch Overcurrent Protective Devices:

1. For Circuit-Breaker Frame Sizes 125 A and Smaller: Bolt-on circuit breakers.
2. For Circuit-Breaker Frame Sizes Larger Than 125 A: Bolt-on circuit breakers; plug-in circuit breakers where individual positive-locking device requires mechanical release for removal.

2.4 LIGHTING AND APPLIANCE BRANCH-CIRCUIT PANELBOARDS

A. Branch Overcurrent Protective Devices: Bolt-on circuit breakers, replaceable without disturbing adjacent units.

Bid 24-14, Construction - Appendix A
City Hall HVAC Improvements Rebid

B. Doors: Concealed hinges; secured with flush latch with tumbler lock; keyed alike.

2.5 OVERCURRENT PROTECTIVE DEVICES

A. Molded-Case Circuit Breaker: UL 489, with interrupting capacity to meet available fault currents.

1. Thermal-Magnetic Circuit Breakers: Inverse time-current element for low-level overloads, and instantaneous magnetic trip element for short circuits. Adjustable magnetic trip setting for circuit-breaker frame sizes 250 A and larger.
2. GFCI Circuit Breakers: Single- and two-pole configurations with 5-mA trip sensitivity.
3. Molded-Case Circuit-Breaker Features and Accessories: Standard frame sizes, trip ratings, and number of poles.

a. Lugs: Mechanical style, suitable for number, size, trip ratings, and conductor materials.
b. Application Listing: Appropriate for application; Type SWD for switching fluorescent lighting loads; Type HACR for heating, air-conditioning, and refrigerating equipment.
c. Shunt Trip: 120-V trip coil energized from separate circuit, set to trip at 55 percent of rated voltage.

B. Fused Switch: NEMA KS 1, Type HD, clips to accommodate specified fuses; lockable handle.

2.6 CONTROLLERS

A. Motor Controllers: NEMA ICS 2, Class A, combination controller equipped for panelboard mounting.

B. Contactors: NEMA ICS 2, Class A, combination controller equipped for panelboard mounting.

C. Controller Disconnect Switches: Adjustable instantaneous-trip circuit breaker mounted adjacent to and interlocked with controller.

1. Auxiliary Contacts: Integral with disconnect switches to de-energize external control-power source.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Install panelboards and accessories according to NEMA PB 1.1.

B. Mount top of trim 74 inches above finished floor, unless otherwise indicated.

C. Mount plumb and rigid without distortion of box. Mount recessed panelboards with fronts uniformly flush with wall finish.

D. Install overcurrent protective devices and controllers.

E. Install filler plates in unused spaces.

Appendix A - Bid 24-44, Construction - City Hall HVAC Improvements Rebid

F. Stub four 1-inch empty conduits from panelboard into accessible ceiling space or space designated to be ceiling space in the future. Stub four 1-inch empty conduits into raised floor space or below slab not on grade.

G. Identify field-installed conductors, interconnecting wiring, and components.

H. Panelboard Nameplates: Label each panelboard with engraved metal or laminated-plastic nameplate mounted with corrosion-resistant screws.

END OF SECTION 262416

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

SECTION 262726

WIRING DEVICES

PART 1 - GENERAL

1.1 SUMMARY

A. This Section includes the following:

1. Receptacles, receptacles with integral GFCI, and associated device plates.
2. Wall-box motion sensors.
3. Snap switches and wall-box dimmers.
4. Solid-state fan speed controls.
5. Wall-switch and exterior occupancy sensors.
6. Communications outlets.

1.2 SUBMITTALS

A. Product Data: For each type of product indicated.

B. Operation and Maintenance Data: For wiring devices to include in all manufacturers' packing label warnings and instruction manuals that include labeling conditions.

1.3 QUALITY ASSURANCE

A. Electrical Components, Devices, and Accessories: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction, and marked for intended use.

PART 2 - PRODUCTS

2.1 STRAIGHT BLADE RECEPTACLES

A. Convenience Receptacles, 125 V, 20 A: Comply with NEMA WD 1, NEMA WD 6 configuration 5-20R, and UL 498. Receptacles shall be similar to Hubbell Specification Grade Series HBL 5352 for duplex or equal.

2.2 GFCI RECEPTACLES

A. General Description: Straight blade, feed-through type. Comply with NEMA WD 1, NEMA WD 6, UL 498, and UL 943, Class A, and include test and reset push buttons and indicator light that is lighted when device is tripped. Furnish device equal to Hubbell GF 5362.

B. Duplex GFCI Convenience Receptacles, 125 V, 20 A.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

2.3 ISOLATED GROUND RECEPTACLE

A. Where isolated ground receptacles are indicated, use NEMA 5-20R with ground terminal isolated from mounting plate. Identify isolated ground receptacles with an orange triangle on the face and UL labeled as such. Hubbell Series IG 5362 or equal.

2.4 SAFETY TYPE RECEPTACLES

A. NEMA 5-15R with back wired terminals and a mechanical interlock device to prevent insertion of objects into only one terminal. Arrow Hart TR82 or equal.

2.5 SNAP SWITCHES

A. Comply with NEMA WD 1 and UL 20.

B. Switches, 120/277 V, 20 A:

C. Key-Operated Switches, 120/277 V, 20 A:

1. Description: Single pole, with factory-supplied key in lieu of switch handle.

D. Single-Pole, Double-Throw, Momentary Contact, Center-Off Switches, 120/277 V, 20 A; for use with mechanically held lighting contactors.

E. Key-Operated, Single-Pole, Double-Throw, Momentary Contact, Center-Off Switches, 120/277V, 20A; for use with mechanically held lighting contactors, with factory-supplied key in lieu of switch handle.

2.6 WALL-BOX DIMMERS

A. Dimmer Switches: Modular, full-wave, solid-state units with integral, quiet on-off switches, with audible frequency and EMI/RFI suppression filters.

B. Control: Continuously adjustable slider; with single-pole or three-way switching. Comply with UL 1472.

2.7 FAN SPEED CONTROLS

A. Modular, 120-V, full-wave, solid-state units with integral, quiet on-off switches and audible frequency and EMI/RFI filters. Comply with UL 1917.

1. Continuously adjustable.
2. Three-speed adjustable.

2.8 OCCUPANCY SENSORS

A. Wall-Switch Sensors:

1. Description: Passive-infrared type, 120/277 V, adjustable time delay up to 30 minutes, 180-degree field of view, with a minimum coverage area of 900 sq. ft.

Appendix A
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

B. Long-Range Wall-Switch Sensors:

1. Description: Passive-infrared type, 120/277 V, adjustable time delay up to 30 minutes, 110-degree field of view, with a minimum coverage area of 1200 sq. ft.

C. Wide-Range Wall-Switch Sensors:

1. Description: Passive-infrared type, 120/277 V, adjustable time delay up to 30 minutes, 150-degree field of view, with a minimum coverage area of 1200 sq. ft.

D. Exterior Occupancy Sensors:

1. Description: Passive-infrared type, 120/277 V, weatherproof, adjustable time delay up to 15 minutes, 180-degree field of view, and 110-foot detection range. Minimum switch rating: 1000-W incandescent, 500-VA fluorescent.

2.9 COMMUNICATIONS OUTLETS

A. Telephone Outlet:

1. Description: Single RJ-45 jack for terminating 100-ohm, balanced, four-pair UTP; TIA/EIA-568-B.1 complying with Category 5e. Comply with UL 1863.

B. TV Outlet:

1. Description: Single Type F coaxial cable connector.

2.10 WALL PLATES

A. Single and combination types to match corresponding wiring devices.

1. Plate-Securing Screws: Metal with head color to match plate finish.
2. Material for Finished Spaces: Steel with white baked enamel suitable for field painting. Smooth, high-impact thermoplastic. Satin-finished stainless steel.
3. Material for Unfinished Spaces: Smooth, high-impact thermoplastic.
4. Material for Damp Locations: Thermoplastic with spring-loaded lift cover, and listed and labeled for use in "wet locations."

B. Wet-Location, Weatherproof Cover Plates: NEMA 250, complying with type 3R weather-resistant thermoplastic with lockable cover.

2.11 FLOOR SERVICE FITTINGS

A. Type: Modular, flush-type, dual-service units suitable for wiring method used.

B. Compartments: Barrier separates power from voice and data communication cabling.

C. Power Receptacle: NEMA WD 6 configuration 5-20R, gray finish, unless otherwise indicated.

D. Voice and Data Communication Outlet: Blank cover with bushed cable opening or two modular, keyed, color-coded, RJ-45 Category 5e jacks for UTP cable if specified on drawings.

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

2.12 FINISHES

A. Color: The color of all receptacles and face plates shall be as directed by the Architect. Emergency devices shall have RED faceplates, while TVSS Devices are BLUE.

PART 3 - EXECUTION

3.1 INSTALLATION

A. Comply with NECA 1, including the mounting heights listed in that standard, unless otherwise noted.

B. Coordination with Other Trades:

1. Take steps to insure that devices and their boxes are protected. Do not place wall finish materials over device boxes and do not cut holes for boxes with routers that are guided by riding against outside of the boxes.
2. Keep outlet boxes free of plaster, drywall joint compound, mortar, cement, concrete, dust, paint, and other material that may contaminate the raceway system, conductors, and cables.
3. Install device boxes in brick or block walls so that the cover plate does not cross a joint unless the joint is troweled flush with the face of the wall.
4. Install wiring devices after all wall preparation, including painting, is complete.

C. Conductors:

1. Do not strip insulation from conductors until just before they are spliced or terminated on devices.
2. Strip insulation evenly around the conductor using tools designed for the purpose. Avoid scoring or nicking of solid wire or cutting strands from stranded wire.
3. The length of free conductors at outlets for devices shall meet provisions of NFPA 70, Article 300, without pigtails.

D. Device Installation:

1. Replace all devices that have been in temporary use during construction or that show signs that they were installed before building finishing operations were complete.
2. Keep each wiring device in its package or otherwise protected until it is time to connect conductors.
3. Do not remove surface protection, such as plastic film and smudge covers, until the last possible moment.
4. Connect devices to branch circuits using pigtails that are not less than 6 inches in length.
5. When there is a choice, use side wiring with binding-head screw terminals. Wrap solid conductor tightly clockwise, 2/3 to 3/4 of the way around terminal screw.
6. Use a torque screwdriver when a torque is recommended or required by the manufacturer.
7. When conductors larger than No. 12 AWG are installed on 15- or 20-A circuits, splice No. 12 AWG pigtails for device connections.
8. Tighten unused terminal screws on the device.
9. When mounting into metal boxes, remove the fiber or plastic washers used to hold device mounting screws in yokes, allowing metal-to-metal contact.

E. Receptacle Orientation:

Bid 24-44, Construction - Appendix A
City Hall HVAC Improvements Rebid

1. Install ground pin of vertically mounted receptacles up.

F. Device Plates: Do not use oversized or extra-deep plates. Repair wall finishes and remount outlet boxes when standard device plates do not fit flush or do not cover rough wall opening.

G. Dimmers:

1. Install dimmers within terms of their listing.
2. Verify that dimmers used for fan speed control are listed for that application.
3. Install unshared neutral conductors on line and load side of dimmers according to manufacturers' device listing conditions in the written instructions.

H. Arrangement of Devices: Unless otherwise indicated, mount flush, with long dimension vertical and with grounding terminal of receptacles on top. Group adjacent switches under single, multigang wall plates.

3.2 FIELD QUALITY CONTROL

A. Tests for Convenience Receptacles:

1. Line Voltage: Acceptable range is 105 to 132 V.
2. Percent Voltage Drop under 15-A Load: A value of 6 percent or higher is not acceptable.
3. Ground Impedance: Values of up to 2 ohms are acceptable.
4. GFCI Trip: Test for tripping values specified in UL 1436 and UL 943.
5. Verify that the device and its outlet box are securely mounted.
6. The tests shall be diagnostic, indicating damaged conductors, high resistance at the circuit breaker, poor connections, inadequate fault current path, defective devices, or similar problems. Correct circuit conditions, remove malfunctioning units and replace with new, and retest as specified above.

END OF SECTION 262726

Bid 24-44, Construction -
City Hall HVAC Improvements Rebid

Bid 24-44, Addendum 1

CITY OF FAYETTEVILLE ARKANSAS

Date: Monday, October 21, 2024

To: All Prospective Vendors

From: Amanda Beilfuss – 479.575.8220 – abeilfuss@fayetteville-ar.gov

RE: Bid 24-44, Construction – City Hall HVAC Improvements Rebid

---

This addendum is hereby made a part of the contract documents to the same extent as though it were originally included therein. Interested parties should indicate their receipt of same in the appropriate blank of the Bid. ***BIDDERS SHALL ACKNOWLEDGE THIS ADDENDUM ON THE DESIGNATED LOCATION ON THE BID FORM.***

1. A non-mandatory Pre-Bid meeting was held on Wednesday, October 16, 2024 at 3:00 PM in Room #111 of Fayetteville City Hall. The sign-in sheet of attendees is attached to this addendum for disclosure to all interested parties.
    a. Attendees:
        i. City of Fayetteville:
            1. Amanda Beilfuss, Sr. Purchasing Agent
            2. Kenny Fitch, Purchasing Agent
            3. Wade Abernathy, Construction Director
            4. Quin Thompson, Facilities Manager
            5. Shane Lanning, Engineering Elements
            6. Ron McClane, Engineering Elements

        ii. Vendors:
            1. Allied
            2. JCI
            3. Middleton Inc.
            4. Milestone Construction
            5. Precision Ventures

2. Clarifications –
    a. It is the intention of the City to award this bid to one (1) contractor to complete the entire scope of work.
    b. Once Contract has been awarded, the Contractor will work with the Fayetteville Police Department/Dispatch to obtain the required Criminal Justice Information Services (CJIS) certification.
    c. Regarding section 13.2 of Section 01 – Instructions to Bidders, the majority of this scope of work will need to be performed OUTSIDE of regular working hours. Regular working hours for City Hall are Monday-Friday, 8:00 AM – 5:00 PM. Work shall be performed outside of this timeframe.

Bid Bond

CONTRACTOR:
(Name, legal status and address)

Milestone Construction Company, LLC
2002 S. 48th Street, Suite A
Springdale, AR 72762

SURETY:
(Name, legal status and principal place of business)

Travelers Casualty and Surety Company of America
One Tower Square
Hartford, CT 06183

OWNER:
(Name, legal status and address)

City of Fayetteville, Arkansas
113 W. Mountain
Fayetteville, AR 72701

BOND AMOUNT: $ Five Percent of Bid Amount----(5%)

PROJECT:
(Name, location or address, and Project number, if any)

City Hall HVAC Improvements

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof, or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

Any singular reference to Contractor, Surety, Owner or other party shall be considered plural where applicable.

POWER OF ATTORNEY

KNOW ALL MEN BY THESE PRESENTS: That Travelers Casualty and Surety Company of America, Travelers Casualty and Surety Company, and St. Paul Fire and Marine Insurance Company are corporations duly organized under the laws of the State of Connecticut (herein collectively called the "Companies"), and that the Companies do hereby make, constitute and appoint **William H Griffin** of **NORTH LITTLE ROCK**, **Arkansas**, their true and lawful Attorney(s)-in-Fact to sign, execute, seal and acknowledge any and all bonds, recognizances, conditional undertakings and other writings obligatory in the nature thereof on behalf of the Companies in their business of guaranteeing the fidelity of persons, guaranteeing the performance of contracts and executing or guaranteeing bonds and undertakings required or permitted in any actions or proceedings allowed by law.

IN WITNESS WHEREOF, the Companies have caused this instrument to be signed, and their corporate seals to be hereto affixed, this **21st** day of **April, 2021**.

State of Connecticut

City of Hartford ss.

By: _____
Robert L. Raney, Senior Vice President

On this the **21st** day of **April, 2021**, before me personally appeared **Robert L. Raney**, who acknowledged himself to be the Senior Vice President of each of the Companies, and that he, as such, being authorized so to do, executed the foregoing instrument for the purposes therein contained by signing on behalf of said Companies by himself as a duly authorized officer.

IN WITNESS WHEREOF, I hereunto set my hand and official seal.

My Commission expires the **30th** day of **June, 2026**

_____
Anna P. Nowik, Notary Public

This Power of Attorney is granted under and by the authority of the following resolutions adopted by the Boards of Directors of each of the Companies, which resolutions are now in full force and effect, reading as follows:

RESOLVED, that the Chairman, the President, any Vice Chairman, any Executive Vice President, any Senior Vice President, any Vice President, any Second Vice President, the Treasurer, any Assistant Treasurer, the Corporate Secretary or any Assistant Secretary may appoint Attorneys-in-Fact and Agents to act for and on behalf of the Company and may give such appointee such authority as his or her certificate of authority may prescribe to sign with the Company's name and seal with the Company's seal bonds, recognizances, contracts of indemnity, and other writings obligatory in the nature of a bond, recognizance, or conditional undertaking, and any of said officers or the Board of Directors at any time may remove any such appointee and revoke the power given him or her; and it is

FURTHER RESOLVED, that the Chairman, the President, any Vice Chairman, any Executive Vice President, any Senior Vice President or any Vice President may delegate all or any part of the foregoing authority to one or more officers or employees of this Company, provided that each such delegation is in writing and a copy thereof is filed in the office of the Secretary; and it is

FURTHER RESOLVED, that any bond, recognizance, contract of indemnity, or writing obligatory in the nature of a bond, recognizance, or conditional undertaking shall be valid and binding upon the Company when (a) signed by the President, any Vice Chairman, any Executive Vice President, any Senior Vice President or any Vice President, any Second Vice President, the Treasurer, any Assistant Treasurer, the Corporate Secretary or any Assistant Secretary and duly attested and sealed with the Company's seal by a Secretary or Assistant Secretary; or (b) duly executed (under seal, if required) by one or more Attorneys-in-Fact and Agents pursuant to the power prescribed in his or her certificate or their certificates of authority or by one or more Company officers pursuant to a written delegation of authority; and it is

FURTHER RESOLVED, that the signature of each of the following officers: President, any Executive Vice President, any Senior Vice President, any Vice President, any Assistant Vice President, any Secretary, any Assistant Secretary, and the seal of the Company may be affixed by facsimile to any Power of Attorney or to any certificate relating thereto appointing Resident Vice Presidents, Resident Assistant Secretaries or Attorneys-in-Fact for purposes only of executing and attesting bonds and undertakings and other writings obligatory in the nature thereof, and any such Power of Attorney or certificate bearing such facsimile signature or facsimile seal shall be valid and binding upon the Company and any such power so executed and certified by such facsimile signature and facsimile seal shall be valid and binding on the Company in the future with respect to any bond or understanding to which it is attached.

I, **Kevin E. Hughes**, the undersigned, Assistant Secretary of each of the Companies, do hereby certify that the above and foregoing is a true and correct copy of the Power of Attorney executed by said Companies, which remains in full force and effect.

Dated this **30th** day of **October**, **2024**.

_____
Kevin E. Hughes, Assistant Secretary

To verify the authenticity of this Power of Attorney, please call us at 1-800-421-3880.
Please refer to the above-named Attorney(s)-in-Fact and the details of the bond to which this Power of Attorney is attached.

Project Check List

This checklist is for the Bidder's use in preparing & submitting a bid. It is not intended to include all details necessary to prepare a bid and shall not be used as a substitute for the requirements of the bid documents. Use of this checklist does not relieve the Bidder from the responsibility of meeting all requirements of the Specifications concerning the preparation of an acceptable bid. Bidders are welcome to use this form as a coversheet for a sealed envelope; however, using this form itself is NOT a requirement.

Appendix B
Bid 24-44, Construction - City Hall HVAC Improvements Rebid
City Issued Bid

[X] **5% Bid Bond of the amount bid accompanied by required documentation (Power of Attorney, etc.)**

- In lieu of a bid bond, the bidder may submit a cashier's check from a bank located in the State of Arkansas for at least five percent (5%) of the amount bid (inclusive of any deductive alternates). Cashier's checks shall be made payable to the City of Fayetteville, AR and received prior to the bid deadline by making an in-person delivery appointment with the City Purchasing Division.

[X] All addenda shall be signed, acknowledged, and submitted on the appropriate forms (submitting the actual addendums or marking acknowledgement on other bid pages).

[X] All line items shall be appropriately filled out and extended to reveal the line item price as well as the total bid price. Total base bid should be calculated in the provided space.

[X] All pages provided with signature lines shall be appropriately signed, dated accordingly, and included with submitted bid documents

[X] All bids shall be received before the stated deadline utilizing the City's electronic bidding platform or submitting a physical sealed bid to the City Purchasing Division. Submitting a bid electronically is strongly encouraged. A public bid opening will be conducted shortly after the deadline at City Hall and livestreamed at https://www.youtube.com/user/cityoffayettevillear. Late or misdirected bids shall not be accepted. The City of Fayetteville shall not be responsible for lost or misdirected bids, or failure of bidder's technical equipment. If submitting a physical bid, all bid documents shall be delivered in a sealed envelope to the address stated in the advertisement or updated deadline issued via Addenda. All bids should be delivered with the name of the bidder (contractor) on the sealed envelope as well as the bidders Arkansas Contractor's License Number.

[X] **Additional Information Required:**

- AR Secretary of State Filing #: 800044464 OR submit electronically.
- Arkansas Contractor License #: 0156050425 OR submit electronically.

- Pursuant Arkansas Code Annotated §25-1-503, the Contractor agrees and certifies that they do not currently boycott Israel and will not boycott Israel during any time in which they are entering into, or while in contract, with any public entity as defined in §25-1-503. If at any time during contract the contractor decides to boycott Israel, the contractor must notify the contracted public entity in writing.
  - Submit electronically or circle applicable answer: (YES) *or* NO

- Pursuant Arkansas Code Annotated §25-1-1002, the Contractor agrees and certifies that they do not currently boycott Energy, Fossil Fuel, Firearms, and Ammunition Industries during any time in which they are entering into, or while in contract, with any public entity as defined in §25-1-1002. If at any time during the contract the contractor decides to boycott Energy, Fossil Fuel, Firearms, and/or Ammunition Industries, the contractor must notify the contracted public entity in writing.
  - Submit electronically or circle applicable answer: (YES) *or* NO

SECTION 02
BID FORM

Contract Name: Rock Street Annex Roof Replacement

Bid Number: 24-44, Construction – City Hall HVAC Improvements REBID

BID TO:

Owner: The City of Fayetteville, Arkansas
113 West Mountain Street
Fayetteville, Arkansas 72701

BID FROM:

Bidder: Milestone Construction Company, LLC
2002 S. 48th Street
Springdale, AR 72762

Appendix B
Bid 24-44, Construction -
City Hall HVAC Improvements Rebid
City Issued Bid

ARTICLE 1 - INTENT

1.01 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an agreement with Owner in the form included in the Contract Documents to perform and furnish all Work as specified or indicated in the Contract Documents for the Bid price and within the Bid time indicated in this Bid and in accordance with the other terms and conditions of the Contract Documents.

ARTICLE 2 - TERMS AND CONDITIONS

2.01 Bidder accepts all terms and conditions of the Invitation to Bid and Instructions to Bidders, including without limitation those dealing with the disposition of Bid Security. This Bid will remain subject to acceptance for 90 days after the day of Bid opening. Bidder will sign and deliver the required number of counterparts of the Agreement with the Bonds and other documents required by the Bidding Requirements within 15 days after the date of Owner's Notice of Award.

ARTICLE 3 - BIDDER'S REPRESENTATIONS

3.01 In submitting this Bid, Bidder represents, as more fully set forth in the Agreement, that:

A. Bidder has examined and carefully studied the Bid Documents, and the following Addenda, receipt of all which is hereby acknowledged:

Number	Date
#001	10-21-24
#002	10-28-24

B. Bidder has visited the Site and become familiar with and is satisfied as to the general, local, and Site conditions that may affect cost, progress, performance, and furnishing of the Work.

C. Bidder is familiar with and is satisfied as to all federal, state, and local Laws and Regulations that may affect cost, progress, performance, and furnishing of the Work.

D. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to Work for which this Bid is submitted as indicated in the Contract Documents.

E. Bidder has correlated the information known to Bidder, information and observations obtained from visits to the Site, reports, and drawings identified in the Contract Documents, and all additional examinations, investigations, explorations, tests, studies, and data with the Contract Documents.

F. Bidder has given Purchasing Division written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Contract Documents, and the written resolution thereof by Purchasing Division is acceptable to Bidder.

G. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performing and furnishing the Work for which this Bid is submitted.

H. This Bid is genuine and not made in the interest of or on behalf of any undisclosed person, firm, or corporation and is not submitted in conformity with any agreement or rules of any group,

Appendix B - Bid 24-44, Construction - City Hall HVAC Improvements Rebid City Issued Bid

association, organization, or corporation; Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham bid; Bidder has not solicited or induced any person, firm, or a corporation to refrain from bidding; and Bidder has not sought by collusion to obtain for himself any advantage over any other Bidder or over Owner.

I. Upon receipt of written notice of acceptance of this bid, bidder will execute the formal contract attached within 10 days and deliver a Surety Bond or Bonds as required by the General Conditions.

J. The bid security attached in the sum of $ 5% is to become the property of the Owner in the event the contract and bond are not executed within the time set forth above, as liquidated damages for the delay and additional expense to the Owner caused thereby.

ARTICLE 4 - CONTRACT TIMES

5.01 Bidder agrees that the Work will be substantially completed and completed and ready for final payment 365 consecutive calendar days from the date established in a written notice to proceed. Total completion shall be 395 consecutive calendar days from the date established in a written notice to proceed. The bidder agrees to pay liquidated damages for each consecutive calendar day thereafter the total completion time.

5.02 Bidder accepts the provisions as to liquidated damages in the event of failure to complete the Work within the total completion time. Liquidated damages in the sum of $ 250.00 for each consecutive calendar day thereafter will be assessed.

ARTICLE 5 – TERMINOLOGY

6.01 The terms used in this Bid which are defined in the GENERAL CONDITIONS or Instructions to Bidders will have the meanings assigned to them.

SUBMITTED on October 30, 20 24.

Bid 24-44, Construction - Appendix B
City Hall HVAC Improvements Rebid
City Issued Bid

Bid 24-44 Submittal Qualifying Statement

The City staff acknowledges that Milestone's submittal response does not include the Allowance for the Mechanical Controls Systems.

It has been determined that with the addition of the controls allowance to the submittal, Milestone is still the lowest responsive bidder.

The City will execute a change order to the contract in the amount of 300,000. Those funds will be scheduled as Owner Contingency and allocated for controls if needed. It will also be used for previous owner scoped items needed to accomplish the hvac installations, and any unforeseen conditions.

This qualification of bid statement will become a part of Milestone's submittal response, and thus a part of the contract.

Amanda Beilfuss, Sr. Purchasing Agent 10/30/24

Kenny Fitch, Purchasing Agent 10/30/24

THIS AGREEMENT is made this _____ day of _____, 2024, by and between City of Fayetteville, Arkansas, acting by and through its Mayor (hereinafter called CITY OF FAYETTEVILLE or CITY) and **Milestone Construction Company, LLC** (Vendor or Milestone).

CITY OF FAYETTEVILLE from time to time requires professional construction services in connection with construction projects. Therefore, CITY OF FAYETTEVILLE and **Milestone**, in consideration of their mutual covenants, agree as follows:

Work performed by **Milestone** shall be performed under valid, active, current license with the Arkansas Contractor's Licensing Board. **Milestone** shall follow all federal, state, and local laws at all times.

1. **Contracted parties and relationship:**
    a. This agreement shall be binding between all parties. Fees shall be provided as identified in appendices.
        i. **Milestone's** Tax identification number (TIN) ending in 6629
        ii. **Milestone's** Arkansas Contractor License No. 0156050425
        iii. **Milestone's** Secretary of State Filing No. 800044464
    b. Parties agree to act on the basis of mutual trust, good faith, and fair dealing, and perform in a fiscally responsible and timely manner. Parties shall each endeavor to promote harmony and cooperation among all Project participants.

2. **Entire Agreement and Exhibits:** This Agreement sets forth the entire agreement and understanding between the parties on the subject matter of this Agreement. Neither party shall be bound by any conditions, definitions, representations or warranties with respect to the subject matter of this Agreement other than those as expressly provided herein.
    a. Appendices included under this agreement include the following:
        i. **Appendix A**: Bid package identified as **Bid 24-44, Construction – City Hall HVAC Improvements Rebid** with the specifications and conditions typed thereon inclusive of all bidding documents, plans and drawings, and issued addenda.
        ii. **Appendix B**: **Milestone's** bid submittal
        iii. **Appendix C**: Bid Tabulation
        iv. **Appendix D**: **Milestone's** Certificate of Insurance
        v. **Appendix E**: **Milestone's** 100% Performance and Payment Bonds
            1. **Appendix D and E** shall be submitted to the City within the timeframe identified in the bid documents or 10 (ten) calendar days.
    b. This agreement may be modified only by a duly executed written instrument signed by the CITY and **Milestone.**
    c. ORDER OF PRECEDENCE: In case of any inconsistency, conflict, or ambiguity among the Contract Documents, the documents shall govern in the following order: (a) Change Orders and written

amendments to this Agreement which are executed by all parties; (b) the Agreement; (c) **Milestone's** Proposal (d) City's published bid and associated Addenda.

3. **Notices:** Any notice required under this Agreement shall be in writing, address to the appropriate party at the following addresses:
    a. City of Fayetteville: Attention: Mayor Lioneld Jordan, 113 W. Mountain, Fayetteville, AR 72701
    b. Vendor: Milestone Construction Company, LLC, 2002 S. 48th Street, Suite A, Springdale, AR 72762

4. **General Provisions:**
    i. ETHICS: All parties shall perform with integrity. Each shall avoid conflicts of interest and promptly disclose to any other part any conflicts that may arise. All parties warrant that it has not and shall not pay or receive any contingent fees or gratuities to or from any other party, including agents, officer's employers, Subcontractors, Sub subcontractors, Suppliers, Volunteers, Elected Officials, or Others to secure preferential treatment.
    ii. Workmanship: The Work shall be executed in accordance with the Contract Documents in a workmanlike manner. All materials used in the Work shall be furnished in sufficient quantities to facilitate the proper and expeditious execution of the Work and shall be new except as otherwise provided in the Contract Documents.
    iii. MATERIALS FURNISHED BY OWNER OR OTHERS: If the Work includes installation of materials or equipment furnished by City or Others, it shall be the responsibility of the vendor to examine the items so provided and thereupon handle, store, and install the items, unless otherwise provided in the Contract Documents, with such skill and care as to provide a satisfactory and proper installation. Loss or damage due to acts or omissions of the vendor shall be the responsibility of vendor and may be deducted from any amounts due or to become due. Any defects discovered in such materials or equipment shall be reported at once to the City and the City's contracted third-party Design Professional. Following receipt of written notice from vendor of defects, City and Design Professional shall promptly inform the City what action, if any, vendor shall take with regard to the defects.
    iv. WORKSITE VISIT: Vendor acknowledges that it has visited, or has had the opportunity to visit, the Worksite to visually inspect the general and local conditions which could affect the Work.
    v. Vendor shall perform all duties and responsibilities necessary to coordinate the various parts of the Work and to prepare its Work for the work of City or Others.
        1. Cutting, patching, or altering the work of City or Others shall be done with the prior written approval of City and Design Professional. Such approval shall not be unreasonably withheld.
    vi. COMPLIANCE WITH LAWS: Vendor shall comply with all the Law at its own cost. Vendor shall be liable to City for all loss, cost, or expense attributable to any acts or omissions by Vendor its employees, subcontractors, suppliers, and agents for failure to comply with Laws, including fines, penalties, or corrective measures.
    vii. COST OF CORRECTING DAMAGED OR DESTROYED WORK: With regard to damage or loss attributable to the acts or omissions of City or Others and not to Vendor, City may either (a) promptly remedy the damage or loss and assume affected warranty responsibilities, (b) accept the damage or loss, or (c) issue a Change Order to remedy the damage or loss. If Vendor incurs costs or is delayed due to such loss or damage, Vendor may seek an equitable adjustment in the Cost of the Work, Date of Substantial Completion or Date of Final Completion. Any equitable adjustment shall be approved by all parties.

viii. Taxes and Permits: Vendor shall give public authorities all notices required by law and shall obtain and pay for all necessary permits, licenses, and renewals pertaining to the Work. Vendor shall provide to City copies of all notices, permits, licenses, and renewals required under this Agreement.

1. Vendor shall pay applicable taxes and permit fees associated with the entire project.

ix. DISCOUNTS: All discounts for prompt payment shall accrue to City. All trade discounts, rebates, and refunds, and all returns from sale of surplus materials and equipment, shall be credited to the Cost of the Work, or directly to the City after final payment.

x. City may occupy or use completed or partially completed portions of the Work when (a) the portion of the Work is designated in a Certificate of Substantial Completion, (b) appropriate insurer(s) consent to the occupancy or use, and (c) public authorities authorize the occupancy or use. Vendor shall not unreasonably withhold consent to partial occupancy or use.

xi. EXTENT OF AGREEMENT: Except as expressly provided, this Agreement is for the exclusive benefit of all Parties, and not the benefit of any third party. This Agreement represents the entire and integrated agreement between the Parties, and supersedes all prior negotiations, representations, or agreements, either written or oral. This Agreement and each and every provision is for the exclusive benefit of all Parties and not for the benefit of any third party.

xii. ASSIGNMENT: Except as to the assignment of proceeds, no Party shall assign their interest in this Agreement without the written consent of the other Party. The terms and conditions of this Agreement shall be binding upon all Parties, their partners, successors, assigns, and legal representatives. No Party shall assign the Agreement without written consent of the other.

xiii. Where figures are given, they shall be preferred to scaled dimensions.

xiv. The drawings and specifications are complementary. If Work is shown only on one but not on the other, Vendor shall perform the Work as though fully described on both. Vendor shall seek clarification from the City or the City's third-party Design Professional for any discrepancies.

xv. In case of conflicts between the drawings and specifications, the specifications shall govern unless otherwise stated in the bidding documents. In any case of omissions or errors in figures, drawings, or specifications, Vendor shall immediately submit the matter to City and Design Professional for clarification. The City's clarifications are final and binding, which may include third-party Design Professional content.

xvi. DEBARMENT AND SUSPENSION: By execution of this agreement, Vendor certifies that to the best of its knowledge and belief that the Vendor and its principals:

1. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

2. Have not within a three year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
3. Are not presently indicted for or otherwise criminally or civilly charged by a government entity (Federal, State, or local) with commission of any of the offenses enumerated in paragraph (2) of this certification; and

4. (d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

5. Vendor understands that a false statement on certification regarding debarment and suspension may be grounds for rejection of this proposal or termination of the award. In addition, under 18 USC Sec. 1001, a false statement may result in a fine. I further certify that I will obtain a similar certification for each subcontract awarded in excess of $50,000.

6. Certifications for subcontracts or sub subcontracts executed under this agreement shall include all language in this section.

5. Definitions:

a. Unless otherwise specifically defined in this Agreement, any terms that have well-known technical or trade meanings shall be interpreted in accordance with their well-known meanings.

b. "Business Day" means all Days, except weekends and official federal or state holidays where the Project is located.

c. A "Change Order" is a written order signed by all Parties after execution of this Agreement, indicating changes in the scope of the Work, and Date of Substantial Completion or Date of Final Completion.

d. "Contract Time" is the period between the Date of Notice to Proceed and the total time authorized to achieve Final Completion.

e. "Cost of the Work" means the total costs and discounts charged to the City.

f. The "Vendor" is the person or entity identified in this contract and includes Vendor's Representative.

g. "Day" means a calendar day unless otherwise specified.

h. "Defective Work" is any portion of the Work that that does not conform with the requirements of the Contract Documents.

i. "Design Professional" means the licensed architect retained by the City and its subconsultants, to perform design services for the Project.

j. "Final Completion" occurs on the date when Vendor's obligations under this Agreement are complete and accepted by City and final payment becomes due and payable. This date shall be confirmed by a Certificate of Final Completion signed by all Parties.

k. "Hazardous Material" is any substance or material identified now or in the future as hazardous under the Law, or any other substance or material that may be considered hazardous or otherwise subject to statutory or regulatory requirement governing handling, disposal, or cleanup.

l. "Interim Directive" is a written order containing change to the Work directed by and in consultation with City and Design Professional after execution of this Agreement and before Substantial Completion. Interim Directives shall be consolidated and formalized in a change order to be signed by all parties.

m. "Law" means federal, state, or local laws, ordinances, codes, rules, and regulations applicable to the Work with which Vendor must comply that are enacted as of the Agreement date.

n. "Others" means City's other: (a) contractors/constructors, (b) suppliers, (c) subcontractors, sub subcontractors, or suppliers of (a) and (b); and others employed directly or indirectly by (a), (b), or (c) or any by any of them or for whose acts any of them may be liable.

o. "Overhead" means (a) payroll costs, burden, and other compensation of Vendor's employees in Vendor's principal and branch offices for work associated with this project.

p. "Owner" is the City of Fayetteville, Arkansas (City).

q. The "Owner's Program" is an initial description of Owner's objectives, including budgetary and time criteria, space requirements and relationships, flexibility and expandability requirements, special equipment and systems, site requirements, and any requirements for phased occupancy.

r. The "Parties" are collectively City and Vendor.

s. The "Project," is the building, facility, or other improvements for which Vendor is to perform Work under this Agreement. It may also include construction by Owner or Others.

t. The "Schedule of the Work" is the document prepared by Vendor that specifies the dates on which Vendor plans to begin and complete various parts of the Work, including dates on which information and approvals are required from City.

u. "Subcontractor" is a person or entity retained by Vendor as an independent contractor to provide the labor, materials, equipment, or services necessary to complete a specific portion of the Work. The term Subcontractor does not include Design Professional or Others.

v. "Substantial Completion" of the Work, or of a designated portion, occurs on the date when the Work is sufficiently complete in accordance with the Contract Documents so that City may occupy or utilize the Work, or a designated portion, for the use for which it is intended, without unapproved disruption. This date shall be confirmed by a certificate of Substantial Completion signed by all Parties.

w. A "Sub subcontractor" is a person or entity who has an agreement with a Subcontractor or another sub subcontractor or Supplier to perform a portion of the Subcontractor's Work or supply material or equipment.

x. A "Supplier" is a person or entity retained by Vendor to provide material or equipment for the Work.

y. "Terrorism" means a violent act, or an act that is dangerous to human life, property, or infrastructure, that is committed by an individual or individuals and that appears to be part of an effort to coerce a civilian population or to influence the policy or affect the conduct of any government by coercion. Terrorism includes, but is not limited to, any act certified by the United States government as an act of terrorism pursuant to the Terrorism Risk Insurance Act, as amended.

z. "Work" means the construction services necessary or incidental to fulfill Vendor's obligations for the Project in accordance with and reasonably inferable from the Contract Documents. The Work may refer to the whole Project or only a part of the Project if work is also being performed by Owner or Others.

aa. "Worksite" means the area of the Project where the Work is to be performed.

bb. "Bi-monthly basis" means every fourteen to sixteen calendar days.

6. Contract Document Review and Administration

a. Before commencing the Work, Vendor shall examine and compare the drawings and specifications with information furnished by the City and Design Professional that are considered Contract Documents, relevant field measurements made by Vendor, and any visible conditions at the Worksite affecting the Work.

b. Should Vendor discover any errors, omissions, or inconsistencies in the Contract Documents, Vendor shall promptly report them to the City and Design Professional. Following receipt of written notice from Vendor of defects, City shall promptly inform Vendor what action, if any, Vendor shall take with regard to the defect.

c. Nothing in this section shall relieve Vendor of responsibility for its own errors, inconsistencies, or omissions.

d. COST REPORTING: Vendor shall maintain complete, accurate, and current records that comply with generally accepted accounting principles and calculate the proper financial management under this Agreement. Vendor shall maintain a complete set of all books and records prepared or used by Vendor with respect to the Project. City shall be afforded access to all of Vendor's records, books, correspondence, instructions, drawings, receipts, vouchers, memoranda, and similar data relating to this Agreement. Vendor shall preserve all such records for a period of three years after the final payment or longer where required by Law.

7. Warranty

a. Vendor warrants all materials and equipment furnished under the Construction Phase of this Agreement will be new unless otherwise specified, of good quality, in conformance with the Contract Documents, and free from defective workmanship and materials. At City or Design Professional request, Vendor shall furnish satisfactory evidence of the quality and type of materials and equipment furnished. Vendor further warrants all Work shall be free from material defects not intrinsic in the design or materials required in the Contract Documents. Vendor's warranty does **not include** remedies for defects or damages caused by normal wear and tear during normal usage beyond the warranty period, use for a purpose for which the Project was not intended, improper or insufficient maintenance, modifications performed by the City or others, or abuse. Vendor's warranty shall commence on the Date of Final Completion of the Project.

b. To the extent products, equipment, systems, or materials incorporated in the Work are specified and purchased by the City, they shall be covered exclusively by the warranty of the manufacturer. There are no warranties which extend beyond the description on the face of any such warranty. For such incorporated items, ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING THE WARRANTY OF MERCHANTABILITY AND THE WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY DISCLAIMED.

c. Vendor shall obtain from its Subcontractors and Suppliers any special or extended warranties required by the Contract Documents. Vendor's liability for such warranties shall be limited to the one-year correction period, as further defined in this Agreement. After that period Vendor shall provide full and comprehensive assistance to the City in enforcing the obligations of Subcontractors or Suppliers for such extended warranties.

d. Correction of Work

i. If before Substantial Completion or within two-years after the date of Final Completion of the Work any Defective Work is found, City shall promptly notify Vendor in writing. Unless City provides written acceptance of the condition, Vendor shall promptly correct the Defective Work at its own cost and time and bear the expense of additional services required for correction of any Defective Work for which it is responsible. If within the two-year correction period City discovers and does not promptly notify Vendor or give Vendor an opportunity to test or correct Defective Work as reasonably requested by Vendor, City waives Vendor's obligation to correct that Defective Work as well as City's right to claim a breach of the warranty with respect to that Defective Work.

ii. If Vendor fails to correct Defective Work within a reasonable time after receipt of written notice from City before final payment, City may correct it in accordance with Owner's right to carry out the Work. In such case, an appropriate Change Order shall be issued deducting the cost of correcting the Defective Work from payments then or thereafter due Vendor. If payments then or thereafter due Vendor are not sufficient to cover such amounts, Vendor shall pay the difference to City.

iii. Vendor's obligations and liability, if any, with respect to any Defective Work discovered after the two-year correction period shall be determined by the Law. If, after the two-year correction period but before the applicable limitation period has expired, City discovers any Work which City considers Defective Work, City shall, unless the Defective Work requires emergency correction, promptly notify Vendor and allow Vendor an opportunity to correct the Work if Vendor elects to do so. If Vendor elects to correct the Work, it shall provide written notice of such intent within fourteen (14) Days of its receipt of notice from City and shall complete the correction of Work within a mutually agreed timeframe. If Vendor does not elect to correct the Work, City may have the Work corrected by itself or Others, and, if City intends to seek recovery of those costs from Vendor, City shall promptly provide Vendor with an accounting of the actual correction costs.

iv. If Vendor's correction or removal of Defective Work causes damage to or destroys other completed or partially completed work or existing building, Vendor shall be responsible for the cost of correcting the destroyed or damaged property.

v. The two-year period for correction of Defective Work does not constitute a limitation period with respect to the enforcement of Vendor's other obligations under the Contract Documents.

vi. Before final payment, at City option and with Vendor's agreement, City may elect to accept Defective Work rather than require its removal and correction. In such cases the contract shall be equitably adjusted for any diminution in the value, as determined by City, of the Project caused by such Defective Work via formal written change order.

8. Safety of Persons and Property

a. SAFETY PROGRAMS: Vendor holds overall responsibility for safety programs. However, such obligation does not relieve Subcontractors of their safety responsibilities and to comply with the Law. Vendor shall prevent against injury, loss, or damage to persons or property by taking reasonable steps to protect: (a) its employees and other persons at the Worksite; (b) materials and equipment stored at onsite or offsite locations for use in performing the Work; and (c) property located at the Worksite and adjacent to work areas, whether or not the property is part of the Worksite.

b. VENDOR'S SAFETY REPRESENTATIVE: Vendor shall designate an individual at the Worksite in its employ as its safety representative. Unless otherwise identified by Vendor in writing to City, Vendor's project superintendent shall serve as its safety representative. Vendor shall report promptly in writing all recordable accidents and injuries occurring at the Worksite. When Vendor is required to file an accident report with a public authority, Vendor shall furnish a copy of the report to City.

c. Vendor shall provide City with copies of all notices required of Vendor by the Law. Vendor's safety program shall comply with the requirements of governmental and quasi-governmental authorities having jurisdiction.

    i. Damage or loss not insured under property insurance that may arise from the Work, to the extent caused by negligent or intentionally wrongful acts or omissions of Vendor, or anyone for whose acts Vendor may be liable, shall be promptly remedied by Vendor.

d. If City deems any part of the Work or Worksite unsafe, City, without assuming responsibility for Vendor's safety program, may require Vendor to stop performance of the Work, take corrective measures satisfactory to City. If Vendor does not adopt corrective measures, City may perform them and deduct their cost from the GMP. Vendor agrees to make no claim for damages, or an increase in the GMP, or for a change in the Dates of Substantial or Final Completion based on Vendor's compliance with City's reasonable request.

9. **Subcontracts:**

   a. BINDING OF SUBCONTRACTORS AND SUPPLIERS: Vendor agrees to bind every Subcontractor and Supplier and require every Subcontractor to so bind its subcontractors and significant supplier, to the Contract Documents as they apply to the Subcontractor's or Supplier's applicable provisions to that portion of the Work.

   b. Vendor agrees not to subcontract Vendor at risk related services without prior written consent from the City.

10. **Fees, Expenses, and Payments:**

   a. **Milestone,** at its own cost and expense, shall furnish all labor, materials, supplies, machinery, equipment, tools, supervision, bonds, insurance, tax permits, and all other accessories and services necessary to complete items bid per **Bid 24-44** as stated in **Milestone's** bid response, and in accordance with specifications attached hereto and made a part hereof under **Bid 24-44**, all included herein as if spelled out word for word.

   b. This turn-key project providing labor and materials shall be provided to the City for a not to exceed fee of **$1,583,718.71** US Dollars.

   c. The City of Fayetteville shall pay **Milestone** for completion of the project based on a percentage of work completed. At no point shall payment exceed the percentage of work completed, as determined by the City.

   d. Payments will be made after approval and acceptance of work and submission of invoice Payments will be made approximately 30 days after approval of invoice. The City of Fayetteville reserves the right to request receipts for materials purchased for the City of Fayetteville from suppliers, subcontractors, or other sources. The City of Fayetteville does not agree to any interest or penalty for "untimely" payments.

   e. The City reserves the right to withhold five percent (5%) retainage from all payments until project is completed in full.

   f. Not to exceed pricing shall include but not be limited to:

      i. Labor wages directly employed by Vendor in performing of the Work.

      ii. Salaries of Vendor's employees when stationed at the field office, in whatever capacity employed, employees engaged on the road expediting the production or transportation of material and equipment, and employees from the principal or branch office as mutually agreed by the Parties in writing.

      iii. Cost of all employee benefits and taxes, including but not limited to, workers' compensation, unemployment compensation, social security, health, welfare, retirement, and other fringe benefits as required by law, labor agreements, or paid under Vendor's standard personnel policy, insofar as such costs are paid to employees of Vendor who are included in the Cost of the Work.

      iv. Transportation, travel, hotel, and moving expenses of Vendor's personnel incurred in connection with the Work.

      v. Cost of all materials, supplies, and equipment incorporated in the Work, including costs of inspection and testing if not provided by City, transportation, storage, and handling.

      vi. Payments made by Vendor to Subcontractors for work performed under this Agreement.

      vii. Cost, including transportation and maintenance of all materials, supplies, equipment, temporary facilities, and hand tools not owned by the workers that are used or consumed in the

performance of the Work, less salvage value or residual value; and cost less salvage value on such items used, but not consumed that remain the property of Vendor.

viii. Rental charges of all necessary machinery and equipment, exclusive of hand tools owned by workers, used at the Worksite, whether rented from Vendor or others, including installation, repair, and replacement, dismantling, removal, maintenance, transportation, and delivery costs at competitive market rates.

ix. Cost of the premiums for all insurance and surety, performance or payment bonds which Vendor is required to procure or deems necessary and approved by City.

x. Sales, use, gross receipts, or other taxes, tariffs, or duties related to the Work for which Vendor is liable.

xi. Permits, taxes, fees, licenses, tests, royalties.

xii. Losses, expenses, or damages to the extent not compensated by insurance or otherwise, and the cost of corrective work during the Construction Phase and for the warranty period.

xiii. Costs associated with establishing, equipping, operating, maintaining, mobilizing and demobilizing the field office and site.

xiv. Water, power, and fuel costs necessary for the Work.

xv. Cost of removal of all nonhazardous substances, debris, and waste materials.

xvi. Costs incurred due to an emergency affecting the safety of persons or property.

xvii. Costs directly incurred in the performance of the Work or in connection with the Project, and not included in Vendor's Fee, which are reasonably inferable from the Contract Documents.

g. STORED MATERIALS AND EQUIPMENT: Unless otherwise provided in the contract documents, applications for payment may include materials and equipment not yet incorporated into the Work but delivered to and suitably stored onsite or offsite including applicable insurance, storage, and costs incurred transporting the materials to an offsite storage facility. Approval of payment applications for stored materials and equipment stored offsite shall be conditioned on a submission by Vendor of bills of sale and proof of required insurance, or such other documentation satisfactory to City to establish the proper valuation of the stored materials and equipment, City's title to such materials and equipment, and to otherwise protect City's interests therein, including transportation to the Worksite. Materials and equipment stored offsite shall be in a bonded and insured secure facility.

h. FINAL PAYMENT: Upon satisfactory completion of the work performed under this Agreement, as a condition before final payment under this Agreement, or as a termination settlement under this Agreement, **Milestone** shall execute and deliver to CITY OF FAYETTEVILLE a release of all claims against CITY OF FAYETTEVILLE arising under or by virtue of this Agreement, except claims which are specifically exempted by **Milestone** to be set forth therein.

i. Unless otherwise provided in this Agreement or by State law or otherwise expressly agreed to by the parties to this Agreement, final payment under this Agreement or settlement upon termination of this Agreement shall not constitute a waiver of CITY OF FAYETTEVILLE's claims against **Milestone** or sureties under this Agreement.

11. **Project Bonding - Performance and payment bonding:** After execution of this contract by all parties, **Milestone** shall provide 100% **separate** performance and payment bonds (inclusive of any approved contingency) from a bonding company, licensed to do business in the state of Arkansas. Bonds shall be provided within ten (10) calendar days after this contract has been executed by all parties.

a. All bonds shall be listed with the U.S. Treasury Department listing of approved surety's (T-List) and shall be rated A+ minimum by A. M. Best.

12. Time:

a. SUBSTANTIAL and FINAL COMPLETION: Date of Substantial Completion and the Date of Final Completion shall be established in the contract documents as a hard not-to-exceed date. If such dates are not established upon the execution of this Agreement, a Date of Substantial Completion and Date of Final Completion of the Work shall be established via Change Order.

b. Time is of the essence with regard to the obligations of the Contract Documents.

c. Unless instructed by City in writing, Vendor shall not knowingly commence the Work before the effective date of Vendor's required insurance and bonds and formal written and signed Purchase Order issued by the City of Fayetteville Purchasing Division.

d. Schedule of Work: Before submitting its first application for payment, Vendor shall submit to City and, if directed, Design Professional a Schedule of the Work showing the dates on which Vendor plans to begin and complete various parts of the Work, including dates on which information and approvals are required from City. Except as otherwise directed by City, Vendor shall comply with the approved Schedule of the Work or Vendor.

    i. City may determine the sequence in which the Work shall be performed, provided it does not unreasonably interfere with the approved project schedule. City may require Vendor to make reasonable changes in the sequence at any time during the performance of the Work in order to facilitate the performance of work by City or Others. If Vendor consequently incurs costs or is delayed, the Dates of Substantial or Final Completion, or both, Vendor may seek equitable adjustment.

e. NOTICE OF DELAY CLAIMS: If Vendor requests an equitable extension of the Contract Time or an equitable adjustment contract as a result of a delay described, Vendor shall give City written notice of the claim. If Vendor causes delay in the completion of the Work, City shall be entitled to recover its additional costs.

13. Substantial Completion:

a. Vendor shall notify City and, if directed, Design Professional when it considers Substantial Completion of the Work or a designated portion to have been achieved. City, with the assistance of its Design Professional, shall promptly conduct an inspection to determine whether the Work or designated portion can be occupied or used for its intended use by City without excessive interference in completing any remaining unfinished Work. If City determines the Work or designated portion has not reached Substantial Completion, City, with the assistance of its Design Professional, shall promptly compile a list of items to be completed or corrected so City may occupy or use the Work or designated portion for its intended use. Vendor shall promptly and accurately complete all items on the list.

b. When Substantial Completion of the Work or a designated portion is achieved, Vendor shall prepare a Certificate of Substantial Completion establishing the date of Substantial Completion and the respective responsibilities of each Party for interim items such as security, maintenance, utilities, insurance, and damage to the Work, and fixing the time for completion of all items on the list accompanying the Certificate. The Certificate of Substantial Completion shall be submitted by Vendor to City and, if directed, to Design Professional for written acceptance of responsibilities assigned in the Certificate of Substantial Completion.

c. Unless otherwise provided in the Certificate of Substantial Completion, warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or a designated portion.

d. Upon City's written acceptance of the Certificate of Substantial Completion, City shall pay to Vendor the remaining retainage held by City for the Work described in the Certificate of Substantial Completion less a sum equal to one hundred and fifty percent (150%) of the estimated cost of completing or correcting remaining items on that part of the Work, as agreed to by the Parties as necessary to achieve Final Completion, including all close outs. Uncompleted items shall be completed by Vendor in a mutually agreed upon timeframe.

14. Final Completion:

a. Upon notification from Vendor that the Work is complete and ready for final inspection and acceptance, City, with the assistance of its Design Professional shall promptly conduct an inspection to determine if the Work has been completed and is acceptable under the Contract Documents.

b. When the Work is complete, Vendor shall prepare for City's written acceptance a final application for payment stating that to the best of Vendor's knowledge, and based on City's inspections, the Work has reached Final Completion in accordance with the Contract Documents.

c. Final payment shall be made to Vendor within thirty (30) Days after Vendor has submitted an application for final payment, pending the application has been approved by the City, including submissions required, and a Certificate of Final Completion has been executed by all Parties.

d. Final payment shall be due on Vendor's submission of the following to the City:

   i. an affidavit declaring any indebtedness connected with the Work, to have been paid, satisfied, or to be paid with the proceeds of final payment, so as not to encumber City property;

   ii. as-built drawings, manuals, copies of warranties, and all other close-out documents required by the Contract Documents;

   iii. release of any liens, conditioned on final payment being received;

   iv. consent of any surety; and

   v. any outstanding known and unreported accidents or injuries experienced by Vendor or its Subcontractors at the Worksite.

e. If, after Substantial Completion of the Work, the Final Completion of a portion of the Work is materially delayed through no fault of Vendor. If approved by City, they shall pay the balance due for any portion of the Work fully completed and accepted. If the remaining contract balance for Work not fully completed and accepted is less than the retained amount before payment, Vendor shall submit to City and, if directed, Design Professional the written consent of any surety to payment of the balance due for portions of the Work that are fully completed and accepted. Such payment shall not constitute a waiver of claims, but otherwise shall be governed by this section.

f. ACCEPTANCE OF FINAL PAYMENT: Unless Vendor provides written identification of unsettled claims with an application for final payment, its acceptance of final payment constitutes a waiver of such claims.

g. **Milestone** shall ensure that the City of Fayetteville receives lien waivers from all material suppliers, subcontractors and sub-subcontractors and **before** work begins on the project. The contractor shall give written notice to the material suppliers, subcontractors and sub-subcontractors providing work on the project that states the following:

i. *'According to Arkansas law, it is understood that no liens can be filed against public property if valid and enforceable payment and performance bond is in place. Regarding this Project and Agreement, the valid and enforceable bonds are with (___ name of surety ___).'*

ii. **Milestone** shall have each subcontractor, sub-subcontractor and material supplier execute a written receipt evidencing acknowledgment of this statement prior to commencement of the work of the subcontractor or material supplier.

15. **Notices**: Any notice required to be given under this Agreement to either party to the other shall be sufficient if addressed and mailed, certified mail, postage paid, delivery, fax or e-mail (receipt confirmed), or overnight courier.

16. **Jurisdiction**: Legal jurisdiction to resolve any disputes shall be Arkansas with Arkansas law applying to the case.

17. **Venue**: Venue for all legal disputes shall be Washington County, Arkansas.

18. **Freedom of Information Act:** City of Fayetteville contracts and documents prepared while performing contractual work are subject to the Arkansas Freedom of Information Act. If a Freedom of Information Act request is presented to the City of Fayetteville, the VENDOR shall do everything possible to provide the documents in a prompt and timely manner as prescribed in the Arkansas Freedom of Information Act (A.C.A. 25-19-101 et. Seq.). Only legally authorized photo coping costs pursuant to the FOIA may be assessed for this compliance.

19. **Changes in Scope or Price:** Changes, modifications, or amendments in scope, price or fees to this contract shall not be allowed without a prior formal contract amendment approved by the Mayor and the City Council **in advance** of the change in scope, cost or fees.

20. **Insurance:**

a. Before starting the Work and as a condition precedent to payment, Vendor shall procure and maintain in force Workers' Compensation Insurance, Employers' Liability Insurance, Business Automobile Liability Insurance, and Commercial General Liability Insurance ("CGL"). The CGL policy shall include coverage for liability arising from premises, operations, independent contractors, products-completed operations, personal injury and advertising injury, contractual liability, pollution coverage, and broad form property damage. Vendor shall maintain completed operations liability insurance for one year after Substantial Completion, or as required by the Contract Documents, whichever is longer. Vendor's Employers' Liability, Business Automobile Liability and CGL policies shall be written with at least the limits of liability presented in **Appendix D.**

b. Employers' Liability, Business Automobile Liability, and CGL coverages required may be provided by a single policy for the full limits required or by a combination of underlying policies with the balance provided by excess or umbrella liability policies.

c. Vendor shall maintain in effect all insurance coverage required with insurance companies lawfully authorized to do business in the jurisdiction in which the Project is located. If Vendor fails to obtain or maintain any insurance coverage required under this Agreement, City may purchase such coverage and charge the expense to Vendor or terminate this Agreement.

d. To the extent commercially available to Vendor from its current insurance company, insurance policies required shall contain a provision that the insurance company or its designee shall give City written notice transmitted in paper and electronic format: (a) 30 Days before coverage is nonrenewed by the insurance company and (b) within 10 Business Days after cancelation of coverage by the insurance company. Before commencing the Work and upon renewal or replacement of the insurance policies, Vendor shall furnish City with certificates of insurance until one year after Substantial Completion or longer if required by the

Contract Documents. In addition, if any insurance policy required is not to be immediately replaced without lapse in coverage when it expires, exhausts its limits, or is to be cancelled, Vendor shall give City prompt written notice upon actual or constructive knowledge of such condition.

e. Certificates of Insurance shall list the City as Additional Insured Parties.

f. PROPERTY INSURANCE:

i. At no time shall any policy be covered by self-insurance or in a self-insured format. All policies shall be covered by an approved commercial insurance professional properly licensed to do business in Arkansas.

ii. Unless otherwise directed in writing by City, before starting the Work, **Milestone** shall obtain and maintain a Builder's Risk Policy upon the entire Project for the full cost of replacement at the time of loss, including existing structures. This insurance shall also (a) name Vendor, Subcontractors, Sub subcontractors, and Design Professional as named insureds; (b) be written in such form to cover all risks of physical loss except those specifically excluded by the policy; and (c) insure at least against and **not** exclude:

1. the perils of fire, lightning, explosion, windstorm, hail, smoke, aircraft (except aircraft, including helicopter, operated by or on behalf of Vendor) and vehicles, riot and civil commotion, theft, vandalism, malicious mischief, debris removal, flood, earthquake, earth movement, water damage, wind damage, testing if applicable, collapse, however caused;

2. damage resulting from defective design, workmanship, or material;

3. coverage extension for damage to existing buildings, plant, or other structures at the Worksite, when the Project is contained within or attached to such existing buildings, plant or structures. Coverage shall be to the extent loss or damage arises out of Constructor's activities or operations at the Project.

4. equipment breakdown, including mechanical breakdown, electrical injury to electrical devices, explosion of steam equipment, and damage to steam equipment caused by a condition within the equipment;

5. testing coverage for running newly installed machinery and equipment at or beyond the specified limits of their capacity to determine whether they are fit for their intended use; and

6. physical loss resulting from Terrorism.

iii. The Party that is the primary cause of a Builder's Risk Policy claim shall be responsible for any deductible amounts or coinsurance payments. If no Party is the primary cause of a claim, then the Party obtaining and maintaining the Builder's Risk Policy shall be responsible for the deductible amounts or coinsurance payments. This policy shall provide for a waiver of subrogation. This insurance shall remain in effect until final payment has been made or until no person or entity other than City has an insurable interest in the property to be covered by this insurance, whichever is sooner. Partial occupancy or use of the Work shall not commence until City has secured the consent of the insurance company or companies providing the coverage required in this subsection. Before commencing the Work, City shall provide a copy of the property policy or policies obtained.

iv. If City elects to purchase the property insurance required by this Agreement, including all of the coverages and deductibles for the same durations specified, City shall give written notice to Vendor before the Work is commenced and provide a copy of the property policy or policies obtained in compliance with this agreement. City may then provide insurance to protect its

interests and the interests of the Constructor, Subcontractors, Suppliers, and Subsubcontractors. The cost of this insurance shall be paid by City in a Change Order. If City gives written notice of its intent to purchase property insurance required by this Agreement and fails to purchase or maintain such insurance, City shall be responsible for costs reasonably attributed to such failure.

v. The Parties each waive all rights against each other and their respective employees, agents, contractors, subcontractors, suppliers, sub subcontractors, and design professionals for damages caused by risks covered by the property insurance, except such rights as they may have to the proceeds of the insurance.

1. To the extent of the limits of Vendor's Commercial General Liability Insurance, Vendor shall indemnify and hold harmless City against any and all liability, claims, demands, damages, losses, and expenses, including attorneys' fees, in connection with or arising out of any damage or alleged damage to any of City's existing adjacent property, including personal property, that may arise from the performance of the Work, to the extent caused by the negligent or intentionally wrongful acts or omissions of Vendor, Subcontractor, Supplier, Sub subcontractor, or anyone employed directly or indirectly by any of them or by anyone for whose acts any of them may be liable.

g. RISK OF LOSS: Except to the extent a loss is covered by applicable insurance, risk of loss from damage to the Work shall be upon the Party obtaining and maintaining the Builder's Risk until the Date of Final Completion.

h. ADDITIONAL GENERAL LIABILITY COVERAGE: City shall require Vendor to purchase and maintain additional liability coverage. Vendor shall provide:

i. Additional Insured. City shall be named as an additional insured on Vendor's Commercial General Liability (CGL) specified, for on-going operations and completed operations, excess/umbrella liability, commercial automobile liability, and any required pollution liability, but only with respect to liability for bodily injury, property damage, or personal and advertising injury to the extent caused by the negligent acts or omissions of Vendor, or those acting on Vendor's behalf, in the performance of Vendor's work for Owner at the Worksite. The insurance of the Vendor and its Subcontractors (both primary and excess) shall be primary to any insurance available to the Additional Insureds. Any insurance available to the Additional Insureds shall be excess and non-contributory.

ii. OCP. Vendor shall provide an Owners' and Contractors' Protective Liability Insurance ("OCP") policy with limits equal to the limits on CGL specified, or limits as otherwise required by Owner.

i. Any documented additional cost in the form of a surcharge associated with procuring the additional liability coverage in accordance with this subsection shall be paid by VENDOR. Before commencing the Work, Vendor shall provide either a copy of the OCP policy, or a certificate and endorsement evidencing that City has been named as an additional insured, as applicable.

i. ROYALTIES, PATENTS, AND COPYRIGHTS: Vendor shall pay all royalties and license fees which may be due on the inclusion of any patented or copyrighted materials, methods, or systems selected by Vendor and incorporated in the Work. Vendor shall defend, indemnify, and hold City harmless from all suits or claims for infringement of any patent rights or copyrights arising out of such selection.

j. PROFESSIONAL LIABILITY INSURANCE: To the extent Vendor is required to procure design services, Vendor shall require its design professionals to obtain a commercial professional liability insurance for claims arising from the negligent performance of professional services under this Agreement, with a company reasonably satisfactory to City, including coverage for all professional liability caused by any

consultants to Vendor's design professional, written for not less than one million US dollars ($1,000,000) per claim and in the aggregate. Vendor's design professional shall pay the deductible. The Professional Liability Insurance shall contain a retroactive date providing prior acts coverage sufficient to cover all Services performed by the Constructor's design professional for this Project. Coverage shall be continued in effect for the entire warranty period.

21. **Professional Responsibility:** **Milestone** will exercise reasonable skill, care, and diligence in the performance of services and will carry out its responsibilities in accordance with customarily accepted professional practices. CITY OF FAYETTEVILLE will promptly report to **Milestone** any defects or suspected defects in services of which CITY OF FAYETTEVILLE becomes aware, so **Milestone** can take measures to minimize the consequences of such a defect. CITY OF FAYETTEVILLE retains all remedies to recover for its damages caused by any negligence of **Milestone**.

22. **Responsibility of the City of Fayetteville**

    a. CITY OF FAYETTEVILLE shall, within a reasonable time, so as not to delay the services of **Milestone**:

        i. Provide full information as to the requirements for the Project.

        ii. Assist **Milestone** by placing at **Milestone's** disposal all available information pertinent to the assignment including previous reports and any other data relative thereto.

        iii. Assist **Milestone** in obtaining access to property reasonably necessary for **Milestone** to perform its services.

        iv. Examine all studies, reports, sketches, cost opinions, proposals, and other documents presented by **Milestone** and render in writing decisions pertaining thereto.

        v. Review all documents and provide written comments to **Milestone** in a timely manner.

        vi. The City of Fayetteville Facilities Director is the project representatives with respect to the services to be performed under this Agreement. The Facilities Director Representative shall have complete authority to transmit instructions, receive information, interpret and define policies and decisions with respect to materials, equipment, elements and systems to be used in the Project, and other matters pertinent to the services covered by this Agreement.

23. **Cost Opinions and Projections:** Cost opinions and projections prepared by the **Milestone** relating to construction costs and schedules, operation and maintenance costs, equipment characteristics and performance, cost estimating, and operating results are based on **Milestone** experience, qualifications, and judgment as a **Milestone** professional.

24. **Period of Service:** This Agreement will become effective upon the first written notice by CITY OF FAYETTEVILLE authorizing services hereunder.

    a. The provisions of this Agreement have been agreed to in anticipation of the orderly progress of the Project through completion of the services stated in the Agreement. **Milestone** shall proceed with providing the authorized services immediately upon receipt of written authorization from CITY OF FAYETTEVILLE. Said authorization shall include the scope of the services authorized and the time in which the services are to be completed.

25. **Termination:**

    a. This Agreement may be terminated in whole or in part in writing by either party in the event of substantial failure by the other party to fulfill its obligations under this Agreement through no fault of the terminating party, provided that no termination may be effected unless the other party is given:

i. Not less than ten (10) calendar days written notice (delivered by certified mail, return receipt requested) of intent to terminate,

ii. An opportunity for consultation with the terminating party prior to termination.

b. This Agreement may be terminated in whole or in part in writing by CITY OF FAYETTEVILLE for its convenience, provided that **Milestone** is given:

i. Not less than ten (10) calendar days written notice (delivered by certified mail, return receipt requested) of intent to terminate,

ii. An opportunity for consultation with the terminating party prior to termination.

c. If termination for default is affected by CITY OF FAYETTEVILLE, an equitable adjustment in the price provided for in this Agreement shall be made, but

i. No amount shall be allowed for anticipated profit on unperformed services or other work,

ii. Any payment due to **Milestone** at the time of termination may be adjusted to cover any additional costs to CITY OF FAYETTEVILLE because of **Milestone**'s default.

d. If termination for default is affected by **Milestone**, or if termination for convenience is affected by CITY OF FAYETTEVILLE, the equitable adjustment shall include a reasonable profit for services or other work performed. The equitable adjustment for any termination shall provide for payment to **Milestone** for services rendered and expenses incurred prior to the termination, in addition to termination settlement costs reasonably incurred by **Milestone** relating to commitments which had become firm prior to the termination.

e. Upon receipt of a termination action under Paragraphs above, **Milestone** shall:

i. Promptly discontinue all affected work (unless the notice directs otherwise),

ii. Deliver or otherwise make available to CITY OF FAYETTEVILLE all data, drawings, specifications, reports, estimates, summaries and such other information and materials as may have been accumulated by **Milestone** in performing this Agreement, whether completed or in process.

f. Upon termination under sections above CITY OF FAYETTEVILLE may take over the work and may award another party an agreement to complete the work under this Agreement.

g. If, after termination for failure of **Milestone** to fulfill contractual obligations, it is determined that **Milestone** had not failed to fulfill contractual obligations, the termination shall be deemed to have been for the convenience of CITY OF FAYETTEVILLE. In such event, adjustments of the agreement price shall be made as provided in this agreement.

26. Delays

a. In the event the services of **Milestone** are suspended or delayed by CITY OF FAYETTEVILLE, or by other events beyond **Milestone's** reasonable control, **Milestone** shall be entitled to additional compensation and time for reasonable documented costs incurred by **Milestone** in temporarily closing down or delaying the Project.

b. In the event the services are suspended or delayed by **Milestone**, CITY shall be entitled to compensation and time for reasonable costs incurred in temporarily closing down or delaying the Project.

27. Rights and Benefits

a. **Milestone's** services shall be performed solely for the benefit of CITY OF FAYETTEVILLE and not for the benefit of any other persons or entities.

28. Dispute Resolution

a. Scope of Paragraph: The procedures of this Paragraph shall apply to any and all disputes between CITY OF FAYETTEVILLE and **Milestone** which arise from, or in any way are related to, this Agreement, including, but not limited to the interpretation of this Agreement, the enforcement of its terms, any acts, errors, or omissions of CITY OF FAYETTEVILLE or **Milestone** in the performance of this Agreement, and disputes concerning payment.

b. Exhaustion of Remedies Required: No action may be filed unless the parties first negotiate. If timely Notice is given as described in this agreement, but an action is initiated prior to exhaustion of these procedures, such action shall be stayed, upon application by either party to a court of proper jurisdiction, until the procedures in this agreement have been complied with.

c. Notice of Dispute

i. For disputes arising prior to the making of final payment promptly after the occurrence of any incident, action, or failure to act upon which a claim is based, the party seeking relief shall serve the other party with a written Notice.

ii. For disputes arising within one year after the making of final payment, CITY OF FAYETTEVILLE shall give **Milestone** written Notice at the address listed in this agreement within thirty (30) calendar days after occurrence of any incident, accident, or first observance of defect or damage. In both instances, the Notice shall specify the nature and amount of relief sought, the reason relief should be granted, and the appropriate portions of this Agreement that authorize the relief requested.

iii. Negotiation: Within seven (7) calendar days of receipt of the Notice, the Project Managers for CITY OF FAYETTEVILLE and **Milestone** shall confer in an effort to resolve the dispute. If the dispute cannot be resolved at that level, then, upon written request of either side, the matter shall be referred to the President of **Milestone**, and the Mayor of CITY OF FAYETTEVILLE or his or her designee. These officers shall meet at the Project Site or such other location as is agreed upon within 30 calendar days of the written request to resolve the dispute.

29. **Sufficient Funds**: The CITY represents to have sufficient funds or the means of obtaining funds to remit payment to **Milestone** for services rendered by **Milestone**. All parties agree if funding should become insufficient to complete the project, VENDOR shall be notified in a timely manner.

30. Publications:

a. Recognizing the importance of professional services on the part of **Milestone's** employees and the importance of **Milestone's** public relations, **Milestone** may prepare publications, such as technical papers, articles for periodicals, promotional materials, and press releases, in electronic or other format, pertaining to **Milestone's** services for the Project. Such publications will be provided to CITY OF FAYETTEVILLE in draft form for CITY OF FAYETTEVILLE's advance review. CITY OF FAYETTEVILLE shall review such drafts promptly and provide CITY OF FAYETTEVILLE's comments to **Milestone**, CITY OF FAYETTEVILLE may require deletion of proprietary data or confidential information from such publications, but otherwise CITY OF FAYETTEVILLE will not unreasonably withhold approval. Approved materials may be used in a variety of situations and do not require additional review or approval for each use. The cost of **Milestone's** activities pertaining to any such publication shall be for **Milestone's** account.

31. Indemnification:

a. The CITY requires the **Milestone** to indemnify, defend and hold harmless the CITY OF FAYETTEVILLE for any loss caused by negligence and from and against any and all loss where loss is caused or incurred or alleged to be caused or incurred in whole or in part as a result of the negligence or other actionable fault

of the **Milestone**, or their employees, agents, Subcontractors, sub consultant and Suppliers of the **Milestone**.

32. Ownership of Documents:

a. All documents provided by CITY OF FAYETTEVILLE including original drawings, CAD drawings, estimates, field notes, and project data are and remain the property of CITY OF FAYETTEVILLE. **Milestone** may retain reproduced copies of drawings and copies of other documents.

b. Engineering and architectural documents, computer models, drawings, specifications and other hard copy or electronic media prepared by **Milestone** as part of the Services shall become the property of CITY OF FAYETTEVILLE when **Milestone** has been compensated for all Services rendered, provided, however, that Vendor shall have the unrestricted right to their use. **Milestone** shall, however, retain its rights in its standard drawings details, specifications, databases, computer software, and other proprietary property. Rights to intellectual property developed, utilized, or modified in the performance of the Services shall remain the property of **Milestone**.

c. Any files delivered in electronic medium may not work on systems and software different than those with which they were originally produced. **Milestone** makes no warranty as to the compatibility of these files with any other system or software. Because of the potential degradation of electronic medium over time, in the event of a conflict between the sealed original drawings/hard copies and the electronic files, the sealed drawings/hard copies will govern.

33. Additional Responsibilities of Milestone:

a. Review, approval, or acceptance of design drawings, specifications, reports and other services furnished hereunder by CITY shall not in any way relieve **Milestone** of responsibility for the technical adequacy of the work. Review, approval or acceptance of, or payment for any of the services by CITY shall not be construed as a waiver of any rights under this Agreement or of any cause of action arising out of the performance of this Agreement.

b. **Milestone** shall be and shall remain liable, in accordance with applicable law, for all damages to CITY OF FAYETTEVILLE caused by **Milestone's** negligent performance, except beyond the **Milestone's** normal standard of care, of any of the services furnished under this Agreement, and except for errors, omissions or other deficiencies to the extent attributable to CITY OF FAYETTEVILLE or CITY OF FAYETTEVILLE-furnished data.

c. **Milestone's** obligations under this clause are in addition to Vendor's other express or implied assurances under this Agreement or State law and in no way diminish any other rights that CITY OF FAYETTEVILLE may have against **Milestone** for faulty materials, equipment, or work.

34. Audit and Access to Records:

a. **Milestone** shall maintain books, records, documents and other evidence directly pertinent to performance on work under this Agreement in accordance with generally accepted accounting principles and practices consistently applied in effect on the date of execution of this Agreement.

b. **Milestone** shall also maintain the financial information and data used by **Milestone** in the preparation of support of the cost submission required for any negotiated agreement or change order and send to CITY OF FAYETTEVILLE a copy of the cost summary submitted. CITY OF FAYETTEVILLE, the State or any of their authorized representatives shall have access to all such books, records, documents and other evidence for the purpose of inspection, audit and copying during normal business hours. **Milestone** will provide proper facilities for such access and inspection.

c. Records shall be maintained and made available during performance on assisted work under this Agreement and until three years from the date of final payment for the project. In addition, those records which relate to any controversy arising out of such performance, or to costs or items to which an audit exception has been taken, shall be maintained and made available until three years after the date of resolution of such appeal, litigation, claim or exception.

d. This right of access clause (with respect to financial records) applies to:

   i. Negotiated prime agreements

   ii. Negotiated change orders or agreement amendments affecting the price of any formally advertised, competitively awarded, fixed price agreement

   iii. Agreements or purchase orders under any agreement other than a formally advertised, competitively awarded, fixed price agreement. However, this right of access does not apply to a prime agreement, lower tier sub agreement or purchase order awarded after effective price competition, except:

      1. With respect to record pertaining directly to sub agreement performance, excluding any financial records of **Milestone**;

      2. If there is any indication that fraud, collusion, gross abuse or corrupt practices may be involved;

      3. If the sub agreement is terminated for default or for convenience.

35. Covenant Against Contingent Fees:

a. **Milestone** warrants that no person or selling agency has been employed or retained to solicit or secure this Agreement upon an agreement of understanding for a commission, percentage, brokerage or continent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by **Milestone** for the purpose of securing business. For breach or violation of this warranty, CITY OF FAYETTEVILLE shall have the right to annul this Agreement without liability or at its discretion, to deduct from the contract price or consideration, or otherwise recover, the full amount of such commission, percentage, brokerage, or contingent fee.

36. Gratuities:

a. If CITY OF FAYETTEVILLE finds after a notice and hearing that **Milestone** or any of **Milestone** agents or representatives, offered or gave gratuities (in the form of entertainment, gifts or otherwise) to any official, employee or agent of CITY OF FAYETTEVILLE or related third party contractor associated with this project, in an attempt to secure an agreement or favorable treatment in awarding, amending or making any determinations related to the performance of this Agreement, CITY OF FAYETTEVILLE may, by written notice to **Milestone** terminate this Agreement. CITY OF FAYETTEVILLE may also pursue other rights and remedies that the law or this Agreement provides. However, the existence of the facts on which CITY OF FAYETTEVILLE bases such finding shall be in issue and may be reviewed in proceedings under the Remedies clause of this Agreement.

b. The CITY may pursue the same remedies against **Milestone** as it could pursue in the event of a breach of the Agreement by **Milestone**. As a penalty, in addition to any other damages to which it may be entitled by law, CITY OF FAYETTEVILLE may pursue exemplary damages in an amount, as determined by CITY, which shall be not less than three nor more than ten times the costs **Milestone** incurs in providing any such gratuities to any such officer or employee.

IN WITNESS WHEREOF, **CITY OF FAYETTEVILLE, ARKANSAS** by and through its Mayor, and **MILESTONE CONSTRUCTION, INC.** by its authorized officer have made and executed this Agreement as of the day and year first above written.

Version **1**	Created: **February 1, 2023**	Revised: **DRAFT**
SOG Reference:	All 400 Series	
CFAI Reference:	Category 5: Community Risk Reduction Program	

Policy

The purpose of this administrative policy is to establish the roles and responsibilities of the Fayetteville Fire Marshal's Office (FMO) and govern the Standing Operating Guidelines (SOGs) specific to the Fayetteville Fire Marshal's Office.

Responsibilities

The primary responsibility of the FMO is to protect life and property through the prevention of fires and other emergencies before they happen. To accomplish this the Fire Marshal's Office has developed a comprehensive fire prevention program consisting of the following:

- Fire Code Inspections / Code Enforcement
- New Construction Plan Review and Acceptance Testing
- Operational Permitting
- Public Education
- Fire Investigations

The Chief Fire Marshal oversees the operations of the FMO. The Office of the Fire Marshal is authorized by State Law, Arkansas Code Annotated 14-53-112 and through the City of Fayetteville Code of Ordinance 94.01 and has the authority to enforce the Arkansas Fire Prevention Code through AFPC Section 104.1.

Fire Code Inspections / Code Enforcement

The FMO conducts fire code inspections on new and existing commercial structures to verify compliance with the Arkansas Fire Prevention Code. Types of inspections include business license, school and daycare, certificate of occupancy, mobile vendor, general fire safety inspections and requested non-commercial residential safety inspections.

DRAFT

New Construction Plan Review and Acceptance Testing

The FMO reviews submitted plans through the City of Fayetteville's development review process. This includes technical plat review, building plan review and fire protection systems review to ensure that all applicable fire and building codes are being followed during the planning and construction of structures within the City. Once constructed, inspections and acceptance tests are done to verify compliance with the Arkansas Fire Prevention Code.

Operational Permitting

The FMO conducts reviews and inspections for the purpose of issuing operational permits for the following:

- Firework permits
- Tent permits
- Indoor pyrotechnic permits
- Flame performance/flame effect permits
- Blasting permits
- Special event permits.

Public Education

The Fayetteville Department provides the community with fire safety education through programs administered and supervised by the Fire Marshal's Office. The FMO identifies specific risks, behaviors and audiences based on information from the National Fire Protection Association (NFPA) and the United States Fire Administration (USFA) to focus fire safety messages to meet the specific needs of the jurisdiction. These programs include fire station tours, a juvenile fire setter program, fire extinguisher training and outreach programs for all public and private schools within the City of Fayetteville. The FMO also has multiple adult education programs through SMART 911 training and fire safety in college housing training programs.

DRAFT

Fire Education Dog(s)

Educating the public on the importance of fire safety in the homes and workplace is one of the most important mandates that a fire department could have. There are many educational tools we have at our disposal, but one of the most effective tools we could have is a fire education dog (FED). A Fire Education Dog is much more than a mascot, a fire education dog can take a fire safety message/idea and create a living, physical persona that people can create a relationship with. A Fire education dog can also generate a calming effect at the fire station among fire department employees, improve morale and inspire employee exercise.

Policy:

- This policy applies to Fayetteville Fire Department employees only.
- The focus of our policy is dogs. Other pets are not included at this time.
- SOG-403 Fire Education Dogs will be created and maintained regarding Requirements, Safety, Responsibilities, and Scheduling procedures.

Fire Investigations

Fire investigations are conducted by trained fire and explosion investigators within the Fayetteville Fire Marshal's Office. The FMO investigates fires to determine the origin and cause for the following type of incidents:

- Fires or explosions suspected to be intentionally set.
- Fires where the origin and cause are not easily explainable to the Incident Commander or Officer in charge.
- Any fire or explosion involving a juvenile.
- Fires or explosions that cause burns or bodily injury that requires transport to a hospital or results in a death.
- Fires involving fire alarm or sprinkler system malfunctions or failures
- Fires violating burn bans or outdoor burning rules.
- Any other fire that the Fire Chief, the Fire Marshal, or Incident Commander determines that an investigation is warranted.

DRAFT

During fire investigations, members of the FMO may work with other agencies to include Fayetteville Police, Arkansas State Police, Federal Bureau of Investigations, Bureau of Alcohol Tobacco Firearms and Explosives, Arkansas State Fire Marshal's Office and various other fire, law enforcement and prosecuting agencies.

CITY OF FAYETTEVILLE ARKANSAS

CITY COUNCIL MEMO
2024-1677

MEETING OF NOVEMBER 26, 2024

TO: Mayor Jordan and City Council

THRU: Ted Jack, Park Planning Superintendent
Alison Jumper, Director of Parks, Natural Resources and Cultural Affairs
Jonathan Curth, Development Services Director
Jessica Masters, Development Review Manager
Susan Norton, Chief of Staff

FROM: John Scott, Urban Forester

SUBJECT: **Urban Forestry Management Plan**

RECOMMENDATION:
Urban Forestry staff recommends that the City Council adopt the Urban Forestry Management Plan.

BACKGROUND:
The City's Urban Forestry efforts have undergone a remarkable transformation since the last plan was completed over a decade ago, in 2012. Significant advancements have been made in adapting the city's tree species selections to account for the impacts of climate change and emerging tree diseases, ensuring the long-term health and resilience of the urban canopy. Continuous research and knowledge-building have further strengthened the city's urban forestry program, equipping decision-makers with the insights required to manage this vital green infrastructure effectively.

In accordance with the Unified Development Code's mandate to conduct a tree canopy analysis every ten years, the city has now fulfilled this requirement, laying the groundwork for a new 10-year Urban Forestry Management Plan. This plan was developed through a sample tree inventory, public and internal surveys, benchmarking against industry best practices, and detailed audits. The Urban Forestry Advisory Board was a key stakeholder throughout, ensuring the plan's recommendations aligned with community priorities. Input was also gathered from various municipal departments, including Parks, Natural Resources, Cultural Affairs, Public Works, Development Services, and Sustainability, further strengthening the plan's cross-functional approach.

With the city's rapid growth and the evolving landscape of urban forestry, this updated management plan comes at a critical juncture, poised to guide the next decade of the city's tree-focused initiatives. By leveraging the wealth of data and insights gathered through this planning process, the city is well-equipped to strategically enhance its urban forest, delivering tangible benefits to the community through improved environmental quality, increased resilience, and enhanced quality of life.

DISCUSSION:
The Urban Forestry Management Plan (UFMP) is a visionary document that serves as a guiding framework for improving and enhancing Fayetteville's urban forest. This flexible plan thoroughly evaluates the city's current tree inventory, urban forestry programs, development codes, and maintenance practices while carefully considering various stakeholders' values and priorities.

The UFMP establishes ambitious yet achievable goals that increase the city's overall tree canopy cover from the current level of 39.4% to a target of 40.6% over the next 10 years. To reach this goal, the plan outlines a flexible strategy of planting approximately 1,850 new trees annually through a combination of direct plantings and community giveaway programs while also emphasizing the critical importance of maintaining these young trees to ensure their healthy maturation. Fayetteville's urban forest is recognized as a cherished natural asset and an economic resource, providing an estimated $55 million in annual benefits through improved air quality and reduced stormwater runoff.
Key Information

- 39.4% of Fayetteville was shaded by urban tree canopy cover in 2019.
- Tree Goal- 40.6% across the city over a 10-year planning period.
- A flexible goal of planting 1,850 trees annually to be achieved through planting and giveaways while focusing on maintaining new trees to maturity.
- Fayetteville’s urban forest provides an annual estimated benefit of $55 million by improving air quality and reducing stormwater volumes.
- A 2022 analysis shows Fayetteville’s overall Tree Equity Score is 87 out of 100. The national average score is 85 (as of 2023).

The UFMP's visionary approach is grounded in five key principles:

- Equitable and Resilient Canopy Cover,
- Maintenance and Management,
- Tree Preservation and Protection,
- Funding and Levels of Service,
- Community Education, Engagement, and Stewardship.

Each of these principles is further elaborated upon, with detailed strategies and priority actions outlined to guide the city's efforts in continuously providing high-quality urban forestry services both now and in the future. With a strong focus on equity, resilience, and sustainable management, the Urban Forestry

BUDGET/STAFF IMPACT:

Urban Forestry Management Plan

A RESOLUTION TO APPROVE AND ADOPT THE URBAN FORESTRY MANAGEMENT PLAN

WHEREAS, the Unified Development Code Chapter 167.03 requires Urban Forestry to complete a tree canopy analysis or equivalent study every ten years; and

WHEREAS, the last comprehensive Urban Forestry plan was completed in 2012 and, since that time, Fayetteville has seen tremendous growth, changes in species recommendations due to climate change and new tree diseases, and an ever-expanding knowledge of trees; and

WHEREAS, on June 21, 2022, City Council approved a contract with PlanIT Geo to prepare a 10-year Urban Forestry Management Plan; and

WHEREAS, the Plan was completed in 2024 with the assistance of the City's Urban Foresters and input from the Urban Forestry Advisory Board; the general public, and internal stakeholders including the Parks, Natural Resources, and Cultural Affairs Department; Public Works Department, Development Services Department, and the Sustainability Division; and

WHEREAS, the proposed Urban Forestry Management Plan is a visionary document guiding improvements, setting goals, and establishing standards based on the principles of Equitable and Resilient Canopy Cover; Maintenance and Management; Tree Preservations and Protection; Funding and Levels of Service; and Community Education, Engagement, and Stewardship.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF FAYETTEVILLE, ARKANSAS:

Section 1: That the City Council of the City of Fayetteville, Arkansas hereby approves and adopts the Urban Forestry Management Plan, a copy of which is attached to this Resolution.

CITY OF
FAYETTEVILLE
ARKANSAS

LETTER FROM THE CITY OF FAYETTEVILLE

In Fayetteville, trees are a source of pride and hold a special place in our City's identity. Our urban tree canopy is part of what makes Fayetteville unique and attractive to residents and visitors. The City of Fayetteville's Urban Forestry Management Plan will serve as a blueprint to guide Fayetteville during rapid growth, helping to make sure our growing community remains healthy, vibrant and green. A coalition of residents, staff, stakeholders and board members created this plan for Fayetteville by reviewing our past and current conditions and considering what the future holds for Fayetteville.

I want to express gratitude to all contributors to the Urban Forestry Management Plan. The direction outlined in this plan will help us maintain and grow our urban forests, which continue to provide direct benefits to our community.

MAYOR LIONELD JORDAN

A LETTER FROM FAYETTEVILLE'S URBAN FORESTERS

Trees and forests are the silent workhorses in our City that provide us with many benefits. Trees give us one of the most basic elements of life: oxygen. Trees shelter us from the sun during the blazing summer months. Trees filter pollutants from the air and give us cleaner air to breathe. Trees absorb rainwater and help with stormwater control when located correctly. Trees help make our lives livable.

Scientists are making discoveries about trees every year. Within the last ten years, we have learned that trees communicate with each other. We are learning about the complex web of relationships trees have with each other and other organisms. In the past thirty years, we have learned that trees produce chemicals we absorb in our skin that naturally lower our blood pressure and reduce our anxiety levels. We are just scratching the surface of what we know about trees.

The City of Fayetteville has a unique relationship with trees and tree preservation. The collaboration with our community shows how important trees are to our residents. Trees and our urban forests continue to be a high priority for our residents as illustrated in the survey results from this Plan, the Park and Recreation System Plan, Energy Action Plan, and City Plan 2040. We are thrilled to have a plan that embraces our residents' priorities and will help guide us through future growth.

Our City is changing quickly, and these changes impact trees. This plan is a guide to help us continue to grow and change while remembering the importance of trees. Over the past ten years, Urban Forestry staff has strengthened our tree preservation and landscape codes, added flexible elements for development in code, and clarified our Unified Development Code. The Urban Forestry Management Plan has a vision to continue strengthening, clarifying, and adding flexibility to our Tree Preservation and Landscape codes.

The Urban Forestry Management Plan will also help focus our efforts to maintain, grow, and enhance our urban forest programs for the next ten years. Fayetteville's award-winning Urban Forestry programs lead the state in innovation, public outreach, technology, and progress. This plan will help continue this progress, strengthen those attributes, and guide us on what we can do for our urban forests. We are excited to continue to serve Fayetteville with award-winning programs by implementing the recommendations of this plan.

Executive Summary

INTRODUCTION

The quality of life for Fayetteville's community members is strongly improved by its trees (collectively known as the urban forest), as trees make a vital and affordable contribution to the sense of community, enhance and create pedestrian-friendly neighborhoods, provide energy savings, reduce stormwater runoff, and improve air quality. Future climate predictions indicate that heat waves will become more frequent, and the average yearly temperatures are expected to continue to rise. In addition, it is anticipated that the region will experience more frequent extreme weather events and temperature changes, prolonged periods of drought, and shortened or disrupted natural seasons. Fayetteville's urban forest is a key part of the City's climate resilience goals, it:

- provides much-needed shade
- is one of the most effective mechanisms to cool urban areas
- reduces stormwater runoff
- increases property values
- makes the City more livable

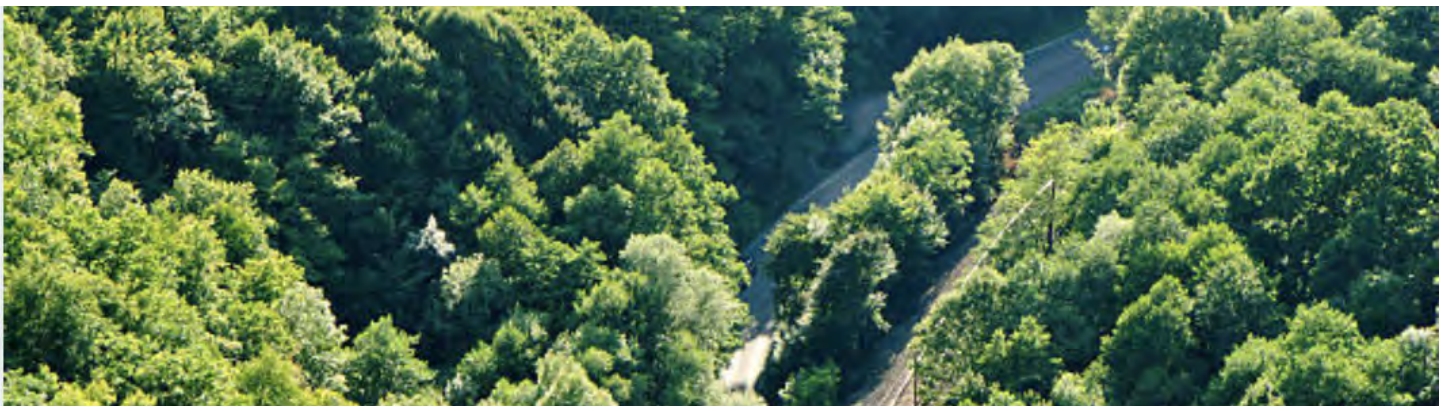
Protecting, maintaining, and expanding Fayetteville's urban forest is essential to preserving and improving quality of life for all residents while increasing property values. To plan and manage Fayetteville's urban forest, a baseline assessment of tree canopy cover was conducted in 2019.

PURPOSE

The City's Urban Forestry Management Plan ("Plan") aims to provide goals and a roadmap for the City to preserve and expand tree canopy cover and maximize the benefits of Fayetteville's urban forest.

KEY FINDINGS

Fayetteville's programs for urban forest management, community engagement, public tree maintenance, tree ordinances, and the supporting Urban Forestry Advisory Board are critical to meeting the City's commitment to climate change mitigation and adaptation, carbon sequestration, stormwater reduction, water conservation, wildlife habitat enhancement, and service to the community. The following summarizes key findings about the City's tree canopy, its programs, and the community it serves.



THE PLANNING PROCESS

The development of the Fayetteville Urban Forestry Management Plan was based on answering four key questions:

WHAT DO WE HAVE?
WHAT DO WE WANT?
HOW DO WE GET THERE?
HOW ARE WE DOING?

Figure 1. The process to develop Fayetteville's Urban Forestry Management Plan

URBAN FOREST KEY FINDINGS

1. 39.4% of the City was shaded by urban tree canopy cover in 2019 and had a Tree Equity Score of 87 out of 100. The regional average is 77 and the national average is 85 (see page 36 in the Current Conditions section for more details).
2. The citywide urban forest provides an annual estimated benefit of $55 million by improving air quality, health savings, energy savings, and reducing stormwater volume. (Endreny, 2018)
3. A sample inventory of 2,712 public trees and 848 private trees was completed in 2022. The trees are diverse- the top ten species only comprise 44% of all trees.
4. Fayetteville has an estimated 42,000 public trees of which 25,000 are in maintained areas.
5. The 25,000 publicly-maintained trees provide an estimated $2.5 million in ecosystem benefits.

MANAGEMENT KEY FINDINGS

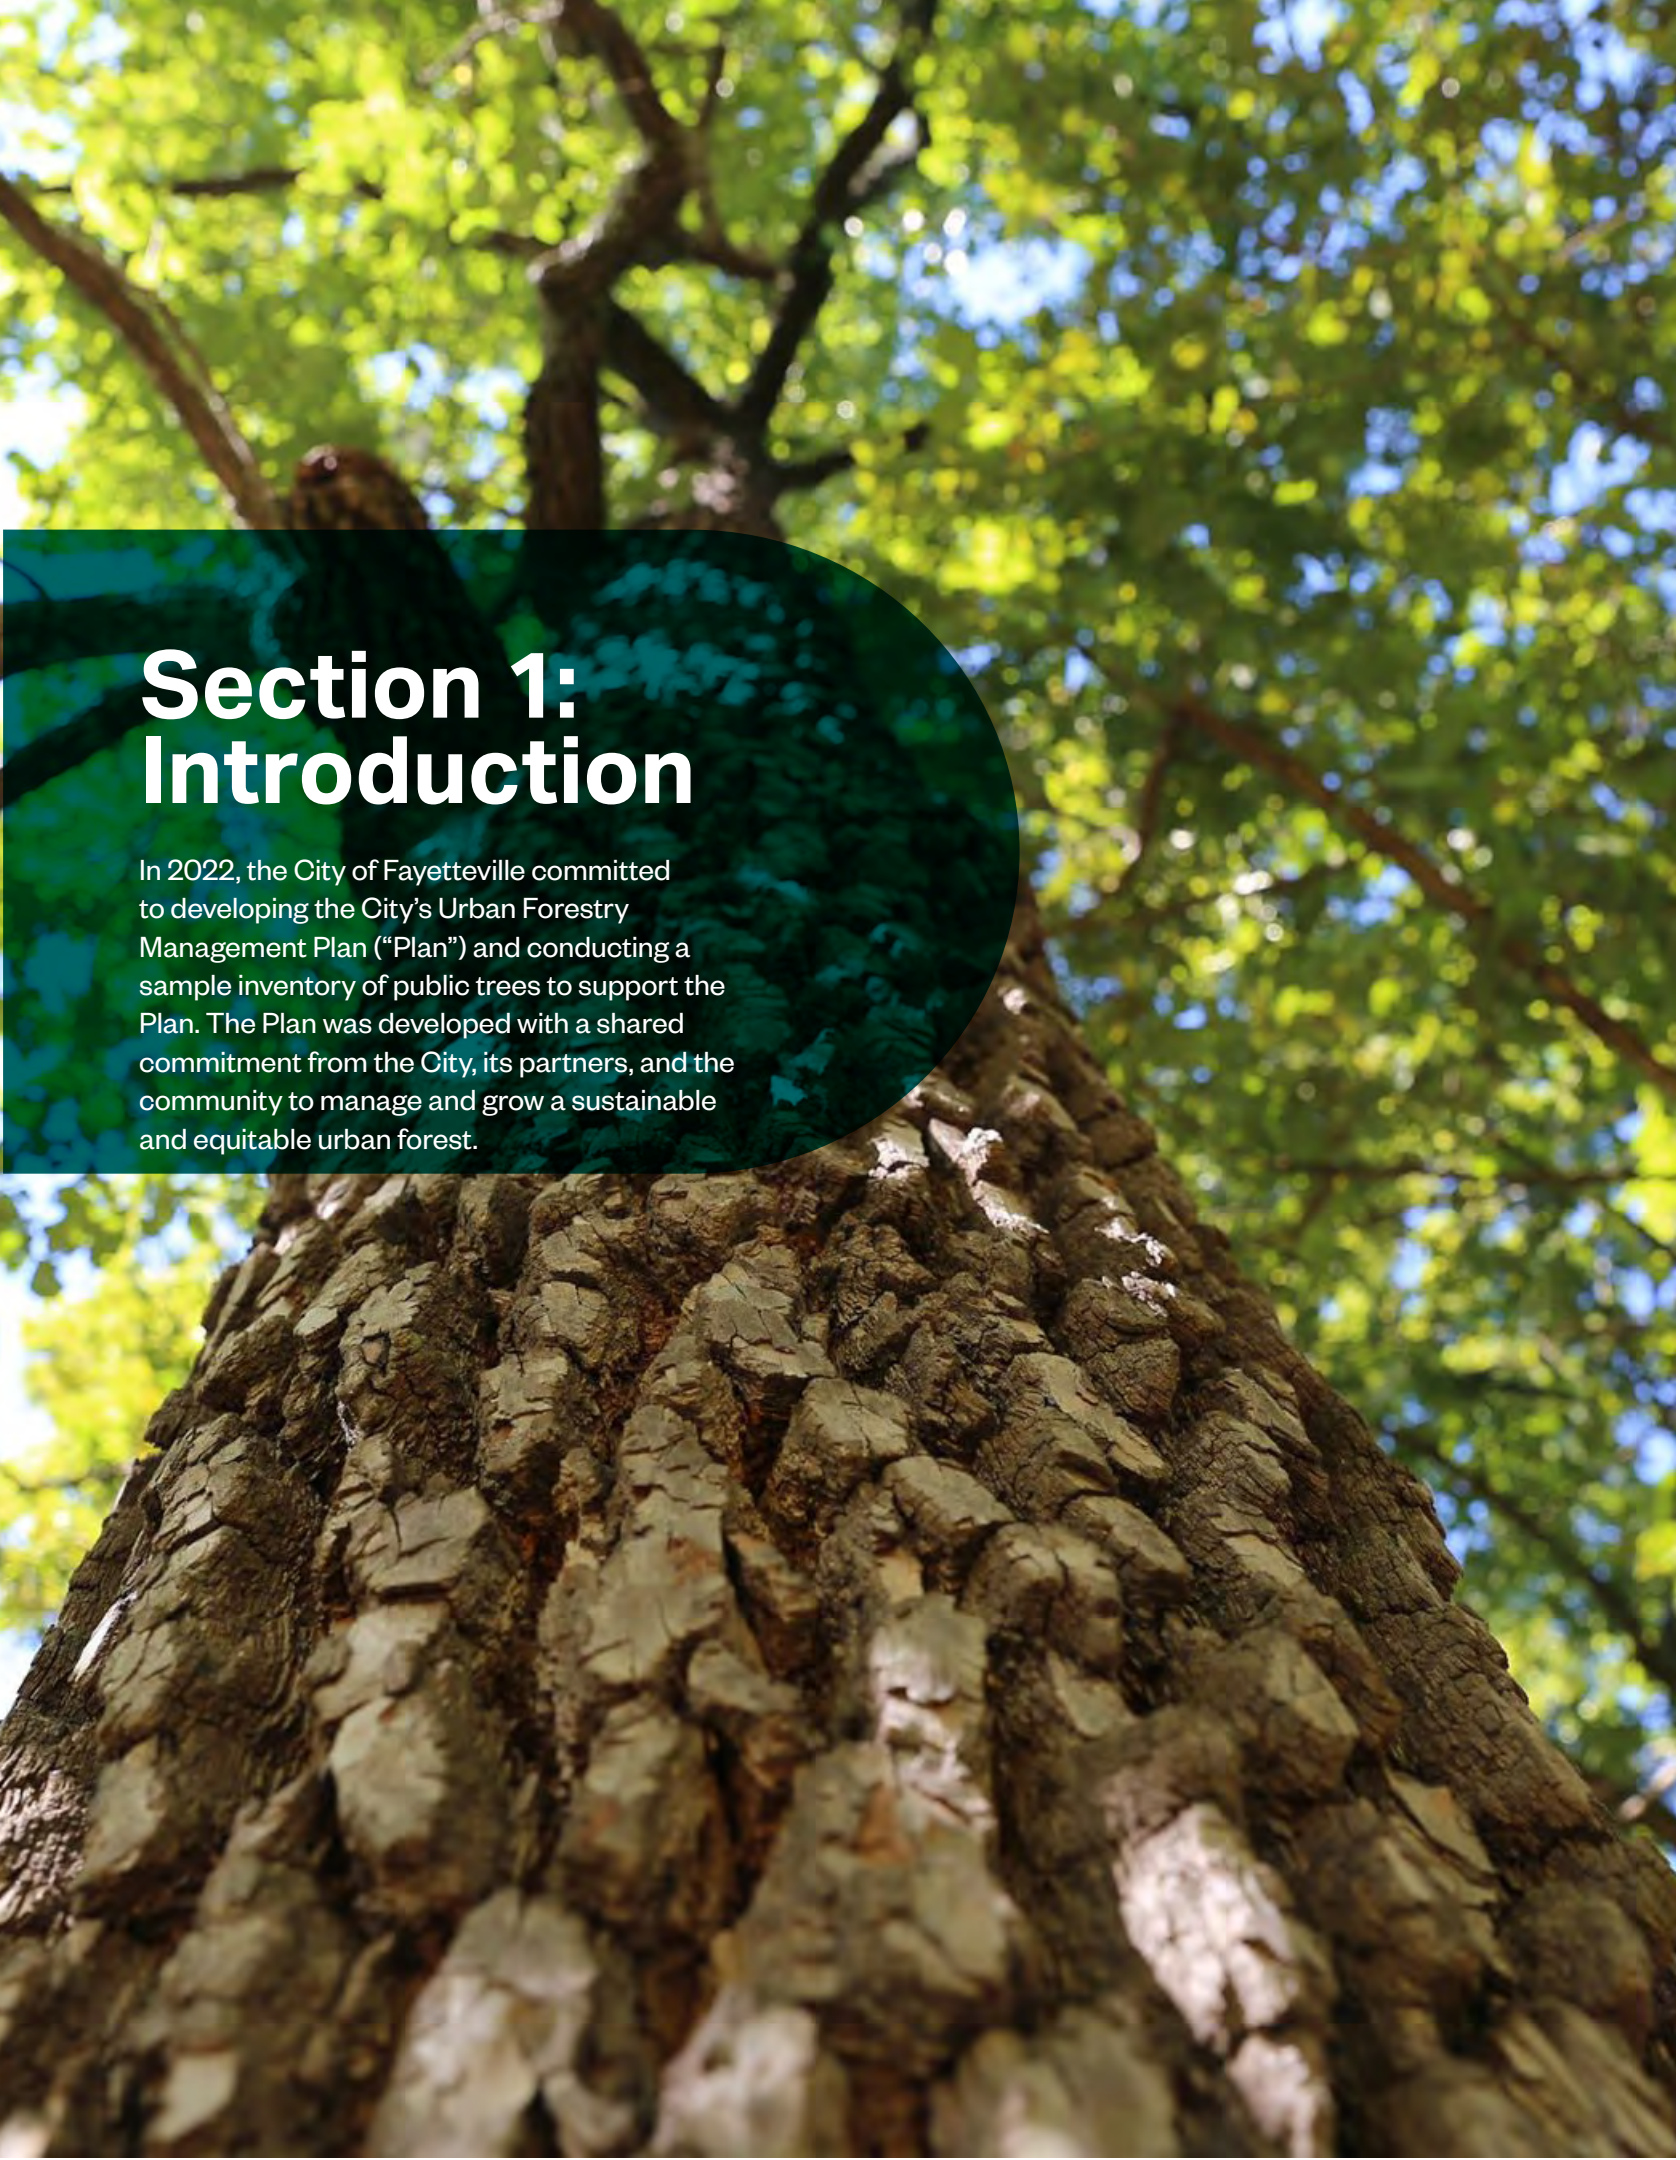
The urban forest is managed by three different City departments— Parks, Natural Resources and Cultural Affairs; Public Works; and Development Services.

1. 1.00 full-time equivalent (FTE) staff is in Parks, Natural Resources and Cultural Affairs (Park Planning & Urban Forestry Division) and oversees tree plantings, Arbor Day Celebration, the Tree City USA program, specifies new tree plantings in public spaces, is the Staff Leader for the City's Urban Forestry Advisory Board (UFAB), works on Code changes, outreach, budgets, and advises maintenance best management practices.
2. 6.00 FTEs in Park Maintenance in Public Works perform public street tree maintenance.
3. 1.00 FTE in Development Services manages trees as part of private development in accordance with Chapter 167 "Tree Preservation and Protection" within Fayetteville's Unified Development Code and Chapter 177 "Landscape Requirements Code."
4. An estimated 74% of public trees are 12 inches in diameter or less, 75% of trees are in good condition, and the most common maintenance need for public trees is clearance pruning (8%), removals (6%), and watering for tree establishment.
5. Fayetteville's Urban Forest Audit Score (page 65) based on U.S. Forest Service criteria is 73% (completed in 2023). The Audit evaluates and scores 11 categories of sustainable urban forest management categories according to industry standards and best practices.
6. Challenges and shared priorities among City staff and commission members include staffing, ordinance and standards, and infrastructure conflicts with 50% or more of participating staff indicating these as challenges or concerns.

ALIGNING CITY PRIORITIES

The Urban Forestry Management Plan complements existing city and regional planning efforts such as the City Plan 2040 comprehensive plan for Fayetteville, the Park and Recreation System Master Plan, Energy Action Plan, and the Climate Action Plan (in development as of 2024).

Involvement from stakeholders and residents has been key to development of the Urban Forestry Management Plan and establishing the Plan's priorities. A diverse group of city staff, residents, and community stakeholders provided perspectives on the most important issues faced by the urban forest. Collectively, this group prioritized preserving existing trees and incorporating healthy, climate-tolerant or native trees into the City's built environment, particularly in underserved areas. The Plan's goals reflect these values and priorities.



URBAN FORESTRY MANAGEMENT PLAN VISION AND GUIDING PRINCIPLES

Urban Forest Vision	Guiding Principles
Healthy Trees, Healthy City: The vision for Fayetteville's urban forest is to cultivate a thriving, diverse, and well-maintained tree canopy that enhances the livability, health, and sustainability of our community for current and future generations.	**Equitable and Resilient Canopy Cover:** We value and appreciate the benefits and services provided by the trees in our community. These benefits and services should be maximized and equitably distributed across the City by growing an urban forest that is sustainable and resilient to current and future challenges. **Maintenance and Management:** We care for our trees and the citywide urban forest to ensure the benefits are available for current and future generations. Our operations and investments prioritize sustainability, fiscal responsibility, and equity. **Tree Preservation and Protection:** Our existing tree canopy cover and the investments made in planting and caring for the urban forest are preserved through sound but fair policies and regulations that align with shared priorities in the City and best practices. **Funding and Levels of Service:** The programs and staffing involved with the trees in our community have the resources necessary to meet current and future demands and challenges. **Community Education, Engagement, and Stewardship:** A sustainable urban forest requires a shared commitment from the City and the community. We will foster tree stewardship in our community through equitable and impactful community education and engagement.

Table 1. Summary of the vision and guiding principles for Fayetteville's Urban Forestry Management Plan.

Fayetteville's Urban Forestry Management Plan aims to achieve 44.4% canopy coverage across the City over a 30-year planning period with a 1.2% increase in the first 10 years. The Plan recommends planting an average of 1,850 trees per year, with a focus on 60% being large-canopy trees at maturity. The other goal is to plant trees the City has the ability to maintain to maturity so these trees can provide the maximum benefits to our environment. The City, developers, and private landowners will collectively contribute to reaching the canopy cover goal. (For goal details see page 72)

Tree canopy analysis must be conducted every 10 years to benchmark against our goals and determine what within the management plan needs to be modified to achieve the canopy goals, as required by City Code section 167.03.C.

Section 1: Introduction

In 2022, the City of Fayetteville committed to developing the City's Urban Forestry Management Plan ("Plan") and conducting a sample inventory of public trees to support the Plan. The Plan was developed with a shared commitment from the City, its partners, and the community to manage and grow a sustainable and equitable urban forest.

Introduction

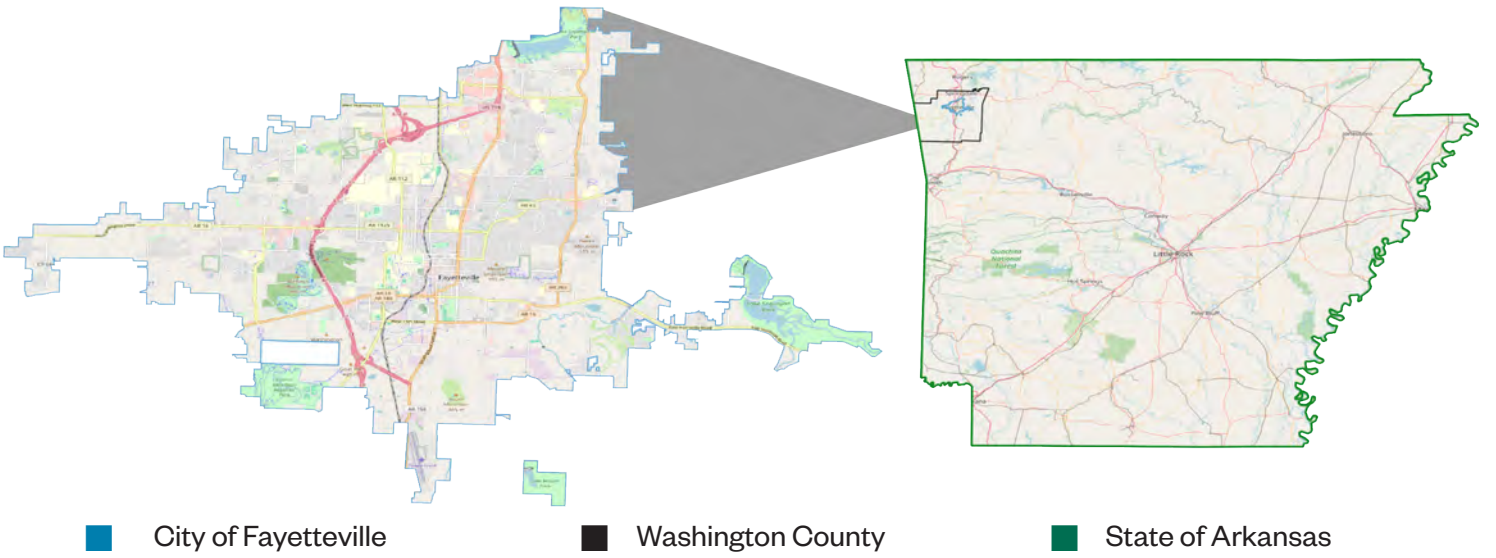


Figure 2. Maps displaying the location of Fayetteville, Arkansas within Washington County.

ABOUT FAYETTEVILLE

Nestled within the picturesque Ozark Mountains in the northwestern part of the state, Fayetteville, Arkansas, stands as a vibrant and growing community that harmoniously blends urban development with natural beauty. As the heart of Washington County and home to the University of Arkansas, Fayetteville exudes a unique character that attracts residents, students, and visitors alike.

Fayetteville is the second most populous city in Arkansas with 93,949 people as of the 2020 U.S. Census. It spans 55.8 square miles and of that area, 39.4% (22 square miles) is covered by the canopy of trees that comprise Fayetteville's urban forest. Fayetteville's location between the Springfield Plateau and the Boston Mountains within the Ozarks gives rise to a wide variety of land forms and environmental features including native prairie wetlands, steeply sloped and forested uplands, and a variety of streams and water bodies.
Overall, Fayetteville's urban forest plays a crucial role in enhancing social interactions, well-being, human health, and community engagement, making Fayetteville a more livable and enjoyable city.

Photo showing circa 1890 Fayetteville, looking northwest from Mount Sequoyah; fayettevillehistory.org

BACKGROUND AND HISTORY

Situated in the Ozark Mountains, Fayetteville is known for its natural beauty and diverse wildlife. However, over time, the natural environment in and around Fayetteville has been significantly altered due to human settlement and unchecked development. As urban development happened, the natural environment transitioned to what is referred to as an urban forest, meaning trees in an urban area. However, there still remain heavily forested areas and woodlots along with forested public parks and open space within the City. The following provides an overview of the history of the natural environment which led to the City's urban forest and the focus of this management plan.

The earliest settlers in the Fayetteville area were Native American tribes who lived off the land and hunted and gathered food from the natural environment. However, with the arrival of European settlers in the early 19th century, the landscape began to change. The first settlers cleared large areas of land for farming, which led to deforestation and loss of habitat for many species of plants and animals.

In the late 19th and early 20th centuries, industrialization began to take hold in Fayetteville. Sawmills and other factories sprang up, leading to further deforestation and pollution of the local waterways. The construction of railroads and highways also had a significant impact on the natural environment, as large areas of land were cleared to make way for these transportation routes.

As Fayetteville continued to grow and develop, urbanization became a significant factor in altering the natural environment. The population increased, and more land was needed for housing, development, and infrastructure. This led to further deforestation and loss of habitat, as well as increased pollution and degradation of waterways.

Despite these significant changes, Fayetteville has also taken steps to preserve and protect its natural environment. A pivotal moment in Fayetteville's Urban Forestry history came in 2000 when Mary Lightheart protested the removal of trees at a proposed development and climbed into a massive oak tree, living there for three weeks. She and 50 other activists were protesting a new shopping center that would cause the removal of a large stand of oak trees. At the time, the Mayor and City Council approved the project. Two organizations, the League of Women Voters and Sierra Club, sued the City.

The activists helped bring light to tree preservation and triggered political change. The following year, a stronger tree preservation ordinance was enacted with a new Mayor. The residents of Fayetteville made it clear that trees are vital to this City.

This commitment to the natural environment is carried on by Fayetteville's Urban Forestry Management Plan and the City's programs for trees that are detailed in the Current Conditions section.

BENEFITS AND SERVICES PROVIDED BY FAYETTEVILLE'S TREES

A diverse and healthy urban forest works to the benefit of the community, the environment, and the economy. Following is a summary of some of the key benefits and services of trees, nature, and greenspaces in urban areas that was compiled from research to develop Fayetteville's Urban Forestry Management Plan.

IMPROVE THE QUALITY OF LIFE

Trees make cities more livable by decreasing summer temperatures and improving well-being. Greater contact with natural environments correlates with lower levels of stress, improved performance, and fewer sick days. Residents in areas with more greenery are three times more likely to be physically active and less likely to be overweight than residents living in areas with little greenery. View the following section for additional details about Fayetteville's urban forest improving the quality of life for residents.

Cooler Pavement Diminishes Urban Heat Islands

Tree canopy lowers temperatures by shading buildings, asphalt, and concrete. Trees deflect radiation from the sun and release moisture into the air, reducing surface temperatures by as much as 36 degrees. Lower temperatures diminish fumes from heated asphalt and mitigate the urban heat island effect.

Improve Air Quality

Trees produce oxygen and clean the air by removing pollutants that would otherwise contribute to human health problems such as asthma and other respiratory diseases.

Protect Wildlife and Ecosystems

Preserving and planting trees provides valuable habitat for wildlife, supports pollinator species, and provides favorable conditions for beneficial soil microorganisms.

Save Energy and Lower Energy Costs for Buildings

As natural screens, trees insulate homes and businesses from extreme weather, keeping buildings cooler and reducing air conditioning bills. Shade trees planted on a sunny exposure can provide savings of up to 50% in the summer. In winter, evergreen trees provide a barrier to cold winter winds.

Conserve Water and Soil

A tree's root system draws water into the soil and their canopy slows rainfall, reducing runoff and erosion while removing contaminants. In contrast, impervious surfaces like roads and parking lots allow water to run off unfiltered and at high volumes, increasing the likelihood of flooding and impaired water quality.

Other benefits include increased property values, reduced pavement wear, traffic calming, public safety, among others. View a compilation of research on urban forest benefits and services prepared by the Alliance for Community Trees (www.actrees.org). Tree benefits are quantified in the following section.

"In light of the ongoing effects of climate change, trees and their associated canopy have innumerable benefits and an urban forest plays a role in carbon sequestration, mitigating stormwater issues, filtering pollutants, increasing property values, improving public health, and reducing the heat island impacts associated with urban areas."

FAYETTEVILLE CITY PLAN, 2040

A CLOSER LOOK AT TREES IMPROVING THE QUALITY OF LIFE IN FAYETTEVILLE

Trees come in various forms— shade trees, flowering trees, trees with edible fruit and nuts, and trees with vibrant fall color. All types contribute benefits and services to the urban ecosystem— an ecosystem that brings nature into cities through tree canopy, parks, and interconnected greenspace. Many environmental benefits of trees in urban areas are identifiable and measurable, while other benefits are tangential and experiential, such as the feeling of walking a quiet tree-covered trail. The following provides a summary of the social and human health benefits of trees and greenspaces.

The urban forest brings a myriad of social and health benefits to Fayetteville's communities. Park and street trees create a sense of community, offering opportunities for people to come together and engage in various activities. These shared spaces foster a sense of belonging and connection among residents. Additionally, Fayetteville's urban forest provides a respite from the hustle and bustle of city life, offering peaceful retreats where individuals can relax, unwind, and enjoy nature.

Research summarized in the following paragraphs shows the presence of trees and greenery in urban areas reduces stress, improves mental well-being, and encourages physical activity, all of which contribute to healthier and happier communities. Moreover, Fayetteville's urban forest creates opportunities for environmental education and volunteering, inspiring residents to learn about nature, participate in tree planting initiatives, and engage in environmental stewardship.

Figure 3. Human health and social benefits of trees.

Overall, Fayetteville's urban forest plays a crucial role in enhancing social interactions, well-being, human health and community engagement, making Fayetteville a more liveable and enjoyable city.

Studies have found that the amount of trees and vegetation in common spaces such as parks are related to a sense of neighbrohood safety and more social activitiy. In turn, greenery in cities enhances the strength of social ties among neighbors (Kim, et al., 2020).

Encounters with nature in cities also lead to enhanced positive attitudes, decreased stress levels, improved attention spans, and better performance on cognitive memory assessments (Wolf, et al., 2020).

Tree canopy cover and greenspaces in cities motivate and provide opportunities for people to be physically active. The percentage of greenspace within a two mile radius of a person's home has been associated with the percentage of residents reporting good health, particularly among the elderly and those with lower socioeconomic status—groups that are typically less likely to get sufficient physical activity. Research shows that community residents are three times as likely to be physically active when living in areas with more greenspace (Ulmer, et al., 2016).

Opportunities to experience urban nature—whether it's a view of a street tree out a window or actually being outside in nature— are key to the mental well-being of city residents. People are happier, experience a greater sense of well-being, and have reduced stress levels when they live in areas with more greenspace nearby or on a tree canopied neighborhood street (White, et al., 2013).

More tree cover near schools also has a positive effect on student performance. Children with challenges concentrating are more focused following a 20-minute walk in an urban park or tree canopy covered sidewalk than they do after walks in other urban settings without trees and greenery (Taylor, et al., 2009). Trees in neighborhoods and parks connect children to nature.

The link between time spent in natural settings and health outcomes has been the center of focus for healthcare and insurance industries in recent years. Trees and greenspaces have shown to increase longevity, reduce the risk of cancer and heart disease, reduce anxiety and depression, improve immune function, and reduce stress hormones. A study in 2016 of 108,000 people found a 12% lower rate of non-accidental mortality among those with the most greenery in a 820-foot (250 meters) radius around their homes (James, et al., 2016). In addition, hospital patients placed in rooms with views of nature experienced shorter stays in the hospital compared to patients in rooms that faced other buildings (Mihandoust, et al., 2021).

ENVIRONMENTAL BENEFITS OF TREES

Research over the past several decades provides valuable quantified data on environmental benefits for urban forest researchers, managers, and practitioners. This data can be used to communicate tree benefits to residents and stakeholders and to incorporate trees into infrastructure design such as stormwater management. It can also be used to develop strategies that reduce inequities.

A tree canopy assessment conducted by the City in 2020 (with 2019 imagery) determined that 39.4% of the City (14,000 acres) was shaded by tree canopy. In 2022, a sample inventory of 2,712 public trees and 848 private trees was conducted to make estimates about the composition and structure of public and private tree populations. These datasets were used to calculate the following benefits of the citywide urban forest and public tree population as noted.

Citywide Tree Canopy Benefits

The citywide tree canopy across public and private land provides an annual estimated benefit of $55 million by improving air quality and reducing stormwater volumes. (Endreny, 2018)

Public Tree Benefits

The 2022 sample inventory of public trees determined that are 42,000 trees in public spaces, and 25,000 are maintained.

The 25,000 publicly maintained trees were used to calculate the benefits and services. Using i-tree tools, it is estimated that the 25,000 provide $71,615 in ecosystem benefits annually.

It is estimated that the 25,000 maintained public trees sequester (capture) 1.4 million pounds of carbon dioxide annually, worth $33,613. The air quality benefits equate to $23,949 annually in services. $14,056 of stormwater benefits are diverted from the 25,000 trees. Using these three benefits, the 25,000 public trees provide a yearly total of $71,615 in ecosystem benefits (Tree Inventory Summary).

Photo of Eastern towhee habitats are supported by healthy urban forests. Source: Audubon Arkansas

CARBON BENEFITS	**$33,613**
AIR QUALITY BENEFITS	**$23,949**
STORMWATER BENEFITS	**$14,053**
TOTAL BENEFITS	**$71,615**

Over the lifetime of these trees (i-trees uses 35.7 years), $ 2.5 million in benefits for our 25,000 maintained public trees. The value of the 42,000 public trees is over $4.2 million in ecosystem services benefits. (Tree Inventory Supplement)

ECOSYSTEM BENEFITS	AMOUNT FOR 2712 TREES	AVERAGE PER TREE	TOTAL FOR 25,000 PUBLIC TREES

PLAN PURPOSE

Caring for and prioritizing the urban forest is an important part of maintaining a sustainable and vibrant city. However, urban forest management must also support the City's goals including economic development, transportation, urban design, and the goals of property owners. In recognition of this, Fayetteville's Code of Ordinances requires 'a tree canopy analysis and an Urban Forestry Effects Model study or their current equivalent studies within the current geographical boundaries of the city by December 31, 2012. Thereafter, the city should conduct these studies every ten (10) years.' UDC 167.03

The Urban Forestry Management Plan serves as a guide to proactively manage, care for, protect, and expand the City's tree canopy while navigating these competing pressures. The Plan provides a strategic and systematic framework for the sustainable stewardship, enhancement, and utilization of trees within the urban areas of Fayetteville. This Plan serves as a roadmap to guide decision-making and actions related to the urban forest. The key purposes include:

Sustainability and Environmental Health:

The Plan ensures that the ecological benefits are maintained and enhanced, contributing to the overall environmental health and resilience of the City

Quality of Life and Community Well-Being:

The Plan provides the strategies to create and maintain accessible and inviting greenspaces that enhance the quality of life and foster community pride.

Urban Planning and Design:

The Plan aligns with urban planning and design principles, ensuring that tree preservation, planting, maintenance, and removal are integrated into the built environment while reducing or clarifying competing priorities.

Climate Change Mitigation and Adaptation:

The Plan's overarching goal to increase canopy enables the City to maximize the urban forest's contribution to climate change mitigation and adaptation efforts.

Public Safety and Infrastructure:

The Plan provides recommendations for public tree maintenance and risk management.

Education and Outreach:

The Plan includes recommendations for community engagement, outreach, and education to raise awareness about the value of trees, promote responsible stewardship, and support the community in tree planting and maintenance activities.

Long-Term Vision:

A vision for the urban forest ensures decisions made today have a positive impact on future generations. It provides a framework for adaptive management, allowing for adjustments based on changing conditions and priorities.

Coordination and Collaboration:

The Plan fosters collaboration among various internal and external stakeholders to ensure a coordinated and holistic approach to urban forest management.

Legal and Regulatory Compliance:

Creation of the Plan is required by City Code. Recommendations in the Plan improve regulations for tree preservation, protection, maintenance, planting, and compliance.

CHALLENGES FACING FAYETTEVILLE'S URBAN FOREST

External Challenges

Urban forests across the country face common stressors including urban heat, poor air quality, weather extremes, pressure from development, and invasive plants, pests, and diseases. These challenges are often intensified by conflicting priorities and a shortage of resources.

Fayetteville's urban forest has been growing and changing as development and redevelopment occurs in the City. In many ways Fayetteville and the northwest region of the state are fortunate to be such a highly desirable place to live, work, recreate, and study. Rapid growth in northwest Arkansas is predicted and the effects are already being felt. From 2010 to 2020, Washington County's population rose by 21.1% and almost half of that growth was in Fayetteville alone. Specifically, Fayetteville is experiencing a 28% growth rate and is now the second largest city in the state, replacing Fort Smith (NWARPC). According to Woods & Poole Economics, Inc., the Fayetteville-Springdale-Rogers metropolitan area has a 76% population growth projected from 2022 to 2060.

Like many cities, the tree canopy cover in Fayetteville is not equitably distributed across the City. As a result, some neighborhoods experience higher surface and ambient temperatures, poorer air quality, and more frequent flooding than neighborhoods with greater canopy cover. Additionally, the lack of access to trees and greenspace impacts residents' physical and mental health, sense of community, and overall well-being.

Climate change is an overarching challenge that is compounding the issues facing Fayetteville's trees. In addition to the known pests, diseases, and weather that the native trees have evolved to withstand, the new changes in temperature and weather extremes bring a new onslaught of pests, diseases, and wet/drought cycles.

Healthy trees can play a significant role in making Fayetteville more resilient to weather and climate extremes by sustaining the natural ecosystem health. Yet the ability of community trees and forests to achieve their full potential is often significantly limited due to poor tree health stemming from reactive fixes instead of holistic solutions, limited training of tree care professionals, and insufficient municipal budgets.

Internal Challenges

- Proper and timely management of the trees in accordance with current best management practices.
- The need for updated tree-related regulations that preserve, protect, and grow the urban forest aligned with best practices and City priorities.
- Limited financial and operational resources to address the gradual and immediate impacts of climate change.
- Concerns regarding the organizational structure and communications with having three groups working in three different departments.
- Preparing for emerald ash borer and other emerging tree pests and diseases.
- Strategic tree planting programs and initiatives needed to sustain and expand tree canopy and the associated benefits.
- Educating and revitalizing community tree stewardship.

THE TIME IS NOW

It is critical for Fayetteville's environment, economy, and community well-being that the City act now to sustainably manage the urban forest. The City has a Comprehensive Plan for how Fayetteville will grow and change with development. Among other plans in place or in development is the City's Climate Action Plan. Fayetteville's Urban Forestry Management Plan supports and builds on the goals and policies of these plans and supplements those with vital analyses, studies, metrics, and strategies relating to the City's natural environment and specifically, the urban forest.

Undeveloped areas contain native trees and vegetation, fertile soils, vital water resources, natural prairie, and wetlands. Protection and conservation of these critical areas is up to the citizens and the choices made by the City.

Fayetteville's Urban Forestry Management Plan provides the roadmap with goals and supporting recommendations to manage, grow, preserve, and strengthen the urban forest through invigorated partnerships that align with city and community priorities. Section 2 of this Plan is an overview of the current state of Fayetteville's urban forest and will serve as a baseline to measure future progress. Section 3 is an overview of Fayetteville's priorities for the urban forest which were identified through community and stakeholder input which informed the Plan's vision, guiding principles, goals, strategies, and priority actions. Section 4 of the Plan details the implementation and monitoring guidelines and the Appendices section provides additional information and studies to support the Plan and its implementation.

Let's begin by exploring Fayetteville's urban forest.

Section 2: Current Conditions

Trees That Make Up Fayetteville's Urban Forest

PROGRESS FROM 2012 ASSESSMENT RECOMMENDATIONS

To begin exploring our urban forests, we must review the 2012 recommendations to see our progress over the last ten years. The recommendations in the 2012 Urban Tree Canopy Assessment Report were evaluated to develop recommendations for the Urban Forestry Management Plan. The following provides a summary of the status of recommendations in the 2012 report (Urban Tree Canopy Assessment Project 2012 recommendations- Pages 33 and 34).

1. Share this report to promote cohesion among the City, AFC, FNHA, and other partners and community stakeholders:

- People are part of the urban forest. This report can be used as a catalyst among urban forest managers and community stakeholders to meet Fayetteville's natural resource goals.
- Solicit feedback from community partners to refine tree preservation ordinances, tree planting initiatives, and steps to encourage survivability and forest health.
- Develop best management practices (BMPs), such as maintaining higher canopy cover in ecologically sensitive areas (wetlands), parking lots, schools, and commercial properties.

2024 Update. On Going and Complete. *The old and new Urban Forestry Plan will be available online.*
We regularly meet with our board to discuss ordinance changes and tree-planting initiatives and stress the importance of planting the right tree in the right place for longevity. The Urban Forestry Advisory Board advises staff on ordinance changes and tree-planting initiatives. The board is made up of a diverse group of community stakeholders.

We have developed a Best Management Practices to ensure we care for new yearly plantings. We set our planting goals based on what we can maintain and grow to maturity.

2. Monitor, adapt, and enforce existing tree Preservation and Protection ordinances.

- Streamline tree-related policies and identify if codes are working against local goals.
- Enforce requirements in the Tree Preservation plan, especially the 90% survival rate for forested areas and tree plantings.
- Collaborative planning can reduce costs and provide consistency for public works officials, planners, developers, stormwater, and resource managers.

2024 Update. Integrated and Complete. *Urban forestry staff continually review policies and codes and regularly adjust to necessary changes. We inspect all projects for a 90% survival rate. We collaborate with planning, sustainability, park maintenance, stormwater engineers, and others throughout the city for many projects.*

3. Develop a regional urban tree canopy assessment report in Arkansas.

Utilize the information gained from this assessment and others in the state to compile and compare results. Involve interdisciplinary partners in the process and draft an appropriate call to action.

2024 Update. Not applicable. *Our latest Urban Forestry Management Plan will be available regionally for other entities to review. This recommendation is outside the scope of staff work. Urban Forestry staff does talk with the NWA Regional Planning Director about trees. Urban Forestry staff would participate in a regional plan if initiated by a larger regional entity like the NWA Regional Planning Commission.*

4. Assess tree canopy every 8-10 years to monitor trends and assess the effectiveness of public education & outreach campaigns and the tree preservation ordinance. Tools such as the I-Tree Canopy can be used between comprehensive GIS-based assessments.

2024 Update. Integrated and Complete. *Urban Forestry Staff has worked with the GIS department and receives NAIP imagery as it is released; we can get regular canopy updates every two years. GIS has used the standards to give us tree canopy assessments every other year. We received one in 2015, 2017, and 2019 and are getting canopy assessments for 2021 and 2023. We assess the tree canopy every two years.*

The City's Urban Foresters frequently participates in several public education and outreach campaigns.

5. Disseminate this project's land cover and UTC assessment data broadly.
While it is current, encourage its use for applications such as water supply planning, stormwater modeling, land use planning, green infrastructure, and Low Impact Development (LID) design.

2024 Update. Integrated and Complete. *The Urban Forestry staff has several tools to help with the above, and we use GIS and the multitude of layers to plan green infrastructure. The staff has included LID features in many of the City's details, and engineering has included LID in the stormwater management of new developments in our city. Our maps are available to everyone.*

6. Foster academic partnerships. Recommend that the University of Arkansas become a Tree Campus USA and work with local schools to educate and plant/care for trees.

2024 Update. Complete. *We have spoken with several groups at the University of Arkansas to get them to become Tree Campus USA, but we have not succeeded. We keep regular contact with the University's Landscape Architecture department. We have also reached out to the sustainability department at the University of Arkansas.*
The staff regularly works with all public and private schools in Fayetteville. We have had planting projects with students at Butterfield Elementary, Haas Hall Academy, The New School, and Washington Elementary. We have been involved with the Fayetteville High School Advance Placement science program, which monitors and removes invasive plants at McNair Middle School. We have participated in several regional activities that teach children the importance of trees.

7. Explore all potential partnerships to achieve urban forest goals: public/private
including corporate and academic sponsors, council representatives, environmental quality, and stormwater associations, volunteers, non-profit organizations, and neighborhood associations.

2024 Update. Complete. *Fayetteville's Urban Forestry has partnered with Compassion Fayetteville, Beaver Watershed, Illinois Watershed Partnership, the Land Trust, Arkansas Urban Forestry Council, and other groups. We have recently started partnerships with several Property Owners Associations.*

8. Promote hardy, climate-adapted, and long-lived tree species that are appropriate for Fayetteville's environment to ensure investments in trees achieve maximum benefits.

2024 Update.Active, Integrated and Complete. *The City of Fayetteville codified the use of native Ozark trees as the recommended tree species. We have stressed the right tree for the right place. We actively promote using only Ozark native trees and shrubs in development.*

We have updated the recommended tree species list and are working on a new one.

9. Target areas for tree planting using the assessment data.

- Use results to justify targeted public tree plantings in the public right-of-way and greater private planting in commercial landscaping.
- Ground-truth possible planting areas and planting site locations. Make these data sets available on a GIS web map as social assessment tools for residents and businesses.

2024 Update. Integrated and On Going. *Over the last five years, we have used Tree Equity Score to locate new planting locations. We also use heat maps and other tools to help us plant trees in the most needed locations. Before that, we have always used income, access to trees, heat islands, and other factors to locate new tree plantings.*

10. Create a central repository for monitoring tree planting and tree removals on public and private property, possibly using a web-based application open to the public.

2024 Update. Integrated and On Going. *The Urban Forester in Parks, Natural Resources, and Cultural Affairs receives all planting plans city-wide and tracks how many trees are removed and planted yearly. The staff also created a spreadsheet that monitors how much is removed in the development review process. Staff can track development removal as well. Staff is currently unable to keep up with the data due to workload in Development and hopes for additional staffing soon. Staff cannot track private property owners activities.*

11. Ensure consistency in future UTC assessments using comparable image resolution, classification techniques, and QA/QC procedures. LiDAR and 1.5-2.0' multispectral satellite imagery acquired at similar times would provide an ideal data set.

2024 Update. Integrated and On Going. *With NAIP imagery, we can bring regular reports closer together; however, rapid technological advances may not always make this possible. We will continue to try to do this. This field has made many advances over the past ten years, and aerial imagery allows us to compare information. However, the imagery gets more accurate and improves each year. The latest data will be the most accurate.*

12. Create or update an existing targeted education and outreach campaign using the ecosystem benefits values. Use the data, maps, tools, and tree benefits to help non-profits, residents, and businesses visualize their role in reaching, maintaining, and expanding Fayetteville's urban forest for social, environmental, and economic benefits that are relevant to them.

2024 Update. Integrated and On Going. *We use trees' benefits and values daily with developers and internal customers. This topic is talked about frequently.* ***We won an award for placing price tags on trees that showed the benefits of each tree.***

13. Work on urban forestry goals and design specifications for other environmental planning initiatives such as wetland restoration projects, open space conservation easements, green infrastructure & low impact development (LID) plans, and energy efficiency programs.

2024 Update. Integrated and On Going. *Goals are something we continue to assess and focus on for tree preservation. We will have new goals when we complete this document.*

Forestry is starting to move towards other natural resource management. The foresters worked with the engineering department on specifications for BMPs for stormwater; this included tree preservation, usually near a stream. Staff created mitigation options and codified the options for green roofs, green facades, and other LID features.

14. Assess forest stands at risk from development by overlaying zoning or future land use data and developable slope percent. Quantify and locate areas at risk that, if developed, would impact overall citywide canopy cover goals as the economy improves and development follows.

2024 Update. Modified and Integrated. *The staff has not assessed at-risk forests in the city using zoning codes and future zoning. However, staff uses multiple maps when reviewing development projects such as the enduring green network, heat island map, flood plan, Hill Side Hilltop Overlay District, and other available mapping tools. We use these tools to recommend conservation in the form of tree preservation easements and tree preservation on each project. We identify high-priority areas during our reviews of each project.*

15. Promote cost-effective professional development in urban forestry. eLearn Urban Forestry is a state-of-the-art online, distance-learning program geared toward beginning urban foresters and those allied professionals working in and around urban and urbanizing landscapes, including service foresters, natural resource planners, landscape architects, City officials and public works employees. eLearn Urban Forestry provides free access to learning modules with a link to the Continuing Forestry Education (CFE) group, where you can get ISA or SAF credit for a small maintenance fee. Visit elearn.sref.info/ for more details.

2024 Update. Integrated and Complete. *Urban Forestry staff codified ISA and other entities as a requirement for internal and external foresters. The city supports employees who want to become certified arborists and allows travel for continuing education. Staff continue to meet standard continuing education requirements to maintain credentials.*

16. Provide an environment for natural forest regeneration. This study shows that grass, herbaceous, and shrub/briar land cover types naturally regenerate into forests, contributing to the City's overall tree canopy and ecosystem services.

2024 Update. Integrated and On Going. *Urban Forestry worked on two forest regeneration projects just last year. The staff has been converting City-owned hay fields into forests and savannas.*

CURRENT CONDITIONS

When the term infrastructure is used, oftentimes roads, bridges, power lines, and storm drains are most recognized. In addition to these staples of city infrastructure, trees lining streets and shading parks and backyards are to be included. These trees, collectively known as the urban forest, provide essential benefits that help Fayetteville function. Services generated by trees in Fayetteville provide immense value to the City. Like other city infrastructure, urban trees require management and maintenance to succeed.

The urban forest is comprised of trees across all city landscapes including streetscapes, parks and open space, trail and waterway corridors, commercial and residential properties, among others. While the Plan primarily addresses public trees, all trees across ownership types and the care of these trees contribute to overall urban forest health, sustainability, and associated benefits.

To present an analysis of the current conditions of Fayetteville's urban forest, tree populations in these landscapes are characterized by the type of setting and land ownership type (public or private) and the responsibility for maintenance (City, property owner, or other). In the following section, analyses are first summarized for the public street tree population, and private trees are then incorporated into the summary by describing the citywide urban tree canopy cover.

Public trees are comprised of trees along streetscapes, in medians, alleys, parks, open space, and natural areas on City-owned land. The City is primarily responsible for the maintenance of these trees and the Urban Forestry Management Plan focuses on the public street trees. View the illustration below for a summary of the tree types in Fayetteville.

RESULTS OF THE 2022 PUBLIC TREE SAMPLE INVENTORY

Fayetteville's urban forest is a diverse ecosystem consisting of young and mature trees of varying species, function, and associated benefits. As part of the planning process, a sample inventory was conducted for public trees and private trees (utilizing public rights-of-way for visual assessments). A total of 2,712 public trees were inventoried and research and analysis were applied to estimate the total public tree population. For more detailed information, refer to the Tree Inventory Summary Supplement.

Figure 5. Illustration of the types of trees in Fayetteville.

Based on the sample and assumptions, it is estimated that Fayetteville has 25,000 tree that are in maintained areas of public parks and street rights-of-way.

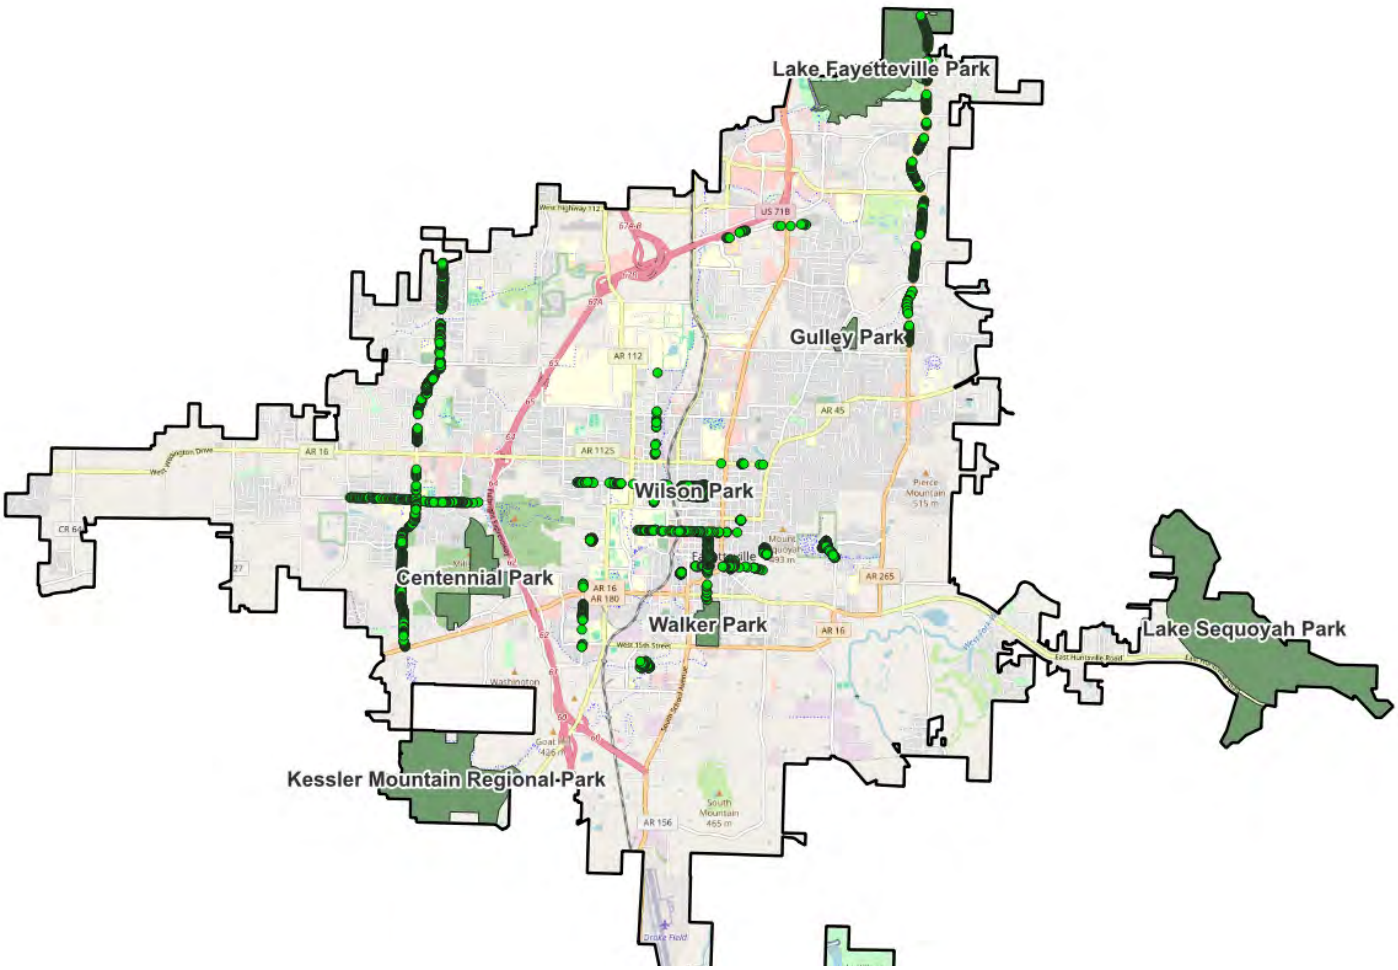

Figure 6. Overview of the sample inventory of public trees completed in 2022.

For more detailed information, refer to the Supplement Tree Inventory Summary.

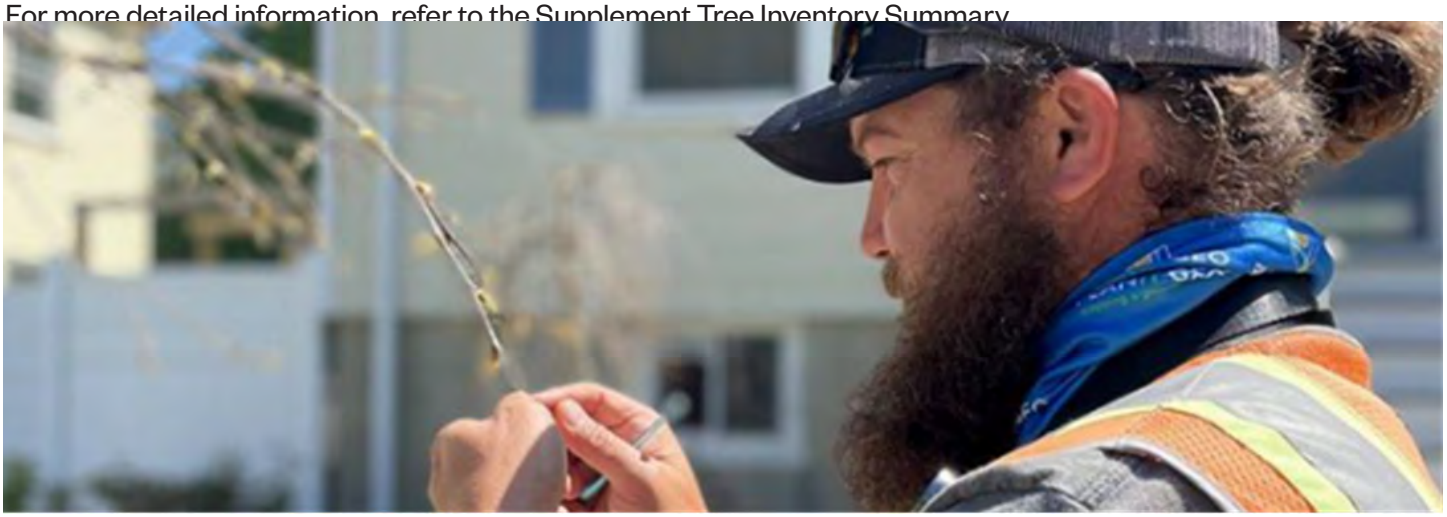

Photo showing a Certified Arborist examining the tree buds to accurately identify the species.

TREE INVENTORY OVERVIEW

In October 2022, a sample inventory of public and private trees in Fayetteville was conducted by Certified Arborists accredited by the International Society of Arboriculture.

The scope of the public and private tree sample inventory was prepared as part of the City's Urban Forestry Management Plan. The tree inventory was intended to gather data that informs the current extent, structure, characteristics, and maintenance needs of the urban forest that can be addressed in the Plan.

Note, the sample public and private tree inventory analysis was conducted in October 2022. Due to ongoing tree maintenance and the dynamic characteristics of trees, changes such as condition, tree size, and maintenance needs may have changed since the analysis. Additional summaries and analyses of the sample public and private tree inventories from 2022 are provided in the Tree Inventory Supplement.

SUMMARY OF THE PUBLIC STREET TREE POPULATION

7%
Princeton elms (*Ulmus americana* 'Princeton')

6%
Post oaks (*Quercus stellata*)

6%
Willow oaks (*Quercus phellos*)

111 unique public tree species

75% of public trees in good condition

55% of public trees are 0 to 6 inches in diameter

Figure 7. Overview of the species results of the 2022 sample inventory of public trees.

INTERPRETATION OF PUBLIC TREE INVENTORY ANALYSES AND CITYWIDE ESTIMATES

To grow a healthy and diverse urban forest, the public tree population must be well understood and managed. The data from the 2022 sample tree inventory were examined and assessed to determine the species, size, health, structural integrity, quality of the growing space, and maintenance needs, among other key characteristics for management that is representative of the citywide public tree population. For more detailed information, refer to the Tree Inventory Summary Supplement.

SPECIES DIVERSITY

Species composition data are essential since the types of trees present throughout the City dictate the amount and type of benefits produced, tree maintenance activities required, budget considerations, and influences species selection for future plantings.

It is estimated the current public tree population consists of 111 different species and 54 unique tree genera— relatively average in terms of species diversity in the region based on benchmarking research. Princeton elms comprise the highest percentage of trees with 7% of the total tree population, followed by post oaks at 6% and willow oaks with 6%. The top ten most common species make up 44% of the total public tree population— slightly lower than average compared to benchmarking research— which is a potential indicator of a healthy level of tree species diversity. If the most common tree species comprise less than half of the population, it may be a sign that the tree population is relatively diverse due to the number of unique tree species and their frequency of occurrence. The remaining 56% of public trees are made up of other species that are primarily pin oaks, blackgums, red maple, northern red oak, baldcypress, and hackberry.

Size and Relative Age Distribution

The distribution of public tree ages and size classes influences the structure of the citywide urban forest and impacts present and future management costs. An unevenly aged urban forest offers continued flow of ecological benefits and a more uniform workflow allowing managers to more accurately allocate annual maintenance schedules and budgets.

To optimize the value and benefits of Fayetteville's trees, the public tree population should have a high percentage of large canopy trees which provide greater ecosystem benefits. On the other hand, there must be a suitable number of younger, smaller trees in the urban forest to account for and eventually replace large and mature trees in decline. Having a healthy percentage of young trees in the urban forest will ensure a sustainable tree population.

To compare Fayetteville's urban forest structure to industry-recommended standards, the "ideal distribution" is used (Richards, 1983 and 1993). The diameter at breast height ("DBH" measured at 4.5-feet above grade) is used to measure relative age.

Overall, based on the sample inventory and estimated public tree population, the size distribution of Fayetteville's public tree population is similar to the ideal age distribution. Generally, an ideal distribution has a larger proportion of small diameter trees compared to larger diameter trees. Specifically, an ideal distribution for public trees consists of:

Ideal Distribution of Public Tree Size Classes versus Fayetteville's Distribution

	Ideal Distribution	Fayetteville Distribution
Tree in the 0-6 in class/ Young trees	40%	55%
Trees that are 6-12 class	25%	19%
Trees that are 12-18 class	15%	14%
Trees that are 18-24 class	10%	6%
Trees that are 24-30 class	6%	4%
Trees that are over 30" DBH	4%	2%

Table 2. Comparing public tree size classes

It is estimated that 55% of Fayetteville's public trees are in the 0-6-inch class compared to the recommended 40%. In contrast, the City also has less 6-12-inch trees (19%) compared to the ideal distribution of 25%.

The remaining size classes are within 4% of the ideal percentage.

The size and relative age distribution of Fayetteville's public trees indicates the population is relatively young given the City has more small-diameter trees and fewer trees than the ideal percentage for each of the larger size classes. This distribution may be an indication of an increase recently in planting efforts. The City should expect a growing demand for maintenance as the large number of young / small trees mature.

CONDITION

Tree characteristics and environmental factors affect the management needs for urban trees. An analysis of the condition can provide an indicator of how well the trees are managed and how they are performing given site-specific conditions. Understanding current and changing conditions plays an important role in planning, budgeting, and resource allocation. Tree maintenance needs are assigned for public safety reasons and by tracking these needs, managers are able to better plan and manage Fayetteville's public trees and the citywide urban forest.

The sample inventory of public trees was analyzed and extrapolated to identify potential trends in tree condition and the management recommendations to improve condition or minimize the deterioration of tree condition. Each inventoried tree's health was evaluated by ISA Certified Arborists based on the condition of the wood and the foliage as well as the structure.

Based on the analysis, it is estimated that three out of four public trees (75%) are in good condition and 15% are in fair condition with only 5% of trees in poor or dead condition. The dead trees or trees noted for removal should be addressed and planned for immediately. Trees classified as "Fair" or "Poor" should be examined to determine the necessary mitigation or plant health care, if any, to improve their condition.

OBSERVATIONS AND DEFECTS

Tree observations (or defects) were recorded during the 2022 sample inventory to further describe a tree's health, structure, or location when more detail was needed. A total of 20 observation categories were available for the arborists to note during the inventory. The public trees were noted to have 11 of the 20 categories. For more detailed information, refer to the Tree Inventory Summary Supplement.

A total of 1,283 observations were recorded during the tree inventory. Crown dieback was the most frequent observation recorded. It is estimated that 30% of the citywide public tree population has some level of crown dieback and 6% have cavity decay present. Mechanical damage due to lawnmowers, weed trimmers, construction, or other may comprise 5% of the public tree population followed by poor structure with 4%.

Of the recordings, 17% of the observations or defects may be preventable or mendable meaning the defects or concerns observed are primarily human-caused. For example, poor structure can be prevented or limited with proper young tree pruning, implementing best practices and standards would prevent or reduce the number of improperly pruned trees, and poor root systems can be prevented by choosing quality tree nursery stock, proper planting, and amending soils. Trees with poor location and/or hardscape damage observations could have been prevented by choosing the appropriate species for the site and ensuring adequate root space. Lastly, adequate mulch rings, growing space, grates, and awareness would reduce the count of mechanical damage observations. The data also shows the impacts of deferred maintenance. Also, about 35% of the observations recorded could be addressed or prevented with proactive pruning and/or plant health care.

MAINTENANCE NEEDS

It is estimated that 8% of the public tree population requires clearance pruning while only 6% require removal, 3% need pruning for clearance around utilities, and 1% require routine pruning or crown cleaning. The low percentage of maintenance needs may be an indicator of the City's current practices of conducting routine proactive pruning of public trees across the City. Newly planted trees should be structurally pruned (training pruned) within five years of planting though it was not an observable need in the recorded sample inventory.

Young tree training pruning is performed to improve tree form or structure; the recommended length of young tree pruning cycles is three years since young trees tend to grow at faster rates (on average) than more mature trees. The young tree cycle differs from a routine pruning cycle in that these trees generally can be pruned from the ground with a pole pruner or pruning shear.

The objective is to increase structural integrity by pruning for one dominant leader in most cases for most tree species. Young tree training pruning is species-specific, since many trees may naturally have more than one leader. For such trees, young tree training pruning is performed to develop a strong structural architecture of branches so that future growth will lead to a healthy, structurally sound tree. In addition to training pruning, young trees may also require additional maintenance such as added or amended mulch, watering, added or removed stakes and ties, and/or clearance of debris and litter. These needs can potentially be addressed during young tree training pruning.

Trees included in the young tree training pruning cycle are generally less than six inches DBH. These younger trees sometimes have branch structures that can lead to potential problems as the tree ages. Potential structural problems include codominant leaders, multiple limbs attaching at the same point on the trunk, crossing/interfering limbs, or dead/diseased/damaged limbs. If these problems are not corrected, they may worsen as the tree grows, increasing risk and creating potential liability.

INTERPRETATION OF PRIVATE TREE ANALYSES AND ESTIMATES

Though less data was collected for private trees during the 2022 sample inventory, this data is valuable in providing information about the citywide urban forest. A total of 850 private trees were inventoried from the public rights-of-way. Based on industry research and benchmarking of comparable cities, it is estimated that there are 80,000 trees in maintained areas of private property.

Using the sample inventory and an analysis that extrapolated the data, it is estimated that most tree species are oaks or Quercus with 19%, maples or Acer with 12%, and pines or Pinus with 9%. The top ten most common tree genera comprise 78% of the private tree population whereas, the top ten most common tree species comprise 57% of the population. The most common tree species include pin oaks (9%), loblolly pine (8%), red maple (8%), arborvitae, London planetree, hackberry, eastern redbud, eastern red cedar, Princeton elms, and black cherry. Most private trees are in the 0-6-inch class with 39%, followed by the 12-18-inch class (23%) and trees in the 6-12-inch class with 20%. Only 2% of private trees are greater than 30 inches.

Similar to public trees, it is estimated the private tree population is primarily in good condition (70%) with only 4% in poor condition and 2% consist of dead trees.

Based on the Certified Arborists observations of private trees from the public rights-of-way, it appears that the most common maintenance needs are pruning for clearance (9%), removing hardware from trees (6%), and utility pruning (2%).

Summary of Tree Inventory Analysis

Understanding the extent, structure, condition, characteristics, and maintenance needs of public trees enables Fayetteville's Urban Forestry Program and Transportation Department's right-of-way crews to effectively budget, plan, and address maintenance and planting needs in a sustainable, safe, and equitable manner. A comprehensive citywide public tree inventory is recommended in the Plan, and it is essential that the City maintain the data and routinely update the inventory.

For private trees, understanding the extent, health, composition, and other factors provides the Urban Forestry Program with a better picture of the entire urban forest. Challenges such as pests and diseases, invasive plant species, climate resiliency, among other threats to the urban forest can be addressed for private trees by providing resources, education, training, and other support to property owners to support growing a sustainable and resilient urban forest.

As stated at the beginning of this section, additional summaries and analyses of the sample public and private tree inventories from 2022 are provided in Tree Inventory Summary supplement.

CURRENT CONDITIONS OF THE CITYWIDE URBAN FOREST : TREE CANOPY COVER OVERVIEW
